Apartment House—3 story and base, brick and frame, $15,000. San Francisco. Architects, H. Geilfuss & Son, 16 Kearny St., S. F. Owners name withheld. The building will contain about 18 apartments which will be arranged in suites of three and four rooms each, the four-room suites predominating. There will be wall beds, connecting baths, steam heat and a vacuum cleaning system. The interior of the building will be finished in pine and redwood with oak floors. Tile and composition will be used in the bath rooms. The exterior will be covered with veneer pressed brick and cement plaster on metal lath. Plans are being prepared.

Apartment House—3 story and base, frame, $12,000. San Francisco. Architects, H. Geilfuss & Son, 16 Kearny St., S. F. Owner's name withheld. The plans have provided for six apartments of four rooms and bath each. All apartments will be equipped with wall beds and hot and cold running water. There will be open fire places and tile mantels. The exterior of the building will be covered with pressed brick veneer and cement plaster on metal lath. Plans are nearly complete.

Flats—3 story and base frame, $50,000. San Francisco. Architect, none. Owners, Ruegg Bros., 636 Pacific Bldg., S. F. The building will cover a lot 25x61 feet, and has been designed to contain four flats of five rooms each. The interiors will be finished entirely in pine. There will be large bath rooms and open fire places. The exterior will be covered with shiplap. Plans are complete and the work will be done by Day Labor.

Flats—3 story and base, frame, $[illegible]. San Francisco. Architect, none. Owner, Forest Wayman, [illegible] S., S. F. The building will be erected on

Hayes street and will contain three large flats of six and seven rooms each with baths. The interiors will be finished in pine and redwood with some Lar'Wood floors. Tile will be used in the bath rooms. There will be gas grates and tile mantels. The exterior will be covered with shingles. Plans are being prepared by the owner.

Flats—2 story and base, frame, $10,000. San Francisco Architects, H. Geilfuss & Son, 46 Kearny St., S. F. Owner's name withheld. The building will be erected in one of the best districts in the city and will contain two large residential flats. Each flat will contain seven rooms, bath and laundry. The interiors will be finished in pine, redwoods and hardwoods. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile. Bath rooms will have composition floors. The exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are now being prepared.

Flats—3 story and base, frame, $7,000. San Francisco. Architect, William Mooser, Nevada Bank Bldg., S. F. Owner's name withheld. The building will be erected at Powell and Johns streets and will contain three flats of four and five rooms each. There will be modern plumbing, gas grates and pine trim. The exterior of the building will be covered with shiplap. Plans are complete and figures are now being taken.

Garage—2 story and base, reinforced concrete, $30,000. San Francisco. Architect, none. Owner, Matera Land and Investment Co. The building will be erected at the corner of Pine and Van Ness. The first floor has been arranged for sales rooms, office and service room. The upper floor will contain a large repair shop. The interior of the offices and sales room will be finished in marble, mahogany and oak. The exterior of the building will be faced with cement plaster. Plans are complete and the work will be done under the supervision of the Northern Construction Co., Mills Bldg. This firm is now taking subbidmtes on all parts of the work.

Residence—2 story and base, frame, $5,000. San Francisco Architect, none. Owner, Mrs. Rudolph Moor. Crocker Bldg., S. F. The dwelling will contain seven rooms and bath. The interior will be finished in pine, redwood and Jenesero. Floors of all rooms will be of oak except in the bath, which will be of tile with tile wainscotting. There will be open fire places with tile mantels. A gas water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Bungalow—1½ story and base, frame, $2,500. San Francisco. Architects, Smith and Stewart, 241 Kearny St., S. F. Owner, Dr. Girley. The dwelling will contain six rooms and bath. The interior trim will be of pine and redwood with oak floors in the living and dining rooms. Tile will be used in the bath room. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with shingles. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $3,500. San Francisco. Architect, A. J. Mazzuretti, 1522 Broadway, Oakland. Owner, John M. Lundholm. The house has been designed for a seven-room dwelling with bath. The interior will be finished in pine and redwood. Oak will be used in the floors of several of the rooms and composition flooring in the bath room. There will be coal grates and brick or tile mantels. The exterior of the house will be covered with rustic. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $6,000. San Francisco. Architect, Herman Barth, 12 Geary St., S. F. Owner, Mrs. P. S. Beel. The dwelling will contain about seven rooms and baths. The interior will be finished in pine, redwood and oak. Oak will be used in the floors of the principal rooms. The bath room will have composition floor and tile wainscotting. There will be furnace heat and open fire places. The mantels will be of brick or tile. The exterior will be covered with shiplap. Plans are complete and figures are being taken.

Fire House—2 story and base, brick and steel. Cost not stated. San Francisco Architectural Dept. Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for the North Beach Station, which is to be erected on Greenway street have been approved and are now in the hands of the Board of Public Works. Bids will be opened for the construction on September 11th. The exterior of the building will be faced with pressed brick. Plans can be secured from the Architectural Dept. For official proposal see under Sealed Proposals in this issue.

Flats—3 story and base, frame, $2,500. San Francisco. Architect, none. owner Jens P. Sperisen, 1834 15th St., S. F. The building will contain two flats of four and five rooms each with bath. The interior trim will be entirely of redwood and pine. There will be modern plumbing and 30-gallon boilers. The exterior will be covered with rustic and shiplap. Plans are complete and the work will be done by Day Labor.

Hospital Work—Electrical installation. Cost not stated. San Francisco. Architect, Architectural Dept., Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be opened on September 11th for the installation of the submitted electric work at the San Francisco City Hospital, and for some extra work not provided for in the original plans and specifications. Plans can be secured from the architectural Department.

Hotel—, story and base, brick and steel, $100,000. San Francisco. Architect, R. L. Holt, 727 Alcatraz Ave., Berkeley. Owners, Somers Estate, Mills Bldg., S. F. The building is projected for the northeast corner of Taylor and O'Farrell streets. The entire project depends upon the signing of a lease and no information of the construction can be obtained until this is done. If the owners and the tenant fail to agree on terms of the lease Mr. Somers states the building will not be erected.

Store—1 story base and mezzanine brick and concrete, $10,000. San Francisco. Architect, John Ettler, 604 Mission St., S. F. Owners, Bothin Estate. The building is to be erected at the corner of Polk and Green streets and has been designed with foundation and walls of sufficient strength to carry several additional stories. The intention of the owners is to construct a modern apartment house on this site. For the present, however, only the one building will be erected. The exterior will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

Bank—1 story and base, steel and brick, $55,000. San Francisco. Architect, Herbert A. Schmidt, Royal Ins. Bldg., S. F. Owners, German Savings and Loan Society. Contractors, Mahony Bros., Crocker Bldg. Contract price, $51,876.

OAKLAND AND ALAMEDA COUNTY.

Apartment House—2 story and base, frame, $20,000. Oakland, Cal. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owners name withheld. The building has been designed to contain 13 apartments of three and four rooms each. All suites will be equipped with wall beds. There will be connecting baths, steam heat and a vacuum cleaning system. The interior will be finished in pine with hardwood floors. The exterior of the building will be covered with veneered pressed brick and cement plaster. Plans are complete and figures are being taken.

Flats—2 story and base, frame, $6,000. Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, P. Lawrence. The building has been designed to contain two flats of 5 rooms and bath each. The interior will be finished in pine and redwood with oak floors. There will be furnace heat and open fire places. The sum of $900 has been allowed for mantels. The exterior of the building will be covered with plaster. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $2,500. Oakland, Cal. Architect, none. Owner, K. M. Sheridan, 5140 Boulevard, Oakland. The dwelling has been designed for a six-room house with bath and sleeping porch. The interior trim will be of pine throughout. Oak will be used in the floors of the living and dining rooms. There will be open fire places and tile mantels. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

Residence—2 story and base, frame, $2,900. Berkeley, Alameda Co., Cal. Architect, Otis S. Grove, 2911 Telegraph Ave., Berkeley. Owners, Junk-Riddle Investment Co. The dwelling has been designed for a small house but will be handsomely finished. The interior trim will be largely of pine and hardwoods will be used throughout. There will be furnace heat and open fire places. Mantels will be of brick. Tile and composition flooring will be used in the bath rooms. The exterior of the house will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

Bungalow — 1½ story and base, frame, $2,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, Samuel Logasa, Hanford Bldg., S. F. The bungalow will contain five rooms and bath. The interior finish will be of pine and redwood with oak floors in the principal rooms. There will be a large open fire place in the living room with an attractive brick mantel. The exterior of the house will be covered with shingles or cement plaster. Plans are being prepared and when complete the work will be done by Day Labor.

Residence Alterations—2 story and base, frame, $1,000. Oakland, Cal. Architect, William C. Hays, Foxcroft Bldg., S. F. Owner, A. H. Markwart. This work will include new interior finish, plumbing and electric work. Also extensive exterior alterations, which will be of cement plaster on metal lath. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $6,000. Piedmont, Alameda Co., Cal. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, W. W. Saint. The dwelling has been designed for a nine-room house with bath, sleeping porch and laundry. The interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile. The bath room floor will be composition. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the architect is taking figures on the work.

Residence—2 story and base, frame, $3,500. Berkeley, Alameda Co., Cal. Architect, Ernest Coxhead, Hearst Bldg., S. F. Owner, Mrs. A. W. Kidder. The dwelling has been designed for a seven-room house with bath, sleeping porch and laundry. The interior will be finished in pine and redwood with some oak panels. The floors will be of oak throughout except in the bath where composition will be used. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $11,000. Berkeley, Alameda Co., Cal. Architect, Hiram K. Lovell, 1617 Felton St., Berkeley. Owner, Dr. L. H. Ginno. This dwelling will contain 11 rooms, baths, sleeping porch and laundry. The interior trim will be of pine and redwood. Oak floors will be used in all the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Elm panels will be used in the living and dining rooms. Composition flooring is specified in the bath rooms. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $4,000. Piedmont, Alameda Co., Cal. Architect, none Owner, Lester B. Rielff, 1098 Grand Ave., Oakland. The house will contain seven rooms, bath and sleeping porch. The interior will be finished in pine, redwood and elm. Oak will be used in the floors. There will be a hot water heating system and open fire places. The mantels will be of tile. Cement plaster on metal lath will cover the exterior of the building. Plans are in the hands of the owner and the work will be done by Day Labor.

Residence—2 story and base, frame, $4,000. Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, Mr. Kerns. -The dwelling will contain seven rooms, bath, sleeping porch and laundry. The interior will be finished in pine and redwood with oak floors throughout. There will be furnace heat and open fire places. The mantels will be of tile. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken by the architect.

Residence—2 story and base, frame, $3,500. Oakland, Cal. Architect, none. Owner, A. J. Yerrick, 860 36th St., Oakland. The dwelling will contain seven rooms bath and sleeping porch. There will be pine and redwood interior finish, oak and composition floors and tile wainscotting in the bath room. The dwelling will be heated by a warm air furnace. The exterior will be covered with shingles. Plans are complete and the work will be done by Day Labor.

Stores and Offices—12 story and base. Class A construction. Cost not stated. Oakland, Cal. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Surety Mortgage and Building Co. This Building will be erected at the gore of 17th and Telegraph Aves., and will practically adjoin the 15 story building plans for which are now on the boards in Architect Benj. G. McDougall's offices. The owners have just approved the preliminary studies and details of the construction cannot be given in these columns yet.

Residence—2 story and base, frame, $4,000. Oakland, Cal. Architects, Haar & Davis, 1520 Broadway, Oakland. Owner, C. C. McCapwell. The dwelling has been designed for a seven-room house with all modern conveniences. The interior finish will be of pine and redwood. Oak will be used in the floors of the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile wainscoting and composition floors will be used in the bath room. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Residences—1½, 1½ and 2 story and base, frame, $4,500, $5,000 and $6,000 each. Oakland, Cal. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, Mark Anthony. These dwellings will mark the opening of a new tract. All will be finished in pine and redwood with some hardwood in the dining and living rooms. The arrangement will vary from six to nine rooms. There will be furnace heat in the more expensive houses and tile bath rooms. All will have open fire places with either brick or tile mantels. The exteriors will be of cement plaster, shingles and rustic. When plans are complete the work will be done by Day Labor.

Church—Steel and brick construction, $150,000. Oakland, Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, First Methodist Church of Oakland. Reports from reliable sources state that the total of the subfigures received by Schneby-Hostrawser & Pedgrift for the construction of the First Methodist Church in Oakland are some $30,000 above the estimate. Chairman Morton of the Building Committee has notified Architect Norman F. Marsh and he will prepare complete new plans or make extensive reductions. In either case the construction will still be handled by Schneby-Hostrawser & Pedgrift on a percentage basis.

Warehouse—6 story and base, reinforced concrete, $60,000. Oakland, Cal. Architect not selected. Owners, Bekins Van and Storage Co. This firm has recently purchased a lot on Grove on which they intend to improve

with a fire proof building. The structure will be 140x150 feet and designed for large storage space and smaller concrete storage apartments. Full particulars of this work will be given as soon as an architect is selected.

Flats—2 story and base, frame, $8,000. Oakland, Cal. Architect, A. Merrill Bowser, 1007 Broadway, Oakland. Owner's name withheld. The building will be arranged for four and five room flats. The interiors will be finished in pine and redwood with some hardwood floors. There will be open fire places and tile mantels. Composition flooring will be used in the bath rooms. The exterior of the house will be covered with metal lath and cement plaster. Plans are complete and bids are being taken by the architect.

Hotel—4 story and base. Class A construction. Cost not stated. Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, R. W. Kinney. The building will be erected at the corner of 10th and Washington streets. There will be in the neighborhood of 150 rooms a large percentage of which will have connecting baths. There will be steam heat, elevator service and hot and cold running water in all rooms. The exterior will be faced with pressed brick. Plans are complete and figures are now being taken.

Residence—2 story and base, frame, $3,000. San Leandro, Alameda Co., Cal. Architects, Haar & Davis, 1520 Broadway, Oakland. Owner, Mrs. A. Edwards. The dwelling will contain 7 rooms, bath and sleeping porch. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be a warm air furnace and open fire places. The mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and out for figures.

Residence—2 story and base, frame, $5,000. Elmhurst, Alameda Co., Cal. Architect, C. D. McNally, Mechanics' Institute Bldg., S. F. Owner, Mrs. Rider. The dwelling will contain seven rooms and bath. The interior will be finished in pine and hardwood. Oak will be used in the floors of the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the house will be covered with shiplap. Plans are complete and figures will be called for shortly.

Residence—2 story and base, frame, $4,000. Oakland, Cal. Architects, Richardson Bros., 470 13th St., Oakland. Owner, R. A. McWilliams. This house has been designed for an eight-room dwelling with bath and sleeping porch. There will be pine, redwood and hardwood interior finish. The dwelling will be heated by a warm air furnace. There will be open fire places and tile or brick mantels. Floors in the bath rooms will be of composition. The exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $4,000. Oakland, Cal. Architect, A. Merrill Bowser, 1007 Broadway, Oakland. Owners, W. J. Mortimer Co. The dwelling will contain seven rooms and bath. The interior will be finished in pine and redwood with oak floors in the principal rooms. The bath room will have composition floor. There will be furnace heat and open fire places. The mantels will be of brick or tile. The exterior of the house will be covered with shingles. Plans are being prepared.

Residence—2 story and base, frame, $12,000. Piedmont, Alameda Co., Cal. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, Mr. Higgins. The dwelling will contain in the neighborhood of 12 rooms, 2 baths, sleeping porches and a laundry. The interior trim will be of pine and redwood. Oak floors will be used throughout the first floor. Bath rooms will have composition floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the baths and kitchen. The exterior of the house will be covered with brick veneer and rustic. Plans are complete and figures are being taken.

School—2 story and base, concrete and frame Cost not stated. Oakland, Cal. Architect, J. J. Donovan, Security Bldg., Oakland. Owners, City of Oakland. Plans and specifications for this building are complete and bids for the construction will be opened on September 16th. The work called for is in the nature of extensive alterations and repairs to the Fremont School, and has been estimated to cost $80,000. For official proposal see under Sealed Proposals in this issue. This work is the first of a large number of Oakland schools which is to be figured, and others will be advertised for very shortly. All work will be done under the direction of Supervising Architect J. J. Donovan.

Hayward School Bids Opened.

C. Christensen Presents Low Figure On Complete Construction of Reinforced Concrete Building.

The following bids were opened on Friday by the School Trustees of the Hayward Union High School District for the construction of the new two-story and basement reinforced concrete school building. Plans for this work were prepared by Architect Henry C. Smith, Humboldt Bank Bldg. The contract has been awarded to C. Christensen on his bid, which is approximately $65,000. The following is a complete list of all figures received:

General Construction.

Thurston & Co.	$72,969
Lange & Bergstrom	75,894
Van Sant-Houghton	73,400
C. Christensen	65,000
McLeran & Peterson	71,500

Note:—Bid of the Northern Construction Company for $75,000 received too late for consideration.

Heating and Ventilating.

Murray & Co.	$5,600
Walter Morgan	5,800

Residence—2 story and base, frame, $5,000. Madera, Madera Co., Cal. Architects, A. C. Swartz & Son, Fresno. Owner, John High. The dwelling has been designed for an eight-room house with bath and sleeping porch. The interior will be finished in pine and redwood. There will be open fire places and tile or brick mantels. Tile will also be used in the bath and kitchen. The exterior of the building will be covered with cement plaster on metal

Wesco
Cold Water Paint

The most economical paint on the market. When you buy it you pay only for **paint** and not for high priced oils. Can be used on exterior and interior surfaces. Does not turn yellow with age. **Wears well,** looks well.

Wesco Concrete Paint

The **best** paint to use on damp places. It sticks where others fall off. Is sanitary and does not decompose or decay. Fine for factories and buildings where there is loose steam and damp vapors.

Both Paints Come In All Colors. Send For Samples.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Apartment House—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Edelman & Barnett, Blanchard Bldg., L. A. Owner, Herman Cohn. The building will cover an area of 50x150 and will contain 92 rooms which will be divided into two room suites and 46 baths. There will be steam heat, wall beds, a vacuum cleaning system and an automatic passenger elevator. The exterior will be faced with enameled brick trimmed with artificial stone. Plans are complete and figures are being taken.

Apartment House and Stores—4 story and base, brick. $65,000. Los Angeles, Cal. Architect, John Rebman, Citizens' Bank Bldg., L. A. Owner, R. D. Minnig. The building will have a street frontage of 85 feet and a depth of 27 feet. The ground floor has been arranged for five retail stores. The three upper floors will be divided into 140 rooms, which will be arranged for small apartments. There will be steam heat, wall beds and elevator service. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, John T. Zeller, Currier Bldg., L. A. Owner, N. J. Sanders. The building will cover an area of 50x90 feet. The interior of the building will be subdivided into 52 rooms which will be arranged in two and three room suites. There will be connecting baths with composition floors. There will be steam heat, elevator service and wall beds. The exterior will be faced with pressed brick. Plans are now being prepared.

Apartment House—9 story and base, reinforced concrete. Cost not stated. Long Beach, Los Angeles Co., Cal. Architect, Paul C. Pape, Union League Bldg., L. A. Owner, E. Tisnerat. The building will contain 60 apartments of two rooms each with kitchen and private bath. The ground floor will con-

tain store room, billiard room, lobby, amusement rooms, sun parlor, dressing rooms and shower baths for bathers. The construction will be entirely of reinforced concrete, with cement plastered exterior exterior finish. There will be composition roofing, hollow tile interior partitions, birch trim throughout, tile bath room floors, oscillating wall beds, steam heat, vacuum cleaning system and two electric passenger elevators. Plans are complete and figures are being taken.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, E. J. Borgmeyer, Stimson Bldg., L. A. Owner, H. S. Baer. The building will be 75x165 feet and will contain 104 guest rooms, which will be arranged in two and three room suites. There will be wall beds, elevator service, steam heat and a vacuum cleaning system. The exterior will be faced with pressed brick. Plans are complete and the work is being figured both as a whole and segregated.

Hotel—6 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, Fred R. Dorn, Douglas Bldg., L. A. Owner, William I. Kock. The building will contain 150 guest rooms and 75 baths besides the main lobby and office. The interior will be finished in birch with considerable marble, tile and scagliola used. There will be hollow tile partitions, and metal window sash and frames. The mechanical equipment will include steam heat, elevator service and a vacuum cleaning plant. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

Hotel—3 story and base, brick, $40,000. Los Angeles, Cal. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owners, Bryan and Bradford. The building will cover an area of 75x119 feet. There will be stores on the first floor and 60 rooms with 20 baths on the upper floors. There will be steam heat. Running hot and cold water has been provided for all rooms. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Hotel—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. E. Fetherstonhaugh, Ferguson Bldg., L. A. Owner, Joseph H. Call. The building has been designed for 56 rooms besides the office and lobby. There will be steam heat and running hot and cold water in all rooms. The interior will be finished in pine. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Hotel—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Garrett & Bixby, Currier Bldg., L. A. Owner, L. L. Bowen. The building will cover a ground area of 55x100 feet. The upper floors have been subdivided into 62 rooms and 18 baths. Five stores will occupy the ground floor. There will be steam heat. Running water will be supplied to all rooms. The exterior of the building will be faced with pressed brick. Plans are complete and the work will probably be done by Day Labor.

Apartment House—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Arthur S. Heineman, San Fernando Bldg., L. A. Owner, Nora E. Waldron. The building will be 60x140 feet and will contain 100 rooms, which are arranged in suites of two and three rooms each. There will be wall beds and private baths. The mechanical equipment of the building includes steam heat, both freight and passenger elevators and a vacuum cleaning plant. The exterior will be faced with cement plaster. Plans are complete and figures are being taken.

Garage—1 story and base, frame. Cost not stated. Los Angeles, Cal. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, Llewellyn A. Parker. The building will cover an area of 50x65 feet and has been designed for a commercial garage. There will be a cement floor over the entire area. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

Hospital—Group of semi-fireproof buildings, $200,000. Santa Barbara, Santa Barbara Co., Cal. Architects, George F. Costerisan, associated with J. F. Kavanaugh, California Bldg., L. A. Owners, Santa Barbara County. The above mentioned architects were the successful competitors for the new Santa Barbara County Hospital buildings, and besides the first prize of $400 cash, received the commission to prepare the plans and specifications for the new group of buildings, which will cost $200,000. It is possible the architects say, that the construction will be changed from semi-fireproof to Class A. If this is done the cost will be increased to $250,000. The main or administration building will be 120x56 feet in size, three stories and basement, and will contain the general administrative quarters, private wards, chapel, dining rooms and kitchen department, helps' quarters, etc. On either side of the main building will be two, three-story ward buildings and two, two-story wings for isolated patients, all connected to the central building by enclosed and open corridors. Each of the larger wings will be 200x28 feet in size and will have best room space for forty-two patients on each floor, besides nurses' rooms, private kitchens, toilet rooms and baths. The power house, garage and morgue will be in separate buildings situated in the rear of the main group. The construction as now specified will be semi-fireproof with exterior walls of brick, floor slabs of reinforced concrete and roof of clay tile and composition. The first story will be covered with face brick, the two upper stories cement plastered. There will be an electric elevator, dumb waiters, tile bath rooms and toilets, steam heating and vacuum cleaning.

School—2 story and base, steel and reinforced concrete: Santa Barbara, Santa Barbara Co., Cal. Architect, State Department of Engineering, Sacramento. Owners, State of California. This work has been figured before, but, as was stated in these columns, all bids were too high and plans have been revised. These plans are now on file at this office or may be secured from the department at Sacramento.

School—3 story and base, brick and steel, $250,000. Los Angeles, Cal. Architect, A. F. Rosenheim, H. W. Heilman Bldg., L. A. Owners, City of Los Angeles. This building is one of the largest of the new schools being built in Los Angeles and will cover a ground area of 225x192 feet with a wing for gymnasium purposes 60x150 feet. A separate building will house the heating system. All floors will be of fireproof material with maple surface. Stairways will be of concrete. Interior partitions are to be of metal lath and plaster and hollow tile. The trim will be of oak. The exterior of the building will be faced with pressed brick. Plans are complete and bids will be opened on September 12th. Bids will be opened on September 5th for the construction of the sixteen-room school building to be erected at Wadsworth and 38th Aves. Plans for this building were prepared by Architect A. H. Dunn, acting as Supervisor of Construction for the Los Angeles Board of Education. Plans for both of these buildings may be secured from William A. Sheldon, Secretary of the Board, Security Bldg., L. A.

Convent School—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Convent of the Good Shepard. This work has been mentioned here before. Plans for the building are now complete and figures are being taken. The new building will contain the administrative offices and accommodations for 150 girls. The interior trim will be of pine and oak. There will be steam heat, a vacuum cleaning system and special kitchen equipment. The exterior will be faced with gold pressed brick trimmed with terra cotta.

School—1 story and base, brick, $20,000. El Modena, Orange Co., Cal. Architect H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, El Modena School District. The building will contain six class rooms, principal's office and teachers' room. There will be pine trim and maple floors. A modern system of heating and ventilation will be installed. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

School—1 story and base, brick. Cost not stated. Glendale, Los Angeles Co., Cal. Architect, A. H. Fairchild, 405 So. Main and St., Glendale. Owners, Glendale School District. The building will have a frontage of 103 feet and will contain four class rooms, auditorium, teachers' rooms and principal's office. There will be a warm air system of heating. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

Hotel—3 story and base, brick, $20,000. Torrance, Los Angeles Co., Cal. Architect, Irving J. Gill, Title Insurance Bldg., L. A. Owners, Dominguez Land Co. Contractor, J. M. Thomas, Douglas Bldg., L. A. Contract price, $20,894.

SEATTLE AND WASHINGTON.

Harbor Development — Buildings, wharfs, etc., $5,000,000. Seattle, Wash. Engineer not selected. Owners, Pacific Holding Corporation.

The following information was secured from a member of the Holding Corporation, which is composed of W. A. Starrett, of Thompson-Starrett Construction Co., of New York; Paul Starrett, Vice-President of the Fuller Construction Co., of New York; R. F. Ayers, formerly of the Bush Terminal

Co., Chas. Fenn, Leary Bldg., Seattle, and Palmer Woodbury, of New York.

It is also reported that the Holding Corporation has selected a Seattle architect who will be placed in charge of the architectural department without delay.

The Corporation agrees to erect the following list of buildings, which is substantially the same as when the proposition was first placed before the public:

Six story warehouse, $180,000, 30 1 story warehouses, 75x100 feet, $90,000, 30 1 story warehouses, 100x100 feet, $120,000; 10 miles of railroad, $100,000, harbor equipment, tugs, lighters, etc., $115,000; rail equipment, engines and flat cars, $170,000; 4 industrial buildings, $1,200,000, bulkheads, $300,000. Two piers 1400 feet long will be built by the company at once at a cost of $1,000,000.

Church—1 story, brick and frame, $35,000. Seattle, Wash. Architect, David J. Myers, Central Bldg., Seattle. Owners, Westminster Church. A recent competition held to secure plans for this work resulted in the selection of Architect Myers. Only the preliminary plans have been worked out and complete details of the building will be published later.

Stores and Lofts—2 or 3 story and base, reinforced concrete. Cost not stated. Aberdeen, Wash. Architect, J. A. Creutzer, Haight Bldg., Seattle. Owner, N. G. Wheeler. The building will contain two stores on the first floor and lofts on the upper floors. A five-story party wall is to be erected as the owners of the adjoining property have commissioned Architect Creutzer to prepare plans for a structure of this height for them. Both sets of plans will be complete at about the same time and figures will be taken for the joint construction of the two buildings.

Stores—1 story and [illegible] brick $20,000. Seattle, Wash. Architect James H. Schack, Downs Bldg., Seattle. Owner, Joseph Leibly. The building will cover an area of 15x[illegible] feet and will contain five stores and [illegible]. There will be steam heat. The exterior will be faced with pressed brick. Plans are complete and figures will be called for at once.

Stores and Offices—[illegible] story and base, Class A construction $[illegible], Seattle, Wash. Architects, Gaggin & Gaggin, University Block, Syracuse, N. Y. Owner Burt Smith. Information has been received by a close associate of Burt Smith, son of the late L. C. Smith, which states that the present Pacific Block at the corner of Yesler Way and Occidental avenue is to be replaced within a short time with a modern 36 story Class A structure. The information further states that plans are well advanced and that actual construction will be undertaken as soon as the L. C. Smith Building at 2nd and Yesler Way is completed.

Contracts Awarded.

Factory—3 story and base, reinforced concrete. Cost not stated. Seattle, Wash. Architect, none. Owners, C. C. Pierce and associates. Contractors, Franklin Engineering Co., Arcade Annex Bldg., Seattle. Contract price not stated. The present work includes the construction of the above mentioned building and a one-story reinforced concrete mixing building. Other work will be undertaken shortly and the ultimate expenditure of the company will reach $300,000.

Stores and Offices—2 story and base, reinforced concrete, $50,000. Wenatchee, Wash. Architect, J. A. Creutzer, Haight Bldg., Seattle. Owners, Gregg Land Co. Contractor, George C. Dietrich, Globe Bldg., Seattle. Contract price, $50,000.

PORTLAND AND OREGON.

Bank and Offices—6 story and base, steel and reinforced concrete, $80,000, Eugene, Ore. Architect, Aaron H. Gould, Portland. Owners, Eugene Loan and Savings Bank. Preliminary plans for this structure show large banking rooms which will occupy the entire first floor with the exception of a spacious lobby and entrance to the elevators. The upper floors will be subdivided into offices which may be occupied singly or en suite. The interior of the banking rooms will be finished in mahogany, marble and ornamental bronze and plaster. There will be large safety deposit and coin vaults. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans will be ready for figures by the first of the year.

Club House—1 story and base, brick. Cost not stated. Portland, Ore. Architects Whitehouse & Fouilhoux Portland. Owners, University Club. The building will be 88x84 feet and will be devoted to the club's use. There will be a large number of bed rooms, lounging rooms, library, etc. The building will be heated by steam. The exterior will be faced with red pressed brick trimmed with terra cotta. The interior will be finished in hardwoods. Plans are complete and bids will be opened on August 29th.

Armory—2 story and base, reinforced concrete. Cost not stated Ashland, Ore. Architect, W. C. Knighton, Salem. Owners, State of Washington. The building will be 89x135 feet, and will provide for a large drill hall, banquet rooms, offices and rifle range. The construction will be of reinforced concrete throughout. The exterior will be faced with cement plaster. There will be a hot water heating system. Plans are complete and can be secured from the State Architect at Salem or from Adj. Gen Finzer of Portland. Bids will be opened on September 7th.

Contracts Awarded.

Bank—3 story and base, reinforced concrete, $30,000. Tillamook, Ore. Architect, Frank K. Nenchley, Portland. Owners, Tillamook State Bank. Contractors, Stanfield-Arnold Co., The Dalles. Contract price not stated.

School—2 story and base, brick, $40,000. Heppner, Ore. Architect, E. E. McClaren, Portland. Owners, Heppner School District. Contractors, Wineland Building and Engineering Co., Portland. Contract price, $40,000.

Department Store—2 story and base, reinforced concrete. Cost not stated. Canby, Ore. Architect, Wayne L. Mills, Portland. Owners, Carlton & Rosenbaum. Contractor, Frank E. Dodge, Canby. Contract price not stated. Note. The building will cover an area of 100x100 feet.

Theatre and Stores—2 story and base, brick, $30,000. Roseburg, Ore. Architect, Earl A. Roberts, Portland. Owners, Provident Trust Co. The building will be 40x110 feet. The theatre will be modern in all its equipment and will contain a stage 26 feet wide. There will be steam heat and a modern system of ventilation. The interior of the theatre will be finished in ornamental plaster. Besides the theatre the building will contain two stores. The exterior will be faced with pressed brick. Plans are being prepared and bids will be called for by September 10th.

GENERAL CONTRACTORS TO SUPPORT MASTER HOUSESMITHS.

Statement of Resolutions Passed By The Building Trades Employers and General Contractors.

The structural steel and ornamental iron men working in shops have demanded a reduction in hours, which the employers through their association known as the Master Housesmiths' Association can not grant and continue to successfully compete in business against the eastern contractors. The unions are demanding that this reduction in hours take effect on August 26th, and the Master Housesmiths' Association having been unable to come to an understanding with their employees, recently referred the controversy to the Building Trades Employer's Association, and the different organizations affiliated with that body have now all agreed to support the Master Housesmiths' Association in their fight.

At a meeting of the General Contractors' Association held recently the following resolution was adopted:

"WHEREAS, the workmen employed by the Master Housesmiths' Association of San Francisco have formulated a demand for a shorter working day; and

"WHEREAS it appears from a statement issued by said Master Housesmiths' Association that the demand can not be granted without making it practically impossible for San Francisco concerns to compete with those in more favored localities outside of this city; and

"WHEREAS the Master Housesmiths' Association has decided to resist this demand, and asks the support of other employers' associations to help them maintain their stand;

"THEREFORE BE IT RESOLVED that the members of the General Contractors' Association pledge their moral and financial support to the Master Housesmiths' Association in assisting them to maintain what we consider to be a fair and reasonable position.

"BE IT FURTHER RESOLVED that any stockholder of this corporation who, in the event of a strike being declared against the Master Housesmiths, attempts to bring in material from outside sources, or who permits or causes the striking workmen to be employed on his work, shall be declared guilty of conduct unbecoming a member of this association, and shall be expelled therefrom and declared to have forfeited his right to remain a stockholder.

"BE IT FURTHER RESOLVED that a copy of this resoultion be furnished to each newspaper and that a copy be sent to the Building Trades Council of San Francisco."

The structural steel erectors in this city are in fierce competition with the east, and are at this time paying 66% higher wages to their men than the

average prices prevailing in the east. It has developed that throughout the east the men are working nine and ten hours a day, but for years past the metal trades' unions of this city have been endeavoring to get the eight-hour day.

MAYOR AGREES TO SEGREGATE WORK.

Municipal Buildings To Be Erected By Contracts Segregated Under General Heads.

A committee from the Contractors' and Dealers Association met with Mayor Ralph Tuesday morning to advocate the letting of segregated contracts on city work. The organization was represented by J. E. Steere, W. S. Scott, John D. McGilvray and John D. McGilvray Jr., Joseph J. Phillips, Alexander Coleman, Harry Larkin, W. S. Hanbridge, Clarence Donovan, Herbert Olney, W. H. Raymond, L. A. Taylor, Gus Johnson and R. Boynton.

It was agreed that the work should be segregated, but not so extensively as in the construction of the hospital and other buildings. Everything connected with one particular line of work will be grouped under one head and one contract let for it. It was said that at this way not more than ten or twelve contracts need be let. The contracts for the San Francisco Hospital have been numbered by the score and the contractors have been so numerous that they have impeded one another.

The contracts can be so timed that work can proceed continuously, and the contractors agreed that by this arrangement there should be no delay of the completion of the new City Hall by 1915. The consulting architects, Frederick H. Meyer and John Reid jr. stated that the detailed plans and specifications would be ready by the end of this year and that then the excavation and foundation work should be started.

NEW INVENTIONS.

Reported especially for this paper by H. B. Willson & Co., Patent Attorneys, 715 Eighth street N. W., Washington, D. C.

SCRINERS TO HAVE A MOVING PICTURE SHOW AND DANCE.

Lilian Temple will give a moving picture show tonight at Scottish Rite Hall at Sutter street and Van Ness avenue. The moving pictures were taken in the Los Angeles Y. M. C. A. and should make a very interesting entertainment. The moving picture part of the entertainment will begin at 8:30 and last one hour. After words the floor will be cleared for dancing.

Deputy Fire Marshal Bell has spent a great deal of time and energy in making this affair a success. In looking over the list of the committee we find the names of many Scottish who are connected with the building industry.

LUMBER PLANT AND RAILROAD SOLD.

OROVILLE (Calif.) Cor. August 19. Announcement was made today by G. W. Jones, Vice President of the West Side Lumber Company, that his company has taken over the Tucker Lumber Company's mill at Tucker and logging road from Tucker to Palermo Railroad and the logging camp into the mountains, a distance of about ten miles.

The Tucker Lumber Company has agreed to cut a certain bill to the order of the West Side Company, but it is understood that these logs are to be rushed. The building of these miles of railroad will be short lived. The West-ern Pacific would have utilized it, but it is to soon dispose of the company after it had been completed mills and factories were to be moved only a portion of the logging road will be retained and this will be used to haul logs to the mill at Oroville. It is understood that the plant will be operated as soon as the market for lumber is reopened. The railroad will be operated by Tucker Log from the extensive timber holdings of the company and the entire local plant will take on new life.

The West Side Lumber Company has been operating the Tuolumne County and extensive holdings in the San Joaquin Valley. Its officers are W. R. Tucker, President, G. W. Jones, Vice President and J. R. Pringle, Secretary. The plant is one of the most modern and up-to-date in the West. With its acquisition of the Tucker plant the Lumber.

RAILS FOR BEET LINE.

WINNEMUCCA, Nev., August 20.—Fourteen carloads of 56-pound rails, taken up from the line of the Nevada Power, Light & Water Company between Lovelock and Hazen, will be used on the new Southern Pacific beet line that is under construction between Hazen and Fallon.

The rails are being loaded and along the main line and the branches are being put in place. Eighteen men are now doing the work, and it is expected that by the first of the month the entire line will be in operation for the beet crop. A new switch and spur track is also being put in.

TO SELL INDIAN LANDS.

WASHINGTON, Aug. 20.—The house has passed a bill authorizing the secretary of the interior to sell under such terms as may seem to him best land and timber in Oklahoma belonging to the Five Civilized Tribes. There are about 400 acres of land which, with the timber, are expected to bring upward of $2,000,000.

TO TREAT REFRACTORY SANDS.

ROSEVILLE (Placer Co.), August 24.—A. B. Simons, a metallurgist who has spent years investigating methods for reducing the defractory "black sands," has located in Roseville. Simons is from Los Angeles and is establishing a plant for the development of the platinum and iridium which is found in the black sands in connection with gold and other metals. The metals desired are in great demand among electrical machinery builders and are almost a necessity in connection with the installation of wireless telegraphy.

His plant is in the Busby building known as the "Creamery." It is already fitted with motive power and all necessary machinery for the work is being installed. It is the intention to put in several mills of varying capacity in order to handle the concentrates from various mines.

FIRE AT CHICO.

CHICO, August 23.—Shortly after midnight this morning fire started in the Goldstein building, Second and Main streets, totally destroying that building and doing damage to the adjoining structures. The total loss will amount to $40,000.

The Goldstein building, in which were the new armory of Company A, Second Infantry, National Guard of California, the Business Men's Club and several physicians' offices, was destroyed.

MR. ARCHITECT, Give Your Owner the BEST

Discriminating Conduit Users Specify

CENTRAL RED

It Stands Out as the Best of Rigid Conduits

In the manufacture of this especially prepared conduit, we have taken advantage of every refinement known to the profession and have utilized the experience of producers of this class of material for the past twelve years, in evolving a coating for pipe that is an ABSOLUTE PREVENTATIVE of deterioration in the pipe under the most trying conditions.

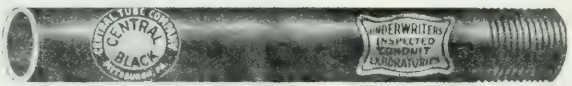
The utmost care has been taken to thoroughly clean and to remove all scale and silicates before giving the pipe a coating of zinc by our own special process. This exterior coating is absolutely continuous, free from pin holes and other objectionable features. The coating of zinc prevents rust and insures against any deterioration in the pipe. Over the zinc exterior, two layers of our own especially prepared red enamel are coated, great care being observed to allow only a very thin layer to adhere to the threads, thus avoiding the necessity of re-cleaning them and to maintain perfect electrical contact. The red enameled interior provides a smooth, slippery raceway, facilitating fishing.

The salt air of sea coast cities, so injurious to all other classes of conduit, has no appreciable effect upon "CENTRAL RED," and we heartily recommend its use in these localities and wherever conditions are the most severe. It is especially adapted for use in CINDER CONCRETE.

"Try It Where Others Have Failed"

"CENTRAL WHITE"

is as good, if not better than competing brands of electro-galvanized conduit. Adequate protection from deterioration is insured by a heavy zinc coating. Couplings are removed during the electro-galvanizing, so that there may be no unprotected spots on the pipe.



"CENTRAL BLACK"

is especially recommended for its softness and easy working qualities. Our patented cleaning process gives us a product free from roughness.

APPROVED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS

Honest samples of our product furnished on request.

MANUFACTURED BY THE

CENTRAL TUBE COMPANY

Editorial Comment.

Smoke is an evil which California cities have comparatively little to contend wth. It is a different thing in Eastern cities, however. It is stated that the smoke nuisance costs Cleveland $6,000,000, Cincinnati $8,000,000, and Chicago $50,000,000 a year, and the whole country over $500,000,000 a year, in damage done to merchandise, defacement of buildings, tarnishing of metals, injury to human and plant life, increased cost of housekeeping, and losses to manufacturers due to imperfect combustion of coal.

Pittsburg, Pennsylvania, being the land of coal and smelters has this evil to deal with all its relations. Recently the Department of Industrial Researches at the University of Pittsburg has published the first of a series of bulletins on the investigation of the "smoke nuisance," for which funds were provided on a munificent scale by a Pittsburg business man. The investigation is being carried on by a staff of twenty-five specialists, six of whom give their entire time to the work, while the others have been intrusted with the preparation of reports on special phases of the subject. The topics discussed briefly in the initial bulletin are: Smoke and the Weather; How is Vegetation Affected by Smoke and Soot; The Chemistry of Smoke and Soot; The Physical Problems of Smoke; Deterioration of Buildings and Building Materials; Smoke and Disease; What the Smoke Nuisance Costs; Who Makes the Smoke; Laws and Ordinances Concerning Smoke; General Experimental Work; Smoke Means Waste and Inefficiency; The Education of the Public; The Question of Legal Regulation.

It is hoped to get at some definite means of overcoming the smoke nuisance and providing against the enormous waste caused by this agent.

Some action has at last been taken for the acquisition of the Home Telephone Company's property by the city. The Public Utilities Committee of the Board of Supervisors has voted in favor of submitting to the people a proposition to vote in favor of acquiring the property. This action is apparently long delayed and not at all enthusiastically undertaken. Notwithstanding the fact that the people by a large majority voted against the merger in last March, notwithstanding the fact that the Home Telephone Company's franchise expressly prohibited the transfer of its property to the Pacific States Telephone Company, that transfer has been effected and the offices of the Pacific States Telephone Company are now in the main building of the Home Company.

The San Francisco plant and equipment of the Home Telephone Company is said to be the best in the world. With its present central lines it could serve the city as well as it is being served. There is certainly no comparison as to service and the time saved each day in the city's business would amount to years. Under the present law the public utilities commission has power to compel the connection on toll lines and a municipal telephone would have the same privilege in using telephone lines that the Pacific States or the Bell system would have. And yet with all these facts in its favor the city has but few champions for preventing this fraudulent transfer. There seems to be no one on the Board of Supervisors willing to take it up, no newspaper is willing to shoulder the affair and make a great popular furore and so the procedure drags on from time to time.

Let there be some action taken in this affair as has been done with the City Hall and the Geary Street Railroad. If the Board of Supervisors and the newspapers believe in the merger of the telephone companies let them come out and say so and present their argument. The companies have transferred their properties in open violation of their contract with the city and against the avowedly expressed will of the people. It is up to the Mayor and the City Attorney to see that this transfer is set aside and to see that the people's rights in the matter are safeguarded. The history of the telephone companies is redolent with scandal and graft.

This transfer in open violation of their contract, does not add to their reputation for honor or fair dealing nor does it enhance the reputation of the officials who permit it.

Senator Simmons of North Carolina, one of the conferees on the Panama Canal Bill, has stated that he believes that as soon as the canal opens private capitol will be liberally invested in ship building and furnishing sea transportation whenever the conditions will permit. This seems reasonable to suppose as the recently established line from here to Panama has not only proved a paying investment, but a great boon to shippers. Let shipping conditions be free and untrammeled, free ports where all can enter and it is hard to build up any monopoly on the sea. San Francisco is one of the few natural harbors in the world where the largest ships can anchor and dock. It is of the highest importance to the city and state that it remain a free port. Open competition on the high seas mean cheap freight rates and increased trade to any port.

The Panama Canal. The World's Most Stupendous Engineering Undertaking.

From an article in the "National Geographical Magazine," by W. J. Showalter, and additional notes collected in April 1912, by N. C. Wilson, M. E.

When Congress asked for information as to the number of yards of material to be removed and the length of time it would take to remove it, the engineers, in a report characterized by optimism rather than pessimism, declared there were 103 million cubic yards of material to be removed, and that it would take nine years to do it. Since then, enlargements in the bottom width of Culebra Cut slides, and other conditions have forced the total amount of material to be excavated up to 195 million cubic yards. Under those original estimates it would take 17 years to complete the work. Yet the canal army, under the leadership of Colonel Goethals, will complete it in a little more than six years of actual, full-swing work.

In other words, the amount of material to be removed has been increased by about 90 per cent, while the time of removal has been cut down about 30 per cent.

In 1908 it was estimated that the total amount of material to be removed, as the project was then laid out, would amount to 135 million cubic yards, and that the total cost of the completed canal would be 375 million dollars. Since that time 60 million yards more have been added to the total excavation; and yet the prospect is that enough money will be left on this estimate, as a result of unexampled efficiency and economy, to build a new breakwater and perhaps to make a giant new storage reservoir at Alleluja.

Under what difficulties all of this has been done, the world never will fully understand. Think of a farm of 117 acres slipping foot by foot into the canal, and yet being taken out as a mere incident in canal construction! This is the aggregate acreage of the slides that have been slipping in and are being steam shoveled out.

In order to appreciate fully how rapidly the canal army is moving down the home stretch in its race against time, let us take an imaginary journey across the Isthmus, from Toro Point, Atlantic side, to Naos Island, Pacific side. First we pass the huge two-mile long Toro Point breakwater, now being built out into the Caribbean to protect the mouth of the canal and the Colon harbor from the violent "northers" which sweep down over that region during the winter months. It is now far out into the ocean, and will be finished many a month before the opening date. On the east side of the canal line, a second breakwater has been laid out; but it will be built only in the event that the Toro Point breakwater is unable to baffle the destructive seas single handed.

We next enter that part of the canal which is being dug from deep water to Gatun, a distance of seven miles, at sea-level. When completed it will carry the ocean into Gatun through a channel 41 feet deep and 500 feet wide. Already this channel is navigable for the light-draft vessels of the material carrying fleet from Gatun, and the first five miles is practically completed. By the end of the calendar year, it will be deep enough to accommodate the majority of ships which pass by way of Colon. Six months thereafter, it will be completed and ready for even so hugh a craft as the Olympic.

We next come to Gatun, where the great dam of the same name and the Atlantic side locks are located. Within twelve months it will be completed and ready for the maximum head of water, 87 feet. The work of the locks is being pushed forward so that they will be completed by the end of the calendar year, except for the installation of the operating machinery, and that will be completed five months later.

Passing through the locks, we next come to the channel through Gatun Lake. We find this all but completed for a distance of 26 miles. There is practically nothing left to do with this stretch of more than half the total length of the canal but to put in the lighting equipment and other aids to navigation. Already the water is spreading over the bottom of the lower part of this section of the big waterway. Already Colonel Goethals is serving notice on the people who wish to see the canal while the magnitude of the work is still apparent, that they had better visit the Isthmus soon. He says that belated visitors will wonder where all the work could have been done.

This 26-mile section carries us past Las Cascades, and two miles into the great Culebra Cut. The next four miles represent the very backbone of the work yet to be done. In a comparatively few months there will be only about three miles of the cut above the requisite depth. Thirty steam shovels will be concentrated on that, and, if their present gait is maintained, within sixteen months proud old Culebra Mountain no longer can bid defiance to the age-long desire of men for a shipway through its vitals.

The only thing that might possibly happen to delay this work further would be unexpected slides; but they are provided against from the fact that by that time the water in Culebra Cut will be deep enough to float the big 20-inch suction dredges, which would be brought up through the locks and set to work. Before them the slides would disappear as a snowbank on a balmy day.

Passing through Culebra Cut, we next come to the Pedro Miguel locks — called "Peter Magill" by the Americans on the Isthmus. Here the work is all but completed, except for the installation of the machinery, and that task is going forward in such a way that it will be in readiness before Culebra Cut is completed. The dam here—which is a small one, comparatively speaking—will be finished at an early date.

The next 2,0 9 yards or more of the canal will be a small lake between the single flight of locks at Pedro Miguel and the double flight at Miraflores. This lake, which will cover nearly 1,200 acres, will be finished by the end of the present year. After passing through this lake, we come to the Miraflores locks; and such unusual progress has been made on them that, although the work could not begin on them until the Pedro Miguel locks were completed, the division engineer has announced that he expects to have the work on all the Pacific locks ready for the installation of the machinery before Thanksgiving Day. Already the contractors are putting in some of the gates and operating machinery.

After passing through the double flight of locks at Miraflores, we find ourselves back at sea-level again. The dam connecting the Miraflores locks with the adjacent hills is not completed yet, and will not be until the early part of 1913, being kept open to let the dirt trains from the Culebra Cut through on their way to the Naos Island dumps. Much of the material for this dam will be taken from the sea-level ditch from Miraflores to the sea. This portion of the canal will be completed fully eighteen months ahead of the official opening day of the big waterway. Already it is open to navigation for more than five miles inland from deep water. Only three miles out of the eight still remain uncompleted.

This rapid passage through the canal demonstrates how fast it is nearing completion. The entire channel is a little more than 50 miles long. About 37 miles of it, including the lock sites, are now down to the requisite depth; and, of the remaining 13 miles, there are less than eight miles of really heavy work.

There is perhaps no other work on the whole canal more interesting than that at Gatun. Here it is that one gets a view of some of the most stupendous work on the great waterway. Gatun Dam is now taking shape, and soon will be up to its full height. To the tourist it is a most disappointing sight. When he approaches Gatun, he inquiries where the dam is, for, be it said, the slope of the structure is so gentle that few people recognize it as a dam. Take a yard-stick and elevate one end 3 inches above the other, and you have about the average slope of the down-stream face of the dam. On the up-stream side the slope would be represented, so far as the part under water is concerned, if you elevated the one end of your yard-stick 4½ inches higher than the other end.

The completed dam will cover some 400 acres of ground, and will contain 21 million cubic yards of material—enough to make a wall of earth three feet high and three feet thick and reaching nearly half way around the world.

The dam has been full of surprises, but very different surprises from those which the pessimists were expecting. The site was for a long time called into question. When Colonel Goethals took charge, he immediately put into effect a policy of not taking even the

smallest thing for granted when he could prove a thing by actual test. After the assertion had been made thousands of times that there was an underground river flowing beneath the dam site, he honeycombed the whole area with borings, and sank a big shaft down to solid foundation, so that he could see with his own eyes. He found almost none of the conditions the fearful ones had pictured. But, in order to forestall all criticism, he planned the dam so as to include triple interlocking steel sheet piling across the valley, driven down to bed rock, and a dam that should be 135 feet high—50 feet above the water level.

Then came the famous "collapse" of the dam, wired to the American press by a Panama newspaper reporter. People did not stop to think that there was as yet no dam there to collapse, and President Roosevelt was alarmed at the wide-spread uneasiness. It was this that led him to send the board of engineers to the Isthmus, accompanied by President-elect Taft.

The net result of the trip was that the engineers declared the dam was being built so that it can discharge there was no occasion whatever for the use of the piling. So it was cut down to 115 feet, and the piling was omitted. After all, the story that shook the confidence of the American people in the dam bore fruit in the resulting saving in the construction of that dam. The only criticism of it today is that it is still larger than was necessary. Colonel Goethals admits that if he had been building it for private corporations, he would have made it smaller. But "concede everything else to safety" has been his policy from beginning to end.

We see this same attitude in the matter of providing for the disposal of surplus water coming into Gatun Lake during the high stages of the Chagres River. The Gatun spillway is being built so that it candischarge 137,000 cubic feet of water a second, the water issuing at a speed of 35 feet a second. This will take care of the maddest flood that history records in the Chagres. In addition to this, the big culverts on the locks can be turned open and a flood of 170,000 feet a second is provided for. Yet the Chagres can flow at its highest known stage into the Gatun Lake for 5½ hours, with no discharge at all, and raise its level only one foot, and can rise seven feet without doing damage.

In other words, although the Chagres could do its worst for a day and a half, without a drop of water going over the spillway, without doing any damage, the canal authorities have arranged to pass out more water per hour than the Chagres can possibly bring down, and have not presumed at all upon that day and a half advantage over the Chagres.

Still another incident serves to illustrate the wonderful care that has been taken uniformly not to draw a more rosy picture than conditions warrant. Colonel Goethals always declared that the material which would constitute the hydraulic core of the dam would be sufficiently impervious to water to prevent any dangerous seepage. But experience is proving that there is no seepage at all. A long pond is maintained at all times on the crest of the dam, and into this the big dredges are pumping millions of gallons of water. The clay settles and part of the water runs off. The remainder stays there, seeking out every possible crack and crevice, a sort of hydraulic stone mason who tightens up every minute space and offers a perpetual guarantee that when he finishes his work all will evermore be well.

* * * *

One of the most remarkable phases of the work of building the Panama Canal has been the unparalleled development of engineering efficiency. For instance, the cost of steam shovel operation has been cut from 11.5 cents a yard to 8.88 cents a yard. The cost of hauling away the spoil has been cut down from 18.54 cents a yard to 15.22 cents, although the distance of transportation has increased from 8 to 12 miles. A ton of dynamite has been made to do twice as much work in 1912 as it did in 1908. They save $50,000 a month by shaking their cement bags.

When Colonel Goethals took charge of the work at Panama, the incessant demand of the people at home was that he should "make the dirt fly." He recognized that if the canal were to command the support and confidence of the people during its construction, "making the dirt fly" would have to be the first aim of the canal diggers; the cost of making it fly would have to become a secondary consideration. How well he succeeded is shown by the tremendous results of 1908—37 million cubic yards of material removed.

Thereafter one heard little talk about making the dirt fly; and the Commission were then able to bend their energies to the work of making it fly economically, as well as making it fly fast. A tightening-up process here, the elimination of lost motion there, the invention of some time-saving device at another place, all served to make the operations more economical and to save millions of dollars. So great has been the progress in developing efficiency on the Isthmus, that they have cut the cost of excavation in Culebra Cut by more than one-third.

Nowhere else in the world has there ever been such a vast amount of masonry constructed on any single engineering project as is being built in the locks and spillways of the Panama Canal. In times gone by, the masonry of all great projects like the Pyramids of ancient times and the Assuan Dam on the Nile of today—was made of natural rock; at Panama they make artificial rock, and make it so fast that one scarcely can believe his eyes. The concrete required on the whole project amounts to more than four and a half million cubic yards—all made from Atlas Portland cement. This is enough to build up an air-line street from New York to Washington, with six-room houses on both sides. Those houses would furnish shelter for a population the size of the city of Indianapolis, taking the census returns of the number of people to the average American dwelling as the basis. Expressing the magnitude of the project in another way, it would make a regulation sidewalk nine feet wide by six inches thick, reaching more than twice around the earth.

The locks at Gatun require two million cubic yards of concrete. Those on the Pacific side, being built with two flights at one place and the third at another place, require nearly 200,000 yards more than the single trip flights at Gatun. The Gatun spillway claims approximately a quarter of a million yards.

Nowhere else in the world does one get a more vivid impression of the versatility of concrete than on the Panama Canal. They are using it to make the giant locks, and with equal success in constructing the huge piers and docks at the ends of the big waterway. They have been trying out a cement gun to shoot cement, sand and water—mixed as it passes out of the nozzle—against the sides of the Culebra Cut, to form a coating of solid artificial rock, although the experiment has not proved so much of a success as had been hoped. They are building lighthouses and other aids to navigation out of concrete, and have even gone so far as to build barges of this material.

Nowhere else in the world are there to be found such extensive concrete mixing plants or such remarkable machinery for handling the material. Millions of barrels of cement had to be carried to the Isthmus, the Atlas brand Portland cement being used exclusively; and millions of yards of stone had to be quarried and crushed at Ancon and Porto Bello. Sand by the hundreds of barge loads had to be brought from islands in the Atlantic and the Pacific to keep filled the seemingly insatiable maws of dozens of giant mixers, which receive some ten tons of sand, cement chushed stone and water, whirl them around for a minute in a sort of digestive process, and then dump the mass out in the shape of unhardened artificial stone.

Many new problems in concrete construction have been worked out at Panama. The effect of sea water on concrete, the time of setting for such huge masses, and a dozen other matters, upon which depended the stability of the locks and the integrity of the waterway, had to be met. All of them were met in the spirit of accepting nothing as proven until it was proven by actual physical test.

The world is now in the age of concrete, and the Panama Canal must go down into history as the greatest effort man ever has made and perhaps ever will make to simulate the processes of geological ages and do in days what nature required unreckoned years to accomplish.

* * * *

The magnitude of the work being done on the canal is so great that it cannot be appreciated in a few minutes, or even in a few days. It is somewhat like the first sight of Niagara Falls in this respect. Figures giving the number of cubic yards of material removed from Culebra Cut do not convey any idea to the ordinary mind; but if the material removed were placed on a space equal to the ordinary city block, and built straight up in the form of a monument, the top would be approximately more than a mile higher than the top of the highest mountain above sea level.

The steel gates in the different locks weigh approximately 66,000 tons. If these gates were piled on top of one another like a pack of cards they would form a pile 641 feet high. If they were piled end to end, they would reach a length of 14½ miles. These figures will probably give a better idea to the ordinary reader than a simple

statement of cubic yards or pounds.

As the Gatun Dam is different from the ordinary dam to which we are accustomed, there is possibly not one person in a thousand who has any idea of how it is constructed. In round figures this dam is one-half mile wide at the base, and almost two miles long, and is built up to an elevation of 150 feet above mean sea level. The only concrete work used in the dam is the spillway. The dam is practically continuing the mountain range across the gorge formed by the Chagres River. The rock blasted from Culebra Cut and other cuts was distributed from this area in two immense parallel walls, leaving a space of several hundred yards between the two walls. The space between these two walls was filled by a hydraulic fill, the material being supplied by means of hydraulic dredges, which pump the clay and sand from the channels that are being dredged, into the space between the two rock walls, thus forming an entirely water-tight hydraulic core. Thus the entire dam has been constructed of waste material, which, had it not been placed in that position, would have had to be hauled to some other location farther distant.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 3 story and base, frame, $20,000. Architect, none. Owner, J. Pasqualetti, Humboldt Bank Bldg., S. F. The building is to be erected on a corner lot and is to cover a considerable ground area. The plans provide for twelve apartments, each of which will contain three and four rooms besides the bath. The interior is to be finished in pine with some hardwood floors. There will be steam heat and wall beds. The exterior will be covered with veneered pressed brick and cement plaster on metal lath. Plans are in the hands of the owner and bids are being taken both as a whole and segregated.

San Francisco—Apartment house, 3 story and base brick and steel, $20,000. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on an inside lot and will be arranged for thirty rooms, which are to be divided into two and three room apartments. There will be connecting baths, wall beds and steam heat. The interior will be finished in pine throughout. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

San Francisco—Apartment house, 3 story and base, frame, $10,000. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, Mrs. Ellen Otto. The building will contain six small apartments which have been arranged in suites of three and four rooms each. The equipment will require wall beds and a central heating system. The interior will be finished in pine throughout. All apartments will have connecting baths. The exterior of the building will be covered with shiplap. Plans are complete and the architects are taking figures on the work.

San Francisco—Apartment house, 4 or 5 story and base, brick and steel. Cost not given. Architect, John Ettler, 604 Mission St., S. F. Owners, Bothin Estate. Plans for the building to be erected at this time provide for a one-story and basement structure which will be arranged for stores. All walls and foundations have been designed to carry additional stories, which will be subdivided into apartments of two, three and four rooms each. Construction of the additional stories will be undertaken within a short time.

Berkeley, Alameda Co., Cal.—Apartment house, 3 story and base, frame, $20,000. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, Dr. J. J. Benton. Plans for this building are now complete and provide for three stores on the first floor and sixteen apartments of three rooms and bath each on the upper floors. All interior finish will be of pine. Some oak floors will be used. There will be a central heating system and wall beds. The exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the architects are taking figures on the work.

Berkeley, Alameda Co., Cal.—Apartment house, 3 story and base, frame, $35,000. Architect, J. Cather Newsom, Monadnock Bldg., S. F. Owner, J. Cather Newsom. The building has been arranged for 36 apartments with wall beds, connecting baths and all other modern conveniences. The interiors of all apartments will be finished in pine with oak floors. There will be steam heat. The exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared and will be ready for figures within a short time.

Oakland, Cal.—Apartment house, 3 story and base, frame, $30,000. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. This building will be erected in the Lake District and has been arranged for 27 apartments of two and three rooms each. The equipment calls for wall beds and private baths. There will be steam heat. The interior will be finished in pine and redwood. Oak floors will be used in the living room of each apartment. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

Los Angeles, Cal.—Apartment house, 3 story and base, brick and frame, $25,000. Architect, Los Investment Co., 435 So. Hill St., L. A. Owner, L. Weston. The building will be 36x40 feet and will contain 24 two-room apartments which will be equipped with wall beds and private baths. There will be steam heat and electric cooking stoves. The exterior of the building will be faced with pressed brick and cement plaster. Plans are now being prepared.

Seattle, Wash.—Apartment house, 6 story and double base, reinforced concrete, $100,000. Architects, Blackwell & Baker, Northern Bank Bldg., Seattle. Owner, H. S. Amon. This building is to be erected at an important corner and will cover an area of 60x120 feet. The interior has been arranged for apartments varying in size from two to four rooms, all of which will have wall beds, private baths and other modern equipment. There will be steam heat and a vacuum cleaning system. The construction is to be of reinforced concrete throughout with the exterior walls faced with pressed brick. Plans are complete and figures are being taken.

Los Angeles, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, W. J. Story, I. W. Hellman Bldg., L. A. Owner, H. J. McElroy. The building will contain 60 rooms, which are to be subdivided into suites of two rooms and bath each. The interior of all apartments will be finished in pine. There will be steam heat and elevator service. Wall beds will be used in all bed rooms. The exterior of the building will be covered with cement plaster trimmed with artificial stone. Plans are complete and bids will be called for at once.

Contracts Awarded.

Los Angeles, Cal.—Apartment house, 3 story and base, brick, $25,000. Architects, Train & Williams, Exchange Bldg., L. A. Owner, Andrew Anderson. Contractor, J. A. Weddel, 341 West 51st St., L. A. Contract price, $22,896.

Los Angeles, Cal.—Apartment house, 3 story and base, brick, $10,000. Architect, none. Owners, H. Stanley Benedick and Gardner H. Narbonne. Contractor, J. H. Bean, 1347 Valencia St., L. A. Contract price, $10,000.

615 Phelan Building, San Francisco

BRIDGES, DAMS AND HARBOR WORK.

Oakland, Cal.—Bridge, reinforced concrete, $35,000. Engineer, City Engineer, P. F. Brown, City Hall Annex, Oakland. Owners, City of Oakland. At a recent meeting of the City Council the long delayed project of a suitable bridge over the Estuary at Eighth street was taken up and an appropriation of $35,000 was made. The City Engineer has started the working drawings and within the next few weeks bids for the construction will be called.

CHURCHES.

Long Beach, Los Angeles Co., Cal.—Church, brick construction, $60,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, First Congregational Church of Long Beach.

The new building will cover a ground area of 100x150 feet. There will be a main auditorium with a seating capacity of 1200 people besides Sunday school rooms, pastor's study, library and rooms to be devoted to social uses. The exterior of the building will be faced with pressed brick. Plans have just been started for this work.

San Diego, Cal.—Church, 1 story and base, brick and frame, $80,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, First Baptist Church of San Diego. This work has been mentioned here before when the architect was first commissioned to prepare the plans. The new edifice will cover a ground area of 100x150 feet and has been designed in the Spanish Mission style. The exterior will be finished in cement plaster with a clay tile roof. There will be a modern system of heating and ventilating. Plans are complete and figures are being taken.

Hanford, Kings Co., Cal.—Church, 1 story and base, brick. Cost not stated. Architect, J. M. Saffell. New Fish Bldg., Bakersfield. Owners, Hanford Presbyterian Church. All bids for this work have been rejected and the plans revised. The original building was to have been a two-story structure, but figures were in excess of the money available. New bids will be called for as soon as the architect can complete the revision of the plans.

FACTORIES & WAREHOUSES.

San Francisco—Factory, 4 story and base, steel and concrete. Cost not stated. Architect, William Knowles, Hearst Bldg., S. F. Owners, Ford Motor Car Co. This work has been mentioned here several times before when plans were first being prepared. The engineer has completed all of his work and the plans have received the official approval of the owners. Bids for the construction will be called for within two weeks.

San Francisco—Warehouse, 1 story and base, brick and steel, $4,000 Architect, August Nordin, Mills Bldg., S. F. Owners, George Brown Estate. The building will cover a ground area of 40x80 feet. There will be a cement floor, metal sash and window frames and fire doors. The exterior will be faced with stock brick. Plans have been out for figures and a contract will be awarded at once.

Los Angeles, Cal.—Factory, 1 story and base, concrete and frame. Cost not stated. Architect, none. Owners, Moreland Motor Truck Co, Main and Wilhardt streets, L. A. Plans for a large addition to the company's plant have been prepared by the Engineering Dept., and construction will be started at once. The addition will cover an area of 250x187 feet, and will have a concrete foundation with frame superstructure. The work will be done by Day Labor.

FLATS.

San Francisco—Flats, 2 story and base, frame, $5,000. Architect, Smith O'Brien, Humboldt Bank Bldg., S. F. Owner, J. J. Leonard. The building is to be erected on Dolores street and will contain two modern flats of five and six rooms each. The interiors will be finished in pine and redwood with some oak floors. There will be open fire places and brick mantels. The exterior of the building will be covered with shiplap and rustic. Plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Flats, 2 story and base, frame, $3,000. Architect, L. F. Hyde, 2745 26th St., Oakland. Owner, Mrs. Enos. The building has been arranged for two small flats of four and five rooms each with baths and sleeping porches. The interiors will be finished in pine and redwood. Oak will be used in the floors of the principal rooms. There will be open fire places and tile mantels. The exterior will be covered with rustic. Plans are in the hands of the owner and she is taking figures on the work.

Oakland, Cal.—Flats, 2 story and base, frame, $5,000. Architect, L. J. De Luchi, 556 63rd St., Oakland. Owner, George Comper. The building has been designed for two flats, each of which is to contain six rooms, bath and sleeping porch. The interiors will be finished in pine, redwood and oak. Oak floors will be used in the principal rooms. There will be a central heating system. Tile will be used in the baths. The exterior of the building will be covered with rustic. Plans are complete and figures are being taken.

GARAGES.

San Francisco—Garage and sales rooms, 2 story and base, reinforced concrete, $90,000. Architects, MacDonald & Applegarth, Call Bldg., S. F. Owner, Paul Bancroft. The building which is to be erected at the southeast corner of Van Ness avenue and Sutter street, will cover a large area, and has been leased to an agency for a long term of years. There will be large and handsomely finished offices and sales rooms besides a large repair shop and storage space. The construction will be fireproof throughout. The exterior of the building will be faced with cement plaster. The architects are now preparing the working drawings.

San Francisco—Garage and sales rooms, 3 story and base, reinforced concrete, $80,000. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owner, Melville G. Topertz. The building will be erected at O'Farrell and Van Ness and is to cover a site 60x120 feet. The construction throughout will be fireproof with cement floors and metal trim. The first floor has been arranged for offices and sales rooms. Storage space and a repair shop will occupy the upper two floors. There will be steam heat and elevator service. The exterior will be faced with cement plaster. Plans are being prepared. A lease for the entire structure has been signed with the Cadillac Pacific Agency.

San Francisco—Garage and lofts, 4 story and base, reinforced concrete and steel, $65,000. Architect, Herman Barth, 12 Geary St., S. F. Owner William Goeggel. This building has been mentioned here before. The structure will be erected at Van Ness and Bush streets. Plans have been prepared and are now out for figures. The structure has been arranged for the special needs of the automobile business. The exterior will be faced with cement plaster.

San Francisco—Garage, 2 story and base, reinforced concrete, $35,000. Architect, William Helbing, 1420 Market St., S. F. Owners, Dow and Green. This work has been mentioned here before when the owners applied for a permit. This permit has now been granted and construction will be started at once. The building will cover a large ground area with two entrances from the streets, front and rear. The rear entrance will be on a level with the second floor. Construction will be fireproof. The exterior of the building will be faced with cement plaster. The work will be carried on by Mr. Helbing who is taking subfigures.

Portland, Ore.—Factory, 3 story and base, reinforced concrete. Cost not stated. Architects, Doyle, Patterson & Beach, Worcester Bldg., Portland. Owners, Ford Motor Car Co. This is the third building for the same owners which is to be erected on the Pacific Coast this year. The structure will cover an area of 80x300 feet, and is to be used as an assembling plant. Construction will be fireproof. Plans are complete and the architects are taking figures.

Los Angeles, Cal.—Garage, 2 story and base, brick and steel. Cost not stated. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, Mrs. Susan H. Van Nuys. The building will be 53x145 feet. First and second floors will be of cement. There will be metal trim and hardwood. Steel rolling shutters will be used. The exterior of the building will be faced with glazed terra cotta. Plans are complete and figures are being taken.

Contracts Awarded.

Los Angeles, Cal.—Garage, 2 story and base, brick. Cost not stated. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owner, Robert Fowler. Contractor, J. R. Keel, 543 So. Broadway, L. A. Contract price not stated.

GOVERNMENT WORK AND SUPPLIES.

Hydropneumatic Elevator.

A hydropneumatic elevator is to be installed in the foundry at the navy yard, Puget Sound, Wash. Bids for the work are to be opened on September 21 at the bureau of yards and docks, Navy Department. The elevator shall have a lifting capacity of 4,000 pounds at 25 feet per minute and 2,500 pounds at 40 feet per minute, with a constant pressure of 100 pounds of air at the receiver. The car shall have entrances from two sides. Size of the hatchway, 5 feet 10 inches by 7 feet 6 inches, and the car travel is from first floor to changing floor, a distance of about 18 feet. It is the desire of the department that the work be completed within 3 calendar months.

Pumps for Reclamation Service.

Bids were opened at the U. S. Reclamation Service, Los Angeles, Cal., for 4 nonoverloading open runner pumps for the Rio Grande reclamation project:

No award has yet been made for reconstructing pier No. 5 and dredging at the navy yard, Puget Sound, Wash., under bids opened July 26.

HALLS AND SOCIETY BUILDINGS.

San Francisco—Halls and stores, 4 or 5 story and base, brick and steel, $75,000. Architect, Frederick H. Meyer. Bankers' Investment Bldg., S. F. Owner, Hillbush Silverberg. The building is to be erected at the corner of Powell and Sutter streets, and has been designed for a number of clubs, the principal occupant being the San Francisco Press Club, which will occupy two entire floors. There will be several stores on the first floor. The interior of the Press Club rooms will be handsomely fitted up. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

Watsonville, Santa Cruz Co., Cal.—Lodge hall, 3 story and base, brick and steel, $50,000. Architect, James H. Humphries, Wells-Fargo Bldg., S. F. Owners, Watsonville Masonic Hall Association. Plans for this building provide for several stores on the first floor and large lodge rooms, banquet hall and social parlors on the upper two floors. There will be steam heat. The interior of the lodge rooms will be finished in pine and Karlwoods. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for shortly.

Seattle, Wash—Lodge hall and stores, 7 or 9 story and base. Class A construction, $200,000. Architect, John Carrigan, Oriental Bldg., Seattle. Owners, Elks' Hall Association. The basement and sub-basement will contain a gymnasium, Turkish baths, bowling alleys, etc. The 4th avenue frontage will be given over to stores. The plans provide for 51 hotel rooms, large banquet hall, ladies' reception and private parlors and dining rooms. The lodge room, situated on the top floor, will have a seating capacity of 900 and will be provided with a stage having all modern appurtenances. The roof will be so constructed as to be turned into an elaborate roof garden later. The building will be in the French Renaissance style of architecture. The building will be 60x111 feet, strictly fireproof and faced with copper, brick and terra cotta. Bids will be opened on September 18th, and should be addressed to President George W. Stetson.

HOSPITALS.

San Francisco — General finishing construction, $156,000. Architectural Dept., Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractor, Grant Fee, S. F. Contract price, $156,000. For a complete list of these figures see under Bids Opened, San Francisco.

Oakland, Cal.—Hospital, 3 story and base, brick, $55,000. Architect, Walter Mathews, 927 Broadway, Oakland. Owners, Merritt Hospital. The plans for a substantial building, which is to be used in part for a nurses' home and for the surgical department of the Merritt Hospital, have been completed and figures are being taken. The interior finish of the new building will be of pine and hardwoods with considerable tile used. There will be steam heat. The exterior will be faced with pressed brick. Plans can be secured from the architect.

Patton, Los Angeles Co., Cal.—Hospital cottage, etc, frame construction. Cost not stated. Architect, State Dept. of Engineering, Sacramento. Owners, State of California. Plans for a large amount of work which is to be done at the State Hospital at Patton have been completed. The work includes several cottages and extensive alterations and additions to the present buildings. Plans and specifications for this work are on file at the office of the Building and Industrial News. For the official proposals see under Sealed Proposals in this issue. Bids for the above work will be opened on September 20th.

HOTELS.

San Francisco—Hotel, 6 story and base, brick and steel, $40,000. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owner, T. G. Walker Co. The building is to be erected in the north line of Turk street near Jones, and will contain in the neighborhood of 100 rooms and baths. There will be steam heat, elevator service and running water. The interior will be finished in pine and redwood. The exterior of the building will be faced with pressed brick. Preliminary plans only have been prepared.

San Francisco—Hotel, 7 story and base, brick and steel, $50,000. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Stewart Estate Co. The building will be erected on Geary street near Mason, and will contain a large number of guest rooms, all of which will have connecting baths and hot and cold running water. There will be steam heat and elevator service. The interior will be finished in pine and redwood with some marble. The construction will be of brick with the exterior faced with pressed brick trimmed with terra cotta. Plans for this work are being prepared.

San Francisco—Hotel, 7 story and base, brick and steel, $60,000. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be 60x87 feet, and will contain 85 rooms, all of which will have connecting baths. Plans provide for running hot and cold water, elevator service and steam heat. A vacuum cleaning system will also be installed. The interior of the building will be faced with pressed brick and

terra cotta. Plans for the work are nearly complete.

San Francisco—Hotel, 6 story and base, brick and steel, $60,000. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owners, Dr. Crane and Dr. W. J. Yore. The building will cover a site 48x90 feet with an L 22x22 feet. The interior has been arranged for 90 rooms and 90 baths. Four stores will be located on the first floor besides the main offices and lobby. There will be steam heat and elevator service. Running hot and cold water has been provided for all rooms. About 30 of the rooms will be equipped with wall beds. The interior of the lobby will be finished in hardwoods and marble. The exterior of the building will be faced with pressed brick. Plans are being prepared.

San Francisco—Hotel, 6 story and base, brick and steel, $75,000. Architects, Smith & Stewart, 244 Kearny St., S. F. Owners, Broad Realty Co. The building will be erected at the corner of Jones and Ellis streets, and will contain in the neighborhood of 100 rooms, all with private baths. The lot is 55x87 feet. Both street frontages will be subdivided for retail stores, two on one street and one on the other. The first floor will also contain the lobby. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are being prepared and will be ready for figures in about three weeks.

Los Angeles, Cal.—Hotel, 4 story base, brick, $75,000. Architect, J. E. Frary, Trust Savings Bldg., L. A. Owner, D. F. Hill. The building will be 60x155 feet. The first floor has been arranged for a large, spacious lobby and two stores. One hundred guest rooms and fifty baths have been planned for the upper three floors. There will be steam heat and elevator service, a vacuum cleaning system and hot and cold running water. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

Los Angeles, Cal.—Hotey, 4 story and base, reinforced concrete, $30,000. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owner, Frank R. Tousley. The building will cover an area of 27½x100 feet. There will be 56 guest rooms and 10 baths. All rooms will be supplied with hot and cold running water. There will be an automatic elevator and steam heat. The construction is to be entirely of reinforced concrete. Interior partitions will be of metal lath and plaster. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Los Angeles, Cal.—Hotel and stores, 4 story and base, brick and steel. Cost not stated. Architect, E. C. Thorne, Realty Board Bldg., L. A. Owner, I. I. Dehail, 256 East 1st St., L. A. The building is to cover an area of 100x109 feet, and has been arranged for six stores on the first floor and 132 rooms with 12 baths on the upper three floors. There will be elevator service, steam heat and fire escapes. Running hot and cold water has been provided for all rooms. The exterior of the building will be faced with pressed brick. Plans are in the hands of the owner and he is letting sub-contracts for all parts of the work.

Sacramento, Cal.—Hotel, 7 story and base. Class A construction, $250,000. Architects, Cuff & Diggs, Elks' Bldg., Sacramento. Owners, Travelers' Hotel Company. The architects have completed the working drawings for the new Travelers' Hotel which is to be erected at the southwest corner of Fifth and J streets, Sacramento, at a cost of approximately $250,000. Blue prints are now being made and will be distributed among the contractors as rapidly as possible. The building is to be a seven-story and basement Class A structure having a frontage of 80 feet on one street and 160 feet on the other street. The location of the new Travelers' Hotel is regarded as most favorable, being in the heart of the business district and within a short distance of the new proposed Southern Pacific station, the City and County and State buildings. When completed the new hotel will be under the management of Mr. Flanigan, one of the best known hotel men in the west, and now managing the Land Hotel at Sacramento. The new Travelers' Hotel will contain 210 guest rooms, all but 40 of which will have private baths. These 40 rooms will be arranged so that they may be thrown into suites with baths. Besides a large and spacious office and lobby the first floor will contain ten stores. A cafe, grill room and sample rooms will occupy most of the basement. Sample rooms will also be located on the mezzanine floor. The lobby will be finished in mahogany, marble and Caen stone. Two public fountains, one on J street and one on Fifth street will be installed. The mechanical equipment of the building will include steam heat, elevator service, cooling plant and a vacuum cleaning system. Plans provide for a complete steel frame with curtain walls of brick, hollow tile partitions, concrete floors and stairs. The exterior of the building will be faced with pressed brick, probably the Sacramento Sand Lime Brick.

Contracts Awarded.

Los Angeles, Cal.—Hotel and stores, 4 or 5 story and base, brick and steel, $125,000. Architect, none. Owner, Geo. A. Ralphs, 514 So. Spring St., L. A. Contractor, F. O. Jean, 492 Ardmore Ave., L. A. Contract has been taken on the percentage basis. The building will contain a number of stores and 150 guest rooms

RESIDENCES.

San Francisco—Residence, 2 story and base, frame. Cost not stated. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, H. S. Heller. The dwelling has been designed for an eight-room house with bath and laundry. There will be furnace heat and open fire places. The interior finish is to be of pine and redwood with oak floors throughout. A general contract has been awarded, and the contractor, E. A. Janssen, Hearst Bldg., S. F., is now taking subfigures on all parts of the work.

San Francisco—Residence, 2 story and base, frame, $3,000. Architect, none. Owner, F. Balstrieri, 7 Card Alley. The dwelling will contain 7 rooms and bath. The interior finish will be of pine throughout. Oak will be used in the floors of several of the rooms. There will be open fire places with tile mantels. The exterior of the house will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Residences, 2, 2 story and base, frame, $4,000 and $5,000 each. Architect, none. Owner, E. N. Fritz, 1401 Masonic Ave., S. F. These dwellings will contain seven and eight rooms each with baths and laundry. The interiors will be finished in pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick and tile. Bath room floors will be composition. The exteriors of both houses will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, $2,500. Architect, none. Owner, Henry Ahnefeld, 3005 King St., Berkeley. The dwelling will contain six rooms and bath. The interior will be finished in pine and redwood with oak floors in the dining and living rooms. There will be open fire places and brick mantels. Tile will be used in the bath and kitchen. The exterior of the bungalow will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, $3,300. Architect, none. Owner, G. W. Eliassen, Security Bank Bldg., Oakland. The house has been designed for a seven-room dwelling with bath, sleeping porch and laundry. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be open fire places and brick or tile mantels. The exterior of the house will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

Oakland, Cal.—Bungalow and garage, 1 story and base, frame, $4,000. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, Paul McMullen. The house will contain seven rooms, sleeping porch, bath and laundry. The interior will be finished in pine with hardwood floors throughout. Composition flooring will be used in the bath room. There will be furnace heat and open fire places. The mantels will be of pressed brick. The exterior of both house and garage will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Oakland, Cal.—Bungalow, 1 story and base, frame. Cost not stated. Architect, none. Owners, Junk-Riddell Co., Berkeley National Bank Bldg., Berkeley. The dwelling will contain six rooms and bath. The interior trim will be of pine and redwood. Oak will be used in the floors of the principal rooms. There will be open fire places and tile or brick mantels. Tile will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster. Plans are complete and the work is to be done by Day Labor.

Oakland, Cal.—Residences, 4, 2 story and base, frame, $4,500 each. Architect, none. Owner, J. M. Wiley, 1718 Hearst Ave., Berkeley. Each of these dwellings has been designed to contain six rooms, bath and sleeping porch. The interiors will be finished in pine, redwood and veneer hard-

woods. The floors of the principal rooms will be of oak. Composition flooring will be used in the bath rooms. There will be furnace heat and open fire places. The mantels will be of tile and brick. All exteriors will be covered with cement plaster on metal lath. Plans are being completed and the work will be done by Day Labor.

Oakland, Cal.—Bungalows, 3, 1 story and base, frame, $2,500 each. Architect, A. J. Mazurette, 1520 Broadway Oakland. Owner, Roger Coit. Each of the bungalows has been designed for a five-room house with bath. The interiors will be finished in pine throughout. Oak will be used in the floors of some of the rooms. There will be open fire places and brick mantels. The exteriors of the dwellings will be covered with cement plaster and shingles. Plans are being prepared and when complete the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, $6,500. Architect, Claud B. Barton Security Bank Bldg., Oakland. Owner, A. W. Baker. This dwelling will be erected at Adams Point and will contain ten rooms, baths, sleeping porch and laundry. The interior will be finished in pine, redwood and hardwoods. Oak will be used for the floors in the principal rooms, while all baths will have composition flooring. There will be a hot water heating system and open fire places. The mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, $5,000. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, C. E. Quigley. The dwelling has been designed for a seven-room house with bath, sleeping porch and laundry. The interior will be finished in pine and redwood. Oak will be used in the floors except the bath room which will have a composition floor. There will be furnace heat and open fire places. Tile will be used in the bath and kitchen. Mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, $2,500. Architect, none. Owner, I. W. Button, 590 Telegraph Ave., Oakland. The dwelling will contain seven rooms and bath. The interior will be finished in pine throughout. There will be open fire places, brick or tile mantels and some oak floors. The exterior of the house will be covered with lath and plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1 story and base, frame, $3,000. Architect, none. Owner, L. Beilhes, 5301 Market St., Oakland. The dwelling has been designed for a seven-room house with bath. The interior will be finished in pine with oak floors throughout. There will be open fire places and brick mantels. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with rustic. Plans are complete and figures are being taken by the owner.

Oakland, Cal.—Bungalows, 5, 1 story and base, frame, $2,500 each. Architect, none. Owners, Butler Bros., 63rd and Shattuck, Oakland. Each of the bungalows has been designed to contain five rooms and bath. The interiors will be finished in pine throughout. Some oak flooring will be used. There will be open fire places and brick mantels. All exteriors will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

Piedmont, Alameda Co., Cal.—Residence, 2 story, attic and base, frame, $9,000. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, B. L. Albarn. The dwelling has been designed to contain eight rooms, baths, sleeping porches and laundry. A garage will be erected on the rear of the lot. The interior of the dwelling will be finished in pine, redwood and hardwoods. Oak floors will be used throughout. There will be furnace heat and open fire places. The mantels will be of tile and brick. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Oakland, Cal.—Residence, 2 story and base, frame, $7,000. Architect, none. Owner, R. A. McWilliams, 101 Moss Ave., Oakland. The dwelling is arranged for an eight room house with bath, sleeping porch and laundry. The interior will be finished in pine and redwood. There will be oak floors throughout except in the hall which will have a composition floor. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

Piedmont, Alameda Co., Cal.—Residence, 2 story and base, frame, $9,000. Architects, Bliss & Faville, Bailon Bldg. S. F. Owner A. A. Moore, Jr. The dwelling will contain twelve rooms, baths, sleeping porches and laundry. A garage will also be erected on the lot. The interior of the house will be finished in pine, redwood, hardwoods and white enamel. All floors will be of oak. The bath rooms will be finished in tile with composition floors. There will be a warm air heating system and open fire places. The mantels will be of tile and brick. A vacuum cleaning system will be installed. The exterior of the house will be covered with metal lath and plaster. Plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, $4,000. Architect, none. Owner, William Conroy, Northbrae, Berkeley. The dwelling will contain six rooms and bath. The interior is to be finished in pine and redwood with oak floors in the principal rooms. There will be open fire places and tile or brick mantels. A warm air system of heating is to be installed. The exterior of the dwelling will be covered with cement plaster and shakes. Plans are in the hands of the owner and he is taking figures on the work.

San Francisco—Bungalow, 1 story and base, frame, $2,500. Architect, none. Owners, Homeland Building Co., Merchants' Exchange Bldg., S. F. The dwelling will contain 6 rooms and bath. All interior finish will be of pine. Oak floors will be used in two rooms. There will be open fire places and brick mantels. The exterior of the dwelling will be covered with rustic. Plans are now in the hands of the owners and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, $4,000. Architect, A. Merrill Bowser, 1007 Broadway, Oakland. Owner, C. B. Strong. The dwelling has been designed for a seven-room house with bath, laundry and sleeping porch. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. Tile will be used in the bath and kitchen. All mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

Albany, Contra Costa Co., Cal.—Bungalow, 1 story and base, frame, $2,000. Architect, none. Owner, B. K. Denbigh, 2035 Shattuck Ave., Berkeley. The dwelling has been designed for a five-room house with bath. All interior finish will be of pine and redwood. Oak floors will be used in the dining and living rooms. There will be open fire places and tile mantels. The exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

Stockton, San Joaquin Co., Cal.—Residence, 2 story and base, frame, $4,500. Architect, Walter King, Elks' Bldg., Stockton. Owner, A. S. Munch. The dwelling has been designed for an eight-room house with baths, laundry and sleeping porch. The interior will be finished in pine, redwood and some hardwoods. All floors will be of oak. There will be furnace heat and open fire places. The mantels will be of brick. Wall beds will be used. The exterior of the dwelling will be covered with rustic. Plans are now being prepared.

Gilroy, Santa Clara Co., Cal.—Bungalow, 1 story and base, frame, $2,500. Architect, Henry L. Wilson, Capp Bldg., L. A. Owner's name not given. The dwelling will contain six rooms, bath and sleeping porch. The interior will be entirely finished in pine. Oak will be used in the floors of some of the rooms. There will be open fire places and tile or brick mantels. The exterior of the dwelling will be finished in rustic. Plans are complete and figures are being taken.

—POST OFFICES—

Santa Barbara, Santa Barbara Co., Cal.—Postoffice, 2 story and base, brick and steel, $125,000. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. A special wire has been received from the Supervising Architect at Washington, D. C., which states that Eugene Schuler, of the Northwestern Construction Co., Wahpeton, North Dakota, was low man on this work at $11,000. The second lowest bidder was presented by King Lumber Co., of Charlotteville, Va., $118,000. A contract will be awarded shortly.

RAILROAD CONST., STATIONS AND EQUIPMENT.

Pomona, Los Angeles Co., Cal.—Car barns, 1 story and base, reinforced concrete. Cost not stated. Architect, M. C. Halsey, Pacific Electric Bldg., L.

A. Owners, Pacific Electric Railway Co. The building will cover an area of 100x130 feet. A cement floor will cover the entire area. There will be metal window frames and sash. Construction will be fireproof throughout. The exterior of the building will be faced with cement plaster. Plans are being prepared.

SCHOOLS.

Haywards, Alameda Co., Cal.—School, 1 story and base, reinforced concrete, $45,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Haywards Union High School District. This building is to be used for a manual training department, and will be completely separate from the main group of buildings. A contract has just been let for the main structure. Plans for the manual training school will be completed within a few weeks and figures on the construction will be called for.

Elm Dale School District, Stanislaus Co., Cal.—School, 1 story and base, frame, $10,000. Architect, Walter King, Elks' Bldg., Stockton. Owners, Elm Dale School District. The building will be designed for a district school, and is to contain one class room. The construction will be of frame with exterior covered with rustic. Plans are now being prepared. Bids will be called within a few days.

Eagle Rock Valley, Los Angeles Co., Cal.—Dormitory, 3 story and base, reinforced concrete. Cost not stated. Architect, Myron Hunt, Hibernian Bldg., L. A. Owners, Occidental College. The building will be 40x160 feet and is intended for a girls' dormitory. There will be a reinforced concrete skeleton with hollow tile filler walls and partitions. The interior will be finished in pine. There will be steam heat. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

Los Angeles, Cal.—School, 2 story and base, brick. Cost not stated. Architect, J. Martyn Haenke, Central Bldg., L. A. Owners, Huntington School for Girls. The building will be 40x100 feet, and is to contain 12 class rooms. Besides this and the present school building, a Greek Theatre and laundry are to be built. The new building will have pine interior trim and steam heat. The exterior will be faced with cement plaster. Plans are being prepared.

Fresno, Fresno Co., Cal.—School, 1 story and base, frame. Cost not stated. Architects, Parker, Thayer and Kenyon, 241 Kearny street, San Francisco, and Forsyth Building, Fresno. Owners Wantoke School District. The building has been designed for a district school and will contain two class rooms. The exterior of the building will be covered with rustic. Plans are complete and bids are to be opened on September 11th. Plans can be secured from the architects.

STORES & OFFICE BUILDINGS.

San Francisco—Stores and offices, alterations, brick, $12,000. Architect, Willis Polk, Merchants' Exchange Bldg., S. F. Owner, Miss A. F. Martel. The present building is a two-story frame structure occupying a site at the southwest corner of Market and 8th streets. A brick exterior will be placed around the building, and the interior completely altered and modernized. Plans for the work are complete and bids are being taken.

San Francisco—Stores and lofts, 3 story and base, reinforced concrete, $60,000. Architect, David C. Coleman, Western Metropolis Bank Bldg., S. F. Owner, M. Fisher. The building will be erected at the corner of Van Ness and Pine street. The construction will be of reinforced concrete throughout. When complete the structure will be leased to an automobile firm. The interior trim will be of pine. The first floor will be of cement. The exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by the owner, who is a well known contractor.

San Francisco—Stores and offices, 12 story and base. Class A construction, $300,000. Architects, L. B. Dutton & Co., Chronicle Bldg., S. F. Owner, Charles Sweeney. This building is to occupy a site at the southeast corner of Bush and Montgomery streets, the Burke-Donahue property. It has a frontage of 120 feet on Montgomery street and 160 feet on Bush. The construction will be of the Class A type throughout. The first floor will be occupied by retail stores and the upper floors divided into modern offices. Preliminary sketches only have been prepared and details of the construction cannot be given for some time.

San Francisco—Stores and lofts, 2 story and base, brick, $16,000. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, Mrs. Ellen Otto. The building will be erected on Fremont street near Howard, and has been designed for one store and lofts. The exterior will be faced with pressed brick. There will be modern plumbing. Plans are complete and figures will be taken at once.

Oakland, Cal.—Stores and lofts, 3 story and base, brick and steel, $60,000. Architects, Woollett & Woollett, Newhall Bldg., S. F. Owner, Mrs. Moody. This building has been mentioned here before when the architects were first selected to prepare the plans. The structure will cover a considerable ground area and will contain several stores on the first floor and lofts above. There will be steam heat and elevator service. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

Portland, Ore.—Stores and offices, 10 story and base, reinforced concrete and steel. Cost not stated. Architects, MacNaughton & Raymond, Portland. Owners, Multnomah Securities Co. This building will be erected at the corner of Seventh and Morrison streets, and will cover a ground area of 50x150 feet. The construction will be of the Class A type throughout. The first floor will be arranged for stores and the upper floors for modern offices. Each of the upper floors will contain 17 offices. The mechanical equipment will include steam heat, elevator service and a vacuum cleaning plant. There will be a steel frame and exterior walls of reinforced concrete faced with pressed brick and terra cotta. All interior trim will be of metal. Plans for the work are complete and bids are being taken. Figures will be opened by the architects on September 7th.

SEALED PROPOSALS.

PROPOSALS FOR RAILROAD SUPPLIES AND CONSTRUCTION. PROPOSALS FOR SEWER WORK.

OFFICE of the Board of Public Works of the City and County of San Francisco. Sealed proposals will be received at this office between the hours of 1 o'clock p. m. and 3 o'clock p. m. on **Wednesday, the 11th day of September, 1912,** for furnishing and delivering the following material:

(1) A quantity of steel tie rods and nuts for the Geary Street Municipal Railway.

(2) A quantity of rail spikes for the Geary Street Municipal Railway.

(3) A quantity of tie plates for the Geary Street Municipal Railway.

(4) A quantity of rail bonds, preliminarily estimated at twenty-eight hundred and fifty, for the Geary Street Municipal Railway.

(5) A quantity of copper wire, preliminarily estimated at sixteen thousand, one hundred (16,100) pounds, for the Geary Street Municipal Railway.

(6) The furnishing and installing of electric power conductors and appurtenances for the Geary Street Municipal Railway.

Note: Separate bids will be received on each of the above mentioned items. For Official proposals in each of the above apply to Board of Public Works.

PROPOSALS FOR RAILROAD SUPPLIES AND CONSTRUCTION.

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on **Wednesday, the 18th day of September, 1912,** for furnishing and delivering the following material:

(1) A quantity of track specials for the Geary Street Municipal Railway.

(2) A quantity of tubular steel trolley poles, preliminarily estimated at one hundred and ten, for the Geary Street Municipal Railway.

Note: Separate bids will be received on each of the above mentioned items. For official proposals apply to the Board of Public Works.

PROPOSALS FOR CEMENT.

PORTLAND CEMENT—Department of the Interior, United States Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, 408 Commonwealth Building, Denver, Colo., until 10 o'clock a. m. **September 30, 1912,** for furnishing 260,000 barrels of Portland cement, f. o. b. cars at the works of the bidder, for shipment during the years 1913 to 1916, inclusive. The estimated requirements for each of the above years are as follows: 1913, 70,000 barrels. 1914, 85,000 barrels; 1915, 85,000 barrels; 1916, 20,000 barrels. For particulars address the U. S. Reclamation Service, 408 Commonwealth Building, Denver, Colo., or Washington D. C. F. H. NEWELL, director.

PROPOSALS FOR STEEL.

STEEL.—Sealed proposals for furnishing about 496 tons of steel for lock construction will be received at the U. S. engineer office, Seattle, Wash., until 12 m. **September 18, 1912,** and then publicly opened. Information on

application there or at the U. S. engineer office, Chicago, Ill., or Pittsburg, Pa. J. B. CAVANAUGH, major, engineers.

PROPOSALS FOR LIGHT FIXTURES.

WIRING AND LIGHT FIXTURES—Sealed proposals indorsed "Proposals for Electric Lighting System" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. **September 24, 1912,** and then and there publicly opened, for electric wiring and fixtures in new general foundry building at the navy yard, Puget Sound, Wash. Estimated cost, $2,000. Plans and specifications can be obtained on application to the bureau or to the commandant of the navy yard named. WM. M. SMITH, acting chief of bureau.

PROPOSALS FOR REINFORCING BARS.

REINFORCING BARS—Department of the Interior, U. S. Reclamation Service, Montrose, Colo. Sealed proposals will be received at this office until 1 p. m. **September 16, 1912,** for furnishing 3,360 pieces round deformed reinforcing bars to conform to standard specifications for concrete reinforcement bars adopted in 1910 by the Association of American Steel Manufacturers. C. T. PEASE, engineer.

PROPOSALS FOR PIPING AND RADIATORS.

PIPING AND RADIATORS—Sealed proposals indorsed "Proposals for Heating System and Piping" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. **September 28, 1912,** and then and there publicly opened, for hot water piping and radiators and water and compressed air piping in the new general foundry, navy yard, Puget Sound, Wash. Estimated cost, $5,000. Plans and specifications can be obtained on application to the bureau or to the commandant of the navy yard named. WM. M. SMITH acting chief of bureau.

PROPOSALS FOR ELEVATOR.

ELEVATOR—Sealed proposals indorsed "Proposals for hydropneumatic Elevator" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. **September 21, 1912,** and then and there publicly opened, for a hydropneumatic elevator in the foundry at the navy yard, Puget Sound, Wash. Plans and specifications can be obtained on application to the bureau or to the commandant of the navy yard named. WM. M. SMITH acting chief of bureau.

NOTICE TO CONTRACTORS.

SEALED bids will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, **Friday, September 20, 1912,** said bids then and there to be publicly opened and read for Physician's Cottage No. 2 Southern California State Hospital at Patton, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Bids will be received as a whole, or in sub-divisions as follows:

FIRST—For the Entire Work.

SECOND—For the Mason Work.

THIRD—For the Carpenter and Mill Work.

FOURTH—For the Finish Hardware.

FIFTH—For the Metal Furring, Lathing and Plastering.

SIXTH—For the Painting, Staining and Glazing.

SEVENTH — For the Plumbing, Sewers and Gas Fitting.

EIGHTH—For the Electric Wiring.

A certified check in the sum of ten per centum (10%) of the amount of bid must accompany each bid.

A deposit of Fifteen Dollars ($15.00) will be required on plans and specifications.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, Cal.

(Signed) W. F. McCLURE,
State Engineer.

SEWERS, STREET WORK AND WATER SYSTEMS.

Angel Island, San Francisco Bay— Reservoir, reinforced concrete, $7,000. Engineers, Pierre Zucco & Co., 166 Geary St., S. F. Owners, United States Government. Plans have been approved for the construction of a reinforced concrete reservoir 10 feet high and 75 feet in diameter, having a capacity of 300,000 gallons. The Hennebique system has been used. Plans are complete and have been placed in the hands of the Commissioner of the Department of Commerce and Labor at Angel Island. Bids will be called for shortly.

San Francisco—Power station, 1 story and base, reinforced concrete and steel, $100,000. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, Union Iron Works. This work has been fully described in these columns before. All bids are in and a contract will be awarded within a few days.

Tulare, Tulare Co., Cal.—Water system, pumping station and pipe lines, $100,000. Engineers, Sloan & Robson, Nevada Bank Bldg., S. F. Owners, City of Tulare. Plans for the construction of a municipal water system have been approved. A bond issue will be called to raise the funds for construction on September 17th. The plans include a pumping station and pipe lines. Complete details will be given in the next issue of the Building and Industrial News.

Firms desiring news from certain localities like San Francisco, Los Angeles Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—3 story and base, frame, $20,000. San Francisco. Architect, none. Owner, J. Pasqualetti, Humboldt Bank Bldg., S. F. The building is to be erected on a corner lot and is to cover a considerable ground area. The plans provide for 12 apartments each of which will contain 3 and 4 rooms besides the bath. The interior is to be finished in pine with some hardwood floors. There will be steam heat and wall beds. The exterior of the building will be covered with veneered pressed brick and cement plaster on metal lath. Plans are in the hands of the owner and bids are being taken both as a whole and segregated.

Apartment House—3 story and base, brick and steel, $20,000. San Francisco. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on an inside lot and will be arranged for thirty rooms, which are to be divided into two and three room apartments. There will be connecting baths, wall beds and steam heat. The interior will be finished in pine throughout. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

Apartment House—3 story and base, frame, $10,000. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, Mrs. Ellen Otto. The building will contain six small apartments which have been arranged in suites of three and four rooms each. The equipment will require wall beds and a central heating system. The interior will be finished in pine throughout. All apartments will have connecting baths. The exterior of the building will be covered with shiplap. Plans are complete and the architects are taking figures on the work.

Apartment House—4 or 5 story and base, brick and steel. Cost not given. San Francisco. Architect, John Ettler, 604 Mission St., S. F. Owners, Bothis Estate. Plans for the building to be erected at this time provide for a one story and basement structure which will be arranged for stores. All walls and foundations have been designed to carry additional stories which will be subdivided into apartments of two, three and four rooms each. Construction of the additional stories will be undertaken within a short time.

Residence—2 story and base, frame. Cost not stated. San Francisco. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, H. S. Heller. The dwelling has been designed for an eight-room house with bath and laundry. There will be furnace heat and open fire places. The interior finish is to be of pine and redwood with oak floors throughout. A general contract has been awarded and the contractor, E. A. Janssen, Hearst Bldg., S. F., is now taking sub-figures on all parts of the work.

Residence—2 story and base, frame, $3,000. San Francisco. Architect, none. Owner, F. Balstrieri, 7 Card Alley. The dwelling will contain seven rooms and bath. The interior finish will be of pine throughout. Oak will be used in the floors of several of the rooms. There will be open fire places with tile mantels. The exterior of the house will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

Residences—2, 2 story and base, frame, $4,000 and $5,000 each. San Francisco. Architect, none. Owner, E. N. Fritz, 1401 Masonic Ave., S. F. Each of these dwellings will contain seven and eight rooms with baths and laundry. The interiors will be finished in pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick and tile. Bath room floors will be composition. The exteriors of both houses will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, $2,500. San Francisco. Architect, none. Owners, Homeland Building Co., Merchants' Exchange Bldg., S. F. The dwelling will contain six rooms and bath. All interior finish will be of pine. Oak floors will be used in two rooms. There will be open fire places and brick mantels. The exterior of the dwelling will be covered with rustic. Plans are now in the hands of the owners and the work will be done by Day Labor.

Factory—4 story and base, steel and concrete. Cost not stated. San Francisco. Architect, William Knowles, Hearst Bldg., S. F. Owners, Ford Motor Car Co. This work has been mentioned here several times before when plans were first being prepared. The engineer has completed all of the work and the plans have received the official approval of the owners. Bids for the construction will be called for within two weeks.

Warehouse—1 story and base, brick and steel, $4,000. San Francisco. Architect, August Noreiin, Mills Bldg., S.

F. Owners, George Brown Estate. The building will cover a ground area of 40x80 feet. There will be a cement floor, metal sash and window frames and fire doors. The exterior will be faced with stock brick. Plans have been out for figures and a contract will be awarded at once.

Flats—2 story and base, frame, $5,000. San Francisco. Architects, Smith & O'Brien, Humboldt Bank Bldg., S. F. Owner, J. J. Leonard. The building is to be erected on Dolores street and will contain two modern flats of five and six rooms each. The interiors will be finished in pine and redwood with some oak floors. There will be open fire places and brick mantels. The exterior of the building will be covered with shiplap and rustic. Plans are complete and the work will be done by Day Labor.

Garage and Sales Rooms—2 story and base, reinforced concrete, $90,000. San Francisco. Architects, MacDonald & Applegarth, Call Bldg., S. F. Owner, Paul Bancroft. The building, which is to be erected at the southeast corner of Van Ness avenue and Sutter street, will cover a large area and has been leased to an agency for a long term of years. There will be large and handsomely finished offices and sales rooms besides a large repair shop and storage space. The construction will be fire proof throughout. The exterior of the building will be faced with cement plaster. The architects are now preparing the working drawings.

Garage and Sales Rooms—3 story and base, reinforced concrete $80,000. San Francisco. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owner, Melville G. Topeltz. The building will be erected at O'Farrell and Van Ness and is to cover a site 60x120. The construction throughout will be fireproof with cement floors and metal trim. The first floor has been arranged for offices and sales rooms. Storage space and a repair shop will occupy the upper two floors. There will be steam heat and elevator service. The exterior will be faced with cement plaster. Plans are being prepared. A lease for the entire structure has been signed with the Cadillac Pacific Agency.

Garage and Lofts—4 story and base, reinforced concrete and steel, $65,000. San Francisco. Architect, Herman Barth, 12 Geary St., S. F. Owner, William Goeggel. This building has been mentioned here before. The structure will be erected at Van Ness and Bush street. Plans have been prepared and are now out for figures. The structure has been arranged for the special needs of the automobile business. The exterior will be faced with cement plaster.

Garage—2 story and base, reinforced concrete, $35,000. San Francisco. Architect, William Helbing, 1420 Market St., S. F. Owners, Dow and Green. This work has been mentioned here before when the owners applied for a permit. This permit has now been granted and construction will be started at once. The building will cover a large ground area with two entrances from the streets, front and rear. The rear entrance will be on a level with the second floor. Construction will be fireproof. The exterior of the building will be faced with cement plaster. The work will be carried on by Mr. Young, who is taking subfigures.

Halls and Stores—4 or 5 story and base, brick and steel, $75,000. San Francisco. Architect, Frederick H. Meyer, Bankers Investment Bldg., S. F. Owner, Hillbush Silverberg. The building is to be erected at the corner of Powell and Sutter streets and has been designed for a number of clubs, the principal occupant being the San Francisco Press Club, which will occupy two entire floors. There will be several stores on the first floor. The interior of the Pess Club rooms will be handsomely fitted up. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

General Finishing Construction — $156,000. San Francisco. Architectural Dept., Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractor, Grant Fee, S. F. Contract price, $156,000. For a complete list of these figures see under Bids Opened, San Francisco.

Hotel—6 story and base, brick and steel, $40,000 San Francisco. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owner, T. G. Walker Co. The building is to be erected in the north line of Turk street near Jones, and will contain in the neighborhood of 100 rooms and baths. There will be steam heat, elevator service and running water. The interior will be finished in pine and redwood. The exterior of the building will be faced with pressed brick. Preliminary plans only have been prepared.

Hotel—7 story and base, brick and steel, $50,000. San Francisco. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Stewart Estate Co. The building will be erected on Geary street near Mason, and will contain a large number of guest rooms, all of which will have connecting baths and hot and cold running water. There will be steam heat and elevator service. The interior will be finished in pine and redwood with some marble. The construction will be of brick with the exterior faced with pressed brick trimmed with terra cotta. Plans for this work are being prepared

Hotel—7 story and base, brick and steel, $60,000. San Francisco. Architects, C M and A F Rousseau, Monadnock Bldg., S F Owner's name withheld. The building will be 60x87 feet, and will contain 85 rooms, all of which will have connecting baths. Plans provide for running hot and cold water, elevator service and steam heat. A vacuum cleaning system will also be installed. The interior of the building will be faced with pressed brick and terra cotta. Plans for the work are nearly complete.

Hotel—6 story and base, brick and steel, $60,000. San Francisco. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owners, Dr. Crane and Dr. W. J. Yore. The building will cover a site 48x90 feet with an L 22x22 feet. The interior has been arranged for 90 rooms and 90 baths. Four stores will be located on the first floor besides the main offices and lobby. There will be steam heat and elevator service. Running hot and cold water has been provided for all rooms. About 30 of the rooms will be equipped with wall beds. The interior of the lobby will be finished in hardwoods and marble. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Hotel—6 story and base, brick and steel, $75,000. San Francisco. Architects, Smith & Stewart, 244 Kearny St., S. F. Owners, Broad Realty Co. The building will be erected at the corner of Jones and Ellis streets, and will contain in the neighborhood of 100 rooms, all with private baths. The lot is 55x87 feet. Both street frontages will be subdivided for retail stores, two on one street and one on the other. The first floor will also contain the lobby. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are being prepared and will be ready for figures in about three weeks.

Reservoir—Reinforced concrete, $7,000. Angel Island, S. F. Bay. Engineers, Pierre Zucco & Co, 166 Geary St., S. F. Owners, United States Government. Plans have been approved for the construction of a reinforced concrete reservoir 10 feet high and 75 feet in diameter, having a capacity of 300,000 gallons. The Hennebique system has been used. Plans are complete and have been placed in the hands of the Commissioner of the Dept. of Commerce and Labor at Angel Island. Bids will be called for shortly.

Power Station—1 story and base, reinforced concrete and steel, $100,000. San Francisco. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, Union Iron Works. This work has been fully described in these columns before. All bids are in and a contract will be awarded within a few days.

Stores and Offices, Alterations—Brick, $12,000. San Francisco. Architect, Willis Polk, Merchants' Exchange Bldg., S. F. Owner, Miss A. F. Martel. The present building is a two-story, frame structure occupying the site at the southwest corner of Market and 8th streets. A brick exterior will be placed around the building and the interior completely altered and modernized. Plans for the work are complete and bids are being taken.

Stores and Lofts—3 story and base, reinforced concrete, $60,000. San Francisco. Architect, David C. Coleman. Western Metropolis Bank Bldg., S. F. Owner, M. Fisher. The building will be erected at the corner of Van Ness and Pine street. The construction will be of reinforced concrete throughout. When complete the structure will be leased to an automobile firm. The interior trim will be of pine. The first floor will be of cement. The exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by the owner, who is a well known contractor.

Stores and Offices—12 story and base. Class A construction, $300,000. San Francisco. Architects, L. B. Dutton & Co., Chronicle Bldg., S. F. Owner, Charles Sweeney. This building is to occupy a site at the southeast corner of Bush and Montgomery streets—the Burke-Donahue property. It has a frontage of 120 feet on Montgomery street and 160 on Bush. The construction will be of the Class A type throughout. The first floor will be occupied by retail stores and the upper floors divided into modern offices. Preliminary sketches only have been prepared and details of the construction cannot be given for some time.

Stores and Lofts—2 story and base,

brick, $16,000. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, Mrs. Ellen Otto. The building will be erected on Fremont street near Howard, and has been designed for one store and lofts. The exterior will be faced with pressed brick. There will be modern plumbing. Plans are complete and figures will be taken at once.

City Bids Opened.

Grant Fee Will Be Awarded The Contract For General Finishing Construction at Hospital.

Ten firms presented figures for the general finishing construction on the San Francisco Hospital at the meeting of the Board of Public Works held in the Temporary City Hall, Wednesday afternoon. Grant Fee's bid of $156,000 was low and he will be awarded the work. All figures ran exceptionally close considering the size of the job. The following is a complete list of the figures as opened:

Neil A. McLean	$159,600
William Bateman	165,900
McSheehy Bros.	173,992
William Bros. & Henderson	162,000
Grant Fee	156,000
J. W. Carr	177,949
Charles Wright	157,500
Van Franz	179,400
Lange & Bergstrom	172,000
Lindgren & Co.	179,000

OAKLAND AND ALAMEDA COUNTY.

Apartment House—3 story and base, frame, $20,000. Berkeley, Alameda Co., Cal. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, Dr. J. J. Benton. Plans for this building are now complete and provide for three stores on the first floor and sixteen apartments of three rooms and bath each on the upper floors. All interior finish will be of pine. Some oak floors will be used. There will be a central heating system and wall beds. The exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the architects are taking figures on the work.

Apartment House—3 story and base, frame, $35,000. Berkeley, Alameda Co., Cal. Architect, J. Cather Newsom, Monadnock Bank Bldg., S. F. Owner, J. Cather Newsom. The building has been arranged for 36 apartments with wall beds, connecting baths and all other modern conveniences. The interiors of all apartments will be finished in pine with oak floors. There will be steam heat. The exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared and will be ready for figures within a short time.

Apartment House—3 story and base, frame, $30,000. Oakland, Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. This building will be erected in the Lake District and has been arranged for 27 apartments of two and three rooms each. The equipment calls for wall beds and private baths. There will be steam heat. The interior will be finished in pine and redwood. Oak floors will be used in the living room of each apartment. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

Bridge—Reinforced concrete, $35,-000. Oakland, Cal. Engineer, City Engineer, P. F. Brown, City Hall Annex, Oakland. Owners, City of Oakland. At a recent meeting of the City Council the long delayed project of a suitable bridge over the Estuary at eighth street was taken up and an appropriation of $35,000 was made. The city Engineer has started the working drawings and within the next few weeks bids for the construction will be called.

Bungalow—1 story and base, frame, $2,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, Henry Ahnefeld, 3005 King St., Berkeley. The dwelling will contain six rooms and bath. The interior will be finished in pine and redwood with oak floors in the dining and living rooms. There will be open fire places and brick mantels. Tile will be used in the bath and kitchen. The exterior of the bungalow will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $2,300. Oakland, Cal. Architect, none. Owner, G. W. Eliassen, Security Bank Bldg., Oakland. The house has been designed for a seven-room dwelling with bath, sleeping porch and laundry. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be open fire places and brick or tile mantels. The exterior of the house will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

Bungalow and Garage—1 story and base, frame, $4,000. Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, Paul McMullen. The house will contain seven rooms, sleeping porch, bath and laundry. The interior will be finished in pine with hardwood floors throughout. Composition flooring will be used in the bath room. There will be furnace heat and open fire places. The mantels will be of pressed brick. The exteriors of both house and garage will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Bungalow—1 story and base, frame. Cost not stated. Oakland, Cal. Architect, none. Owners, Junk-Riddell Co., Berkeley National Bank Bldg., Berkeley. The dwelling will contain six rooms and bath. The interior trim will be of pine and redwood. Oak will be used in the floors of the principal rooms. There will be open fire places and tile or brick mantels. Tile will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster. Plans are complete and the work is to be done by Day Labor.

Residences—1, 2 story and base, frame, $4,500 each. Oakland, Cal. Architect, none. Owner, J. M. Wiley, 1718 Hearst Ave., Berkeley. Each of these dwellings has been designed to contain six rooms bath and sleeping porch. The interiors will be finished in pine, redwood and veneered hardwoods. The floors of the principal roms will be of oak. Composition flooring will be used in the bath rooms. There will be furnace heat and open

fire places. The mantels will be of tile and brick. All exteriors will be covered with cement plaster on metal lath. Plans are being completed and the work will be done by Day Labor.

Bungalows—3, 1 story and base, frame, $2,500 each. Oakland, Cal. Architect, A. J. Mazurette, 1520 Broadway, Oakland. Owner, Roger Coit. Each of the bungalows has been designed for a five-room house with bath. The interiors will be finished in pine throughout. Oak will be used in the floors of some of the rooms. There will be open fire places and tile and brick mantels. The exteriors of the dwellings will be covered with cement plaster and shingles. Plans are being prepared and when complete the work will be done by Day Labor.

Residence—2 story and base, frame, $6,500. Oakland, Cal. Architect, Claude B. Barton, Security Bank Bldg., Oakland. Owner, A. W. Baker This dwelling will be erected at Adams Point and will contain ten rooms, baths, sleeping porch and laundry. The interior will be finished in pine, redwood and hardwoods. Oak will be used for the floors in the principal rooms while all baths will have composition flooring. There will be a hot water heating system and open fire places. The mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor

Residence—2 story and base, frame, $5,000. Oakland, Cal. Architect, A. W. Smith, 1010 Broadway Oakland Owner, C. E Quigley. The dwelling has been designed for a seven-room house with bath, sleeping porch and laundry. The interior will be finished in pine and redwood. Oak will be used in the floors except the bath room, which will have a composition floor. There will be furnace heat and open fire places. Tile will be used in the bath and kitchen. Mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $7,500. Oakland, Cal. Architect, none. Owner, I. W. Button, 5030 Telegraph Ave., Oakland. The dwelling will contain seven rooms and bath. SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

Residence—2 story and base, frame, $4,500, Stockton, San Joaquin Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owner, A. S. Munch. The dwelling has been designed for an 8-room house with baths, laundry and sleeping porch. The interior will be finished in pine, redwood and some hardwoods. All floors will be of oak. There will be furnace heat and open fire places. The mantels will be of brick. Wall beds will be used. The exterior of the dwelling will be covered with rustic. Plans are now being prepared.

Hotel—7 story and base. Class A construction, $250,000. Sacramento, Cal. Architects, Cuff & Diggs, Elks' Bldg., Sacramento. Owners, Travelers' Hotel Company. The architects have completed the working drawings for the new Travelers' Hotel which is to be erected at the southwest corner of Fifth and J streets, Sacramento, at a cost of approximately $250,000. Blue prints are now being made and will be distributed among the contractors as rapidly as possible. The building is to be a seven-story and basement Class A structure having a frontage of 80 feet on one street and 160 feet on the other street. The location of the new Travelers' Hotel is regarded as most favorable, being in the heart of the business district and within a short distance of the new proposed Southern Pacific station, the City and County and State buildings. When completed the new hotel will be under the management of Mr. Flanigan, one of the best known hotel men in the west, and now managing the Land Hotel at Sacramento. The new Travelers' Hotel will contain 210 guest rooms, all but 40 of which will have private baths. These 40 rooms will be arranged so that they may be thrown into suites with baths. Besides a large and spacious office and lobby the first floor will contain ten stores. A cafe, grill room and sample rooms will occupy most of the basement. Sample rooms will also be located on the mezzanine floor. The lobby will be finished in mahogany, marble and Caen stone. Two public fountains, one on J street and one on Fifth street will be installed. The mechanical equipment of the building will include steam heat, elevator service, cooling plant and a vacuum cleaning system. Plans provide for a complete steel frame with curtain walls of brick, hollow tile partitions, concrete floors and stairs. The exterior of the building will be faced with pressed brick probably the Sacramento Sand Lime Brick

LOS ANGELES AND SOUTHERN CALIFORNIA.

Apartment House—3 story and base brick and frame, $25,000. Los Angeles, Cal. Architect, Los Angeles Investment Co., 335 So. Hill St. L. A. Owner, L. Weston. The building will be 56x10 feet and will contain 24 two-room apartments, which will be equipped with wall beds and private baths. There will be steam heat and electric cooking stoves. The exterior of the building will be faced with pressed brick and cement plaster. Plans are now being prepared.

Church—Brick construction, $60,000. Long Beach, Los Angeles Co., Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, First Congregational Church of Long Beach. The new building will cover a ground area of 100x150 feet. There will be a main auditorium with a seating capacity of 1200 people besides Sunday school rooms, pastor's study, library and rooms to be devoted to social uses. The exterior of the building will be faced with pressed brick. Plans have just been started for this work.

Garage—2 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, Mrs. Susan H. Van Nuys. The building will be 53x145 feet. First and second floors will be of cement. There will be metal trim and hardwood. Steel rolling shutters will be used. The exterior of the building will be faced with glazed terra cotta. Plans are complete and figures are being taken.

Hospital Cottage, Etc.—Frame construction. Cost not stated. Patton, Los Angeles Co., Cal. Architect, State Dept. of Engineering, Sacramento. Owners, State of California. Plans for a large amount of work, which is to be done at the State Hospital at Patton, have been completed. The work includes several cottages and extensive alterations and additions to the present buildings. Plans and specifications for this work are on file at the office of the Building and Industrial News. For the official proposals see under Sealed Proposals in this issue. Bids for the above work will be opened on September 20th.

Hotel—1 story and base, brick, $75,000. Los Angeles, Cal. Architect, J. E. Frary, Trust Savings Bldg., L. A. Owner, D. E. Hill. The building will be 60x155 feet. The first floor has been arranged for a large spacious lobby and two stores. One hundred guest rooms and fifty baths have been planned for the three upper floors. There will be steam heat and elevator service, a vacuum cleaning system and hot and cold running water. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

Hotel—1 story and base reinforced concrete, $50,000. Los Angeles, Cal. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owner, Frank R. Tousley. The building will cover an area of 27½x100 feet. There will be 50 guest rooms and 10 baths. All rooms will be supplied with hot and cold running water. There will be an automatic elevator and steam heat. The construction is to be entirely of reinforced concrete. Interior partitions will be of metal lath and plaster. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Hotel and Stores—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, E. C. Thorne, Realty Board Bldg., L. A. Owner, I. I. Desail, 246 East 1st St., L. A. The building is to cover an area of 100x109 feet and has been arranged for six stores on the first floor and 132 rooms with 12 baths on the upper three floors. There will be elevator service, steam heat and fire escapes. Running hot and cold water has been provided for all rooms. The exterior of the building will be faced with pressed brick. Plans are in the hands of the owner and he is letting subcontracts for all parts of the work.

Apartment House—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architects, W. J. Sircy, I. W. Hellman Bldg., L. A. Owner, H. J. McElroy. The building will contain 60 rooms, which are to be subdivided into suites of two rooms and bath each. The interior of all apartments will be finished in pine. There will be steam heat and elevator service. Wall beds will be used in all bed rooms. The exterior of the building will be covered with cement plaster trimmed with artificial stone. Plans are complete and bids will be called for at once.

Church—1 story and base, brick and frame, $80,000. San Diego, Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, First Baptist Church of San Diego. This work has been mentioned here before when the architect was first commissioned to prepare the plans. The new edifice will cover a ground area of 100x150 feet, and has been designed in the Spanish Mission style. The exterior will be finished in cement plaster with a clay tile roof. There will be a modern system of heating and ventilating. Plans are complete and figures are being taken.

Factory—1 story and base, concrete and frame. Cost not stated. Los Angeles, Cal. Architect, none. Owners, Moreland Motor Truck Co, Main and Wilhardt Sts., L. A. Plans for a large addition to the company's plant have been prepared by the Engineering Department, and construction will be started at once. The addition will cover an area of 250x187 feet and will have a concrete foundation with frame superstructure. The work will be done by Day Labor.

Postoffice—2 story and base, brick and steel, $125,000. Santa Barbara, Santa Barbara Co., Cal. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. A special wire has been received from the Supervising Architect at Washington, D. C., which states that Eugene Schuler, of the Northwestern Construction Co., Walpeton, North Dakota, was low man on this work at $115,000. The second lowest figures were presented by the King Lumber Co., of Charlottesville, Va., $118,000. A contract will be awarded shortly.

Car Barns—1 story and base, reinforced concrete. Cost not stated. Pomona, Los Angeles Co., Cal. Architect, M. C. Halsey, Pacific Electric Bldg., L. A. Owners, Pacific Electric R. R. Co. The building will cover an area of 100x130 feet. A cement floor will cover the entire area. There will be metal window frames and sash. Construction will be fireproof throughout. The exterior of the building will be faced with cement plaster. Plans are being prepared.

Dormitory—3 story and base, reinforced concrete. Cost not stated. Eagle Rock Valley, Los Angeles Co., Cal. Architect, Myron Hunt, Hibernian Bldg., L. A. Owners, Occidental College. The building will be 40x160 feet and is intended for a girls' dormitory. There will be a reinforced concrete skeleton with hollow tile filler walls and partitions. The interior will be finished in pine. There will be steam heat. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

School—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, J. Martyn Hjenke, Central Bldg., L. A. Owners, Huntington School for Girls. The building will be 10x100 feet, and is to contain 12 class rooms. Besides this and the present school building a Greek Theatre and laundry are to be built. The new building will have pine interior trim and steam heat. The exterior will be faced with cement plaster. Plans are being prepared.

Contracts Awarded.

Apartment House—3 story and base, brick, $25,000. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owner, Andrew Anderson. Contractor, J. A. Weddle, 341 West 51st St., L. A. Contract price, $22,896.

So., Broadway, L. A. Contract price not stated.

Hotel and Stores—4 or 5 story and base, brick and steel, $125,000. Los Angeles, Cal. Architect, none. Owner, George A. Ralphs, 514 So. Spring St., L. A. Contractor, F. O. Jean, 492 Ardmore Ave., L. A. Contract has been taken on the percentage basis. The building will contain a number of stores and 150 guest rooms.

PORTLAND AND OREGON.

Factory—3 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architects, Doyle, Patterson & Beach, Worcester Bldg., Portland. Owners, Ford Motor Car Co. This is the third building for the same owners which is to be erected on the Pacific Coast this year. The structure will cover an area of 80x300 feet and is to be used as an assembling plant. Construction will be fireproof. Plans are complete and the architects are taking figures.

Stores and Offices—10 story and base, reinforced concrete and steel. Cost not stated. Portland, Ore. Architects, MacNaughton & Raymond, Portland. Owners, Multnomah Securities Co. This building will be erected at the corner of Seventh and Morrison streets, and will cover a ground area of 50x100 feet. The construction will be of the Class A type throughout. The first floor will be arranged for stores and the upper floors for modern offices. Each of the upper floors will contain 17 offices. The mechanical equipment will include steam heat, elevator service and a vacuum cleaning plant. There will be a steel frame and exterior walls of reinforced concrete faced with pressed brick and terra cotta. All interior trim will be metal. Plans for this work are complete and bids ae being taken. Figures will be opened by the architects on September 7th.

SEATTLE AND WASHINGTON.

Apartment House—6 Story and double base, reinforced concrete, $100,000. Seattle, Wash. Architects, Blackwell & Baker, Northern Bank Bldg., Seattle. Owner, H. S. Amon. This building is to be erected at an important corner and will cover an area of 60x120 feet. The interior has been arranged for apartments varying in size from two to four rooms, all of which will have wall beds, private baths and modern equipment. There will be steam heat, elevator service and a vacuum cleaning system. The construction is to be of reinforced concrete throughout with the exterior walls faced with pressed brick. Plans are complete and figures are being taken.

Lodge Hall and Stores—7 or 9 story and base. Class A construction, $200,000. Seattle, Wash. Architect, John Carrigan, Oriental Bldg., Seattle. Owners, Elks' Hall Association. The basement and sub-basement will contain a gymnasium, Turkish baths, bowling alleys, etc. The 4th avenue frontage will be given over to stores. The plans provide for 51 hotel rooms, large banquet hall, ladies' reception and private parlors and dining rooms. The lodge room, situated on the top floor, will have a seating capacity of 900 and will be provided with a stage having all modern appurtenances. The roof will be so constructed as to be turned into an elaborate roof garden later. The building will be in the French Renaissance style of architecture. The building will be 60x111 feet, strictly fireproof and faced with copper, brick and terra cotta. Bids will be opened on September 18th, and should be addressed to President George W. Stetson.

Bids Opened For Highway Work.

Figures on Six Sections of State Highway Are Opened. Bidders Represent Eight Cities.

Forty-three bids for the construction of six sections of the $18,000,000 State highway system, aggregating 55½ miles, have been opened by the State Highway Commission.

The cost of construction of these sections, according to State Highway Engineer Fletcher's estimate, ranges from $45,490 for mastic surfacing to $313,762 for oil surfacing. On one section bids for bituminous gravel surfacing were also asked for.

The six sections for which bids were received are in Stanislaus, Merced, Madera, Fresno and San Diego counties, and embrace parts of the valley route from Sacramento to Los Angeles, and of the coast route from San Francisco to San Diego.

There were twenty different bidders, representing eight cities. Awards will be made in a few days.

The following were the low bidders in each of the sections.

Stanislaus County, 11.07 Miles.

O. McDonald, Livermore, Mastic, $68,664.15.

Worswick Street Paving Co., Fresno, Oil Surfacing, $57,773.50.

Merced County, 9.6 Miles.

O. McDonald, Livermore, Mastic, $61,471.30.

Worswick Street Paving Co., Fresno, Oil Surfacing, $50,343.50.

San Diego County, 8.6 Miles.

M. L. Curtis & Co., South Pasadena, Mastic, $70,133.47; Oil Surfacing, $49,434.80.

Fresno County, 9.6 Miles.

California Road and Street Improvement Co., Fresno, Oil Surfacing, $50,595.35.

Worswick Street Paving Co., Fresno, Mastic, $60,642.10.

Madera County, 9.9 Miles.

Burns, Clark & Daroza, San Francisco, Bit. Gravel, $60,023.50.

Worswick Street Paving Co., Fresno, Mastic, $64,535.50; Oil Surfacing, $45,557.50.

THE PETROLEUM INDUSTRY.

Increasing and Diversified Use of Oil for Power and Manufacturing.

Since the beginning of the oil industry in the United States over two and a half billion barrels have been produced, and the total value of the oil, reckoned in the crudest condition at the mouth of the well, is over two billion dollars. More than half of this oil has come from New York, Pennsylvania, West Virginia and Ohio, and has been produced in two years over half a century. In the first half of this period nearly the entire product came from the eastern fields, but lately the declining production of he Easten States base been more than compensated by the enormous output in the West, so that the total product of the United States 972,429,805 barrels have been produced west of the Mississippi River, and at this time the Midcontinent and California fields are the controlling influences in the oil production of this country. If a line is drawn across Ohio separating its eastern oil areas from the Lima area and the Lamt oils

are included in the western production then the West already exceeds the East in the total produced.

The annual report of the United States Geological Survey on the production of petroleum, compiled by David T. Day, shows that for 1911 California not only led in quantity of product (over 80,000,000 barrels) but produced almost half as much again as Oklahoma, the State second in rank. The Midcontinent field omitted, California produced as much oil as the rest of the United States put together; the United States being omitted, California produced more oil than any entire nation; and if Russia and the United States are omitted, California far surpassed the combined production of all the rest of tre world, including, Mexico, India, Roumania, Galicia, Japan, and South America.

The rank of the States is easily remembered when one recognizes California, Oklahoma and Illinois as forming a class by themselves, the lowest (Illinois) producing over 30,000,000 barrels and the three furnishing three-fourths of the entire output. The second group includes Louisiana, West Virginia, Texas, Ohio and Pennsylvania, in which Louisiana furnishes a surprise by yielding the greatest product on record for that State (over 10,000,000 barrels) and passing to the head of this group, while the slight gain from two pools in Texas put that State in advance of Ohio again. In the third group, comprising Indiana, Kansas, New York, Kentucky, Colorado, Wyoming, Missouri, Utah and Michigan, the largest state production is less than a fourth of the lowest in the second group, and combined these States produced less than 2.2 per cent of the total.

The changes which may be expected in 1912 may advance the rank of West Virginia by the development of the Blue Creek pool, Kansas may change places with Indiana, and Wyoming may head the third group.

Increased Use of Fuel Oils.

The most important feature developed by the oil industry of 1911 has been the realization of a supply of fuel oil large enough to be reckoned on as a national asset in the production of power. During 1910 arguments became convincing that fuel oil was sufficiently plentiful on the Pacific coast to justify great trade and manufacturing expansion in California, and indeed the adoption of oil as fuel on the northern transcontinental railroads for significant portions of their lines and the introduction of oil as fuel as far north as Alaska, without bringing the consumption up to the level of present production, has given assurance of permanency of the supply sufficient for the industrial needs of the whole Pacific slope.

The solution of the corresponding problem on the Atlantic coast received much encouragement in 1911 by the great development of oil supplies in Mexico. The quantity of oil which the Mexican fields are now ready to furnish is variously estimated at 6,000,000 to 12,000,000 barrels a month. The total output of 1911 was perhaps a tenth as much, the production being limited not by supply or demand but by transportation facilities. The needed tank steamers are being furnished as rapidly as they can be built, and meantime the popularity which fuel oil has obtained has already led to a doubling of its market price.

It should be borne in mind, however, that if there were tank steamers sufficient for all the oil that can now be furnished for the east coast, the market would probably be temporarily oversupplied. The consumers of fuel require time for the substitution of oil for coal, though the many advantages of oil are obvious.

Oil on Railroads.

Railroad consumption of fuel oil is especially popular because it gives added comforts to travel owing to the freedom from coal cinders, because it avoids the danger of forest fires, and particularly because it makes a saving in labor. In fact, until coal can be replaced by oil the weight of trains on mountain divisions is limited by the endurance of the fireman. In recommending the adoption of fuel oil on the mountain divisions of the Canadian Pacific Railway, William White, second vice-president, states that one of the reasons for this change is the removal of danger from conflagrations in the great forests of British Columbia. He also alludes to the failure of the immense locomotives now in use, saying: "It is not the failure of the locomotives; it is the failure of the fireman." A fireman shoveling coal on one of these locomotives for a distance of 130 miles is physically exhausted before getting to the end of the run. The Southern Pacific Co. uses over 1200 oil-burning locomotives, the Santa Fe over 800, the Northern Pacific 20, and the Great Northern 115.

It is estimated that nearly 50,000,000 barrels of the California oil in 1912 was used for fuel. The Texas and Louisiana fuel oil is estimated at 9,000,000 barrels, much of which was in the form of residues, after light distillates were taken off. In the Midcontinent field also crude oil as fuel is fast giving place to these "topped" oils. Of this material about 2,000,000 barrels was consumed. Little oil from the eastern fields finds use as fuel, because the heavy residuum is valuable for manufacture into lubricants, paraffin wax, etc. In nearly all 62,000,000 barrels were probably consumed as fuel oil in 1911 in the United States; a fair estimate of the consumption for the preceding year is 61,000,000 barrels, the increase showing a growing appreciation of oil as fuel.

Used by United States Navy.

In the use of fuel oil for water navigation the advance in 1911 was world wide.

Experience with fuel oil in the United States Navy has been so satisfactory that its use will be extended as rapidly as is permitted by considerations of supply and cost. Already the Navy has 19 torpedo boat destroyers that burn oil and 8 battleships that burn oil as auxiliary to coal. The battleships Nevada and Oklahoma, now under construction, will burn oil exclusively.

During the year 1911 the Navy used 15,000,000 gallons of fuel oil, and it is estimated that the consumption for the present year will be 21,000,000 gallons.

Oil in Smelting.

California crude oil has been used for some time in reverberatory furnaces at McGill, Nev., and Cananea, Mexico. Early in 1911 arrangemtnts were made for the use of oil in the

Wesco
Cold Water Paint

The most economical paint on the market. When you buy it you pay only for **paint** and not for high priced oils. Can be used on exterior and interior surfaces. Does not turn yellow with age. **Wears well,** looks well.

Wesco Concrete Paint

The **best** paint to use on damp places. It sticks where others fall off. Is sanitary and does not decompose or decay. Fine for factories and buildings where there is loose steam and damp vapors.

Both Paints Come In All Colors. Send For Samples.

WYBRO IN THE GOLDBERG MANSION.

Architect Milton Lichtenstein has designed a very beautiful residence for Mr. Sol Goldberg, First Vice-President of Goldberg Bowen & Co., the well known grocers of this city.

The mansion is being erected on a prominent corner of 13th avenue, Richmond District, by the genial contractor,. Ira W. Coburn. The residence is to be one of the finest in the city and all the appointments and fixtures are of the very best.

In the matter of panels, as in everything else connected with the house, the very highest quality was desired and Mr. and Mrs. Goldberg went down to White Brothers and themselves selected the Quartered Oak WYBRO for the dining room.

WYBRO is recognized as the standard in veneered panels and is sold only by White Brothers.

REMOVAL NOTICE.

James C. Hayburn of San Francisco, the well known bonding general agent, announces the removal of his offices on September 1st from his present location at 573 California street to 335 Montgomery street, between Pine and California. At his new address Hayburn will have ground floor offices and the increased space made necessary by the constant growth of his business.

NEW INVENTIONS.

Reported especially for this paper by H. B. Willson & Co., Patent Attorneys, 715 Eighth Street, N. W., Washington, D. C.

A Complete Copy of any of these patents will be forwarded to any person by Messrs. Willson & Co., on receipt of ten cents. Persons ordering Copies must give Number of Patent.

1,035,166. Saw Clamp. J. S. Dikeman, Norwalk, Conn., Assignor to The Dikeman Mfg. Co., Norwalk, Conn.

BEGIN WORK ON BRIDGE.

CHICO (Butte Co.), August 27.—The Chico Construction Company started work on the new county bridge over Sandy Gulch on the esplanade Monday. The contract specifies the work must be finished by November 7th. W. Perley, Manager, states the bridge will be completed by October 26th.

The structure will cost the county $12,500 and will be of reinforced concrete, of two spans, each ninety feet long. Special attention has been given in planning it, for use by the State Highway if it comes on this side of the river.

While the bridge is being built, a ford will be used above the present site for light rigs. Heavy teams will cross the bridge on Cussick Avenue, half a mile west of the esplanade.

INTERNATIONAL RAIL AGREEMENT

(From the Manchester, England, Guardian.)

Very little information is made public regarding the International Rail Syndicate, whose renewal for a further period of three years has just been announced. The Steel Syndicate, which comprises the whole of the producers in America, England, Germany, France, and Belgium, supplies practically the whole of the world's requirements in steel rails, the only other source of supply being Russia, though the syndicate has an agreement with makers there, who were granted certain privileges in 1909 in order to avoid a fight. Producers in each country are granted special rights with regard to certain markets, and German manufacturers have several times expressed dissatisfaction with the terms they have obtained, though all differences have hitherto been amicably settled. During the depression which followed the 1907 boom, for instance, German exports fell off much more seriously than did those of English makers, who were able to maintain a good trade with the colonies. The American producers were the chief sufferers at this time. Business has since revived, of course, and at present about half the German production of steel rails is being exported. From the producer's point of view the syndicate has certainly been a success.

BRIDGE CONTRACT LET.

VICTOR (San Joaquin Co.), August 19.—The contract to build the bridge across the Mokelumne River, at this point on the new Sacramento-Stockton road, has been let to Jenkins and Wells at a cost of $23,122.

The property owners recently deeded the rights of way for the road and work will be commenced at once. This road will be of great assistance to the Victor Colony residents as it makes a difference of several miles in the distance to Stockton.

TO LAY CONCRETE PIPE FOR SUB-IRRIGATION.

COLUSA (Colusa Co.), August 19.—W. J. Arnold, concrete foreman at the large citrus grove west of Maxwell, under whose supervision miles of concrete pipe were made and laid during the recent lemon tree planting, is now engaged with the preliminary work of preparing for the manufacture of concrete piping to be used in the underground irrigation system to be added to that already used at Mills Station.

About twenty miles of concrete will be used on the next 500 acres.

MUST REPLACE TERRA COTTA.

PLACERVILLE (El Dorado Co.), August 19. One hundred pieces of terra cotta must be replaced by the contractors who are constructing the new Court House here, Gladding & McBean Company, according to a decision reached by the Supervisors after a conference with the representatives of the company last Friday. Clifford B. Rushmer, Superintendent of construction on the building, has condemned the pieces as not up to the contract specifications.

Representatives of the contractors claim the latter face a loss of nearly $3,000 as the result of the action of the Supervisors. They were represented at the conference by Athol McBean, Secretary of the Company, and George Chamberlain, Manager, who came here in an automobile to attend the conference.

Ira Boss, manager for the general contractors, and the Ransome Concrete Company and C. C. Cuff, architect for the building, were present but they took no part in the controversy except to say they were satisfied as to the competency of the Superintendent. After a long talk with Boss, Cuff and the Supervisors, McBean and Chamberlain said the changes would be made.

BIDS OPENED ON YUBA BRIDGE.

MARYSVILLE (Yuba Co.), August 17.—The Board of Supervisors opened bids this morning for the construction of the proposed new bridge at Parks Bar, on the Yuba River. The bids received were taken under advisement and were as follows:

F. A. Gawthorne, San Francisco, concrete, $34,500; Mervy-Elwell Co., Oakland, steel, $28,045; Dundons Iron Works, San Francisco, steel, $28,000, Clark & Henery, Sacramento, steel, $28,200, concrete, $38,000; Ross Construction Company, Sacramento, steel, $25,940, concrete, $39,947; Chico Construction Company, Chico, steel, $29,800; Portland Concrete Pile Company, Portland, concrete, $31,600; Burrel Bridge and Construction Company, Oakland, steel, $28,770.

WAREHOUSE COMPANY INCORPORATES.

SUISUN (Solano Co.), August 21.—The Pierce Warehouse Company, recently organized here, has filed articles of incorporation in the County Clerk's office. The life of the corporation is fixed at fifty years and the capital stock is $100,000, divided into 1,000 shares of a par value of $100 each.

The incorporators and Directors are William Pierce, Lewis Pierce and R. S. Keator. The Pierce Brothers own grain and hay warehouses on the water front here and the new company contemplates improving the property and conducting a more extended business, which is expected to come with the advent of the electric railroad to be built by the Vallejo and Northern Railroad Company.

BIG ADDITION TO THE REGISTRY.

NEW YORK, August 21.—Nearly five million new voters are expected to appear at the polls this year, according to an estimate prepared here for the Republican National Committee. There will be 3,650,000 male voters enfranchised by age alone, and 1,350,000 women and newly naturalized citizens. There will be 24,332,200 male voters. The number of women is estimated at 1,667,000, making a total approximately of 26,000,000 persons who may vote for President. In 1908 there were 22,261,500 eligible voters and the number of votes cast was 14,888,442.

CORNER STONE OF Y. M. C. A. BLDG. LAID.

SAN JOSE (Cal.), August 21.—The corner stone for the new Y. M. C. A. building in this city, being erected at a cost of $150,000, was laid yesterday afternoon with impressive ceremonies, William G. Alexander, chairman of the Board of Trustees, presided, and addresses were made by Hiram A. Blanchard and George C. Wilson, the president and setretary respectively; E. N. Richmond, president of the San Jose Chamber of Commerce; Mayor Thomas Monahan and Rolla V. Watt and Henry J. McCoy of the San Francisco Y. M. C. A.

The building is to be a five-story structure and is to be completed and ready for occupancy by March 15, 1913. Besides the cost of the building the association raised $25,000 for the building site at Third and Santa Clara streets.

ARLETT APPOINTED TO COMMISSION.

Local Builder Named to Fill Vacancy On Exposition Board.

Governor Johnson has filled the vacancy on the State Commission of the Panama-Pacific Exposition made by the death of R. Cameron Rogers by appointing Arthur Arlett, of Berkeley, to the place.

Arlett is a well known contractor, a mason and builder, and member of the Builders' Exchange, with offices in the Sheldon Building, this city.

This commission has charge of the $5,000,000 fund appropriated by the state for the Exposition. Mr. Arlett's thorough knowledge of the building business will make him a valuable addition to the commission. He is to be congratulated on his appointment and the builders will feel elated to have a member of their craft represented on the State Board.

In the appointment of Arthur Arlett to the Panama-Pacific Exposition Commission the builders have occasion to feel complimented. He is a member of the Contractors' and Dealers' Association, the Builders' Exchange, the Masons' and Builders' and is a practical builder of high repute. He knows the building business and the administration is to be complimented upon the selection.

WAGE EARNERS INCORPORATE.

The Associated Producers and Wage-earners of the World, which has for its purpose the general uplift of humanity has filed articles of incorporation in the County Clerk's office. There are neither capital stock nor shares of the incorporation. The membership fee is $1.

The association was organized at a meeting held in this city, which is to be the headquarters, on August 20 last. The following five directors were elected: J. R. Cunningham, D. B. Diggert, E. Northcott, Oakland; E. S. Deardorff, San Francisco and D. S. Hinds, Farrallone.

Some of the recited purposes of the association are:

To promote the social, intellectual and financial welfare of the producers and wage-earners of the world and to encourage co-operation among the members.

To advocate systems and methods of providing homes for the homeless and employment of the idle labor of the world.

To advocate legislation that will create equality among men, and to abolish poverty off the face of the earth.

To find ways and methods to give unto labor all it produces.

TO SUSPEND ADVANCE IN FREIGHT RATES.

WASHINGTON, August 22.—Transcontinental railways are facing suspension by the Interstate Commerce Commission of advances in freight rates proposed recently. The new rates to become effective September 2d would increase the transportation charges of many commodities from the Atlantic seaboard to Pacific Coast terminals. They also would make some reductions to inter-Rocky mountain destinations.

Vigorous protests are being received from Eastern manufacturers and shippers, from Pacific Coast jobbers and merchants. It appears likely that many of the proposed increases will be suspended pending a thorough inquiry.

TO BUILD DETOUR LINE.

The electrification of the Denver and Rio Grande road over Soldier summit, Utah, which was proposed by President Benjamine Bush, contingent upon the ability of the company to obtain power at a low cost has been abandoned. Power could not be obtained at the price the railroad wanted. The reduction of the grade from 4 to 2 per cent, which will be accomplished by the detour line which the company is to build, will enable the company to save $500,000 a year. This sum, according to officials, will be saved by a decrease in the amount of coal consumed on the steep grade and by the

lessening of wear and tear on equipment, the latter item having been a serious one.

WHEN THE CANAL IS OPEN.

Many countries are considering the possibilities for commercial expansion by use of the Panama Canal. Experts everywhere are busy charting the courses which steamers must traverse to land freight from one hemisphere to the other. A leading question among nations is, Who will profit the most commercially? To estimate profits the matter of long or short voyages needs careful consideration. The canal reduces the distances almost one-half in many instances.

The United States, in the opinion of most experts, should reap the largest benefits from this $400,000,000 waterway. Grain, lumber and other commodities from the Pacific Coast can be sent quickly through the canal to Europe, Southern products to Oriental countries and Eastern goods to South America. The Coastwise traffic of the United States should be increased enormously.

It is obvious that the first great increase in the commerce of the United States should come from trading with our closest neighbors in South America. European and Oriental countries will be largely benefited naturally, but if American merchants are enterprising they will reap the largest profits. Shipping men and merchants on the Pacific Coast are making active preparations to meet the new trading conditions, but on the Atlantic Coast there is not yet so determined an effort as there should be.—Boston Globe.

WORK ON STATE HIGHWAY CONTINUES IN VALLEY.

The Ransome-Crummey Company, which has the contract for building a 10 mile stretch of the state highway, north of Madera, is not proceeding very fast with the work, although advices received at the local division office of the state highway are to the effect that more equipment is due within the next few days and that construction will then be rushed.

The company has graded about three miles of the road. Within a very short time it is expected that the building of the new road will start so that it may keep close to the grading. The contract calls for the completion of this strip of road by December 1.

State highway surveyors have completed the preliminary survey of the proposed route through the Tejon Pass. They are now beginning to secure locations to determine the grade and approximate cost of construction. Another month will be required to complete this work. The actual mountain survey in this division is about 12 miles, although there is a strip of about 16 miles to be surveyed along the alkali plains from Rose Station to Bakersfield. This survey will be comparatively easy, as the grade is easy and there are few curves.

The survey between Hanford and Visalia has practically been completed, but nothing has been done between Selma and Delano, pending the decision of the state highway commission, as to the route. The local division office does not know when a decision will be made.

Bids on four contracts for the new highway, in Fresno, Madera and Merced, counties, will be opened at the office of the state highway commission on August 26. These four contracts call for the construction of 37 miles of road. A number of contractors who are planning to bid have been in Fresno in the past few days, looking over the road to be built.

BIG INHERITANCE TAX ON ASTOR ESTATE.

NEW YORK, Aug. 22.—State Controller Sohmer expects to turn into the state treasury between $2,500,000 and $4,000,000 as a result of the appraisal of the John Jacob Astor estate for inheritance tax purposes. Five noted realty experts of the city today began the task of appraising the Astor real estate.

Officials of the department of taxes and assessments are narrowly watching the work of the Astor appraisers. The John Jacob Astor holdings within the city limits are assessed at close to $100,000,000 on the city tax books.

It is understood one-half of the expense of appraisal will be borne by the Astor estate and the other half by the state.

FIRE AT NEVADA CITY.

NEVADA CITY (Nevada Co.), August 21.—The Malakoff Hotel building, together with the barn and shed across the road, about a mile south of North Bloomfield, was destroyed by fire Monday night. The fire afterwards communicated with the adjacent woods, but was extinguished by forest officials. The loss amounts to several thousand dollars, with a small insurance.

The hotel has been unoccupied for years, but was one of the famous land marks of the country, serving the miners in the palmy days of hydraulic mining. Mrs. D. R. McKillican was the owner of the property.

PETITIONS IN BANKRUPTCY.

The following petitions in bankruptcy were filed Friday in the United States district court. Fred A. Smith, a millman of San Jose, whose liabilities are $1137, with no assets. Christopher W Duffie, a local carpenter, whose liabilities are $2500, with no assets; John Surges Planing Mill Company (involuntary procedure) filed its schedule, showing the liabilities to be $20,238.84, with $17,875.79 in available assets; William C. Bemis, a local manufacturer, whose liabilities are $6200, with no assets.

BEGIN BUILDING 'PHONE SYSTEM IN RESERVE.

PLACERVILE (El Dorado Co.), August 21.—Work will begin at once by the Forest Service, whose headquarters are in this city, to construct a telephone line through Long Canyon. It will be twelve and one-half miles long and will connect Placerville with the extreme northern part of the Forest Reserve.

The work will be expensive owing to the nature of country the line passes through and will require about four weeks to complete. The line will take in the Ralston Mine, Lynchburg Ranger Station, Goggin's Mine and the Long Canyon Ranger Station.

At Lake Valley Ranger Station, the headquarters for District Ranger McMillan, buildings are in course of construction for his accommodation.

AERIAL RAILWAYS IN SWITZERLAND.

Aerial railways, which have long been employed for industrial and military purposes, are now being utilized for transporting passengers over precipitous places in the Swiss mountains. Several of these roads are now in operation, and the demands of tourists, who want comfort in the ascent and descent of mountains, and who enjoy the novelty and sensations experienced in scaling the heights in cars carried through the air on cables, are encouraging the construction of aerial routes over some of the most difficult places in the Alps. The popularity of the Swiss mountain resorts and attractive scenery of the higher regions are also incentives for building railways over the great glaciers and granite walls leading up to them.

The first aerial railway projected in Switzerland was the work of a German engineer who, in 1901, enlisted the cooperation of capitalists in Berne and of the community of Grindelwald in a plan to build an aerial line for the assension of the Wetterhorn. The concession was secured in 1904, a company organized and in 1908 a portion of the road was inaugurated. In the first section the two extremities of the line are separated by a horizontal distance of 1000 feet, the average incline for the course being 45 degrees. The cars are made of steel, each being propelled by two cables with a resistance of seventeen times the power required to carry them up the incline.

No motive power is employed, the line being operated by the simple movement of ascent and descent. The cars are of the same weight and are regulated by automatic brakes of such force as to insure safety.

The line passes over the Grand Glacier that descends the Wetterhorn and at considerable distance from the rocky, precipitous sides of the mountain, nearly to the summit. It is in operation from June 1st to October 1st only, as the heavy snows in the mountains during winter make transportation impracticable and dangerous. The popularity of the Wetterhorn route is handicapped by the fact that the starting point is several miles from Grindelwald, the principal town in the valley, which has no railway connection. Statistics show that 3000 passengers were carried over the road in 1909, 3600 in 1910 and 5000 in 1911.—Consular Report.

WORK BEGUN ON SUGAR FACTORY.

MERIDIAN (Sutter Co.), August 28.—Surveyors have staked off the site for the $1,000,000 beet sugar factory which is to be built on the Forbes' ranch, north of the Northern Electric Railroad at Meridian. The material for the plant continues to arrive by the barge load up the Sacramento River.

Plowing for sugar beets has commenced on the old Paine ranch a few miles south of Meridian. Five caterpillar engines, two cables and one steamer are engaged at the work.

The concrete pier at each [illegible] and the 100 cement piles driven down for this end of the river bridge.

GUNBOAT TO BE BUILT AT MARE ISLAND.

VALLEJO, August 28.—A sister ship to the Gunboat Monocacy will be built at Mare Island. Telegraphic orders to begin work were received from Washington Tuesday morning. Both gunboats will be used in Chinese waters.

Authorization for the gunboat just ordersd was made by Congress in 1898. Great Britain objected under the treaty of 1872 to the use of the gunboat on the Great Lakes, as was planned, and after fourteen years the contract has now been let.

MORE HIGHWAY ROUTES CHOSEN.

SACRAMENTO, August 28.—With the approval of the State Advisory Board to the Department of Engineering the State Highway Commission has announced that it will call for bids on two contracts for portions of the State Highway to be constructed under the $18,000,000 bond issue.

The first work on the State Highway in Sacramento County under the Highway Commission will be the construction of a highly improved road from the Sylvan School on the Auburn Road, in Sacramento County, thence going to the Placer County line and on to Lincoln. The road will have a cement base, and the surface will be of bitumen.

The other route for which a contract will be let in Merced County, and will be constructed between the town of Arena and Merced City. This road will also be of high-class construction.

The lay-out or route taken over, and for which bids will be sought later, starts at El Rancho Rincon, at the Santa Barbara-Ventura line. It then follows the Rincon route.

The State Highway Commission has indicated that the route it will select, connecting the San Joaquin Valley with the Bay, will run from the San Joaquin County line through the towns of Livermore and Haywards to the Oakland line.

Another survey was ordered in Marin County.

Beginning at San Rafael and extending by way of San Anselmo, Ross, Larkspur and Corte Madera Hill to Alto.

A recent report of the Geological Survey gives some interesting data on the oil industry of California. The production of California for 1911 amounted to over 80 million barrels, half as much again as Oklahoma, the next state in rank of production. Oklahoma and Illinois omitted from the report shows California to have produced more oil during the year than any entire nation in the world. And if Russia and the United States are omitted California far surpassed the combined production of all the rest of the world, including Mexico, India, Roumania, Galicia, Japan and South America.

An important feature of the oil industry has been its increasing use as fuel. The realization that the supply is large enough to be reckoned as a national asset in the production of power has led to the adoption of its use as fuel in the navy, on the transcontinental railroads for great portions of their lines. At the present time the Southern Pacific uses over 1200 oil burning locomotives, the Santa Fe over 800, the Northern Pacific 200, and the Great Northern 115. It is stated that 62 million barrels of oil was consumed in the United States in 1911.

The increase of the use of fuel oil in water navigation has been world wide. The navy has 19 torpedo boat destroyers that use oil and 8 battleships that burn oil auxilliary to coal. The two battleships Nevada and Oklahoma will burn oil exclusively. Oil has been used for some time in reverberatory smelters at McGill, Nev. and Cananea, Mexico. It is daily being put into further use in smelters and similar places and has an ever increasing use. This fuel industry of the state is of great importance. We are apt to overlook it until facts and figures are shown.

ENGINEER OF TESTS (MALE).

September 21, 1912.

The United States Civil Service Commission announces an examination to secure eligibles from which to make certification to fill a vacancy in the position of engineer of tests at $2000 per annum in the Watertown Arsenal, Massachusetts, Ordnance Department at Large, and vacancies requiring similar qualifications as they may occur, unless it is found to be in the interest of the service to fill the vacancy by reinstatement, transfer, or promotion.

An application must be a graduate in civil or mechanical engineering with not less than three years' experience subsequent to graduation. He must also have had experience in metallurgical work, in the making of investigative tests of engineering materials, in the operation of testing machines, and in the interpretation of results.

Competitors will not be assembled for any of the tests, but will be rated according to their training, experience and original investigations, as shown in application and examination Form 1312, and corroborative evidence. Applicants must furnish on the application and examination form the vouchers of two persons who are able to testify from their personal acquaintance in reference to the fitness of the applicant for the position sought. It is desirable that the vouchers should be persons belonging to the same profession, or pursuing the same line of work as the applicant.

All statements relating to training, experience, and fitness are subject to verification.

Age limit, 25 years or over on the date of the examination.

This examination is open to all citizens of the United States who comply with the requirements.

Applicants should at once apply for Form 1312 either to the United States Civil Service Commission, Washington, D. C.; the secretary of the board of examiners, Post Office, Seattle, Wash., San Francisco, Cal., and other cities throughout the Union. No application will be accepted unless properly executed and filed with the Commission at Washington prior to the hour of closing business on September 21, 1912. In applying for this examination the exact title as given at the head of this announcement should be used in the application.

Issued Aug. 17, 1912.

ORO ELECTRIC TO ENTER STOCKTON FIELD.

STOCKTON, August 26.—The Oro Electric Corporation is planning to enter the local field as a competitor of the Western States Gas and Electric Company, which now enjoys a monopoly of the business.

E. V. Burke, the local representative of the new company, declared that his company had men interviewing the residents of the city to ascertain whether or not they desired competition. He declared that if the public wanted the Oro corporation the City Council would be asked for a franchise at once.

A 200-horse-power plant, he said, would be erected here to furnish the residents with light at a price much less than they are now paying. He stated that when the business justified it the company would furnish power for irrigation throughout the county at a minimum cost to the farmers.

ENGINEER DRAFTSMAN (MALE).

Supervising Architect's Office

September 11-12, 1912.

The United States Civil Service Commission announces an examination on September 11-12, 1912, to secure eligibles from which to make certification to fill vacancies as they may occur in the position of engineer draftsman (male), at entrance salaries ranging from $1600 to $2000 per annum, in the Supervising Architect's Office, Treasury Department, unless it is found to be in the interest of the service to fill such vacancies by reinstatement, transfer, or promotion.

The examination will consist of the subjects mentioned below, weighted as indicated:

Subjects.	Weights.
1 Practical questions in engineering construction	60
2 Training, experience, and fitness	40
Total	100

Two days of seven and one-half and seven hours, respectively, will be allowed for this examination.

A rating of at least 70 in the subject of training, experience, and fitness is a prerequisite for consideration for this position.

Competitors in this examination will be allowed to use a slide rule, and should bring for use throughout the examination a Carnegie handbook. Explicit instructions regarding the use of handbooks in the examination will be printed on the sheet. Each competitor should also bring drawing board, drawing instruments, pens, ink, and pencils, but not drawing paper.

The duties of this position are confined to the engineering problems involved in first-class building construction. The examination will consist of practical questions based upon the work required, particular attention being paid to fireproofing and to designing in steel and reinforced concrete. Applicants must have had not less than five years' practical experience, of which at least two years should be in either steel designing or construction work. A degree in civil engineering

"Just the Information We Need"

WEBSTER'S NEW INTERNATIONAL
—THE MERRIAM WEBSTER

Every day in your talk and reading, on the street car, in the office, shop, and school some new question is sure to come up. You seek quick, accurate, encyclopedic, up-to-date information.

This NEW CREATION will answer *all* your questions with *final* authority. *400,000 Words Defined. 2700 Pages. 6000 Illustrations. Cost $460,000.* The *only* dictionary with the new divided page. A "Stroke of Genius."

Write for specimen pages, illustrations, etc. Mention this publication and receive FREE a set of pocket maps.

from a technical school of recognized standing will be considered as equivalent to not more than two years of the five years above mentioned.

Age limit, 18 years or over on the date of the examinationfl.

This examination is open to all citizens of the United States who comply with the requirements.

Applicants should at once apply either to the United States Civil Service Commission, Washington, D. C., or to the secretary of the local board of examiners, for application and examination Form 1312. No application will be accepted unless properly exexuted and filed with the Commission at Washington.

Issued August 7, 1912.

Fresno has made a substantial contribution to the successful conduct of municipal enterprises. The city, the center of the state's greatest agricultural district, has demonstrated that a modern municipal corporation can become a successful farmer. The city sewer farm has become very profitable and will eventually bear all the expense of the sewer system. Alfalfa is the stuff that has done it, too; alfalfa and Trustee Pickford's good bargains in the sale whereof.

The success of the city as a farmer should encourage the city to resume efforts to acquire its own water system. A municipal water system would not only pay for itself, but would take care of the streets as well.

Editorial Comment.

Definite statement now comes from the Exposition authorities that between now and August 1913 all the contracts will be let and work started on each of the fourteen great buildings of the exposition to be built by the company. Specifications for the service buildings are now complete and the contract will be let on the 24th of this month. This is commendable and definite action. It is what the people have been waiting for and the time is opportune for its publication.

The drawings that have been published and the plan for the grounds that have been published are worthy of commendation. The plan is certainly unique. The celebration will be something different. The climate will permit of landscape gardening that could be accomplished nowhere else. And the unrivaled setting of the bay and shore give a perspective that is equaled in few places in the world.

The published sketches show a general plan that is highly commendable. The architecture is composite. Some of the sketches like that of the central tower seem to have too much of the gingerbread ornament and thereby loses the beauty and grace of simpler lines, but in the main the architects seem to have performed their work well. Willis Polk tells us that the color scheme will be harmonious and beautiful and will be in charge of Jules Gerin, the most famous colorist in the country. This will be an important feature of the exposition for nowhere will color show to better advantage and nowhere else can its use in architecture be better demonstrated than at this international fair.

Color in artificial lighting will be an important feature also. The most inspiring scene at the Chicago Fair, in 1893, was when evening came and the glare of the sun on the white city was darkened into somber shadows. When the artificial lighting began then the Fair became a real fairyland. Pallid pinnacles were etched against the ebony sky. Cornice, and pediment and colonnade glowed with beads of astral fire. And suddenly the great electric fountains in the Court of Honor would begin to play and a hush would fall on the vast throng that were out to see the sights or enjoy a walk in the park gardens.

Color lighting has advanced a long ways since then. By 1915 the electrician should show the possibilities of artistic color lighting in such events in a manner that will astound and entrance the world

So far the announcements are definite and satisfactory. The statement that all the buildings will be ready by June, 1914, is a commendable fore thought. For never have exhibitions been ready on the time designated. This allows nine months for unforseen circumstances and also time to devote to foreign buildings and the construction of other states.

Government investigation into all matters pertaining to the welfare of the nation is being made more and more effective. As agriculture is necessarily the basis of the wealth of the country, the department of Agriculture has received more or less attention. Bureaus for soil analysis, for fertilizer analysis, a bureau for bacteriological problems in plant industry, bureau of animal industry and a score of others. With all these there was a bill introduced last month to Congress to establish a bureau of Farm power. It is the object of this bureau to conduct investigations and make reports on the different kinds of power used on the farm. As modern farming is now conducted hand labor is reduced to a minimum. Not only are horses used for the work but the gas engine has come to be an important factor in all kinds of labor. And as electricity is coming more and more into daily use it can and is being used as a motive power in farm work. The world has moved. Labor saving machinery has removed much of the drudgery from farm life. Science has advanced the methods and directs with intelligence the products of the soil. The intelligent investigation, under government supervision, of farm work means conservation or resources and increased production in all lines.

Manufacturers of road materials and machinery will have an opportunity to display their models before the very men they are most desirous of reaching at the American Road Congress, which is to be held on the Million Dollar Pier in Atlantic City, September 30th to October 5th. All the leading highway engineers of the States, counties, and cities have sent word that they will participate in the congress, and many of the States are making arrangements to have special booths at which full information may be obtained as to the development and the needs of each State.

The good roads movement is gaining steadily throughout the country. The recent convention held here of the Pacific Coast Highway Association did a great deal to keep up interest and enthusiasm in the movement. The state appropriation here and in our sister states in putting the building of roads on to a scientific basis and allowing planning of highways that look to the material betterment of the country. Good roads are one of the most important assets of any country. And this country of great distances needs good roads more than any country in the world. The American Road Congress should advance the cause.

The Engineering Career, It's Opportunities and Duties.

By F. H. Newell, Doctor of Engineering and Member of the U. S. Reclamation Service.

*Address before Graduating Class of Case School of Applied Science, May 29, 1912.

The Formal Parting.

This occasion marks officially the time of separation between the two great periods of your life, namely, the first, the recipient or student stage, during which you have been receiving instruction and have been concentrating your attention upon getting the benefit of other people's knowledge, and, second, that period when you are supposed to go out, each for himself, to make use of the accumulated knowledge, not wholly for personal nor selfish ends, but for the benefit of the whole community. You have come together with your friends for possibly the last time as an organized body. You leave here as individuals, ready each to take up his life work.

Up to this time you have been recipients in part of the protection and bounty of individuals, of the family, of the community, and of the state, which have been freely bestowed upon you. This has been done in the hope and expectation that, having made a large investment in your education, you will now go forward and return with interest the investment thus made. Now you have before you the joy of opportunity. You can soon give expression to some of your ideals, or at least can utilize some of your restless energy in work which seems to count for progress.

Opportunities for the Engineer.

The need and opportunities in modern life for the engineer are steadily increasing. Each new invention creates a necessity for two more. The use of the relatively simple instrument, the telephone, has called into being an occupation requiring thousands of electricians and men educated in engineering principles, not alone of electricity, but of other branches. The wireless telegraph is making urgent demands for still another body of men with slightly different training and experience. And so it goes in all the branches, electrical, civil, mechanical and mining.

The aeroplane is promising to call into activity the best of engineering skill and intellect; with the surmounting of each natural obstacle there comes the demand for pioneers in new fields, and especially in those occupations which relate to the interest of the people as a whole, organized into modern social units.

The number of persons now engaged in engineering is not known, and, in fact, cannot be ascertained until we agree more definitely upon what shall be included under this very general term; but from a condition of less than a tenth of one per cent of the population a few decades ago, the proportion has increased with great rapidity; still the demand of the public increases. There appears to be no reliable statistics of the relative proportion of engineers in private and in public employment, but from general observation it is safe to say that the number in the public service is relatively less and far below what it should be, when we consider the nature of the duties involved.

Throughout the entire political organization there has been and still is a tendency to ignore the special training of the engineer in civic affairs. This is due largely to the engineers themselves and to their organizations, some of which in their ultra-conservative attitude tend rather to repress than to push forward the claims of the engineer for recognition as a factor for good in the larger affairs of the country. Judging, however, from the developments abroad, with increase of knowledge, our people will begin to understand and appreciate that the conduct of many of our larger public affairs can be entrusted safely only to the men who have been trained in the business and who may look forward to such continuity of employment as to enable them to perfect themselves in the details of public service. We may not expect, perhaps, to see at an early date the principal officers of our municipalities employed, as in some European cities, solely because of their business ability and experience in such lines, but we are slowly working toward that ideal.

Knowledge of Men.

In public service, more than in any other class of work, a knowledge of men, especially in groups is more important for success than almost any other single item. And the training of an engineer begins mainly with the facts as to the strength of materials and the action and reaction of the forces of nature. At the outset, he must understand thoroughly the machinery with which he is to achieve results.

The most important of the machinery with which the engineer has to do is the human machine, including in this the laborers, the foremen, the engineering organization, and all others, together with their peculiarities of mental and physical make-up.

In the same way the engineer is concerned not simply with a single man, as such, but particularly with men in organizations designed for constructive work, and where efficiencies must be studied not on the basis solely of the individual, but of the interrelation of the units and groups; of the human machine in which the wheels and bearings are men and not metals.

Public Service as a Duty.

It has been shown that it is peculiarly the duty of the engineer, as a man trained largely at public expense, to take a broad interest in public affairs, whether employed in the public service or not. The present century is marked by the wonderful advances which are being made in material prosperity, which have arisen from careful observation and study of forces and materials, and the intelligent and ingenious application of these to the human needs. In fact, the enineer has been so busy in these studies and in the practical applications in detail that as a class he is under reproach of having neglected his larger duties as a citizen. As a consequence, there have been left to unskilled men, or to the other professions, the leadership which properly belongs to his own.

Study the Costs.

Efficiency is the watchword of the engineer. The tme has gone by when man took pride in a great engineering structure or machine simply because of its elaboration and intricacy. They now ask not merely what it does, but how efficient it is. That is to say, what is the relation between the work or energy put into the machine and that which comes out of it in useful results.

The engineer has been defined as the man who can accomplish with the expenditure of $1 the results which require another man to use $2. This is simply defining efficiency in terms of money values. While we cannot properly measure ability directly by dollars, yet they furnish the convenient means of expressing ideas of efficiency to the public.

Full Records.

The result of studies of cost, whether made by you individually at odd moments or officially for your employer, or for the public, should always be given not merely in actual expenditures, but in terms of the results attainedd, including the terms usually grouped under the terms of overhead charges or general expenses. A good system of cost keeping, in which all of these terms are included, is invaluable, while a defective cost system, which does not take into account these ramifications, may be worse than useless, as it is misleadng.

You will find that in the long run, especially in public affairs, your reputation is dependent largely on the maintaining of records of this kind which will give all the facts of cost and of related incidents, such as to protect you from the effect of sudden attack.

Personal Efficiency.

The watchword of the engineer is efficiency, the maximum output for a given expenditure of time and energy. This should apply to the individual as well as to the surrounding organization. We hear more or less of business men and engineers breaking down under the strain of business cares. Stated broadly, a breakdown of this kind is a disgrace to the engineer who has been trained to observe the operations of machines and organizations, and to know the strains to which they can safely be subjected. The same vigilence which should be exercised toward the outside machinery should be given to personal affairs.

Constant attention and study must be made and critical consideration given to the relative importance of all of the details of official life. Nearly every engineer who accomplishes anything has on hand two or three times as much work as can be given proper attention, and usually those items are

most attractive to him which really have the least importance.

It is a process of continual self-denial to shove aside the minor matters which are attractive, in order to push forward those which are distasteful, but upon which hinge the successful outcome of the work.

It is well to consider each demand upon the working time and energy as falling under one or another of two headings: First, constructive, that is to say, leading to accomplishment; and, second, obstructive, or destructive, tending simply to hold back performance.

There is nothing more destructive to efficiency than to ask the question continually as to whether this or that particular thing is for me to do. It is safe to assume that if a thing is to be done, you are the man to do it. Starting with this assumption, the next question is equally important—can it be done in whole or part by some one whom I can direct and who has better opportunity or equipment?

Whatever may be the political or other conditions, the powers that be are always looking for a man who can accomplish things either himself or through others. He may not apparently, obtain the credit for it, or at least outwardly, but few employers, whether the public or a corporation, fail to discover finally the man who is accomplishing results! Whether the direct credit is given to him or not, it counts for very little, because there is in these matters frequently a curious inversion or reversal of credits. Much of the best work which men have done has been that which has been ignored or attributed to some one else, while the things for which they are credited are often those which have originated with their assistants. In the long run, there has been more or less compensation.

The most important thing for you to do in the immediate future, whatever your line of work, is to acquire a reputation for judgment or common sense. It is assumed that you have a reasonable amount of knowledge and a good foundation of character, but it is yet to be demonstrated how well you can get along with your fellowmen, what is your tact, and especially how you will meet the daily emergencies. In this connection in public affairs it is wise to keep well within conservative lines. A reputation for boldness may be a good thing some time, but the public in general are better satisfied with the man who, while having brilliant ideas, does not attempt to try these at the expense of the public, even though they may succeed. Energy and skill are always appreciated, and if these are combined with that indefinable quality known as common sense, there is little to be desired.

Entering Public Service.

Assuming that opportunity is to be had in public service, and along the lines of the highest development of civilization, what is there to prevent its acceptance? Why should not every graduate of an institution of this kind seek to work out the highest ideals along these lines?

There has been and probably always will be more or less of a tendency to decry the public service as tending to lower men's ideals. There is enough of truth in this to make these unfavorable conditions the subject of consideration; enough at least to know and to guard against the discouragement which is apt to follow ignorant belief that because a man's motives are good, therefore the public will come to his support.

When the question is asked, I have never advised any young man to go into public employment, if he looks at it from purely selfish or the financial standpoint. It is true that at first he may have a tempting offer, and in many lines of public service the young, untrained engineer is paid at first more than he is worth. As he advances in experience and judgment, and really becomes valuable in the public service, his salary does not increase proportionately. Finally, after years of service, he may be one of the poorest paid of his profession, as far as money consideration goes.

There is, however, an attraction or fascination which holds; a delight in handling large things and being in the midst of works which count for the general welfare. The public service is continually being entered at the bottom by bright, energetic young men, some of whom stay for a time, obtain a certain experience and reputation (having thus a sort of post-graduate course), and then go out into other work.

What is there that should attract and hold a man, causing him to deliberately plan to devote his life to the public service? The reply must be in the form of another question, namely, what does he consider success? If it be money-making and comparative ease, then do not try it. If, opportunity to do a man's work with men and in a man's way, constantly meetin and overcoming obstacles, and building up those things which make for better life for the community, then come along.

You have learned that force and matter are indestructible; that you have brought nothing into the world and can take nothing away. What, then, is the use? You have simply the power of slightly rearranging the appearance of a few forces and of a little matter. But wait a minute: You will take something away which is not force nor matter—if the beliefs of many of us are correct—the spirit, the satisfaction of a life well spent in the service of humanity. As to whether this is worth while or not, I will leave for each of you to decide.

CONTRACTORS' & DEALERS' MEET.

Regular Weekly Meeting Show Steady Growth and Everybody Is Interested

As last Monday was a holiday the regular meeting of the Contractors' and Dealers' Association, which should have been held on that day, was held Wednesday, September 4th. All of the affiliated associations were represented

It was reported that a city contract was recently awarded to a general contractor who had, in the past, made pro rata settlements on city work and the Secretary was instructed to communicate with Supervisor Ralph McLeran, of the Building Committee, and with the Board of Public Works ,on the purpose of seeing to it that the sub-contractors on the proposed work receive their money in full.

The rubber stamps to be used for placing the trade mark of the Association on all bids and letter heads of the members of the various affiliated associations were issued and it was resolved that no member be allowed to print or write the trade mark on any stationery and that the members must use the stamp as issued by the Central Body.

Mr. L. R. Boynton, the genial delegate from the Electrical Contractors' Association gave a glowing account of the excursion trip he had taken on the Bay Labor Day as the guest of the Master Painters' and Decorators' Association. Mr. Boynton said that there was an abundance of everything good to eat and drink and that the Master Painters , as hosts knew how to extend hospitality ungrudgingly. He said that he felt that it was an honor and a pleasure to represent the Contractors' and Dealers' Association on the trip and he was sorry indeed that all of the delegates could not have been present.

Owing to next Monday being Admission Day the next meeting of the Association will be held on Wednesday, September 11th, at the Builders' Exchange.

All of the delegates congratulated the Secretary, Wm. S. Scott, on his successful campaign for the nomination for Assemblyman from the Richmond District. They predicted that at the general election the Secretary would undoubtedly be elected by a large majority.

CONSTRUCTION WORK ABROAD.

CANADA.

(From Consul Abraham E. Smith, Victoria, British Columbia.)

Progress on Vancouver Island—New Railways.

Work was started in August on the Cowichan Lake extension of island division of Canadian Pacific Railway, running from Duncan Station, 18 miles, to that resort. The contract was awarded to the Island Lumber Co. The railway also awarded to Culleton Bros., of Spokane, a contract for an additional 5 miles beyond their 10-mile contract north of McBride Junction, an extension to Comox, and a 5-mile section from Trent River, southwest, to J. W. Heard, late of Nebraska. Right-of-way is being cleared on a 20-mile gap, construction on which will probably be undertaken before the end of the year.

The Vancouver Island line of the Canadian Northern Railway, now under construction as far as Cowichan Lake, has been located between Alberni on the west coast of Comox Lake, about 8 miles from the east coast. From Alberni the route runs northerly and easterly up to a summit in the center of the island, 1,355 feet high, dropping down to an elevation of 150 feet at the east end of Comox Lake, a distance of 27 miles. Construction will be heavy, the maximum grades being 1½ per cent. Three engineering parties are now making a preliminary location between Comox Lake and Campbell River, a distance of 35 miles.

New Sawmills.

The Empire Lumber Co., controlling 50,000 acres timber lands, near Co-

wichan Lake, Vancouver Island, with $7,500,000 capital (New York people being mostly interested), is getting ready for business. A mill site of 149 acres base been purchased at Osborne Bay, to which the E. & N. Railway is building a standard-gauge railway, that will soon be in active operation. From the lake the new branch railroad will deliver to the company's boom at tidewater. The new enterprise will mean the marketing of over 4,850,000,000 feet of timber.

The Cowichan Lake Lumber Co. is planning to erect a sawmill at the lake. The company's timber limits comprise about 11,000 acres near Cowichan Lake, Vancouver Island.

Colliery Extension—Town Growth.

W. L. Coulson, ge eral manager of the Canadian Collieries Co., states that the vast improvements in connection with equipment and development work in the Comox field, involving the expenditure of several million dollars, are being rapidly carried out. Early next year about 6,000 electrical horsepower will be available from the power plant now being installed at Pundlege River. This improvement, within 18 months, will enable the company to double its coal production, now amounting in that field to 2,500 tons daily. A new coal mine, known as No. 8, is being opened up near Cumberland. The main shaft is now down 200 feet, and the coal seams will be struck at a depth of 900 feet.

The rapid growth of Nanaimo is reflected in the increase in building, which to the end of June is 50 per cent greater than last year. The total value to the end of June this year is $125,992, as against $82,386 to the end of June last year, an increase of $43,606, or over 50 per cent. The value of building permits issued during June was $36,853, as against $22,675 for June last year, an increase of $14,178. Nanaimo is the fourth city in size in the Province, and is the center of the coal mining industry of Vancouver Island. Its coal resources are practically unlimited.

(From Montreal Gazette.)

Government Awards Railway and Other Contracts.

The contract for the second section of the Hudson Bay Railroad and a number of smaller contracts were awarded by the Cabinet at Ottawa. For the 68 miles of the Hudson Bay road between Thicket Portage and Sylit Lake the tender of J. D. McArthur was accepted. The figure is $1,825,000.

In connction with the big elevator to be erected by the Government at Port Arthur, considerable dredging of approaches is required. The Department of Public Works has arranged with W. E. McQueen & Co., contractors, for other dredging in Port Arthur to do this work also.

The militia department has secured a site for a new armory at Simcoe. The price is $6,400.

R. Weddell & Co. were awarded the contract for dredging at Nigger Island, Bay of Quinte. The price is $85,000.

For dreding the south shole in Yarmouth harbor, the Dominion Dredging Co. was given the contract at an estimate of $9,000.

CHILE.

(From Consul Alfred A. Winslow, Valparaiso.)

Vina Del Mar Municipal Improvements.

The municipality of Vina del Mar, a suburb of Valparaiso, with a population of about 30,000, has decided to expend $1,302,000 United States gold in beautifying the place as follows: Macadam base, $525,000; concrete on macadam, $231,000; natural rock asphalt, $273,000; hill roads, $105,000; improving sea front, $105,000; municipal buildings, $42,000; garbage incinerator, $21,000.

Of the above the abutting property is to pay $567,000 and the municipality the balance, for which bonds are to be issued bearing 8 per cent per annum, with 2 per cent accumulative amortization.

Homes in Chile for Workingmen.

The Chilean Government is making a strong effort to induce capitalists to build suitable homes for the working people, going so far as to guarantee 6 per cent on the investment when constructed under the supervision of Government architects and rented according to regulations approved by the authorities.

Within the past year quite a large amount of Chilean capital has been invested in this undertaking, and now European capitalists come forward and offer to invest $6,502,500 United States gold under the above guarantee, which, if accepted, will provide fair homes for the working people of the larger cities in the country. It seems to be the general opinion that 8 and 10 per cent can be earned on the investment in Valparalso and Santiago. This move will do much to better the sanitary conditions in the large cities, since much attention is given to this feature of the buildings and surroundings.

Longitudinal Railway — New Docks.

The Chilean Government has under consideration the construction of the connecting links covering 438 miles in a through coast line of 608 miles, reaching from Valparaiso on the north to Nueva Imperial on the south.

The Government has called for bids for the construction of docks at Valdivia to cost $67,276 United States gold. The work is to be paid for in installments as follows: Twenty per cent the first year, 40 per cent during 1913, and the balonce during 1914.

BRAZIL.

(From report of British consul at Sao Paulo.)

Progress of the State Capital.

The city of Sao Paulo continues its extraordinary march of progress. During the past year there were constructed over 4,000 new houses, all of which were occupied as soon as finished. So rapid is the increase in population that the demand for houses in the capital is greatly in excess of the supply, with the result that rents have reached fantastic figures. The population of the city of Sao Paulo at present is estimated at 380,000 inhabitants. It is anticipated that within the next 15 years the city will have grown to 1,000,000 inhabitants.

Value of land in the city has increased enormously within the past few years. At present the value of sites in business areas ranges from $500 upward per meter (10¾ square feet and in outlying districts building plots sell for $1.70 to $2.45 per square meter. During the past year the Sao Paulo Improvement and Freehold Land Co. (Ltd.) was formed in London, with $10,000,000 capital to acquire and develop lands within the municipal area of the capital.

Many Large Buildings—City Conveniences.

The Companhia de Grandes Hotels de Sao Paulo has also been formed with $1,650,000 capital to construct two large hotels upon the most modern lines, one in the city of Sao Paulo and one at Guaraja, the favorite seaside resort near Santos. Work on the hotels will be commenced forthwith. It is hoped that the hotel in Sao Paulo will be finished before October, 1913, in time to accommodate the large influx of visitors expected to arrive here in connection with the solar eclipse, which will occur at that time, and will be visible in this State.

The magnificent opera house, constructed by the Sao Paulo municipality, was completed during the past year, and was inaugurated by a brilliant season of Italian opera.

It has been decided to pull down the old cathedral and to construct upon the site a new edifice, which for size and magnificance will rank among the finest in the world. Plans for the projected edifice have been prepared and approved, and work will be commenced without delay. The cost of the new cathedral is estimated at $2,000,000, and will be defrayed principally by public subscription, aided by a substantial State donation.

As indicating the progress of the capital, during the past year there were installed throughout all parts of the city apparatus in electrical communication with police headquarters. Policemen can thus communicate with the head office. Residents of recognized good standing are also authorized to make use of the apparatus.

An ambulance department has also been organized, with a number of motor vehicles specially constructed for conveyance of persons injured. A staff of surgeons and trained medical assistants is on duty day and night with the ambulance department, which has already proved of great public utility.

INDIA.

From Times of India, Bombay, July 13.

Government Sanctions New Irrigation Works.

A project for the construction of the Nira Right Bank Canal in the Sholapur district of the Bombay Presidency as a protective irrigation work has been officially sanctioned. The total cost is estimated at $8,500,000. The proposed canal will off-take from the Nira River at the southern end of the Vir weir. The capacity of the storage reservoir known as Lake Whiting, in connection with the Left Bank Canal, will be increased from 5,300 to 24,300 million cubic feet. The new canal on the Right Bank will have a total length of 109½ miles, with a head capacity of 1,500 cubic feet per second. It will deliver water to 4 branch canals and to 63 distributaries. The capacity of the existing Left Bank Canal will be increased in order that it may utilize a share of the additional supply to be stored in Lake Whiting.

The two canals will command on either bank a gross area of 874,500 acres of 1,366 square miles, of which it is proposed to irrigate annually 231,000 acres, including an area of 41,000 already irrigated by the existing canal. The works will probably take about 11 years to complete.

USE OF BRICK IN AMERICAN ARCHITECTURE.

Considered from the point of view of beauty, brick would seem to occupy a unique position among the structural materials available for the creation of beautiful buildings. Further analysis discloses among others, the following interesting points:

Brick is made in reasonably small units, so that in the case of many modern buildings, at least one hundred thousand of them show on the exterior. This, together with the varying shapes and sizes now obtainable, make possible an almost infinite variety of form and pattern, thus giving full scope to the imagination, ingenuity and skill both of the designer and of the workman.

Brick, moreover, is now made in almost every conceivable color and shade, the permanency of which is unequaled by hardly any other building material; with such a "palette," therefore, at one's command, and by a skillful use of color, the brick builder of today can readily add to his design that living touch which the painter gives us in his painting.

Brick may also be counted unique in the fact that it requires for its structural efficiency the use of a very considerable amount of material of quite another kind and color, namely, mortar; and, further, that this material must of necessity show in the form of a joint to a more or less degree in the face of the finished wall. A mistaken idea has prevailed that the mortar joint is a blemish that should be suppressed as far as possible, or be colored to match the brick. We find, however, that the designer of today seizes the very opportunity afforded by a mortar joint to introduce into his wall another element of color and pattern.

The word "texture" has lately come into use in connection with brickwork, and, strange as it may seem, this word has a very plausible application; for the builder of interesting brickwork has much in common with the weaver at the loom as far as resulting color effect goes. Just as the weaver, with his threads of varying sizes and colors, produces a never-ending variety of useful and beautiful fabrics, just so it is possible for the brick builder, with his bricks and joints of many colors and sizes, to weave new ideas and combinations into his work, all in beautiful and imperishable patterns; and this applies to all brick.

Just as the fabric charms and delights the eye, and at the same time protects man from heat and cold, and performs a thousand other useful functions, so the beautiful wall of brick, exemplifying man ingenuity and his artistic skill, forms also the protective structure of the buildings erected for his use. Brick, therefore, would seem to fulfil to a very high degree the requirements of an ideal architectural material.—"Don Barber."

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 6 story and base, reinforced concrete, $90,000. Architects, C. M. and A. F. Rousseau, Monadnock Bld., S. F. Owner, C. A. Jordan. The building will be erected on Leavenworth street near Ellis, and is to cover a considerable area. The interior will be subdivided into 56 apartments of 2 and 3 rooms each. All apartments will have connecting baths and wall beds. The interior will be finished in pine, redwood, marogany and jenisero. There will be steam heat, both freight and passenger elevators, a vacuum cleaning system and dumb waiters. The exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

San Francisco—Apartment house, 4 story and base, reinforced concrete, $20,000. Architect, Phillip Overman, Shreve Bldg., S F. Owners, Columbia Realty Co. The building will contain in the neighborhood of 24 apartments arranged in suites of two and three rooms each. All will have wall beds and connecting baths. The interior will be finished in pine. There will be steam heat and elevator service. The exterior of the building will be faced with cement plaster. Plans are now complete and the architect is taking figures on the work.

Stockton, San Joaquin Co., Cal.—Apartment house, 4 story and base, brick and steel, $75,000. Architect, Engineering Dept. Home Builders' Investment and Security Co., 26 North San Joaquin St., Stockton. Owners, Home Builders' Investment and Security Co. The building will cover an area of 100x100 feet and has been arranged to contain 48 apartments of two and three rooms. There will be connecting baths, wall beds, steam heat, a vacuum cleaning system, elevators and all other modern conveniences. The exterior of the building will be faced with pressed brick. Plans for this work are complete and on file at this office for the benefit of local contractors and material men. The work will be done under the direct supervision of the owners.

San Francisco—Apartment house, 3 story and base, frame, $22,000. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, T. L. Ayres. This building will be erected on a corner lot and will cover an area of 50x90 feet. There will be 21 apartments, each of which will contain three rooms and bath. There will be wall beds and steam heat. The interior will be finished in pine and redwood with some oak floors. Tile will be used in the bath rooms. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Oakland, Cal.—Apartment house, 5 story and base, reinforced concrete, $110,000. Architect, E. W. Hartman, 243 41st St., Oakland. Owner, John B. Mitchell. The building will cover a ground area of 60x140 feet and will contain 72 apartments, which have been arranged in suites of two and three rooms each. All apartments will have connecting baths and wall beds. The interior will be finished in pine with some oak floors. Tile and composition flooring will be used in the bath rooms. There will be steam heat, an oil burning plant, elevator service and vacuum cleaning system. The exterior of the building will be faced with cement plaster. Plans are complete and subfigures are being taken on all parts of the work.

Los Angeles, Cal.—Apartment house, 4 story and base, brick, $40,000. Architect, Scott Quintin, Story Bldg., L. A. Owners, Consolidated Securities Co. The building will occupy a corner site, and has been arranged to contain 100 rooms, which will be subdivided into suites of two and three rooms each. There will be wall beds, steam heat, elevator service and a vacuum cleaning system. The exterior of the building will probably be faced with pressed brick. Only preliminary plans have been prepared as yet.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, M. D. L. Scott, Douglas Bldg., L. A. Owner, Mrs. Ella Barker. The building will cover an area of 81x98 feet, and is to contain 96 rooms, arranged in two and three room suites. All apartments will have wall beds and connecting bath rooms. There will be steam heat, elevator service and a vacuum cleaning system. The interior will be finished in pine throughout. Composition flooring will be used in the baths. The exterior of the building will be faced with pressed brick. Plans will be ready for figures by September 20th.

Sacramento, Cal.—Apartment house, 5 story and base, reinforced concrete, $182,000. Architects, Smith & Stewart, 244 Kearny St., S. F. Owner, Dr. Faris. The building will be the largest and most modern apartment house structure in Sacramento. The location is one of the most favorable in the city, a large corner lot at the corner of 13th and N streets, overlooking the Capitol grounds and within a few minutes walk of the business center. The building is to cover a site 120x160 feet, and will contain 100 apartments arranged in suites of two, three and four rooms each. Besides the apartments there will be the main lobby, large reception room, amusement room and billiard hall. A feature of the plan is the exceptionally large rooms provided for the apartments and a spacious court, which will contain a fountain and gardens. Sleeping porches in connection with all suites will add another pleasing feature to the building. The mechanical equipment includes steam heat, elevator service, a vacuum cleaning system and a specially designed cooling system. The exterior of the building will be faced with pressed brick. Plans are now being prepared and will probably be ready for figures within three or four weeks.

Long Beach, Los Angeles Co., Cal.—Apartment house, 3 story and base,

frame. Cost not stated. Architect, E. J. Borgmeyer, Stimson Bldg., L. A. Owner, George Ward. The building will be 50x90 feet and is to contain 42 rooms, which will be arranged in two and three room apartments. There will be wall beds and connecting baths. The building will be heated by steam. The exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Venice, Los Angeles Co., Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, Frank T. Kegley, Consolidated Realty Bldg., L. A. Owner, Mrs. P. J. Wilson. The building will cover a ground area of 34x120 feet. The interior has been arranged for two and three room suites with wall beds and private baths. The interior finish will be of pine and redwood. Composition floors will be used in the bath rooms. There will be steam heat and elevator service. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, H. C. Deckbar, Ferguson Bldg., L. A. Owner, Mrs. Eugenia D. Porter. The building will contain 47 rooms, which will be arranged in two and three room apartments. There will be 24 bath rooms. All suites will have wall beds. There will be steam heat and a vacuum cleaning system. The interior finish will be of pine with some oak floors. The exterior of the building will be faced with pressed brick. Plans are complete and sub-figures on the various parts of the work are now being taken.

Los Angeles, Cal.—Apartment house, 4 story and base, reinforced concrete. Cost not stated. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owner's name withheld. The building will cover an area of 75x95 feet. The interior will be arranged for 108 rooms, which will be sub-divided into 51 apartments with connecting baths and wall beds. There will be steam heat, elevator service and a vacuum cleaning plant. The exterior of the building will be faced with cement plaster. Plans are being prepared and bids will be called for shortly.

Portland, Ore.—Apartment house, 5 story and base, brick. Cost not stated. Architect, William J. Kratz, Portland. Owner's name withheld. Only preliminary plans have been prepared and details of the construction cannot be given at this time. The structure, as proposed, will contain all modern conveniences, including wall beds, steam heat, elevator service and dumb waiters. The exterior will probably be faced with pressed brick. Plans will be completed within the next few weeks.

Contracts Awarded.

Los Angeles, Cal.—Apartment house, 3 story and base, brick, $30,000. Architects, Garrett & Bixby, Currier Bldg., L. A. Owner, Matt Conway. Contractor, E. P. Trull, 951 Mariposa St., L. A. Contract price, $27,175.

BRIDGES AND DAMS.

Fresno, Fresno Co., Cal.—Bridge, reinforced concrete. Cost not stated. Engineer, City Engineer Jensen, Fresno. Owners, City of Fresno. The City Engineer has drawn new plans for the proposed reinforced car and foot bridge over Dry Creek at Fortheamp Ave. The new plans provide for a structure 60 feet in width carried on three reinforced concrete piers. Bids will be called for as soon as the plans receive the approval of the City Council.

Seattle, Wash.—Bridges, steel and concrete, $8,000,000. Engineer Deputy County Engineer A. P. Denton, Seattle. Owner, King County.

Deputy County Engineer A. P. Denton has completed plans for the proposed steel and concrete bridges across Lake Washington from Bailey Peninsula to Mercer Island and from Mercer Island to the east shore, and stated to the County Commissioners that they will cost approximately $8,000,000.

The first bridge will be over 3,400 feet long and have a suspension span of 1,400 feet. The other bridge will be 900 feet long and will have a suspension span of 420 feet.

Mr. Denton's estimates of cost are as follows: 35,000 tons of structural steel, $4,375,000; 100,000 cubic yards of concrete, $2,000,000; 30,000 cubic yards excavation, $90,000; 20,000 square yards paving, $50,000; 35,000 square yards painting, $70,000; car tracks, $50,000; lighting, $50,000; approaches, car tracks and lights, $880,000; total, $8,-900,000.

The County Commissioners will consider the matter further but it is doubtful if the question of building the bridges will be placed before the voters this year.

The plans as submitted provide for two roadways and two footways, with a space for a double track street car line.

County Engineer Morrison is of the opinion that the bridges could be built for less money. Assistant County Engineer John M. Baird was associated with Mr. Denton in the preparation of the plans.

CHURCHES.

Modesto, Stanislaus Co., Cal.—Church, reinforced concrete, $20,000. Architect, John J. Foley, Monadnock Bldg., S. F. Owners, St. Stanislaus Catholic Church. The building will cover an area of 46x112 feet and has been designed in the Spanish Renaissance style. The main auditorium will have a seating capacity of 500 people. The interior will be finished in pine and ornamental plaster. There will be furnace heat. The exterior of the building will be faced with white cement plaster. Plans will be complete in the course of three weeks.

Winters, Yolo Co., Cal.—Church, 1 story and base, frame. Cost not stated. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Winters Christian Church. The building has been designed in the Spanish Mission style. The interior will be finished in pine and redwood. The exteror will be covered with cement plaster on metal lath. A metal tile roof will be used. Bids are being taken on three alternative propositions. Plans are complete and bids will be opened shortly.

Chico, Butte Co., Cal.—Church alterations, frame construction, $10,000. Architect, Chester Cole, Chico. Owners, St. John's Episcopal Church. This work will include the removal of the building to another site, the construction of additions to both the church and parish building and extensive interior alterations. Plans have been approved by Rev. E. A. Osborn, the pastor, and bids will be called for at once.

Lodi, San Joaquin Co., Cal.—Church, 1 story and base, reinforced concrete, $20,000. Architect, John J. Foley, Monadnock Bldg., S. F. Owners, St. Ann Roman Catholic Church. The building will be similar in design to another new church designed by the same architect and to be erected at Modesto. The main auditorium will have a seating capacity of 500 people. The interior will be finished in pine and ornamental plaster. The exterior design has been worked out in the Romanesque style. White cement plaster will be used on the exterior. Plans will be ready for figures in about a month.

FACTORIES & WAREHOUSES.

Los Angeles, Cal.—Factory, 3 story and base, reinforced concrete. Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Abbott Hardware Co. The building has been designed for a warehouse and will cover an area of 48x64 feet. The construction will be of reinforced concrete throughout, and heavy enough to carry two additional stories. The Kahn system of floor construction will be used. There will be fireproof doors and metal sash and frames. The exterior of the building will be faced with cement plaster. Plans are being prepared.

Georgetown, Wash.—Factory, 4 buildings, frame construction. Cost not stated. Architects, Saunders & Lawton, Alaska Bldg., Seattle. Owners, Astoria Iron Works. The plans call for the following buildings, a 75x200 foot machine shop, 75x180 foot blacksmith shop, 75x94 foot foundry and 60x60 foot office building. All construction will be of frame with the exteriors covered with sheet iron. Plans are complete and bids will be opened on September 18th.

FLATS.

San Francisco—Flats, 2 story and base, frame, $3,000. Architect, none. Owner, Domenico Comis. The building will cover an area of 27x38 feet and is to contain two small flats of five rooms and bath each. The interior finish will be of pine throughout. There will be electric work and modern plumbing. The exterior will be covered with rustic. Plans are complete and the work will be done by Day Labor.

San Francisco—Flats and stores, 2 story and base, frame, $19,000. Architect, Frank S. Holland, 100 Haight St., S. F. Owner, Charles Harkins. This building will be erected at the corner of 24th and Harrison streets and has been arranged for four stores on the first floor and six four-room flats on the upper floor. The structure will be 50x114 feet. The interior of the flats will be finished in pine and redwood. There will be modern plumbing and electric work. Some art glass will be used. All stores will have large display windows and patent store fronts. The exterior of the building will be covered with shiplap. A contract for the excavating and concrete work has been let and separate figures are now being taken for the carpentry work, plumbing, plastering and painting.

GARAGES.

San Francisco—Garage, 1 story and base, brick, $5,000. Architect, none. Owner, John Pordon, 1737 Mason St., S. F. The building will be 108x87 feet and has been designed as a commercial garage. The floor will be of cement. There will be a general office and storage space. The exterior of the building will be faced with pressed brick. Plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Garage, 2 story and base, brick and reinforced concrete, $90,000. Architects, MacDonald & Applegarth, Call Bldg., S. F. Owner, Paul Bancroft. The building will cover a large corner site at the southeast corner of Van Ness and Sutter. The entire first floor is to be arranged for sales rooms and office while the second floor will contain storage space and repair department. Construction will be fireproof throughout, with cement floors, metal trim and metal sash and frames. The interior of the sales rooms will be finished in pine and redwood and tile. The exterior of the building will be faced with pressed brick and cement plaster. Plans are nearly complete and figures will be called for shortly.

Los Angeles, Cal.—Garage, 2 story and base, brick, $60,000. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owner, Miss L. R. Hawkes. The building has been designed for a commercial garage and sales rooms and will cover an area of 100x155 feet. The entire building is under a lease to the H. O. Harrison Co. A cement and tile floor will be used on the first floor. The first floor is to be given over to the show rooms, offices being placed on a mezzanine floor. The upper floor will contain storage space and repair departments. There will be metal trim, metal sash and frames and copper store fronts. The exterior of the building will be faced with cement plaster. Plans are complete and bids are being taken.

GOVERNMENT WORK AND SUPPLIES.

Dry Dock at Pearl Harbor.

Plans for the extension of the naval dry dock at Pearl Harbor are practically complete, ond the naval act authorizes $1,050,000 for the continuation of this work. The limit of cost was increased to $3,486,500, which provides for an increase in the length of the dock of from 800 to 1,000 feet. This increase is necessary on account of the large ships allowed by the present length and width of the Panama Canal locks. Rear Admiral H. R. Standford, U. S. Navy, chief of the bureau of yards and docks, has been at Pearl Harbor recently and has thoroughly investigated the work at that station. While he did no serve as a member of the board appointed to determine the location of the 200-foot extension to the dock, it is understood that the extension was practically agreed upon at the harbor end. The labor of extending the dock harborward will be much less than if worked inward from the land end. The extension of 200 feet into the harbor will not interfere with the anchorage room.

Sacrnento, Cal., Cabinets.

H. S. Crocker & Co. has been awarded the contract by the supervising architect, Treasury Department, Washington, D. C., for installing filing cabinets in the U. S. post office and court house, Sacramento, Cal., at $780.50.

Santa Barbara, Cal., Public Building.

Bids were received August 27 by the supervising architect, Treasury Department, Washington, D. C., for the construction, complete, including plumbing, heating apparatus, gas piping, electric conduits, and wiring and lighting fixtures for the U. S. post office at Santa Barbara, Cal., as follows:

Fred L. Somers, Los Angeles, Cal., $127,900.

Southwestern Construction Co., Los Angeles, Cal., $122,400.

King Lumber Co., Charlottesville, Va., $118,000.

Eugene Schular, Wampeton, N. D., $115,000.

J. H. Wiese, South Omaha, Neb., $125,000.

Grant Fee, 2440 16th street, San Francisco, Cal., $132,000.

HALLS & SOCIETY BLDGS.

Richmond, Contra Costa Co., Cal.—Lodge hall, 4 story and base, brick and steel, $60,000. Architect, James T. Narbett, Berry Bldg., Richmond. Owners, Richmond Elks' Hall Association. This work has been mentioned here before when the architect was first commissioned to prepare the plans. Bids for the excavating have been opened and contract awarded to J. J. Davis. The building will be 57x108 feet and will contain stores on the first floor, lodge halls, offices and about 20 sleeping apartments on the upper floors. There will be steam heat and elevator service. The interior will be finished in pine and redwood with some maple floors. The exterior will be faced with pressed brick. Plans for the balance of the work are complete and contracts will be let as soon as figures can be secured.

Santa Barbara, Santa Barbara Co., Cal.—Association building, 4 story and base, brick and steel, $90,000. Architects, E. Russell Ray and Winsor Soule, Howard Canfield Bldg., Santa Barbara. These architects have only just received the commission to prepare plans and as yet preliminary sketches only have been made. Details of the building are being worked out by the architects. The Building Committee consists of John F. Diehl, C. H. Frink, N. S. Kaime, William Wyles, J. M. Warren and W. G. Griffith.

HOSPITALS.

Oxnard, Ventura Co., Cal.—Hospital, 2 story and base, brick. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Sisters of Mercy. This is the main building of a group which are to make up the new hospital The structure will be 40x150 feet with a 60-foot wing. The structure will contain the general offices, surgical wards and a number of private rooms. There will be steam heat and a modern system of hospital plumbing. The exterior of the building will be faced with cement plaster. Plans will be complete and go out for figures about November 1st.

Seattle, Wash.—Hospital, 4 story and base, reinforced concrete, $100,000. Architect, Daniel Huntington, Colman Bldg., S. F. Owners, City of Seattle. After several weeks of deliberation Architects Williatzen & Byrne, who were first selected to prepare these plans have withdrawn owing to a disagreement over the compensation. Architect Huntington has been appointed and will start plans at once for the first unit of the big project.

Contracts Awarded.

Bakersfield, Kern Co., Cal.—Hospital, 3 story and base, brick and steel, $41,000. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, Sisters of Mercy. Contractor, Charles Amweg, 244 Kearny St., S. F. Contract price, $41,000.

HOTELS.

Oakland Cal.—Hotel, 4 story and base, brick. Cost not stated. Architect, Clinton Day, Nevada Bldg., S. F. Owners, Pacific Investment Co. The building will be erected on Jackson street. The interior is to be divided into about 100 guest rooms, a number of which will have private baths. There will be steam heat, elevator service and a vacuum cleaning system. Running water has been provided for all rooms. The exterior of the building will be faced with pressed brick. Plans are complete and the architect is now taking figures on the construction.

Oakland, Cal.—Hotel, 6 story and base, brick and steel, $65,000. Architects, Wilde & Schaefer, Albany Bldg., Oakland. Owner's name withheld. This building will be erected near Broadway, and will contain a large number of guest rooms, nearly all of which will have connecting baths. There will be steam heat elevator service and a vacuum cleaning system. The interior of the building will be finished in pine. A large office and lobby besides stores will occupy the first floor. The exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared.

Willows, Glenn Co., Cal.—Hotel additions, 3 story brick, $20,000. Architect, Sylvain Schnaittacher, First National Bank Bldg., S. F. Owners, Hockheimer Co. The present Crawford Hotel at Willows is to undergo complete interior alteration. The owners of the property will take over the management of the building when complete. The new work will include plumbing, electrical work, plastering and painting. Plans for the work are now being prepared.

Los Angeles, Cal.—Hotel., 4 story and base, brick. Cost not stated. Architect, A. L. Haley, California Bldg., L. A. Owner, F. E. Brown. The building will cover an area of 100x104 feet. There will be seven stores besides the hotel lobby and offices on the first floor. Each of the upper floors will contain 29 guest rooms, nine private baths, two public baths and toilets. There will be steam heat and elevator service. Running water will be supplied to all rooms. The interior will be finished in pine and hardwoods. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Pomona, Los Angeles Co., Cal.—Hotel, 3 story and base, reinforced concrete. Cost not stated. Architects, Allison & Allison, Hibernian Bldg., L. A. Owner, Dr. W. F. Fundenberg, Pasadena. Only preliminary sketches have been prepared for this work, and none of the details have been decided upon. The intention of the owner is to put up a strictly modern hotel for commercial business, and which will contain in the neighborhood of 250 rooms. Complete details will be given as the plans progress.

Ocean Park, Los Angeles Co., Cal.—Hotel, 6 story and base, brick. Cost not stated. Architects, Eager & Eager, Story Bldg., L. A. Owner, E. A. Allen. The building will be 75x85 feet and will contain three stores besides a lobby on the first floor and 115 guest rooms on the upper floors. About 25 per cent of the rooms will have connecting baths, the balance will be fitted with showers and toilets. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Barton, Ore.—Hotel, 3 story and base, frame, $35,000. Architect, Fred S. Alberton, Portland owners, Neal Institute. The intention if the owners is to establish a high class hotel in connection with their sanitarium. The building will contain the office, lobby and billiard rooms on the first floor and 30 rooms with baths attached on the upper floors. The surrounding grounds, 16 acres in extent, will be parked and enclosed with an ornamental iron fence. There will be a hot water system of heating. All interior finish will be of white enamel. Plans will be completed shortly.

Contracts Awarded.

San Francisco—Hotel, 6 story and base, brick and steel, $124,000. Architects, Miller & Colmesnil, Lick Bldg., S. F. Owner, Anna Favon. Contractors, Matthies & Griffith, 180 Jessie St., S. F. Contract price not stated.

Los Angeles, Cal.—Hotel, 4 story and base, brick, $40,000. Architects, Garrett & Blxby, Currier Bldg., L. A. Owner, L. L. Bowen. Contractors, John T. Long & Co., Byrne Bldg., L. A. Contract price, $40,000.

—LIBRARIES—

Upland, San Bernardino Co., Cal.—Library, 1 story and base, brick, $10,000. Architect, H. W. Glidden, Wright & Callender Bldg., L. A. Owners, City of Upland. Plans for this building are complete and bids will be opened on September 18th. The structure will be 40x60 feet and is designed in the classic style. There will be hardwood finish, a central heating system and metal book racks. The exterior will be faced with pressed brick.

POST OFFICES.

Contracts Awarded.

Billings, Mont.—Postoffice, 2 story and base, brick, stone and steel, $110,000. Architect, Oscar Wenderoth, Washington, D. C. Owners, U. S. Government. Contractors, Wurster Construction Co., Wichita, Kans. Contract price, $106,000.

RESIDENCES.

San Francisco—Residence, 2 story and base, frame, $3,000. Architect, none. Owner, M. Fauth, 29 Alma St., S. F. The dwelling will contain seven rooms and bath. The interior of the building will be finished in pine throughout with oak floors in the principal rooms. Tile will be used in the bath and kitchen. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, $3,500. Architect, E. J. Spence, 6093 Claremont Ave. Berkeley. Owners, Craig & Currie Co. The plans have been prepared for a seven-room house with bath and sleeping porch. The interior finish will be largely of pine. Oak floors will be used in several of the rooms. There will be both open fire places and furnace heat. Mantels will be of brick. Tile will be used in the bath room. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

Oakland, Cal.—Residence, 2 story and base, frame, $3,500. Architect, E. J. Spence, 6093 Claremont Ave., Berkeley. Owners, Craig & Currie Co. The dwelling will be similar in design to another two-story structure to be erected for the same owners on Berkeley property. There will be seven rooms with pine trim and oak floors, furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

Berkeley, Alameda Co., Cal.—Bungalow, 1½ story and base, frame, $3,500. Architect, Frank M. May, 2145 Center St., Berkeley. Owner, Fred Roumage. This house has been designed for a seven-room dwelling with all modern conveniences. The interior will be finished in pine and hardwoods with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with shingles. Plans are being prepared.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, $4,500. Architect, E. J. Spence, 6093 Claremont Ave., Berkeley. Owners, Craig & Currie Co. This dwelling will contain eight rooms, bath and sleeping porch. The interior will be finished in pine and redwood. Oak floors will be used in the living and dining rooms and composition flooring in the bath room. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Oakland, Cal.—Cottages, 2, 1 story and base, frame, $2,500 each. Architect, M. L. Newsom, 812 Broadway, Oakland. Owner, Margaret McArthur. These two cottages will each contain six rooms and baths. The interiors will be finished entirely in pine. Oak floors will be used in the living and roning rooms. There will be open fire places and tile mantels. The exteriors will be covered with cement plaster. Plans are complete and figures are being taken.

Alameda, Alameda Co., Cal.—Residence, 2 story and base, frame, $4,000. Architect, M. L. Newsom, 812 Broadway, Oakland. Owner, Mr. Lundholm. The dwelling will contain eight rooms, bath, sleeping porch and a laundry. All interior finish will be of pine. Oak floors will be used in the principal rooms. Tile wainscotting and composition flooring will be used in the bath. There will be furnace heat and open fire places. Mantels will be of brick. The exterior of the house will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Bungalows, 2, 1 story and base, frame, $2,000 each. Architect, M. L. Newsom, 812 Broadway, Oakland. Owner, Mr. Horner. Each of these bungalows will contain six rooms and bath. The interior finish will be of pine. Oak floors will be used in some of the rooms. There will be open fire places and tile mantels. The exteriors of the bungalows will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, $5,000. Architects, Hutchinson Bros., 470 13th St., Oakland. Owner's name withheld. The dwelling will contain eight rooms, baths, sleeping porch and laundry. The interior will be finished in pine and redwood. Oak will be used in the floors of several of the principal rooms and composition flooring in the bath room. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be covered with rustic. Architects are now completing the working drawings.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, $3,500. Architect, none. Owners, Peake-Munroe Co., 2035 Shattuck Ave., Berkeley. The dwelling has been designed for a seven-room house with bath and sleeping porch. The interior will be finished in pine and redwood throughout. There will be furnace heat and open fire places. The mantels will be brick or tile. The exterior of the house will be covered with shingles. Plans are in the hands of the owners and sub-figures on all parts of the work are being taken.

Berkeley, Alameda Co., Cal.—Residence, 2 story, base and attic, concrete and frame, $50,000. Architect, Loring P. Rixford, Mills Bldg., S. F. Owner, W. P. Woolsey. This dwelling is to be erected in Thousand Oaks. There will, in reality be two separate houses and a garage. Included in the work is a large amount of landscape gardening and the construction of a retaining wall. The main dwelling will contain twelve rooms, baths and a laundry. The interior will be finished in pine, redwoods and hardwoods. Both oak and composition floors will be used. Tile will be used in the bath rooms and kitchen. The dwelling will be heated by a central plant, probably steam. There will be open fire places and brick or tile mantels. The exterior of the main dwelling and garage will be covered with cement plaster. Plans are now complete and figures are being taken.

Oakland, Cal.—Residence alterations, 2 story, frame, $2,300. Architect, Al-

bert Farr, Foxcroft Bldg., S. F. Owner, Irving Lundberg. This work will include the addition of two bed rooms, three bath rooms and a sleeping porch besides extensive alterations to the old rooms. Redwood interior finish will be used throughout. The exterior of the old part of the dwelling will remain unchanged and the now portion will be made to harmonize. Plans are complete and figures are being taken.

Oakland, Cal.—Residence, 2 story and base, frame, $3,000. Architect, none. Owner, J. R. Riley, 448 45th St., Oakland. The dwelling has been designed for a six-room house with bath. There will be open fire places and tile mantels. The interior will be finished in pine throughout. The exterior will be covered with lath and plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

St. Helena, Napa Co., Cal.—Bungalow, 1½ story and base, frame, $3,000. Architect, L. M. Turton, 144 Main St., Napa. Owner, Mrs. G. B. Anderson. The house will contain six sleeping rooms two baths and a sleeping porch. Redwood and pine will be used for interior trim. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick or tile. The exterior of the house will be covered with shingles. Plans are complete and figures are being taken.

Stockton, San Joaquin Co., Cal—Bungalow, 1½ story and base, frame, $3,000 Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, Mr. Denton. The dwelling will contain five rooms, bath and sleeping porch. The interior will be finished entirely in pine. Oak will be used in the floors of several rooms. There will be open fire places and tile mantels. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with rustic. Plans are being prepared

Stockton, San Joaquin Co., Cal.—Residence, 2 story and base, frame, $4,000. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, D. M. Burge. The dwelling has been designed for an eight-room house with baths and sleeping porch. All interior finish will be either of pine or redwood. There will be furnace heat and open fire places. The mantels will be of tile or brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with rustic. Plans are being prepared.

Castro Valley, Contra Costa Co., Cal.—Bungalow, 1 story and base, frame, $2,500. Architects, Haar & Davis, 1520 Broadway, Oakland. Owner, A. R. Noe. The house will contain five rooms, bath and sleeping porch. The interior will be finished in pine and redwood. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with brick veneer and rustic. Plans are complete and figures are being taken.

San Rafael, Marin Co., Cal.—Bungalow, 1½ story and base, frame, $4,000. Architect, Ralph Warner Hart, Humboldt Bank Bldg., S. F. Owner, C. A. Miller. The bungalow has been designed for a seven-room house with baths, sleeping porches and a laundry. The interior will be finished in pine and redwood with oak floors throughout. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with shiplap. Plans are complete and figures are being taken.

San Francisco—Residence, 1½ story and base, frame, $3,000. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Thomas Scoble, 363 14th Ave., S. F. This dwelling will contain six rooms, bath and sleeping porch. The interior will be finished in pine with some elm panels. Oak will be used in the floors of the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, $4,500. Architect, George Anderson, 5456 College Ave., Oakland. Owner, Mrs. La Salle. The dwelling will contain seven rooms, bath and sleeping porch. The interior trim will be of pine or redwood. Oak floors will be used in the principal rooms and composition flooring in the bath. There will be furnace heat and open fire places. The mantels will be of brick and tile. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

The dwelling will contain eight rooms, baths, sleeping porches and a laundry. The interior will be finished in pine, redwood and white enamel. There will be furnace heat and open fire places. Mantels will be of brick and tile. Oak floors will be used in the all principal rooms except the baths, which will have composition flooring. Tile will be used in the bath and kitchen. The exterior of the house will be covered with shakes. Plans are now being prepared.

Oakland, Cal.—Residence, 2 story and base, frame, $5,000. Architect, George Anderson, 5456 College Ave., Oakland. Owner, J. A. Marshall. The dwelling will contain eight rooms, bath and sleeping porch. All interior finish will be either of pine or redwood. Oak floors will be used throughout except in the bath room, which will have a composition floor. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SCHOOLS.

Willows, Glenn Co., Cal.—School, 2 story and base, brick, $45,000. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Willows School District. Architect Weeks has just been commissioned to prepare plans for this work. Several other sets of plans were considered for the building which is to contain eight class rooms, assembly hall and principal's office. There will be a central heating system and a modern system of ventilation. The exterior will probably be faced with pressed brick. Plans will be ready for figues in the course of a month.

Contracts Awarded.

Crows Landing, Stanislaus Co., Cal.—School, 2 story and base, brick, $35,000. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Bonita School District. Contractors, Peterson & Wilson, S. F., general construction. Contract price, $28,485. Contract for plumbing and heating has not been awarded as yet.

Los Angeles, Cal.—School, 1 story and base, frame, $30,000. Architect, A. H. Daum, L. A. Owners, City of Los Angeles. Contractor, Murdock McKenzie, 416 West 4th St., L. A. Contract price, $27,657.

Los Angeles Cal.—School, 2 story and base, brick, $40,000. Architect, William J. Bliesner, Laughlin Bldg., L. A. Owners, City of Los Angeles. Contractor, B. D. Kronnick, 3901 So. Hill St., L. A. Contract price, $38,294.

—STORE BUILDINGS—

San Francisco—Stores and offices, 4 story and base, reinforced concrete, $40,000. Architects, Frye & Shastey, Monadnock Bldg., S. F. Owners, Hop Woe Society. The building will be one of the most modern structures erected in Chinatown since the fire, and is to cover an area of 40x100. The first floor will contain several stores and the entrance to the upper floors. Negociations are pending with a prominent Chinese government official who may take offices in the building, and if so the interiors will be highly ornate. The exterior will be faced with pressed brick. Plans are being prepared.

San Francisco—Stores and office addition Class A construction. Cost not stated. Architects, L. B. Dutton &

Co., Chronicle Bldg., S. F. Owners, Sherman-Clay Co. It has recently been decided to make the proposed addition to the Sherman & Clay building, at the corner of Kearny and Sutter streets, a four-story steel frame addition instead of one story as first planned. Revised bids are being taken from several contractors who figured the original work.

San Francisco—Stores and lofts, 3 story and base, brick and steel. Architect's name withheld. Owners, Ernest H. and C. M. Dettner, 451 Bush St., S. F. The building will be 20x60 feet, the first floor being arranged for one store and the upper two floors for lofts. There will be a freight elevator installed. The exterior of the building will be faced with pressed brick. Plans are being prepared, and as soon as they are complete bids will be taken by the owners.

San Francisco—Stores and lofts, 2 story and base, reinforced concrete, $35,000. Architects, Salfield & Kohlberg, Clunie Bldg., S. F. Owner, Miss A. T. Smith. The building has been designed for stores and light manufacturing purposes. There will be a mezzanine floor. The interior will be finished in pine throughout with fireproof doors and metal sash and frames. There will be freight elevator service. The exterior will be faced with white cement plaster. Plans are complete and bids have been taken. A contract will be awarded within a few days.

San Francisco—Stores and flats, 3 story and base, frame, $22,000. Architect, Henry Shermund, Mills Bldg., S. F. Owner, Mrs. Katharine Siepel. The building will cover an area of 27x120 feet and will have three street frontages. The first floor will be arranged for two large stores with basement storage space. There will be six modern flats of four, five and six rooms on the upper floors. The interior will be finished in pine and redwood with some oak floors. There will be open fire places and tile mantels. Several wall beds are specified. The exterior will be covered with veneer brick and special run rustic. Plans are complete and figures are being taken.

Burlingame, San Mateo Co., Cal.—Store, 1 story and base, reinforced concrete, $10,000. Architect, John J. Foley, Monadnock Bldg., S. F. Owner's name withheld. The building was mentioned here before when it was first contemplated. At that time the construction was to have been of brick, but this has been changed to reinforced concrete. Plans are complete and the architect is taking figures on the work.

Los Angeles, Cal.—Stores and offices, 13 story and base. Class A construction. Cost not stated. Architect, none. Owners, Home Builders, Opera House Bldg., L. A. The property to be improved has a frontage of 103 feet and a depth of 108 feet. None of the particulars of the building are available at this time. Management of the construction will probably be invested in C. Westley Roberts, Citizens' Bank Bldg., who is a director of the company. Full particulars will be given as the plans progress.

Los Angeles, Cal.—Stores and offices, 4 story and base. Class A construction. Cost not stated. Architects, William Curlett & Son, Phelan Bldg., S. F., and Title Ins Bldg., L. A. Owner, Frank P. Flint. The building will be 60x155 feet. The construction is to be of reinforced concrete with an enamel brick facing. The trim will be of metal with metal sash and frames, hollow tile and metal lath and plaster partitions, cement and tile floors. There will be steam heat and elevators. Plans are complete and figures are being taken.

Seattle, Wash.—Stores and offices, 8 story and base. Class A construction, $150,000. Architects, Bebb & Mendel, Lenny Bldg., Seattle. Owner, George W. Fisher. The building will cover an area of 60x110 feet and has been designed for several stores on the first floor and a large number of modern offices on the upper floors. The construction will consist of a complete steel frame and exterior walls of pressed brick and terra cotta. There will be hollow tile and metal lath and plaste interior partitions, metal sash and frames, tile and concrete floors. The mechanical equipment will consist of a steam heating system, elevators and a vacuum cleaning plant. Plans are complete and figures are being taken.

Contracts Awarded.

Seattle, Wash.—Stores and offices, 2 story and base, brick, $20,000. Architect, James H. Schack, Downs Bldg., Seattle. Owner, Joseph Libby. Contractor, F. W. Layton, 1541 16th Ave., Seattle. Contract price, $20,000.

Santa Monica, Los Angeles Co., Cal.—Stores, 3 story and base, brick, $50,000. Architect, none. Owner, A. A. Juniper. Contractors and designers, Ye Planry Co., Title Ins Bldg., L. A. Contract price, $50,000. Note. These plans are now being prepared but no work has been started.

Los Angeles, Cal.—Stores and offices, 13 story and base. Class A construction. $75,000 Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Standard Fireproof Bldg., Co. Contractor, J. V. McNeil, Citizens' National Bank Bldg., L. A. Contract price, $75,000.

THEATRES.

San Francisco—Theatre and offices, 8 story and base. Class A construction, $350,000. Architect, B. Marcus Pretica, Empire Bldg., Seattle. This work was mentioned here nearly a year ago when the announcement was first made that the Kahn Circuit of New York intended to invade this territory. The architect has returned to his Seattle offices, and is now engaged in completing the working drawings for this building. Full particulars will be given as the plans progress. ... ...

SEALED PROPOSALS.

PROPOSALS FOR FURNISHING CAST IRON POLICE TELEPHONE STANDARDS.

SAN FRANCISCO.

Residence—2 story and base, frame, $2,000. San Francisco. Architect, none. Owner, M. Fauth, 29 Alma St., S. F. The dwelling will contain seven rooms and bath. The interior of the building will be finished in pine throughout with oak floors in the principal rooms. Tile will be used in the bath and kitchen. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

Apartment House—6 story and base, reinforced concrete, $90,000. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner, C. A. Jordan. The building will be erected on Leavenworth street near Ellis, and is to cover a considerable area. The interior will be subdivided into 56 apartments of two and three rooms each. All apartments will have connecting baths and wall beds. The interior will be finished in pine, redwood, mahogany and jenisero. There will be steam heat, both freight and passenger elevators, a vacuum cleaning system and dumb waiters. The exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

Apartment House—4 story and base, reinforced concrete, $20,000. San Francisco. Architect, Phillip Overman, Shreve Bldg., S. F. Owners, Columbia Realty Co. The building will contain in the neighborhood of 24 apartments arranged in suites of two and three rooms each. All will have wall beds and connecting baths. The interior will be finished in pine. There will be steam heat and elevator service. The exterior of the building will be faced with cement plaster. Plans are now complete and the architect is taking figures on the work.

Apartment House—3 story and base frame, $22,000. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owner, T. L. Ayres. This building will be erected on a corner lot and will cover an area of 50x80 feet. There will be 21 apartments, each of which will contain three rooms and bath. There will be wall beds and steam heat. The interior will be finished in pine and redwood with some oak floors. Tile will be used in the bath rooms. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Flats—2 story and base, frame, $3,000. San Francisco. Architect, none. Owner, Domenico Comis. The building will cover an area of 27x38 feet and is to contain two small flats of five rooms and bath each. The interior finish will be of pine throughout. There will be electric work and modern plumbing. The exterior will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Flats and Stores—2 story and base frame, $19,000. San Francisco. Architect, Frank S. Holland, 100 Haight St., S. F. Owner, Charles Harkins. This building will be erected at the corner of 24th and Harrison streets and has been arranged for four stores on the first floor and six four-room flats on the upper floor. The structure will be 50x114 feet. The interior of the flats will be finished in pine and redwood. There will be modern plumbing and electric work. Some art glass will be used. All stores will have large display windows and patent store fronts. The exterior of the building will be covered with shiplap. A contract for the excavating and concrete work has been let and separate figures are now being taken for the carpentry work, plumbing, plastering and painting.

Garage—1 story and base, $5,000. San Francisco. Architect, none. Owner, John Pordon, 1737 Mason St., S. F. The building will be 108x87 feet and has been designed as a commercial garage. The floor will be of cement. There will be a general office and storage space. The exterior of the building will be faced with pressed brick. Plans are in the hands of the owner and the work will be done by Day Labor.

Garage—2 story and base, brick and reinforced concrete, $90,000. San Francisco. Architects, MacDonald & Applegarth, Call Bldg., S. F. Owner, Paul Bancroft. The building will cover a large corner site at the southeast corner of Van Ness and Sutter. The entire first floor is to be arranged for sales rooms and office, while the second floor will contain storage space and repair department. Construction will be fireproof throughout, with cement floors, metal trim and metal sash and frames. The interior of the sales rooms will be finished in pine and redwood and tile. The exterior of the building will be faced with pressed brick and cement plaster. Plans are nearly complete and figures will be called for shortly.

Residence—1½ story and base, frame $3,000. San Francisco. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Thomas Scoble, 363 14th Ave., S. F. This dwelling will contain six rooms, bath and sleeping porch. The interior will be finished in pine with some elm panels. Oak will be used in the floors of the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

Stores and Offices—4 story and base, reinforced concrete, $40,000. San Francisco. Architects, Frye & Shastey, Monadnock Bldg., S. F. Owners, Hop Woe Society. The building will be one of the most modern structures erected in Chinatown since the fire, and is to cover an area of 40x100. The first floor will contain several stores and the entrance to the upper floors. Negociations are pending with a prominent Chinese government official, who may take offices in the building, and if so the interiors will be highly ornate. The exterior will be faced with pressed brick. Plans are being prepared.

Stores and Office Addition—4 story, Class A construction. Cost not stated. San Francisco. Architects, L. B. Dutton & Co., Chronicle Bldg., S. F. Owners, Sherman-Clay Co. It has recently been decided to make the proposed addition to the Sherman & Clay building at the corner of Kearny and Sutter streets a four-story steel frame addition, instead of one story as first planned. Revised bids are being taken from several contractors who figured the original work.

Stores and Lofts—3 story and base, brick and steel, $12,000. San Francisco. Architect's name withheld. Owners, Ernest H. and C. M. Dettner, 451 Bush St., S. F. The building will be 20x60 feet, the first floor being arranged for one store and the upper two floors for lofts. There will be a feright elevator installed. The exterior of the building will be faced with pressed brick. Plans are being prepared, and as soon as they are complete bids will be taken by the owners.

Stores and Lofts—3 story and base, reinforced concrete, $35,000. San Francisco. Architects, Salfield & Kohlberg, Clunie Bldg., S. F. Owner, Mrs. A. T. Smith. The building has been designed for stores and light manufacturing purposes. There will be a mezzanine floor. The interior will be finished in pine throughout with fireproof doors and metal sash and frames. There will be freight elevator service. The exterior will be faced with white cement plaster. Plans are complete and bids have been taken. A contract will be awarded within a few days.

Stores and Flats—3 story and base, frame, $22,000. San Francisco. Architect, Henry Shermund, Mills Bldg., S. F. Owner, Mrs. Katherine Siepel. The building will cover an area of 27x120 feet and will have three street frontages. The first floor will be arranged for two large stores with basement storage space. There will be six modern flats of four, five and six rooms on the upper floors. The interior will be finished in pine and redwood with some oak floors. There will be open fire places and tile mantels. Several wall beds are specified. The exterior will be covered with veneer brick and special run rustic. Plans are complete and figures are being taken.

Theatre and Offices—8 story and base. Class A construction. $350,000. San Francisco. Architect, B. Marcus Pretica, Empire Bldg., Seattle. This work was mentioned here nearly a year ago, when the announcement was first made that the Kahn Circuit of New York intended to invade this territory. The architect has returned to his Seattle

offices and is now engaged in completing the working drawings for this building. Full particulars will be given as the plans progress.

Contracts Awarded.

OAKLAND AND ALAMEDA COUNTY.

Residence—2 story and base, frame, $3,500. Berkeley, Alameda Co., Cal. Architect, E. J. Spence, 6093 Claremont Ave., Berkeley. Owners, Craig & Currie Co. The plans have been prepared for a seven-room house with bath and sleeping porch. The interior finish will be largely of pine. Oak floors will be used in several of the rooms. There will be both open fire places and furnace heat. Mantels will be of brick. Tile will be used in the bath room. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

Residence—2 story and base, frame, $3,500. Oakland, Cal. Architect, E. J. Spence, 6093 Claremont Ave., Berkeley. Owners, Craig & Currie Co. The dwelling will be similar in design to another two-story structure to be erected for the same owners on Berkeley property. There will be seven rooms with pine trim and oak floors, furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

Bungalow—1½ story and base, frame, $3,500. Berkeley, Alameda Co., Cal. Architect, Frank M. May, 2145 Center St., Berkeley. Owner, Fred Roumage. This house has been designed for a seven-room dwelling with all modern conveniences. The interior will be finished in pine and hardwoods with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with shingles. Plans are being prepared.

Residence—2 story and base, frame, $4,500. Berkeley, Alameda Co., Cal. Architect, E. J. Spence, 6093 Claremont Ave., Berkeley. Owners, Craig & Currie Co. This dwelling will contain eight rooms, bath and sleeping porch. The interior will be finished in pine and redwood. Oak floors will be used in the living and dining rooms and composition flooring in the bath room. There will be furnace heat and open fire places. The mantels will be of brick The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Cottages—2, 1 story and base, frame, $2,500 each. Oakland, Cal. Architect, M. L. Newsom, 812 Broadway, Oakland. Owner, Margaret McArthur. These two cottages will each contain six rooms and bath. The interiors will be finished entirely in pine. Oak floors will be used in the living and dining rooms. There will be open fire places and tile mantels. The exteriors will be covered with cement plaster. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $4,000. Alameda, Alameda Co., Cal. Architect, M. L. Newsom, 812 Broadway, Oakland. Owner, Mr. Lundholm. All interior finish will be of pine. Oak floors will be used in the principal rooms. Tile wainscotting and composition flooring will be used in the bath. There will be furnace heat and open fire places. Mantels will be of brick. The exterior of the house will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

Bungalows—2, 1 story ond base, frame, $2,000 each. Oakland, Cal. Architect, M. L. Newsom, 812 Broadway, Cakland. Owner, Mr. Horner. Each of these bungalows will contain six rooms and bath. The interior finish will be of pine. Ook floors will be used in some of the rooms. There will be open fire places and tile mantels. The exteriors of the bungalows will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $5,000. Oakland, Cal. Architects, Hutchinson Bros., 470 13th St., Oakland. Owner's name withheld. The dwelling will contain eight rooms, baths, sleeping porch and laundry. The interior will be finished in pine and redwood. Oak will be used in the floors of several of the principal rooms and composition flooring in the bath room. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be covered with rustic. Architects are now completing the working drawings.

Residence—2 story and base, frame, $3,500. Berkeley, Alameda Co., Cal. Architect, none. Owners, Peake-Munroe Co., 2035 Shattuck Ave., Berkeley. The dwelling has been designed for a seven-room house with bath and sleeping porch. The interior will be finished in pine and redwood throughout. There will be furnace heat and open fire places. The mantels will be of brick or tile. The exterior of the house will be covered with shingles Plans are in the hands of the owners and subfigures on all parts of the work are being taken.

Residence—2 story, base and attic, concrete and frame, $50,000. Berkeley, Alameda Co., Cal. Architect, Loring P. Rixford, Mills Bldg., S. F. Owner, W. P Woolsey. This dwelling is to be erected in Thousand Oaks. There will, in reality, be two separate houses and a garage. Included in the work is a large amount of landscape gardening and the construction of a retaining wall. The main dwelling will contain twelve rooms, baths and a laundry. The interior will be finished in pine, redwood and hardwoods. Both oak and composition floors will be used. Tile will be used in the bath rooms and kitchen. The dwelling will be heated by a central plant, probably steam. There will be open fire places and brick or tile mantels. The exterior of the main dwelling and garage will be covered with cement plaster. Plans are now complete and figures are being taken.

Residence Alterations—2 story frame, $2,300. Oakland, Cal. Architect Albert Farr, Foxcroft Bldg., S. F. Owner, Irving Lundberg. This work will include the addition of two bed rooms, three bath rooms and sleeping porch besides extensive alterations to the old rooms. Redwood interior finish will be used throughout. The exterior of the old part of the dwelling will remain unchanged and the new portion will be made to harmonize. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $3,000. Oakland, Cal. Architect, none. Owner, J. R. Riley, 448 45th St., Oakland. The dwelling has been designed for a six-room house with bath. There will be open fire places and tile mantels. The interior will be finished in pine throughout. The exterior will be covered with lath and plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

Apartment House—5 story and base, reinforced concrete, $110,000. Oakland, Cal. Architect, E. W. Hartman, 243 41st St., Oakland. Owner, John B. Mitchell. The building will cover a ground area of 60x140 feet and will contain 72 apartments, which have been arranged in suites of two and three rooms each. All apartments will have connecting baths and wall beds. The interior will be finished in pine with some oak floors. Tile and composition flooring will be used in the bath rooms. There will be steam heat, and oil burning plant, elevator service and vacuum cleaning system. The exterior of the building will be faced with cement plaster. Plans are complete and subfigures are being taken on all parts of the work.

Hotel—4 story and base, brick. Cost not stated. Oakland, Cal. Architect, Clinton Day, Nevada Bank Bldg., S. F. Owners, Pacific Investment Co. The building will be erected on Jackson street. The interior is to be divided into about 100 guest rooms, a number of which will have private baths. There will be steam heat, elevator service and a vacuum cleaning system. Running water has been provided for all rooms. The exterior of the building will be faced with pressed brick. Plans are complete and the architect is now taking figures on the construction.

Hotel—6 story and base, brick and steel, $65,000. Oakland, Cal. Architects, Wilde & Schaefer, Albany Bldg., Oakland. Owner's name withheld. This building will be erected near Broadway and will contain a large number of guest rooms, nearly all of which will have connecting baths. There will be steam heat, elevator service and vacuum cleaning system. The interior of the building will be finished in pine. A large office and lobby besides stores will occupy the first floor. The exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are now being prepared.

Residence—2 story and base, frame, $4,500 Berkeley, Alameda Co., Cal. Architect, George Anderson, 5456 College Ave., Oakland. Owner, Mrs. La Salle. The dwelling will contain seven rooms, bath and sleeping porch. All interior trim will be of pine or redwood. Oak floors will be used in the principal rooms and composition flooring in the bath. There will be furnace heat and open fire places. The mantels will be of brick and tile. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $4,500 Berkeley, Alameda Co., Cal. Architect, none. Owner, H. M Smalley, 3501 College Ave., Berkeley. The dwelling has been designed for a seven room house with bath, sleeping porch and a laundry. The interior will be finished in pine, redwood and oak. Oak

floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $4,500 Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, C. H. Elrod. The dwelling will be erected in Berkeley Heights and has been designed for a seven-room house with bath and sleeping porch. The interior will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Composition flooring will be used in the bath room. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared for the work.

Residence—2 story and base, frame, $3,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, E. L. Reese, 221 Sansome St., S. F. The dwelling has been designed for a six room house with bath and sleeping porch. The interior will be finished in pine and redwood. Oak floors will be used in the dining and living rooms. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with brick veneer and shingles. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $5,000. Oakland, Cal. Architect, George Anderson, 5456 College Ave., Oakland. Owner, Mrs. Alton. The dwelling will contain eight rooms, baths, sleeping porches and a laundry. The interior will be finished in pine, redwood and white enamel. There will be furnace heat and open fire places. Mantels will be of brick and tile. Oak floors will be used in all principal rooms except the baths which will have composition flooring. Tile will be used in the baths and kitchen. The exterior of the house will be covered with shakes. Plans are now being prepared.

Residence—2 story and base, frame, $5,000. Oakland, Cal. Architect, George Anderson, 5456 College Ave., Oakland. Owner, J. A. Marshall. The dwelling will contain eight rooms, bath and sleeping porch. All interior finish will be either of pine or redwood. Oak floors will be used throughout except in the bath room which will have a composition floor. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

Bungalow—1 story and base, frame, $2,500. Castro Valley, Contra Costa Co., Cal. Architects, Haar & Davis, 1520 Broadway, Oakland. Owner, A. R. Noe. The house will contain five rooms, bath and sleeping porch. The interior will be finished in pine and redwood. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with brick veneer and rustic. Plans are complete and figures are being taken.

Bungalow — 1½ story and base, frame, $4,000. San Rafael, Marin Co., Cal. Architect, Ralph Warner Hart, Humboldt Bank Bldg., S. F. Owner, C. A. Miller. The bungalow has been designed for a seven-room house with baths, sleeping porches and a laundry. The interior will be finished in pine and redwood with oak floors throughout. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with shiplap. Plans are complete and figures are being taken.

Lodge Hall—1 story and base, brick and steel, $60,000. Richmond, Contra Costa Co., Cal Architect, John T. Narbett, Berry Bldg., Richmond. Owners, Richmond Elks' Hall Association. This work has been mentioned here before when the architect was first commissioned to prepare the plans. Bids for the excavating have been opened and a contract awarded to J. J. Davis. The building will be 57x108 feet, and will contain stores on the first floor, lodge halls, offices and about 20 sleeping apartments on the upper floors. There will be steam heat and elevator service. The interior will be finished in pine and redwood with some maple floors. The exterior will be faced with pressed brick. Plans for the balance of the work are complete and contracts will be let as soon as figures can be secured.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

Apartment House—4 story and base, brick and steel, $75,000. Stockton, San Joaquin Co., Cal. Architect, Engineering Dept. Home Builders' Investment and Security Co., 26 North San Joaquin St., Stockton. Owners, Home Builders' Investment and Security Co. The building will cover an area of 100x100 feet, and has been arranged to contain 48 apartments of two and three rooms. There will be connecting baths, wall beds, steam heat, a vacuum cleaning system, elevators and all other modern conveniences. The exterior of the building will be faced with pressed brick. Plans for this work are complete and on file at this office for the benefit of local contractors and material men. The work will be done under the direct supervision of the owners.

Bungalow—1½ story and base, frame, $3,000. St. Helena, Napa Co., Cal. Architect, L. M. Turton, 144 Main St., Napa. Owner, Mrs. G. B. Anderson. The house will contain six sleeping rooms, two baths and a sleeping porch. Redwood and pine will be used for interior trim. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick or tile. The exterior of the house will be covered with shingles. Plans are complete and figures are being taken.

Bungalow — 1½ story and base, frame, $3,000. Stockton, San Jooquin Co., Cal. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, Mr. Denton. The dwelling will contain six rooms, bath and sleeping porch. The interior will be finished entirely in pine. Oak will be used in the floors of several rooms. There will be open fire places and tile mantels. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with rustic. Plans are now being prepared.

Residence—2 story and base, frame, $4,000. Stockton, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, D. M. Burge. The dwelling has been designed for an eight-room house with baths and sleeping porch. All interior finish will be either of pine or redwood. There will be furnace heat and open fire places. The mantels will be of tile or brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with rustic. Plans are being prepared.

Apartment House—5 story and base, reinforced concrete, $182,000. Sacramento, Cal. Architects, Smith & Stewart, 244 Kearny St., S. F. Owner, Dr. Faris. This building will be the largest and most modern apartment house structure in Sacramento. The location is one of the most favorable in the city, a large corner lot at the corner of 13th and N streets, overlooking the Capitol gounds and within a few minutes walk of the business center. The building is to cover a site 120x160 feet and will

contain 100 apartments arranged in suites of two, three and four rooms each. Besides the apartments there will be a main lobby, large reception room, amusement room and billiard hall. A feature of the plan is the exceptionally large rooms provided for the apartments, and a spacious court which will contain a fountain and gardens. Sleeping porches in connection with all suites will add another pleasing feature to the building. The mechanical equipment includes steam and elevator service, a vacuum cleaning system and a specially designed cooling system. The exterior of the building will be faced with pressed brick. Plans are now being prepared and will probably be ready for figures within three or four weeks.

Church—1 story and base, frame. Cost not stated. Winters, Yolo Co., Cal. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Winters Christian Church. The building has been designed in the Spanish Mission style. The interior will be finished in pine and redwood. The exterior will be covered with cement plaster on metal lath. A metal tile roof will be used. Bids are being taken on three alternative propositions. Plans are complete and bids will be opened shortly.

Church Alterations—Frame construction, $10,000. Chico, Butte Co., Cal. Architect, Chester Cole, Chico. Owners, St. John's Episcopal Church. This work will include the removal of the building to another site, the construction of additions to both the church and parish building, and extensive interior alterations. Plans have been approved by Rev. E. A. Osborn, the pastor, and bids will be called for at once.

Church—1 story and base, reinforced concrete, $20,000. Lodi, San Joaquin Co., Cal. Architect, John J. Foley, Monadnock Bldg., S. F. Owners, St. Ann Roman Catholic Church. The building will be similar in design to another new church designed by the same architect and to be erected at Modesto. The main auditorium will have a seating capacity of 500 people. The interior will be finished in pine and ornamental plaster. The exterior design has been worked out in the Romanesque style. White cement plaster will be used on the exterior. Plans will be ready for figures in about a month.

Hotel Additions—3 story, brick, $20,000. Willows, Glenn Co., Cal. Architect, Sylvain Schnaittacher, First National Bank Bldg., S. F. Owners, Hockheimer Co. The present Crawford Hotel at Willows is to undergo complete interior alteration. The owners of the property will take over the management of the building when complete. The new work will include plumbing, electric work, plastering and painting. Plans for this work are now being prepared.

School—2 story and base, brick, $45,000, Willows, Glenn Co., Cal. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Willows School District. Architect Weeks has just been commissioned to prepare plans for this work. Several other sets of plans were considered for the building, which is to contain eight class rooms, assembly hall and principal's office. There will be a central heating system and a modern system of ventilation. The exterior will probably be faced with pressed brick. Plans will be ready for figures in the course of a month.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Apartment House—4 story and base, brick, $40,000. Los Angeles, Cal. Architect, Scott Quintin, Story Bldg., L. A. Owners, Consolidated Securities Co. The building will occupy a corner site and has been arranged to contain 100 rooms, which will be subdivided into suites of two and three rooms each. There will be wall beds, steam heat, elevator service and a vacuum cleaning system. The exterior of the building will probably be faced with pressed brick. Only preliminary plans have been prepared as yet.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, M. D. L. Scott, Douglas Bldg., L. A. Owner, Mrs. Ella Barker. The building will cover an area of 81x98 feet and is to contain 96 rooms arranged in two and three room suites. All apartments will have wall beds and connecting bath rooms. There will be steam heat, elevator service and a vacuum cleaning system. The interior will be finished in pine throughout. Composition floors will be used in the baths. The exterior of the building will be faced with pressed brick. Plans will be ready for figures by September 20th.

Factory—3 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Abbott Hardware Co. The building has been designed for a warehouse, and will cover an area of 48x64 feet. The construction will be of reinforced concrete throughout, and heavy enough to carry two additional stories. The Kahn system of floor construction will be used. There will be fireproof doors and metal sash and frames. The exterior of the building will be faced with cement plaster. Plans are being prepared.

Garage—2 story and base, brick, $60,000. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owner, Miss L. R. Hawkes. The building has been designed for a commercial garage and sales rooms and will cover an area of 100x165 feet. The entire building is under a lease to the H. O. Harrison Co. A cement and tile floor will be used on the first floor. The first floor is to be given over to the show rooms, offices being placed on a mezzanine floor. The upper floor will contain storage space and repair departments. There will be metal trim, metal sash and frames and copper store fronts. The exterior of the building will be faced with cement plaster. Plans are complete and bids are being taken.

Association Building—4 story and base, brick and steel, $90,000. Santa Barbara, Santa Barbara Co., Cal. Architects, E. Russell Ray and Winsor Soule, Howard Canfield Bldg., Santa Barbara. These architects have only just received the commission to prepare plans and as yet preliminary sketches only have been made. Details of the building are being worked out by the architects. The Building Committee consists of John F. Diehl, C. H. Frink, N. S. Kaime, William Wyles, J. M. Warren and W. G. Griffith.

Hospital—2 story and base, brick. Cost not stated. Oxnard, Ventura Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Sisters of Mercy. This is the main building of a group which are to make up the new hospital. The structure will be 40x150 feet with a 60 foot wing. The structure will contain the general offices, surgical wards and a number of private rooms. There will be steam heat and a modern system of hospital plumbing. The exterior of the building will be faced with cement plaster. Plans will be complete and go out for figures about November 1st.

Hotel—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. L. Haley, California Bldg., L. A. Owner, F. E. Brown. The building will cover an area of 100x104 feet. There will be seven stores besides the hotel lobby and offices on the first floor. Each of the upper floors will contain 29 guest rooms, nine private baths and two public baths and toilets. There will be steam heat and elevator service. Running water will be supplied to all rooms. The interior will be finished in pine and hardwoods. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Hotel—3 story and base, reinforced concrete. Cost not stated. Pomona, Los Angeles Co., Cal. Architects, Allison & Allison, Hibernian Bldg., L. A. Owner, Dr. W. F. Fundenberg, Pasadena. Only preliminary sketches have

been prepared for this work and none of the details have been decided upon. The intention of the owner is to put up a strictly modern hotel for commercial business and which will contain in the neighborhood of 250 rooms. Complete details will be given as the plans progress.

Apartment House—3 story and base, frame. Cost not stated. Long Beach, Los Angeles Co., Cal. Architect, E. J. Borgmeyer, Stimson Bldg., L. A. Owner, George Ward. The building will be 50x90 feet and is to contain 42 rooms, which will be arranged in two and three room apartments. There will be wall beds and connecting baths. The building will be heated by steam. The exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Apartment House—3 story and base, frame. Cost not stated. Venice, Los Angeles Co., Cal. Architect, Frank T. Kegley, Consolidated Realty Bldg., L. A. Owner, Mrs. P. J. Wilson. The building will cover a ground area of 34x120 feet. The interior has been arranged for two and three room suites with wall beds and private baths. The interior finish will be of pine and redwood. Composition floors will be used in the bath rooms. There will be steam heat and elevator service. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, H. C. Deckbar, Ferguson Bldg., L. A. Owner, Mrs. Eugenia D. Porter. The building will contain 47 rooms, which will be arranged in two and three room apartments. There will be 24 bath rooms. All suites will have wall beds. There will be steam heat and a vacuum cleaning system. The interior finish will be of pine with some oak floors. The exterior of the building will be faced with pressed brick. Plans are complete and subfigures on the various parts of the work are now being taken.

Apartment House—4 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owner's name withheld. The building will cover an area of 75x95 feet. The interior will be arranged for 108 rooms which will be subdivided into 51 apartments with connecting baths and wall beds. There will be steam heat, elevator service and a vacuum cleaning plant. The exterior of the building will be faced with cement plaster. Plans are being prepared and bids will be called for shortly.

Hotel—6 story and base, brick. Cost not stated. Ocean Park, Los Angeles Co., Cal. Architects, Eager & Eager, Story Bldg., L. A. Owner, E. A. Allen. The building will be 75x85 feet and will contain three stores on the first floor and 115 guest rooms on the upper floors. About 25 per cent of the rooms will have connecting baths, the balance will be fitted with showers and toilets. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Library—1 story and base, brick, $10,000. Upland, San Bernardino Co., Cal. Architect, H. W. Glidden, Wright & Callender Bldg., L. A. Plans for this building are complete and bids will be opened on September 18th. The structure will be 40x60 feet and is designed in the classic style. There will be hardwood finish, a central heating system and metal book racks. The exterior will be faced with pressed brick.

Stores and Offices—13 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architect, none. Owners, Home Builders, Opera House Bldg., L. A. The property to be improved has a frontage of 103 feet and a depth of 108 feet. None of the particulars of the building are available at this time. Management of the construction will probably be vested in C. Westley Roberts, Citizens' Bank Bldg., who is a director of the company. Full particulars will be given as the plans progress.

Stores and Offices—4 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architects, William Curlett & Son, Phelan Bldg., S. F., and Title Ins. Bldg., L. A. Owner, Frank P. Flint. The building will be 60x155 feet. The construction is to be of reinforced concrete with an enamel brick facing. The trim will be of metal with metal sash and frames, hollow tile and metal lath and plaster interior partitions, cement and tile floors. There will be steam heat and elevators. Plans are complete and figures are being taken.

Stores—3 story and base, brick, $50,000. Santa Monica, Los Angeles Co., Cal. Architect, none. Owner, A. A. Junipher. Contractors and designers, Ye Planry Co., Title Ins. Bldg., L. A. Contract price, $50,000. Note: These plans are now being prepared, but no work has been started.

Contracts Awarded.

Apartment House—3 story and base, brick, $30,000. Los Angeles, Cal. Architects, Garrett & Bixby, Currier Bldg., L. A. Owner, Matt Conway. Contractor, E. P. Trull, 951 Mariposa St., L. A. Contract price, $27,175.

Hotel—4 story and base, brick, $40,000. Los Angeles, Cal. Architects, Garrett & Bixby, Currier Bldg., L. A. Owner, L. L. Bowen Contractors, John T. Long & Co., Byrne Bldg., L. A. Contract price, $40,000.

Postoffice—2 story and base brick, stone and steel, $110,000. Billings, Mont. Architect, Oscar Wenderoth, Washington, D. C. Owners, U. S. Government. Contractors, Wurster Construction Co., Wichita, Kans. Contract price, $106,800.

School—1 story and base, frame, $30,000. Los Angeles, Cal. Architect, A. Daum, L. A. Owners, City of Los Angeles. Contractor, Murdock McKenzie, 416 West 4th St., L. A. Contract price, $27,557.

School—2 story and base, brick, $40,000. Los Angeles, cal. Architect, William J. Bliesner, Laughlin Bldg., L. A. Owners, City of Los Angeles. Contractor, B. D. Kronnick, 3901 So. Hill St., L. A. Contract price, $38,294.

Stores and Offices—13 story and base, Class A construction, $75,000. Los Angeles, Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Standard Fireproof Bldg., Co. Contractor, J. V. McNeil, Citizens' National Bank Bldg., L. A. Contract price, $75,000.

PORTLAND AND OREGON.

Apartment House—5 story and base, brick. Cost not stated. Portland, Ore. Architect, William J. Kratz, Portland. Owner's name withheld. Only preliminary plans have been prepared and details of the construction cannot be given at this time. The structure, as proposed, will contain all modern conveniences including wall beds, steam heat, elevator service and dumb waiters. The exterior will probably be faced with pressed brick. Plans will be completed with the next few weeks.

Hotel—3 story and base, frame, $35,000. Barton, Ore. Architect, Fred S. Aiberton, Portland. Owners, Neil Institute The intention of the owners is to establish a high class hotel in connection with their sanitarium. The building will contain the office lobby and billiard rooms on the first floor and 30 rooms with baths attached on the

upper floors. The surrounding grounds, 18 acres in extent, will be parked and enclosed with an ornamental iron fence. There will be a hot water system of heating. All interior finish will be of white enamel. Plans will be completed shortly.

SEATTLE AND WASHINGTON.

Bridges—Steel and concrete, $8,000,000. Seattle, Wash. Engineer, Deputy County Engineer A. P. Denton, Seattle. Owner, King County.

Deputy County Engineer A. P. Denton has completed plans for the proposed steel and concrete bridges across Lake Washington from Bailey Peninsula to Mercer Island and from Mercer Island to the east shore, and stated to the County Commissioners that they will cost approximately $8,000,000.

The first bridge will be over 3,400 feet long and have a suspension span of 1,400 feet. The other bridge will be 900 feet long and will have a suspension span of 420 feet.

Mr. Denton's estimates of cost are as follows: 35,000 tons of structural steel, $1,575,000; 100,000 cubic yards of concrete, $2,000,000; 30,000 cubic yards excavation, $90,000; 20,000 square yards paving, $50,000; 35,000 square yards painting $70,000; car tracks, $50,000; grading, $50,000; approaches, car tracks and lights, $880,000; total, $8,000,000.

The County Commissioners will consider the matter further but it is essential if the question of building the bridges will be placed before the voters this year.

The plans as submitted provide for two roadways and two footways, with a space for a double track street car line.

County Engineer Morrison is of the opinion that the bridges could be built for less money. Assistant County Engineer John M. Baird was associated with Mr. Denton in the preparation of the plans.

Factory—4 buildings, frame construction. Cost not stated. Georgetown, Wash. Architects, Saunders & Lawton, Alaska Bldg., Seattle. Owners, Astoria Iron Works. The plans call for the following buildings: A 75x200 foot machine shop, 75x180 foot blacksmith shop, 75x94 foot foundry and 60x60 foot office building. All construction will be of frame with the exteriors covered with sheet iron. Plans are complete and bids will be opened on September 18th.

Hospital—4 story and base, reinforced concrete, $100,000. Architect, D. Huntington, Coleman Bldg., Seattle. Owners, City of Seattle. After several weeks of deliberation Architects Willlatzen & Bryne, who were first selected to prepare these plans, have withdrawn owing to a disagreement over the compensation. Architect Huntington has been appointed and will start plans at once for the first unit of the big project.

Stores and Offices—5 story and base, Class A construction $150,000. Seattle, Wash. Architects, Bebb & Mendel, Denny Bldg., Seattle. Owner, George W. Fisher. The building will cover an area of 60x110 feet and has been designed for several stores on the first floor and a large number of modern offices on the upper floors. The construction will consist of a complete steel frame and exterior walls of pressed brick and terra cotta. There will be hollow tile and metal lath and plaster partitions, metal sash and frames, tile and concrete floors. The mechanical equipment will consist of a steam heating system, elevators and a vacuum cleaning plant. Plans are complete and figures are being taken.

Contracts Awarded.

Stores and Offices—2 story and base, brick, $20,000. Seattle, Wash. Architect, James H. Schack, Downs Bldg., Seattle. Owner, Joseph Leibly. Contractor, F. W. Layton, 1541 16th Ave., Seattle. Contract price, $20,000.

FOREIGN CONSTRUCTION WORK.

COLOMBIA.

Road Building, Near Barranquilla.

Increased interest in automobiling in Barranquilla has invariably resulted in demand for more and better roads and streets. There is a project for constructing an automobile road from Barranquilla to connect with Puerto Colombia, passing by oil properties now being prospected, and work will no doubt be commenced promptly. Another scheme, proved practicable also by a successful scouting trip, is a good auto road to connect this city and ancient Cartagena.

Automobile manufacturers and manufacturers of roads-building machinery should all be interested in these plans, and should make an early effort to demonstrate cheap but effective modes of roadway construction. (The names of persons who should be addressed in this matter may be had from the Bureau of Manufactures at Washington.)

CANADA.

Cement Needed for Extensive Building Operations.

There is a large building program in progress in Hamilton, Ontario, in which cement is an important factor. The city is now planning a 7-mile conduit for the wires of the electric system as well as for the telephone and telegraph. The city is also about to build a large central fire station. It is also using cement for poles for street-lighting system. An extensive car shop for manufacturing railway equipment is also to be built immediately. There are also other manufacturing industries building or enlarging. Hamilton should be an inviting field for cement companies to cultivate.

STATE AND FEDERAL GOVERNMENT PREPARE FOR WORK SACRAMENTO.

SACRAMENTO, Aug. 29.—The State and Federal Government will get busy immediately on the work of securing the rights of way for the river rectification of the Sacramento from Collinsville, at the mouth, to Rio Vista.

This announcement was made yesterday by J. F. Neylan, president of the board of control, following a consultation with United States District Attorney John McNab.

The federal government appropriated $400,000 and the state $400,000 for widening the lower reaches and deepening the channel to take care of possible winter flood water.

ASKS FOREST SERVICE TO BUILD ROAD.

WEAVERVILLE (Trinity Co.), September 4.—At its last session, Congress appropriated $27,000 for the purpose of building roads and trails in the Trinity National Forest.

The Weaverville Board of Trade asks that $20,000 of this sum be set aside for building a road from North Fork to Big Bar, a distance down the Trinity River of ten miles, thus completing a link in what some day will become a Trinity-Humboldt County Highway for wheeled vehicles, giving the county the road that was hoped for when the State decided to build from Peanut westward, a road on which $250,000 has been expended already.

The county and the Forest Bureau already have spent jointly the sum of $6000 in widening the trail from North Fork to Big Bar. It is estimated that the expenditure of $20,000 more would transform this excellent trail into splendid wagon road. This would leave only twenty-two miles to complete below Big Bar to give this part of Trinity County an ideal wagon road outlet to Humboldt County. Humboldt County has already offered to do its share to help build towards Trinity County and will bridge the South Fork.

ENLARGING HIGH SCHOOL.

ANDERSON (Shasta Co.), August 31. The enlarging of the Anderson High School Building is being rushed to completion. The old one-story structure has been raised and another story built beneath it, doubling its capacity. School is to open in a couple of weeks, and it is expected the building will be ready in time.

TO BETTER FIRE PROTECTION.

TONOPAH (Nev.), August 31.—The Committee appointed by the citizens of Tonopah to investigate the conditions here and recommend some measure for better fire protection has reported to the citizens that two reservoirs should be built on the top of Mount Oddie, with a capacity of 100,000 gallons each, so that the city may have plenty of water and plenty of pressure at all times for fire purposes. This will probably be the system carried out.

The Committee consisted of Fire Chief W. J. Sinclair, Ambrose Murphy, William Bozarth, W. J. Douglas and P. E. Keeler.

WORK STARTS ON NEW COURT HOUSE.

KLAMATH FALLS (Ore)., August 31.—Work started Friday on the new $200,000 Court House on the Hot Springs site. All legal obstacles have been removed and the faction fights ended by the recent Supreme Court decision. The building is to be one of the most modern in the State.

BOARD OF CONTROL BUYS BONDS

SACRAMENTO, Aug. 30.—The State Board of Control yesterday afternoon completed the purchase of the $50,000 issue of bonds for the Galt High School. The State's bid carried a premium of $4,606.10. These are 6 per cent bonds, and run for a period of twenty-five years. The State also paid the accrued interest on the bonds amounting to by the Board with money in the State $483.33. These bonds were purchased Treasury which the law allows to be invested for the State.

The Board today received an opinion from the Attorney General approving the Jackson, Amador County, Joint Union High School bonds for $25,000 at 5 per cent interest. The State, through the Board of Control, may now proceed with the purchase of these bonds.

The Board also received the approval of the Attorney General of the Santa Clara city municipal bonds for $65,000 for the erection of a new school building and equipment for the Fire Department.

RECOMMENDS SALE OF TIMBER

WASHINGTON (D. C.), August 30.—A. K. Chittenden, forester of the Indian Bureau, has just returned from the Coast. He will recommend the sale of 400,000,000 feet of timber on the Klamath Indian Reservation.

PRODUCES POTTERY.

Ohio continued to be the leading pottery producing State of the Union, reporting for 1911 ware valued at $14,775,265, or 42.80 per cent of the total. This was an increase of $480,553, or 3.36 per cent over 1910, when Ohio reported pottery valued at $14,294,712, or 42.31 per cent of the total. Ohio's principal pottery product is white ware, which constituted 65.06 per cent of its entire product in 1911.

NATIVES TO ERECT BUILDING.

LINCOLN (Placer Co.), September 4.—The deed for the Reynolds property of Fifth Street was filed at Auburn by Attorney A. E. Clark for the Silver Star Corporation, which will shortly begin an up-to-date building on the property.

The structure will be two stories in height, the upper floor to be used for lodge purposes. It will be constructed of terra cotta or concrete. The stock in the company is held by several score citizens of the community, the movement being launched by Silver Star Parlor of Native Sons.

WATER POWER APPROPRIATED

OROVILLE (Butte Co.), September 4 An appropriation of 49,000 miner's inches of water in the Middle Fork of the Feather River, the South Branch of the Middle Fork and on Fall River, was filed with County Recorder J. A. Tyler last week, by F. G. Ebey, S. H. Whisner, and L. F. Breuner, all of San Francisco. The application states that the water is to be used to generate electric power.

It is stated that the power plant is to be located at a point on the Middle Fork, where it is estimated that 80,000 horsepower can be generated. The water will have a fall of 650 feet at the point selected for the plant.

OROVILLE LIBRARY NEARING COMPLETION.

OROVILLE (Butte Co.), Sept. 4.—That the Carnegie Library, which is being erected at a cost of $10,000, will be finished by September 15th, and in readiness for occupancy by October 1st, was the statement made recently by the contractor, Frank Sullivan, of Santa Rosa, who was in this city.

AMOUNT SPENT ON AUTOMOBILES.

The sum of $3,203,200 was spent by the people of California during the month of August for automobiles, according to the statistics of Secretary of State Jordan's office, for 2,288 machines were registered at his office and the average value of automobiles is $1,400. The registration brought the State $4,576, and licenses to 544 Chauffeurs $1,088.

FARM BRINGS BIG PRICE.

DAVIS (Yolo Co.), September 5.—Robert Shields has sold his farm, containing 260 acres, six miles west of Davis, to Frank Wine of Clarksburg for $40,000.

PETITION FOR FOLSOM STREET TUNNEL.

The Southern Alabama and Vicinity Improvement Club held a mass meeting last Sunday night at Mey Hall, 1697 Alabama street, in the interest of the proposed Folsom-street tunnel. All present signed a petition for the tunnel. Arguments for the tunnel were presented by J. Bianchi, secretary of the club, who explained that it would benefit the whole Mission district by giving a road and street car line to the county line. James J. Ryan also spoke in favor of the tunnel.

ESTIMATED WEALTH OF THE STATE.

At the meeting of the State Board of Equalization Wednesday morning the tax rate to raise the legislative grant of money to the Panama-Pacific Exposition was placed at 4 cents and 1 mills on $100, bringing out the official figures of the wealth of the State, the Board of Equalization figuring all the operative and non-operative property in the State to be worth $2,921,277,451.

BIG RECLAMATION SCHEME.

SACRAMENTO, Sept. 5.—A reclamation project which will mean the addition of 35,000 acres of excellent farming land to the tillable area of this State came up before the State Reclamation Board at its meeting at the State Capitol Wednesday upon the application of Granville Moore of New York, and Rufus Thayer, an attorney of San Francisco, representing a group of Eastern capitalists, to reclaim Sutter Basin lying between the Feather River and the proposed Government by-pass, now overflowed by the excess waters of the river.

The project is similar to that of the Natomas Consolidated undertaking above Sacramento, where 55,000 acres of land are being reclaimed by the erection of levees. Engineers have worked out the plan of reclamation for the Sutter Basin and it is upon this plan that the State Reclamation Board, whose permission is necessary before any reclamation work can be undertaken, is now acting.

PETITION FOR BOND ELECTION.

RED BLUFF (Tehama Co.), September 5.—A petition bearing 327 signatures asking the city to call an election to vote on bonds for a municipal water system came before the Trustees last night. After discussion further action was postponed until the next meeting.

V. Paul and P. E. Collins addressed the Board asking that action on the petition be taken. Trustee Hammer stated that some action should be taken, while Trustee Albright thought it would not pass. City Attorney Matlock declared. "It is suicidal to bring on an election now."

REJECT PROPOSALS OF POWER CONCERNS.

MARYSVILLE (Yuba Co.), September 5.—Both the proposition of the Pacific Gas and Electric Company to enter into a five-year contract with the City of Marysville for furnishing the municipality with light and power at reduced rates and the request of the Oro Light and Power Company that the awarding of any such contract be postponed for a period of at least a year, to give them time to enter the local field, were laid over indefinitely by the City Council last night. There was a large assemblage of citizens at the City Hall when the matter was brought up, but none took part in the discussion, which was much briefer than was expected.

AWARD STREET CONTRACTS.

SACRAMENTO, Sept. 6.—The Supervisors of Sacramento County awarded the contract for grading, oiling and sanding Sixteenth Street from North B Street to the Twelfth Street bridge over the American River to the Burns, Clark

and Da Roza Contraction Company yesterday afternoon for $5,308.25. The heavy cost is due to the big fill that will have to be made, necessitating a long haul of material. Now that work is to be done to extend Sixteenth Street from the city limits to the American River the city government will have to open the street to North B if a direct thoroughfare is to be obtained.

The plans and specifications of County Surveyor Miller for the construction of a new road for Folsom leading north from that town and following the old railroad grade north from the bridge to eliminate the 15 to 20 per cent grade now encountered, have been adopted by the Supervisors, and advertisement for bids to be opened September 26th was ordered.

TO RECLAIM SWAMP LAND.

SELMA, Sept. 6.—A crew of carpenters is at work east of this city constructing a clam dredger to be used in the work of dragging the big ditch for the Ward reclamation district. Much interest is being attached to this project, because it is the first work of this kind to be undertaken in Fresno county by property owners. The government has conducted considerable work in the West Park country, by the boring of wells and a pumping system, but the Ward district will be drained by a gravity system, which will have as its principal outlet a ditch 24 feet wide and averaging 8 feet in the cut. This ditch will connect up a chain of sloughs considerably below the level of all surrounding land and drain most of the land without even the use of lateral ditches or tile ducts. It is estimated that about 1500 acres of land will be now under water and tules will be transformed into excellent agricultural land, particularly well suited for berries and garden products. Fully 1000 people can be supported on the new land that will be brought into cultivation, while the land of either side will be greatly benefitted from the general drainage that will be obtained.

As the ditch will extend for 9½ miles, the area affected by the drainage project is of large proportions, and will form an unusually good example of drainage operation for the benefit of other sections. There are 6600 acres of land immediately in the bounds of the district, in addition to the land outside which will be benefitted.

HOUSE PLANNING FROM THE OWNER'S POINT OF VIEW.

Professor Osborne of the University of Pennsylvania Offers a Unique Correspondence Course.

Professor Osborne is offering a twelve week's correspondence course in the above subject. This course is especially addressed to draftsmen who feel the need of direction in the important matter of meeting the owner's requirements with an orderly and scientifically arranged plan.

The course will be divided as follows. (1) a four weeks' consideration of special plans designed to meet owners' requirements of an unusual nature; (2) a four weeks' discussion of general principles and (3) four weeks criticism of students' solution of test problems.

Instruction will be given by weekly letters illustrated by blue prints.

The fee for the course is $10, payable in equal installments. Application lists close Sept. 21st, 1912. No fee is to be sent until the student receives notice that his application is accepted.

Address: Professor Osborne, Box 18, College Hall, Univ. of Penna., Philadelphia, Pa.

The first letter of instruction will be mailed October 5th, 1912.

CHICAGO SUBWAY SYSTEM TO COST $150,000,000.

CHICAGO, September 7.—The proposed subway system for Chicago as now planned, will cost $150,000,000. No plan for financing the project has been decided on as yet, but the system of routing was practically agreed upon last Thursday.

The original plan was for lines directly south, west and north from the downtown district. The new arrangement would add lines northwest and southwest.

BOND ISSUE LOST.

ALTURAS (Modoc Co.), September 7. The proposed bond issue to raise a fund for the building of a new Court House has been defeated by a pronounced majority. The sentiment in the county seems to favor a direct tax for the purpose. The voting was light, many voters being kept from the polls by the rainstorm which prevailed Tuesday.

NORTHERN CALIFORNIA POWER COMPANY NOT TO LEVY ASSESSMENT.

The Northern California Power Company, operating plants in Shasta County, has been authorized to expend the full proceeds of the recent sale of its debentures, amounting to $500,000, by the State Railroad Commission.

When the Commission granted the application of the company to sell the debenture notes it stipulated that the proceeds might be expended for such items only as the Commission approvide. A check of the proposed items has since been made.

Rumors that an assessment of $5 per share would be levyed upon the stock of the Northern California Power Company, which have been current in local financial circles since the State Railroad Commission issued its recent order granting the company permission to issue $500,000 of 6 per cent debenture notes, are declared untrue by H. H. Noble, President of the company. Noble insitst that the company is in excellent shape financially and predicts that it will resume the payment of dividends upon its stock next Spring, probably in March or April.

The gross earnings of the company, according to Noble, were $54,078 in April, $58,463 in May, $62,288 in June, $65,512 in July and $66,212 in August. Noble left for the east recently to be gone for some time.

The recent issue of debenture notes of the Northern California Power Company were bought by a syndicate of Swiss bankers. The sale was made after a careful examination of the company's properties by engineers representing the European financiers. It is reported that engineers for other European bankers are looking over properties in Superior California and that additional financing of pojects in that territory through European houses may be expected in the near future.

NEW INVENTIONS.

Reported especially for this paper by H. B. Willson & Co., Patent Attorneys, 715 Eighth Street N. W., Washington, D. C.

A Complete Copy of any of these patents will be forwarded to any person by Messrs. Willson & Co., on receipt of ten cents. Persons ordering Copies must give Number of Patent.

1,036,589. Door Hanger Track. A. J. Eggleston, Aurora, Ill.

1,036,601. Combined Level Plumb and Grade Finder. D. W. L. Frank Sr., Chicago, Ill.

1,036,658. Window Operator. Leon Lewandowski, Cleveland, Ohio.

1,036,680. Building Piers, Shafts, etc. D. E. Moran, Mendham, N. J.

1,036,681. Sinking Joint Caissons and Building Piers, Walls, etc. D. E. Moran, Mendham, N. J.

1,036,721. Door and Window Closure. B. C. Rockwell, Malvern, Ark.

1,036,773. Window. Joseph Alsfasser, Chicago, Ill.

1,036,804. Canopy Screen for Doors. L. S. Couplin, So. Greenfield, Mo.

1,035,832. Sheet Metal Door Construction. Edwin Gustafson, Jamestown, N. Y., assignor to Levi Olson, Jamestown, N. Y.

1,036,859. Rule Pocket for Garments. Solomon Kirshen, Butte, Mont.

1,036,924. Gutter Bracket. C. H. Sparks, London, Eng.

1,036,945. Scaffold Bracket. T. A. Wilkerson, Windom, Texas.

1,037,105. Trowel. H. D. Baugh, San Bernardino, Cal.

1,037,117. Securing Appliance for Window Sash. B. F. Bowen, Wayne, West Virginia.

1,037,149. Aiming Plate for Floor Hinges. Oscar Katzonberger, Chicago, Illinois.

NOTICE TO CONTRACTORS.

SEALED bids will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, **Friday, September 20, 1912**, said bids then and there to be publicly opened and read, for Additions to Cottage "E," Southern California State Hospital at Patton, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Bids will be received for the Entire Work.

A certified check in the sum of ten per centum (10%) of the amount of bid must accompany each bid.

A deposit of Five Dollars ($5.00) will be required on plans and specifications.

All bids must be addressed to W. F. Cal.

(Signed) W. F. McCLURE.
State Engineer.

PROPOSALS FOR LIGHT FIXTURES.

WIRING AND LIGHT FIXTURES—Sealed proposals indorsed "Proposals for Electric Lighting System" will be received at the bureau of yards and docks, Navy Department, Washington,

D. C., until 11 o'clock a. m. **September 21, 1912,** and then and there publicly opened, for electric wiring and fixtures in new general foundry building at the navy yard, Puget Sound, Wash. Estimated cost, $2,000. Plans and specifications can be obtained on application to the bureau or to the commandant of the navy yard named. WM. M. SMITH, acting chief of bureau.

PROPOSALS FOR REINFORCING BARS.

REINFORCING BARS—Department of the Interior, U. S. Reclamation Service, Montrose, Colo.—Sealed proposals will be received at this office until 4 p. m. **September 16, 1912,** for furnishing 3,360 pieces round deformed reinforcing bars to conform to standard specifications for concrete reinforcement bars adopted in 1910 by the Association of American Steel Manufacturers. C. T. PEASE, engineer.

PROPOSALS FOR PIPING AND RADIATORS.

PIPING AND RADIATORS—Sealed proposals indorsed "Proposals for Heating System and Piping" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. **September 28, 1912,** and then and there publicly opened, for hot water piping and radiators and water and compressed air piping in the new general foundry, navy yard, Puget Sound, Wash. Estimated cost, $5,000. Plans and specifications can be obtained on application to the bureau or to the commandant of the navy yard named. WM. M. SMITH, acting chief of bureau.

PROPOSALS FOR ELEVATOR.

ELEVATOR—Sealed proposals indorsed "Proposals for hydropneumatic Elevator" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. **September 21, 1912,** and then and there publicly opened, for a hydropnuematic elevator in the foundry at the navy yard, Puget Sound, Wash. Plans and specifications can be obtained on application to the bureau or to the commandant of the navy yard named. WM. M. SMITH, acting chief of bureau.

NOTICE TO CONTRACTORS.

SEALED bids will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, **Friday, September 20, 1912,** said bids then and there to be publicly opened and read for Physician's Cottage No. 2, Southern California State Hospital at Patton, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Bids will be received as a whole, or in sub-divisions as follows:

FIRST—For the Entire Work.

SECOND—For the Mason Work.

THIRD—For the Carpenter and Mill Work.

FOURTH—For the Finish Hardware.

FIFTH—For the Metal Furring, Lathing and Plastering.

SIXTH—For the Painting, Staining and Glazing.

SEVENTH — For the Plumbing, Sewers and Gas Fitting.

EIGHTH—For the Electric Wiring

A certified check in the sum of ten per centum (10%) of the amount of bid must accompany each bid.

A deposit of Fifteen Dollars ($15.00) will be required on plans and specifications.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, Cal.

(Signed) W. F. McCLURE,
State Engineer.

Great deal of talk is now going the rounds that Roosevelt never did anything while he was president; that the administration was one of bluff and bluster and that there was no real action. Lest it be forgotten in the lapse of years it is well to recount some of the main events of his administration and some of the general results of his policies. It must be remembered that the first three years of his office filled out the term of McKinley's administration and were devoted to carrying out the McKinley measures. From 1904 to 1908 was put into operation what may be termed the distinctive Roosevelt policies and among the achievements of that period may be mentioned.

General Industrial Policies.

Settlement of anthracite coal strike of 1902 by presidential intervention.

National Employers' Liability Act.

Safety Appliance Act.

Pure Food and Drug Act.

Federal Meat Inspection and Packing House Inspection Act.

Organization of Department of Commerce and Labor.

Abolishing of rebating and establishing of control of railroads by Interstate Commerce Commission.

Law Enforcement.

Northern Securities prosecution, which ended movement to center control of railroads and industries in the hands of a few men through the device of the "holding corporation."

Beginning of prosecution of Standard Oil Company and tobacco trust, with the object of preventing the monopolistic evils of great corporations.

Numerous prosecutions for rebating, for thefts of public domain and for grafting in the Postoffice Department.

Conservation of Natural Resources.

The whole conservation policy developed.

Forest reserves extended.

Reclamation of arid lands provided for.

Vetoes of measures to give away water power rights.

National Defense.

Navy made adequate.

Militia co-ordinated with regular army.

Panama Canal.

Interminable negotiations broken off, Columbia notified it could no longer obstruct a great world improvement and canal construction begun.

Work so efficiently organized under War Department that it will be finished ahead of time.

Foreign Relations.

Treaty of Portsmouth negotiated under President Roosevelt's invitation.

Many arbitration treaties negotiated.

Secretary Root sent on a tour of South America, resulting greatly improving relations with South American republics.

Canadian fisheries dispute sent to The Hague tribunal.

Battle ship fleet sent around the world, increasing American prestige and insuring better protection for American citizens abroad.

Consular service reorganized under the merit system.

Conference of Governors.

More efficient relations between states promoted by conference of governors called by President Roosevelt.

Gospel of the Square Deal.

The general spirit of the administration so emphasized the need of attacking every form of special privilege that the work of public spirited men and state governments everywhere was made easier.

A great deal is being said about San Francisco getting control of its own water front. Arguments are advanced that the rival cities of the state oppose any action in the legislature looking to the betterment of the harbor and that the city should be free to grow into the commercial importance which its position demands. It may be that this is the best thing for the city and the state, but there are some things to be considered before any hasty action is taken.

While Herrin and the Southern Pacific controlled the politics of the state and the water front there was no agitation for city control. The credit of the state has enabled the harbor to be improved through the expenditure of many millions of dollars. Costly docks have been built without any expense to San Francisco as well as the seawall and the Ferry building. True these expenses have been paid back by the revenues of the port but it was the credit of the state that enabled the bonds to be issued and sold.

The control of the water front of San Francisco and it harbor dues has a vital relation to the prosperity and development of the great interior valleys, in fact all of California.

The case of the other cities of the state are not properly a parallel as the traffic of the other ports are mainly local or sectional. The traffic of San Francisco concerns directly or indirectly the people and industries of all the state.

The sympathy of the San Francisco business men with graft and grafters has not served to inspire the people of the state with their sincerity or civic pride. This agitation coming now when the water front has been regained to the people looks like a movement that might be planned by the railroads. The political control of San Francisco is more easily gained than the control of the state. When the present Board of Harbor Commissioners has forced the railroad company to reduce its water front charges 10 per cent it is natural for the company to turn to the municipality.

The control of the water front of San Francisco is a big thing for the railroads. They could afford to spend money enough and build up a machine strong enough that once in power it would be almost impossible to dislodge them. And with the present attitude of the newspapers and many of the business men there is no confidence felt by the People of the state that the city would not welcome this control.

The Board of Supervisors has taken definite action in authorizing the Board of Public Works to proceed with plans for the new million dollar auditorium to be erected in the Civic Center. This is good business for the sooner the auditorium is erected the better. The ground designated is the block bounded by Polk and Larkin, Grove and Hayes streets, the site of the old Mechanics' Pavilion. This block of land is vacant, it is presumed that the money is available and there is surely no cause for delay. If the building is erected it can be put to immediate use for conventions and gatherings of all kinds. And these conventions will be held before the exposition just the same as after the exposition.

Let the good work go on and the building be built just as soon as possible.

The San Francisco Call has dug up another great outrage on the people of the state. According to it the inmates of the Napa Asylum are being starved. Nothwithstanding the fact that the bill of fare shows as good a diet as the average citizen gets and that there is no evidence to show that this menu was not served, and the same kind of food served every day, it yet comes forward with affidavits that the inmates are being starved.

Surely it is a great defender of the public health. It is the champion of the under dog, it believes in certain chosen gentlemen being the ruling power in all things and that the dear people should serve them.

It is one of the imperfections of our system that accords freedom of speech and of the press that allows such things to happen.

If there was any truth in what the Call says it certainly does not read like it and its own statements are so silly and ridiculous as to insult the intelligence of common people.

BOOKS

For Home Study, Practical and Scientific.

CARPENTRY. By Gilbert Townsend. 160 pp. 224 illus. A working manual for Carpenters and Woodworkers in general. Not a theoretical treatise, but a practical working guide. Price $1.00

MASONRY CONSTRUCTION. By A. B. Phillips and A. T. Byrne. 145 pp., 44 illus. Latest and best American methods. Price $1.00

WATER SUPPLY. By F. E. Turneaure. 160 pp., 40 illus. An exhaustive compendium for sanitary and Waterworks Engineers and all interested in matters affecting public health. Price $1.00

HIGHWAY CONSTRUCTION. By A. B. Phillips and A. T. Byrne. 145 pp., 80 illus. Modern Methods for Road Builders and all interested in better ways of communication. Price..$1.00

REINFORCED CONCRETE. By Walter Loring Webb and W. Herbert Gibson. 150 pp., 140 illus. A manual of practical methods for Architects, Builders, Contractors, Civil and Sanitary Engineers. Information for the first time made known to the world. Based on recent construction work, special tests, etc. Price $1.00

ESTIMATING. By Edward Nichols. 140 pp., 35 illus. For all workers in Building trades. Tells how to estimate intelligently. Price $1.00

CONTRACTS AND SPECIFICATIONS. By James C. Plant. 130 pp., fully illus. Forms of government and private contracts, specifications, bonds, etc., duties and responsibilities of Architects Contractors and Owners. Price $1.00

STAIR - BUILDING AND STEEL SQUARE. By Fred T. Hodgson and Morris Williams. 130 pp., 180 illus. Only up-to-date work on these subjects. Price $1.00

STRENGTH OF MATERIALS. By Edward R. Maurer. 150 pp., 58 illus. For Architects, Builders, Steel and Concrete workers. Enables one to avoid mistakes. Price $1.00

MECHANICAL DRAWING. By Ervin Kenison. 176 pp., 140 illus. Complete course in projections, shade lines, intersections and developments, lettering with exercises and plate. Price $1.00

POWER STATIONS AND TRANSMISSION. By G. C. Shaad. 176 pp., 43 illus. For Electrical Workers. Up-to-date practice. Price $1.00

PATTERN MAKING. By James Ritchey. 160 pp., 250 illus. For Wood and Metal Workers and Moulders. Methods of building up and finishing, fully described. Price..$1.00

ARCHITECTURAL DRAWING AND LETTERING. By Bourne, von Holst and Browne. 200 pp., 55 drawings. Complete course in making working drawings and artistic lettering for architectural purposes. Price...$1.50

FREEHAND AND PERSPECTIVE DRAWING. By H. E. Everett and W. H. Lawrence. 192 pp., 120 illus. An authoritative treatment of the artistic side of drawing, teaching the reader first how to see and then how to transform this visual conception into a permanent record on paper. Price $1.00

ELECTRIC WIRING AND LIGHTING. By C. E. Knox and G. C. Shaad. 192 pp., 150 illus. A practical guide to approved modern methods of lighting by electricity and of installing conductors for the transmission and utilization of electricity for power, lighting, heating and other uses. Price $1.00

SEWERS AND DRAINS. By A. Marston. 176 pp., 60 illus. A new work, containing complete, practical information for the Civil and Sanitary Engineer on the selection and construction of sewerage and drainage systems and sewage disposal plants for cities, towns and other municipalities. Price $3.00

SHEET METAL WORK. By W. Neubecker. 320 pp., 380 illus. A complete manual of practical self-instruction in the art of pattern drafting for light and heavy gauge metal, skylight work and roofing, cornice work etc. Price $3.00

PLUMBING. By W. B. Gray and C. B Ball. 256 pp., 250 illus. A reliable and up-to-date reference work on Plumbing and the allied subjects of House Drainage and Sanitation. Price $1.50

HEATING AND VENTILATION. By C. L. Hubbard. 256 pp., 180 illus. A practical manual of hot air, steam and hot water heating, and modern systems of ventilation. Price...$1.50

STEEL CONSTRUCTION. By E. A. Tucker. 275 pp., 275 illus. Covers every phase of the use of steel in structural work. Based on actual experience, special tests, etc. For Architects, Bridge Builders, Contractors, Civil Engineers. Price..$1.50

"THE ESTIMATOR" for local use of Architects, Engineers and Builders. Published by Firestone & Roofing Co., 704 Market St., San Francisco. Price postpaid $1.00

MASONRY AND REINFORCED CONCRETE. By W. L. Webb and W. H Gibson. 400 pp., 300 illus.. A practical and authoritative guide to approved American methods in the selection, preparation and depositing of building stone, brick, cement, and other masonry materials; and embodying the latest practice in the application of concrete and concrete steel to structural work. Price..$3.00

SURVEYING. By Alfred E. Phillips 225 pp., 133 illus. For Civil Engineers and Students. All details of field work explained. Price..$1.50

BUILDING SUPERINTENDENCE. By Edward Nichols. 225 pp., 250 illus. Costly mistakes ocur through lack of attention at proper time, hurtful to owner and discreditable to Architect and Builder. Gives thorough knowledge of methods and materials. Price $1.50

BRIDGE ENGINEERING - ROOF TRUSSES. By F. O. Dufour. 384 pp. 340 illus. A manual of practical instruction in the calculation and design of structural steel truss and girder bridges for railroads and highways; including also the analysis and design of roof trusses and other details of mill building construction. Price $3.00

REFRIGERATION. By C. Dickerman and F. H. Boyer. 128 pp., 60 illus. A complete guide to the principles and mechanical details and practices of modern systems of artificial cooling including the construction, equipment and operation of various types of refrigerating plants, such as ammonia compression and absorption, brine compressed air, carbonic anhydride etc. Price $1.00

Upon receipt of price quoted, we will send postpaid, to any address, any book listed here. Remit by Postal Money Order, Express Money Order Bank Draft or Registered Letter, payable to

BUILDING AND INDUSTRIAL NEWS

A Weekly Publication Devoted to the Building and Industrial Activities of the Pacific Coast

THIS WEEK'S ILLUSTRATIONS:

A Modern Lodge Hall Building For U. P. E. C. To Be Erected In Oakland. Designed By Architect Clay N. Burrell, Oakland.

Modern Apartments To Be Erected For C. A. Johnson, Oakland. Designed By Architect Robert Morgeneier, Oakland.

Successor to:
California Architect.
Industrial News of Alameda Co.
Builder and Contractor.
Western Builder.

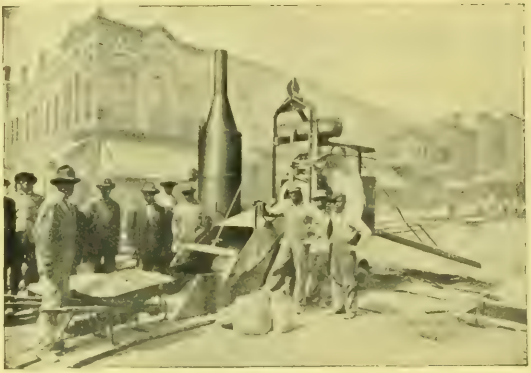
TUESDAY, SEPTEMBER 17, 1912.

SAN FRANCISCO AND OAKLAND, CALIFORNIA

Contractors Equipment

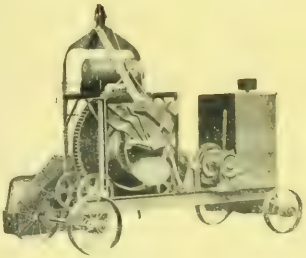
THAT BRINGS RESULTS

Briggs Spreader Carts and Harness



Insley's Gravity Distributing Equipment

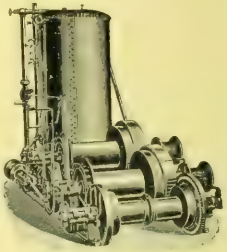
Foote End Discharge Batch Mixer on Traction Wheels with Steam Engi e and Boiler and Gravity Distributor, for Street Paving. We furnish the same style of Mixer with Gasoline Power.



FOOTE

Batch Mixer mounted on Trucks with Gasoline Engine, Loading Skip, Water Tank, Etc., complete.

Belt Hoists
Electric Hoists
Concrete Elevators
Wheelbarrows
Carts



MUNDY'S

Double Cylinder Double Drum Hoisting Engine with Derrick Slewing Attachment.

All of the above equipment carried in stock in San Francisco by

LANGFORD, BACON & MYERS

INCORPORATED

Salesrooms 215-217-219 Rialto Building

SAN FRANCISCO, CAL.

Telephone Douglas 1380

Building and Industrial News

Devoted to the Architectural. Building, Engineering and Industrial Activities of the Pacific Coast

ued Weekly, $3.00 per year. | San Francisco, SEPTEMBER ,17 1912 | Twelfth Year, No. 38

BUILDING AND INDUSTRIAL NEWS

Devoted to the Architectural, Engineering, Building and Industrial Activities of the Pacific Coast.

Entered as second-class matter at San Francisco Post Office under act of Congress of March 3, 1879.

ISSUED EVERY TUESDAY

L. A. LARSEN,
Publisher and Proprietor.
SAN FRANCISCO OFFICE
560 Mission Street,
Telephone—Douglas 2372.

STAFF.

CHALMER MUNDAY, Editorial Comment.
W. D. MANVILLE, Architectural News Department.
RALPH CROTHERS, Advertising Department.

OAKLAND OFFICE
1015 Franklin Street
Telephone Oakland, 790

Regular Subscription—$3.00 a year in advance. 25 cents per copy.

Advertising Rates on application. If enquirers will send copy of matter and state space required, close figures will be given. Address

BUILDING AND INDUSTRIAL NEWS

Water Glass 2

Editorial Comment.

The Chronicle says the Progressives have been shamed into pledging the Roosevelt electors on the ticket by petition. Certainly the gall of these newspapers in monumental. It is as easy for a camel to pass through a needle's eye as it is for them to tell the truth.

Did they ever tell of the new primary law being enacted when the Progressives had control of the machinery that the old machine had designed to perpetuate their power? Did they ever admit the theft of two delegates to the National Convention after the present state administration had given them an equal chance and had beaten them fairly at the polls with a majority of 77,000? And now that the Progressives have carried the Primaries throughout the state and are by every right of law and justice to name the presidential electors,—after all this is done, these unspeakable newspapers haven't the moral courage to give the Progressives any credit for again taking an equal chance and putting their delegates on the ticket by petition just as the Taft people did. Truly these reactionaries and especially the newspapers have none of the virtues that should commend them to any man with backbone enough to be called a man. They are devoid of courage of truth or honesty or anything else.

The City ownership of the water front is advocated by the Call, the Chronicle, Eddie Wolfe, Milton Schmitt and all the others of that breed and dye. At the same time the newspapers are spending all their time telling how the water front is being mismanaged since the Southern Pacific has been put out of control. It may be the best thing for the city to fore and it is still strange that these people never thought of it before and it is still sthange that the reactionary papers should resort to any and all kinds of shameless mendacity to cast discredit, if possible, upon the present management of he Harbor.

Building statistics for the month of August, as compiled by the American Contractor, show a decline as compared with the same month of last year of about 14 per cent. This was due to the fact that Chicago last year changed its building laws to take effect on September 1, 1911, in which there was a limit placed on the height of buildings. This resulted in permits being issued for the month of August, 1911, of more than 20 million dollars. Notwithstanding this great difference in the second greatest city of the country, the average kept up pretty well, New York City itself showing an increase of 50 per cent over last year, amounting to a difference of 7 million dollars.

In general the gains and losses are about equally divided and had Chicago not shown the extraordinary amount of permits a year ago the grand total would have registered about a normal increase. Particulars are to be found in the following table:

City.	August, 1912. Cost.	August, 1911. Cost.
Atlanta	$ 178,159	$ 651,717
Baltimore	691,504	420,884
Buffalo	900,000	793,000
Cedar Rapids	201,000	185,000
Chicago	8,436,100	26,200,500
Cincinnati	1,618,385	1,420,125
Columbus	389,830	535,036
Dallas	623,098	202,172
Des Moines	79,475	154,000
Detroit	2,497,505	1,668,875
Duluth	207,788	278,910
Grand Rapids	200,514	145,550
Harrisburg	77,725	120,575
Hartford	514,930	530,095
Indianapolis	888,670	642,488
Kansas City	1,016,150	877,170
Manchester	741,712	189,816
Memphis	1,101,595	422,850
Milwaukee	1,026,300	1,027,608
Minneapolis	1,050,815	1,042,800
Nashville	146,660	159,706
Newark	901,069	1,377,710
New Haven	292,735	843,065
New Orleans	284,636	267,665
Norfolk	492,276	261,380
Manhattan	13,253,057	6,547,885
Brooklyn	2,475,650	2,978,780
Bronx	2,300,587	2,143,275
New York	18,029,294	11,669,940
Oakland	1,267,779	741,533
Omaha	174,137	401,325
Paterson	135,503	145,177
Philadelphia	3,115,935	4,660,185
Pittsburg	1,170,434	1,138,531
Portland	1,094,509	1,733,325
Richmond	443,935	228,889
Rochester	1,005,329	819,770
San Francisco	1,797,188	1,686,518
St. Paul	618,774	797,116
St. Louis	1,671,951	1,631,519
Salt Lake City	288,285	354,900
Scranton	185,810	107,092
Shreveport	425,888	77,758
Toledo	334,985	774,288
Wilkes-Barre	235,679	92,950
Worcester	588,148	349,338
Total	$58,156,024	$67,865,451

The total for the past eight months for the same cities show a gain of about 6 per cent over the same period in 1911. So that notwithstanding the fact that it is a Presidential year, business seems to be rowling along at about the same rate as usual and about [illegible] per cent.

Water Glass. Its Use In Damp proofing and Dust Prevention From Concrete Floors.

Owing to the extensive use now made of water-glass for damp-proofing concrete surfaces, prevention of dusting from concrete floors, etc., the following remarks by J. T. Dennison in the "Master Painter" regarding the nature and capabilities of this peculiar substance, will be of special interest to cement men.

Under the name of "water-glass" many compounds of silicate of soda or silicate of potash, or mixtures of both, are sold for various purposes. These silicates are prepared by melting together mixtures of quartz or white sand and soda ash, or potash, as the case may be. These mixtures, when melted in proper proportions, form a glassy mass which is soluble in hot water.

The process of manufacture consists essentially in melting the above materials, usually in the presence of charcoal or other form of carbon then pulverizing and leaching out the material with hot water. The silicate or water-glass is made of different strengths, and is sold according to percentage of dry silicate present in the solution, usually 33 to 66 per cent.

There is hardly any material that has caused the paint chemist more heart-ache than this very water-glass, for it seems to offer more advantages when used as a paint vehicle than any other material known to science. At first glance, it would appear to be ideal for paint purposes. First, because it would be a very cheap material. Secondly, when used in paint, it would make one which could be more readily applied. Third, it would dry quickly, and is entirely odorless and non-poisonous. Fourth, it would prevent the formation of mould or fungus. Fifth, it would also prevent worms or dry rot in wood, and lastly it would be a fire-retardant and fireproof to a very large extent.

Naturally these apparent facts led the chemist to experiment along various lines in order to produce a paint from this material which would be practical. But when a great deal of time and worry has been expended on the material, it will be found more disadvantageous than advantageous, for the reason that it has heretofore been impossible to overcome the difficulties which beset this material. First of all, it is very unstable, that is it will change in character from the slightest causes, and some time without any apparent cause. Second, it can be used only with a very limited number of pigments, because most of the pigments have some action on the water-glass causing it usually to coagulate. Third it does not remain smooth, but forms a slight efflorescence of white powder soda on the surface. Fourth, it has a tendency to scale, crack or peel off. Fifth, atmospheric changes have a very deleterious effect on this material to have also acids and gases of various kinds.

In mixing colors with water-glass many changes take place. Sometimes the color changes entirely, due to the action of the alkali in the water-glass. Then, again, the color may act upon the silicate of soda or potash, forming therewith an insoluble silicate, such as lead silicate or zinc silicate, so that when the color is mixed with water-glass it immediately causes the entire mass to become solid instead of remaining in a paint consistency. As a matter of fact most pigments have this action to a greater or less degree.

The lead compounds and zinc compounds have this action to a very marked degree, so that it takes place immediately. The iron oxides, ocher and umbers work slowly, and a very few materials like chromium, barium cobaltate, ultramarine blue, and the graphite blacks work very slowly upon the water-glass, and can be mixed for some considerable time. Whiting and clay have a decided action upon this material. It will be seen, therefore so far as the use of water-glass with pigments is concerned, it is almost impossible to make a mixture which will keep any length of time.

A number of attempts have been made to make use of water-glass by applying first the pigment bound with glue or some other material of a similar nature, and then applying over this material a solution of water-glass. This has a disadvantage in necessitating two operations and it is also necessary to overcome the action of the water-glass on the colors, especially those colors that are readily affected by alkali.

Silicate of soda or water-glass is largely used for the purpose of fireproofing various materials. Wall paper has been fireproofed by the use of water-glass but precaution must be taken with regard to colors, as mentioned heretofore. Scenery and similar products have been treated with water-glass for the purpose of fireproofing.

Water-glass is a very useful material as a binding substance, and is used very largely in the manufacture of boiler coverings and all of the asbestos products, as it acts as a fireproof glue for the purpose of binding the fine fibers together. It has also been used for mending various materials, and it is extremely useful for that purpose. It is also extensively used in the manufacture of artificial stone and similar substances.

As a fireproof material, silicate of soda or water-glass is probably equal to any other substance used for that purpose. It has the disadvantage of being alkaline in its action and in its nature. It is always used thinned down with water, and should not be applied too heavily, otherwise it will only collect on the surface and flake off when dry.

CONCRETE PIER IN ATLANTIC.

Engineering Feature of a Reinforced Pile Structure on the New Jersey Coast.

At Long Branch N. J., there is nearing completion a reinforced concrete pier built for amusement and landing purposes. It is 848 feet long, and designed for an ultimate width throughout of 150 feet.

The foundations are reinforced concrete piles, connected by sills so as to form a series of bents. These piles are spaced 16 feet on centers longitudinally, and 15 feet between the two outer rows, while the remaining rows are 20 feet on centers. The bents are stiffened by means of brace piles placed at intervals beneath the outer ends of the pier and the landing dock, where the liability of shock to the structure is the greatest. The ground in which the piling is driven is a conglomeration of sand and clay, with occasional pockets of gravel, and is underlaid by a firm stratum of coarse gravel. The average penetration of the piles was about 22 feet; and as the top of the pier is about 22 feet above low water, their lengths range from 45 to 68 feet. Near the shore some piles 18 inches square were driven, but in most parts the piles were of a hollow square section, with an outside dimension of 12 inches and an inner core of 13 inches. They were reinforced with 1¼ inch round rods tied together with ¼ inch collars, and, in the case of the longer piles, with additional reinforcement in the middle section, to provide against possible breakage while handling them. The hollow square section was composed of a 1:1½:3 concrete, while a leaner mixture was used for the core. This core was filled up after the pile was driven. Dexter Portland cement was used throughout.

The piles were swung into position by derricks, and driven by means of water jets, necessitating the use of a 150-h.p. pump.

The superstructure consists of a typical beam and girder construction reinforced according to the Hennebique system. In the construction provision was made for securely bonding this work with that of the pile bents. The floor-slab is given a granolithic surfacing, and is graded to drain either to the outside edges of the pier or to the storm-water inlets, with cast-iron gratings placed in the floor. A pipe railing is anchored in the floor beams.

At the outer end there is to be a landing dock with a deck about 8 feet below the deck of the main pier. This dock is supported on concrete piles, and its outer end is shaped like a semi-hexagon thus presenting three sides for mooring purposes. This section is provided with the necessary bollards for mooring; and there is also a wooden fender with shock absorbers made up of piles and stringers.

A traveler carrying two stiff-legged derricks for handling the piles was employed.

In the belief that the rich mixture used for the piling (1:1½:3) would produce a concrete sufficiently dense to be practically impervious to the action of sea water, the contractors made no attempts at special waterproofing treatment. The manufacturers of certain waterproofing compounds and acid-proof paints, however, took advantage of the opportunity to apply their compounds to some of the piles

In order to secure data on the efficiency of the protection afforded by their respective treatments. Some of the piles have been in the water since October, 1910 (almost two years), and none of them thus far have shown the slightest disintegration.

TO BUILDERS AND CONTRACTORS.

Recognized **A One** Construction Superintendent, General or Carpenter Foreman, Architectural Draftsman and Estimator, with planing mill experience, listing and detailing. A man who has been through the mill and can run a general contracting business with results **will be open for position about January, 1913,** with progressive firm of contractors who require the services of an all-round man with technical training, who, placed in possession of plans and specifications for any class of construction will suffice to interpret and direct to completion without further comments. Expert in reinforced concrete construction, including cost data, design floor loads, etc. First class references. Offers invited. Address Supt., 568 Golden Gate Ave., Apartment 21, S. F. Phone 7619 Franklin.

BRICK PRODUCTION OF NEW YORK.

The Hudson River Region Has Produced Over Eleven Billion Brick—Clay Deposits Capable of Producing Sixty Billion More.

The Hudson River (New York) region is one of the most interesting to a recent report of the United States States, if not in the world, according to a recent report of the United Staes Geological Survey. This region exends along both sides of the Hudson River from New York City to Cohoes and embraces ten counties, nine in New York and one in New Jersey. The region is commercially interesting not only because it contains immense deposits of brick clay but because it is the principal source of a cheap supply of common building brick for New York city and vicinity—the largest market for building material in the New World.

Brick have been made in this region for nearly a century. According to the history of Rockland County, N. Y., efforts to establish the brick making industry were made before 1810, with more or less success, attempts having been made even before the Revolution. The brick made prior to 1810, however, were used only locally, and it was not until that year that a kiln was burned for a general market. Even these efforts to market the brick were not successful, but in 1817 James Wood, an Englishman, who had learned the trade of brickmaking in his native land and was attracted to Haverstraw by the vast quantity of clay and unlimited supply of wood for fuel, leased a piece of land on the river shore and started the first successful brickyard in Rockland County.

To Wood is given the credit of discovering in this county, in 1828, the advantage of using coal dust as an ingredient of brick. This process had been used in England but was little known, and a long and bitter litigation ensued to demonstrate the advantages of this method. Wood also invented a mixing and tempering machine, similar to the present ring-pit wheel, and an improved mold. Altogether he seems to have been a great factor in developing the brickmaking industry along the Hudson.

Other prominent early brickmakers were the Allisons and David Munn, the latter being largely instrumental in advancing the industry. To Richard A. Ver Valen is given the credit of having invented, in 1852, a machine for making brick that was a great improvement over any made up to that time, and this gave a fresh impetus to the business.

Even in these early times the labor strike was not unknown in the region. In 1853 one was caused by a reduction in wages and was attended with so much violence that troops had to be called out to suppress it. In 1877 another strike occurred, and the operators sent to Canada for laborers. When the Canadian workmen arrived violence was resorted to by the strikers and the troops were again called out.

Notwithstanding the enormous quantity of brick made in the region at the present time, the method of manufacture is practically the same as that used in the early days of the industry. Attempts have been made to use these clays for other varieties of clay products but with little success, so that building brick is the only product made of this material along the river.

The number of common brick marketed in the Hudson River region since 1901 has been 11,390,111,000, valued at $60,407,258 or $5.30 per thousand. These brick, if laid flat, would make a "sidewalk" 20 feet wide around the world. It has been estimated that the clay in the New York portion of the region will furnish 1,200,000,000 brick a year for the next 45 or 50 years.

In 1911 the product was 926,072,000, valued at $4,717,633, or $5.09 per thousand, as compared with 1,142,284,000 brick in 1910, valued at $5,544,600. This was a decrease of 216,212,000 brick, or 18.9% and $826,967, or 14.9%. In both quantity and value these are the smallest figures for any year since 1903, except only 1908. The average price per thousand for the region has ranged from $4.42 in 1902 to $6.99 in 1905.

New York's portion reported 93.46% of the brick in 1911 and 92.79% of the value of the entire region. This consisted of $65,510,000 brick, a decrease of 218,171,000. It constituted more than 75% of New York's output of common brick in 1911. The value of the common brick of this region was 42.98% of all of New York's clay products and 54.68% of its brick and tile products.

New Jersey's portion of the production is small, being but 60,562,000 brick in 1911, or only 6.54% of the output and $340,097 or 7.21% of the value. This, however, was an increase in both quantity and value of output. The average price per thousand increased from $5.42 in 1910 to $5.62 in 1911. It was 53c higher than that for the whole region and 56c higher than that for New York's portion of the region.

THE YEAR'S FIRE LOSS.

Here are some more figures which tell their own story. They are worth pondering over.

Fifty-seven thousand dollars an hour, estimated annual waste in United States, 60,000 deaths in 30 years property destroyed in 1910 valued at $234,170,650.

The total fire loss in 1911 in the United States was roundly, $500,000,000, a waste of $1,369,000 for every day, $57,000 for every hour, $950 for every minute, nearly $16 for every tick of the clock.

And this was actual, literal "waste," for the loss was irretrievable. To be sure, the individual losers sometimes recovered insurance for a part of their losses, but the insurance money created nothing. It simply distributes the loss over a larger area.

In the last thirty years the country has paid:

In the value of property destroyed [illegible] over $15,000,000,000.

In apparatus and men for fighting fires over $5,000,000,000.

In deaths due to fires, estimated, 60,000.

In injured due to fire, estimated, 180,000.

Loss of Services, $960,000,000.

Suffering is not a merchantable commodity and cannot be considered in estimating national losses, but lives are valuable assets, for the earning capacities of an individual is proportional to his years.

If, therefore, the 60,000 people—an army in itself—killed by fire each had an expectation of twenty years useful effort and in earning capacity of $800 a year, the loss of their combined services would foot up to almost a billion dollars or, to be exact, $960,000,000.

Of the people injured annually by fire some seriously, others slightly, the loss to them, hospital expenses and individual bills, would average perhaps $500 each, or a total of $90,000,000, which must be added to the other items of national loss, due to preventable causes.

As such losses have to be borne by the unfortunate sufferers themselves no record is kept by the underwriters, either as to the number of injured and the extent of their injuries, or the personal loss to them and cost of medical attendance.

No record is kept of the number of people thrown out of employment and the length of their enforced idleness, nor the losses sustained by the owners or employers or account of their idle mills or factories.

It would be safe to estimate that the annual loss of wages in the United States due to fire is at least 20 per cent of the loss on value of property destroyed by fire.

Tabulating the several items then, the price paid annually is.

Value of property destroyed by fire in 1910, $234,470,650.

Approximate cost fire department, $234,470,650.

Cost, value of lives killed, $72,000,000.

Cost to the injured $36,000,000

Loss of wages, 20 per cent fire loss, $46,894,130.

Total, $550,535,430.

All told, the amount expended in new buildings annually throughout the United States is about $1,000,000,000, so that labor runs about even with materials, so far as cost is considered, and [illegible] dollars destroyed by fire would call for [illegible] the value of labor assembling the materials and putting them together.

$192,312,129 in Premiums.

During the year 1909 the sum of $192,312,129 was paid in premiums [illegible]

fire insurance companies on this country. If the same sum which is practically 20 per cent of a billion dollars—the amount spent in building each year—were added to the present cost of building, every structure erected could be made strictly fireproof and that amount permanently added to the wealth of the nation.

FIREPROOF MAXIMS.

A fireless constructor is one who so designs and builds that fires are impossible in his buildings.

Have your State make uniform building laws. Co-operate with towns and cities to secure their enforcement. Test new building material. Try new modes of construction.

Make office furniture fireproof—not iron. Concrete furniture lighter than wood was made. (Not by Edison.)

Concrete can be made to look cheerful and not depressing. Choose warm-toned aggregates and gave natural soft texture stones. Plan and build for the coming years.

TRICKS OF THE TRADE.

Secretary Steward of the Boston Master Builders' Association speaking of certain reprehensible practices in the contracting business relates the following:

A subcontractor had been doing some work under contract for a general contractor, and, as frequently happens, there was some additional work done by the day and for which in due course a bill was rendered. The general contractor communicated with the subcontractor by telephone and told him that the owner found fault with this bill of extras and that he would have to make quite a considerable reduction. To this demand the subcontractor responded that he considered the bill a perfectly fair one, but he would look it over and see if he found it possible to make the reduction demanded or any reduction, as would gladly do so.

"This reply did not satisfy the general contractor who said he wanted to settle this account and if no reduction was not made at once without further demand the subcontractor need never expect to do any more work from that office. This ended the telephone conversation.

"The next morning the subcontractor received by mail a check for the full amount of the bill. The moral of this tale is in the sequel. Within a day or two after receiving the check the subcontractor happened to meet the owner and brought up the question of this bill of extras. To which the owner declared that he had not only made no claim of excessive charge, but had long before paid the general contractor the bill in question with ten per cent added as the general contractor's profit.

"Upon the facts thus as reported it would appear that the subcontractor had been subjected to a severe case of hold-up, and that it did not succeed was no fault of the general contractor.

"The name of the concern was not made known to me, and I am sure I have not to know who it was. I only hope that we never have an experience of this kind, but should we be called on we shall be prepared to act as this man did.

"The lesson to be drawn from this occurrence is that unfortunately the unfair operator can never be eliminated entirely and, therefore, we must be constantly on our guard, but it is our duty at all times to condemn evil practices in no uncertain terms, and, by persistently showing them up, to create a body of opinion which shall finally make it impossible for operators of such tendencies to exist in this community.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

Los Angeles, Cal.—Apartment house, 4 story and base, brick, $80,000. Architects Numan & Kysor, Wright and Callender Bldg., L. A. Owner, Jacob Morris. The structure will cover an area of 100x100 feet and will contain a large lobby, amusement room and 120 guest rooms, which are to be arranged in two and three room suites. All apartments will have connecting baths and wall beds. The interior will be finished in pine and redwood with tile floors in the baths. There will be steam heat, elevator service and a vacuum cleaning system. The exterior will be faced with cement brick. Plans are complete and figures are being taken.

Los Angeles, Cal.—Apartment house, 4 story and base, brick, $60,000. Architect C. C. Rittenhouse, Wilcox Bldg., L. A. Owner E. B. Harbour. The building will be 56x172 feet. The interior has been arranged to contain 120 rooms, which will be subdivided into 48 two-room and 6 three-room apartments. All will have wall beds and connecting bath rooms. There will be steam heat and elevator service. The interior will be finished in pine and hardwoods. Tile will be used in the baths. The exterior of the building will be faced with pressed brick and artificial stone. Plans are now out for figures.

Los Angeles, Cal.—Apartment house, 4 story and base, brick. Cost not stated. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, C. W. Chase. The building will be 50x100 feet and is to contain 108 rooms, which will be arranged in suites of two and three rooms each. All apartments will have private baths and wall beds. There will be steam heat, both freight and passenger elevators and a vacuum cleaning system. The interior of all apartments will be finished in pine. The floors and wainscott will be tiled in the baths. The exterior of the building will be faced with pressed brick. Plans will be complete and ready for figures about October 1st.

Los Angeles, Cal.—Apartment house, 4 story and base, brick. Cost not stated. Architects, California Real Estate and Building Co., 631 So. Spring St., L. A. Owner, Sidney A. Butler. The building will cover an area of 60x140 feet and is arranged for 77 rooms, which will be divided into two and three room suites with wall beds and private baths. There will be steam heat and a vacuum cleaning system. The interior finish will be of pine and hardwood. Tile and composition flooring will be used in the bath rooms. The exterior will be faced with pressed brick. Plans are being prepared.

San Francisco—Apartment house, 3 story and base, frame, $19,000. Architect, W. G. Hind in Kearny St., S. F. Owner, Dr. Clyde S. Payne. This building will be similar to a number of others of the same type constructed recently by Dr. Payne. There will be 12 apartments, which are to be arranged in suites of three rooms each. All apartments will have private baths, private entrances and wall beds. There will be steam heat. The exterior of the building will be covered with cement plaster and brick veneer. Plans are complete and segregated figures are being taken on all parts of the work.

Oakland, Cal.—Apartment house, 3 story and base, frame, $20,000. Architect, none. Owner, E. C. Dalton, 845 Jackson St., Oakland. The house has been arranged to contain 18 apartments of two and three rooms each. There will be private baths and wall beds. All interior finish will be of pine. Some oak floors will be used. There will be steam heat. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner, who is now taking figures on the work.

Oakland, Cal.—Apartment house, 2 story and base, frame, $18,000. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building has been mentioned here before when plans were first started for the work. Working drawings are now complete and figures are being taken. The building will contain a number of apartments which have been arranged in suites of two and three rooms each with bath. There will be wall beds, steam heat and other modern conveniences. The interior finish will be of pine. The exterior of the building will be covered with cement plaster on metal lath.

Stockton, San Joaquin Co., Cal.—Apartment house, 4 story and base, brick, $75,000. Architect's name not given. Owners, Home Builders' Investment and Security Co., 26 North San Joaquin St., Stockton. This work has been mentioned here before. Complete plans and specifications are now on file at this office and bids may be submitted on the same.

Contracts Awarded.

Los Angeles, Cal.—Apartment house, 4 story and base, brick, $100,000. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, Joseph Talbott. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price, $100,000.

—BANKS—

Lodi, San Joaquin Co., Cal.—Bank, 1 story and base, brick and concrete. Cost not stated. Architect, Walter King, Elks' Bldg., Stockton. Owners, Bank of Lodi. The architect is now preparing plans for a modern banking institution and will shortly have the plans ready for figures. At present none of the details of the building can

be given, but will be printed in these columns before the plans go out for figures.

Alhambra, Los Angeles Co., Cal.—Bank, 1 story and base, reinforced concrete, $25,000. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Alhambra Savings Bank. The building will be classical in design and will be occupied by the banking institution only. The exterior will be faced with cement plaster. There will be a large general office, private offices and work space. The interior will be finished in hardwoods and marble. Working drawings are being completed.

BRIDGES, DAMS AND HARBOR WORK.

concrete and steel. Cost not stated. Architect's name not given. Owners, Regents of the University of California. The Regents at their last meeting appropriated funds for the construction of a bridge and roadway from California Hall to Agriculture Hall. Plans will be prepared later,

Contract Awarded.

Parks Bar, Yuba Co., Cal.—Bridge, reinforced concrete, $36,000. Engineer, County Engineer, Marysville. Owners, Yuba County. Contractors, Portland Concrete Pile Co., Phelan Bldg., S. F. Contract price, $36,000.

CHURCHES.

Seattle, Wash.—Church, 1 story and base, brick, $25,000. Architect, David J. Myers, Central Bldg., Seattle. Owners, Westminster Church. This work has been mentioned here before. Plans for the building will be complete and out for figures by October 15th. The building will cover an area of 56x116 feet.

Los Angeles, Cal.—Church, 1 story and base, frame, $20,000. Architects, Walker and Vawter, Hibernian Bldg., L. A. Owners, Hobart Boulevard Methodist Church. The main auditorium and class rooms will be separated by rolling partitions by use of which the two may be thrown together. Social rooms and a large hall will be provided in the basement. The exterior of the building will be covered with cement plaster on metal lath. Metal tile will be used for the roof. Plans are being prepared.

Long Beach, Los Angeles Co., Cal.—Church, 1 story and base, brick, $75,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Congregational Church of Long Beach. Revised plans for this building have just been approved by the owners and working drawings are being made. The design is in the Italian Gothic style. There will be a main auditorium seating 1400 people and class rooms having accommodations for 500. Besides these rooms there will be a pastor's study, library and church parlor. The building will cover an area of 100x150 feet. The exterior will be faced with pressed brick and artificial stone. Plans are being prepared.

FACTORIES & WAREHOUSES.

Armstrong, Ore. — Factory group, brick ond frame construction. Cost not stated. Achitect, Charles N. Elliott, Portland. Owners, Armstrong Mfg. Co. This group of buildings will consist of a one story brick office building, a large warehouse and a foundry and machine shop. The main office structure will be the first of the group to be erected. The company has plans in preparation for the construction of several other large projects in connection with this plant. Complete details will be given in an ealy issue.

Los Angeles, Cal.—Warehouse, 3 story and base, reinforced concrete. Cost not stated. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Abbott Hardware Co. This work has been mentioned here before. Plans are now complete and figures are being taken. The building will cover an area of 64x48 feet. There will be metal sash and doors. The Kahn system of floor construction will be used. The exterior of the building will be faced with cement plaster.

FIRE HOUSES.

San Francisco—Police station, 2 story and base, concrete and brick, $30,000. Architectural Dept. City and County of San Francisco, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids for the construction of the North End Police Station and garage have been opened by the Board of Public Works and show Commary & Peterson Co. low men at $28,993. For a complete list of these figures see under San Francisco.

FLATS.

San Francisco—Flats, 2 story and base, frame, $4,000. Architect, none. Owner, John V. Steifel, 259 11th Ave., S. F. The building will be arranged for two modern flats of five and six rooms each. The interiors will be finished in pine and redwood with some hardwood floors. There will be gas grates. Tile and composition will be used in the bath rooms. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

San Francisco—Flats, 2 story and base, frame, $2,000. Architect, A. W. Richardson, 2733 Mission St., S. F. Owner, William Turner. The building will contain two small flats of four rooms and bath each. The interior finish will be of pine throughout. The exterior of the building will be covered with shiplap. Plans are complete and figures are being taken.

San Francisco—Flats, 2 story and base, frame, $4,000. Architect, none. Owner, C. W. Carlson, 4066 24th St., S. F. The building will cover a corner lot 26x70 feet, and will contain four, five and six room flats. There will be large bath rooms and modern plumbing. The interior finish will be of pine and redwood throughout. There will be gas grates. Tile will be used in the bath rooms. The exterior of the building will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

GARAGES.

San Francisco—Garage and sales rooms, 2 story and base, brick and steel, $60,000. Architects, Oser Bros., Western Metropolis Bank Bldg., S. F. Owner, I. L. Rosenthal. The building will be erected at a corner of Van Ness Ave. and will cover a large area. The first floor will be arranged for sales rooms and offices, while the entire second floor will be given over to repair departments and storage space. The interior will be finished in pine and hardwoods. Considerable tile and marble will be used. There will be steam heat. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

San Francisco—Garage, 2 story and base, brick, $6,000. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Thomas Scoble. The building will be erected in the east line of Geary street near 12th Ave. There will be a small garage on the first floor and three living rooms in the upper floor. The interior will be finished in pine throughout. Pressed brick will be used for the exterior finish. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

GOVERNMENT WORK AND SUPPLIES.

River and Harbor Improvements.

Congress at its last session authorized the expenditure for river and harbor improvements the following sums of money, under the direction of the engineer corps of the Army:

Continuing the improvement of the channel through Pinole Shole, San Pablo Bay, Cal., $122,000.

Continuing the improvement of the Snohomish River, Wash., $75,000.

Continuing the improvement of Willapa River and harbor, Wash., $75,000.

Continuing improvements of harbor at Hilo, Hawaii, $100,000

Improving Columbia and Lower Willamette River below Portland, Ore., $200,000.

Continuing the improvement of Whatcom Creek waterway in the harbor of Bellingham, Wash., in completion of contract authorization, $52,250.

Continuing improvement of Grays Harbor and bar entrance, Wash., by extension of north jetty in completion of contract authorization, $655,000.

Continuing improvement in Puget Sound-Lake, Wash., waterway by the construction of a double lock with the necessary accessory works, $500,000.

Continuing the improvement of the Siuslaw River, Ore., by jetty construction at mouth, $35,000.

Prospective Bidders.

Pearl Harbor General Storehouse September 28.

Otis Elevator Co., Washington, D. C.

W. N. Concannon & Co., San Francisco, Cal.

Crane Co., Washington, D. C.

Spalding Construction Co., Chamber of Commerce Building, Portland, Ore.

W. S. Babcock 17 Battery Place, New York city

F. W. Bird & Son, East Walpole, Mass.

Mesker & Bro., St. Louis, Mo.

Puget Sound Heating System, Sept. 28.
Crane Co., Washington, D. C.
White-Ward-Fussel Co., Washington, D. C.
H. W. John-Manville Co., Madison avenue and 41st street, New York city.

Puget Sound Elevator, Foundry, September 21.
Otis Elevator Co., Washington, D. C.
South Norwalk Engineering Co., South Norwalk, Conn.
Curtis & Co., St. Louis, Mo.

Puget Sound Elevator.

The following bid were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for installing one electric passenger elevator in the naval hospital, Puget Sound, Wash.:

Otis Elevator Co., 11th avenue and 26th street, New York city, $4,480.

Kimball Bros. Co., 717 Commerce Building, Kansas City, Mo., $4,771.

Pearl Harbor, H. T., Crane.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for furnishing one locomotive crane at the U. S. naval station, Pearl Harbor, H. T.:

Item 1, price for crane complete; price based on furnishing a standard double track crane different in detail from specification.

Brown Hoisting Machinery Co., 11-3 St. Claire street, Cleveland, Ohio, item 1, $9,200.

Browning Engineering Co., 1677 Waterloo Road, Cleveland, Ohio, item 2, $10,525.

Pearl Harbor Locomotive Crane.

No action has yet been taken by the chief of the bureau of yards and docks, Navy Department, Washington, D. C. regarding the award of contract for furnishing one 15-ton locomotive crane for delivery at the naval station, Pearl Harbor, H. T.

Mare Island Navy Yard, Capstans.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for furnishing three electrically-driven capstans for delivery at the Mare Island navy yard:

Item 1, price for three capstans and equipment complete in accordance with specifications; item 2, price for 2 capstans and equipment including the substituting of forged gears for the two cast steel auxiliary clutch gears for the purpose of reducing to a minimum excessive noise in the auxiliary gearing.

Hyde Windlass Co., 2 Federal street, Bath, Me., item 1, $5,995.

American Engineering Co., Aramingo avenue and Cumberland street, Philadelphia, Pa., item 1, $6,445; alternate, $6,875; item 2, $6,870; alternate, $7,300.

Presidio of San Francisco, Cal.—Officers' club and apartments, 2 story and base, reinforced concrete, $60,000. Architects, Constructing Q. M. Dept., Fort Mason. Owners, U. S. Government. The building will be erected at Fort Winfield Scott and is to cost in the neighborhood of $60,000. The main portion of the building will cover an area of 74x86 feet with an L 34x40 feet in size. The first floor will be arranged for cafe room, lunch room, rooms, pantry, kitchen and dining room. A large reading room and billiard hall will occupy the greater portion of the second floor. The third floor will be subdivided into apartments. The building will be heated by a hot water system. The design has been worked out in the Mission style, the exterior being covered with cement plaster. Bids will be called for shortly.

Presidio of San Francisco, Cal.—Government work, buildings, road construction, etc Cost not stated. Architects Constructing Q. M., Fort Mason. Owners, U. S. Government. Following the visit of the Secretary of War and his tour of inspection of the army posts around San Francisco Bay comes the announcement from the Constructing Quartermaster's Department at Fort Mason, in charge of Lt. Col. George McK. Williamson, to the effect that plans are already underway for three reinforced concrete buildings at the Letterman General Hospital. This work will be handled through the Constructing Q. M. office at Fort Mason. The same office will take figures in a short time for the construction of sidewalks and grading at Fort Winfield Scott. Plans for all Exposition buildings which are to be erected on Government property will have to have the approval of the Constructing Q. M. office, and this has been granted for the fence and green houses. Plans are being prepared by the same office for the 17,000 feet of boulevard along the Presidio shore line. This roadway will be from 60 to 70 feet in width. Bids will be called for shortly.

HALLS AND SOCIETY BUILDINGS.

Seattle, Wash.—Lodge hall, 3 story and base, reinforced concrete and brick, $200,000. Architects, Saunders & Lawton, Alaska Bldg., Seattle. Owners, Seattle Masonic Temple Association. This work has been mentioned here a number of times before. Working drawings are now complete and bids will be called for by the first of next month. The structure will cover an area of 80x120 feet. The entire building will be given over to the needs of the Masonic Order. The interior will be handsomely finished throughout. There will be steam heat and other modern improvements. The exterior will be faced with pressed brick and terra cotta.

Oakland, Cal.—Lodge hall, 3 story and base, brick, $40,000. Engineer, V. N. Dalton, Oakland. Owners, Pythian Hall Association. The building will be erected on 14th street near Fruitvale avenue. There will be two stores on the first floor and large lodge rooms, banquet hall and offices on the upper floors. There will be furnace heat. The interior will be finished in pine and redwood. The exterior of the building will be faced with cement plaster. Bids were opened for the construction on the 14th.

Alameda, Alameda Co., Cal.—Lodge hall, story and base, frame. Cost not stated. Architect, William Dufour, 2326 Santa Clara avenue, Alameda. Owners, Alameda Eagles' Aerie No 1076. The building has been arranged for two stores on the first floor and lodge rooms, offices and a banquet hall on the upper floor. The interior will be finished in pine and redwood with some hardwood floors. There will be furnace heat. The exterior of the building will be covered with metal lath and plaster. Plans are complete and bids are being taken.

HOSPITALS.

Seattle, Wash.—Hospital, 4 story and base, reinforced concrete, $100,000. Architect, Daniel Huntington, Colman Bldg., Seattle. Owners, City of Seattle. Notice of the appointment of this architect was given here in the last issue. Mr. Huntington has now been appointed to the office of City Architect and will, in the future, design all the municipal buildings. The salary is $300 per month and in addition Mr. Huntington retains his private practice.

Fresno, Fresno Co., Cal.—Sanitarium, 4 story and base, reinforced concrete, $60,000. Architects, Starbuck & Clark, Fresno. Owners, Dr. T. M. Sample and Dr. Adams. The building will be erected at the corner of Forthcamp and Mildred streets and is to be a modern fireproof structure. There will be a general ward, operating rooms and a number of private rooms. The interior will be handsomely finished. A modern system of heating and ventilating will be installed. The exterior of the building will probably be faced with cement plaster. Working drawings are nearly complete and figures will be called for shortly.

HOTELS.

San Francisco—Hotel, 4 story and base, brick, $40,000. Architect, Alfred Henry Jacobs, French Bank Bldg., S. F. Owner, Bert Schlessinger. This work was mentioned here when the architect first started the preliminary sketches some time ago. The first floor will contain the main hotel lobby and stores. Upper floors will be arranged for single rooms and baths. There will be steam heat, elevator service and hot and cold running water. The exterior of the building will be faced with pressed brick. Plans will be complete within a few days and bids will be called.

San Francisco—Hotel, 5 or 6 story and base, reinforced concrete. Cost not stated. Architect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owner, M. Kitzmiller. Only preliminary sketches have been made for this work and none of the details of construction have been determined upon as yet. There will be stores on the first floor and a number of single rooms above. The building will be erected south of Market street. The exterior will probably be faced with cement plaster.

San Francisco—Hotel, 4 story and base, brick, $45,000. Architect, A. J. Bain, Hearst Bldg., S. F. Owner's name withheld. This building will be erected on Mission street near Sixth. There will be stores on the first floor besides the hotel lobby. The upper floors will contain in the neighborhood of 75 rooms and a number of baths. There will be steam heat and elevator service. The exterior will be faced with pressed brick. Plans are being prepared.

San Francisco—Hotel annex, 7 story and base, brick and steel, $75,000. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Charles and Margaret Stewart. The building will have a frontage of 37 feet and a depth of 137 feet. The in-

terior has been arranged for 80 guest rooms, all of which will have connecting baths. The architecture will be similar to the Stewart Hotel, the exterior being faced with pressed brick and terra cotta. Construction will be undertaken within the next two months.

Oakland, Cal.—Hotel, 5 story and base, reinforced concrete, $60,000. Architects, E. W. Emons Eng. Co., Merchants' Exchange Bldg., S. F. Owner's name withheld. The engineering company have plans complete for the construction of this building but are awaiting the return of Mr. Emmons before starting the construction, which will probably be within the next ten days. The building will be erected on 19th street near San Pablo avenue, and will contain a store and the lobby on the first floor and about 80 rooms on the upper floors. There will be steam heat and elevator service. The exterior will be faced with cement plaster.

Sacramento, Cal.—Hotel, 6 story and base, steel and concrete. Cost not stated. Architects, Cuff & Diggs, Sacraento. Owners, Marsh Investment Co. The Marsh Investent Co., owners of the Travelers' Hotel at Sacramento, have sent out an announcement to all contractors extending the time of opening the bids on the construction of the new hotel from September 17th to September 24th. Plans for this work are on file at this office.

The following is a complete list of the firms figuring the Travelers' Hotel at Sacramento: Ransome Concrete Co., Sacramento; Rickon-Ehrhart Co., San Francisco; Long, Lord & Pickering, S. F.; James Stewart Co., Salt Lake City; Lewis A. Hicks Co., S. F.; Grant Fee, S. F.; Large & Bergstrom, S. F.; Matthews Construction Co., Sacramento; Lindgren & Co., S. F.; McGilvary Construction Co., Sacramento; Roberts Bros., S. F.; Amweg & Co., S. F.; Siller Bros., Sacramento; Commery, Peterson & Co. S. F. The owners are anxious to receive subfigures on all parts of this work.

Los Angeles, Cal.—Hotel, 4 story and base, brick, $75,000. Architect, I. E. Frary, Trust and Savings Bldg., L. A. Owner, D. F. Hill. The building will cover an area of 60x135 feet. There will be a lobby and two stores on the first floor and about 100 rooms and 50 baths on the upper three floors. The mechanical equipment includes steam heat, elevator service and a hot water system. The interior will be finished in pine and redwood. The exterior of the building will be faced with pressed brick and terra cotta. Plans are now being figured.

Contracts Awarded.

Los Angeles, Cal.—Hotel and stores, 4 story and base, brick, $35,000. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, A. Bernheim. Contractor, J. A. Kemp, 803 28th St., L. A. Contract price, $34,000.

—LIBRARIES—

McMinnville, Ore.—Library, 2 story and base, brick, $10,000. Architect, Ernest Kroner, Worcester Bldg., Portland. Owners, McMinnville Library Trustees. The building will be in the classic style and will cover an area of 36x72 feet. There will be a large public room, rack room and offices for the librarian. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans will be complete within a few days and figures will be called.

Auburn, Wash.—Library, 1 story and base, tile and brick, $10,000. Architect, David J. Myers, Central Bldg., Seattle. Owners, Auburn Library Trustees. Preliminary plans for this work have received the approval of the Board and working drawings will be ready for figures by October 10th. The interior has been arranged for a large public reading room, office and stack room. There will be furnace heat. The interior will be finished in pine and hardwood. The exterior of the building will be faced with tile.

RESIDENCES.

San Francisco — Residence alterations, frame construction, $4,500. Architect, none. Owner, A. B. Hallett, 1259 12th Ave., S. F. This work will consist of raising the present building and building a new foundation and putting living rooms in the basement. There will be new plastering, electric work and interior finish. Plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Residence, 1½ story and base, frame, $3,000. Architect, A. W. Richardson, 2733 Mission St., S. F. Owner, W. Harris. The dwelling has been designed for a six-room house with bath. The interior trim will be of pine and redwood with oak floors in some of the rooms. There will be open fire places and tile or brick mantels. Tile will be used in the bath room. The exterior of the dwelling will be covered with metal lath and plaster. Plans are complete and the architect is taking figures.

San Francisco—Cottage, 1 story and base, frame, $2,000. Architect, none. Owner, M. C. Warbook, 538 Laidley St., S. F. The cottage will contain five rooms and bath. The interior finish will be of pine throughout. There will be an open fire place in the living room with a tile mantel. The exterior will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, $2,500. Architect, Joseph Cahen, 45 Kearny St., S. F. Owners, Oscar Heyman & Bro., 113 Montgomery St., S. F. The dwelling will contain six rooms and bath. The interior will be finished in pine and redwood. There will be open fire places and tile or brick mantels. Some oak will be used in the floors. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Piedmont, Alameda Co., Cal.—Residence, 2 story and base, frame, $3,000. Architects, E. W. Stillwell & Co., Henne Bldg., L. A. Owner's name withheld. This dwelling has been designed for a seven-room house with bath and sleeping porch. The interior will be finished in pine and redwood. Oak will be used in the floors of the living rooms. Floor throughout will be of [illegible] room, floors [illegible] and [illegible] tion. There will be [illegible] open fire places. Mantels will be of brick and tile. Tile will be used in the kitchen. The exterior of the [illegible] will be covered with [illegible] on metal lath and tarred [illegible] complete and bids are being taken.

San Francisco.—Residence, [illegible] and base, frame, $8,000. Architect Theo. S. Bocqueraz, Hearst Bldg., S. F. Owners, Pockman & Co. The dwelling will contain seven rooms and bath. The interior will be finished in pine throughout. Oak floors will be used in the principal rooms. There will be open fire places and tile and brick mantels. The exterior of the house will be covered with [illegible] plaster on metal lath. Plans for the work will be drawn by [illegible].

Oakland, Cal.—Residence, [illegible] and base, frame, $4,000. Architect George Anderson, 5456 College Ave., Oakland. Owner Miss Allen. The work has been mentioned in these columns before. Plans for the [illegible] now complete and bids are being taken. The dwelling will contain seven rooms and bath. All interior finish will be of pine. Oak will be used for flooring in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. The exterior will be covered with [illegible]. Plans are complete and bids are being taken.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, $4,000. Architect Otis S. Graves, 2041 Telegraph Ave., Berkeley. Owner, Robert A. Bowden. This house has been designed for a seven-room, [illegible] with bath and sleeping porch. The interior will be finished in pine and redwood. There will be oak floors in the principal rooms, furnace heat and open fire places. The mantels will be of brick. The exterior will be covered with cement plaster on metal lath. Plans are being prepared.

Oakland, Cal.—Residence, 2 story and base, frame, $4,000. Architect, George Anderson, 5456 College Ave., Oakland. Owner, T. Anderson. The dwelling will contain seven rooms, bath and sleeping porch. An interior finish will be of pine and oak floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. The exterior of the house will be covered with cement plaster on metal lath. Plans for this work are now being prepared.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, $2,500. Architect, Hiram K. Lovell, 1617 Felton St., Berkeley. Owners, Davis and Long. The bungalow will contain six rooms, bath and sleeping porch. The interior will be finished in pine throughout. Oak will be used for floors in the principal rooms. There will be open fire places and brick mantels. The exterior of the house will be covered with cement plaster. Plans are complete and bids are being taken.

Oakland, Cal.—Residence, 2 story and base, frame, $3,000. Architect Hiram K. Lovell, 1617 Felton St., Berkeley. Owner, Miss E. E. Nichols. The dwelling will contain five rooms, sleeping porch and bath. The interior will be finished in pine and redwood. Oak [illegible] will be used in two of the rooms. There will be open fire places with tile [illegible] mantels. Plans are complete and bids are being taken.

Sacramento, Cal.—Bungalow, 1 story and [illegible], $2,500. Architect, Geo. S. Green, 2911 Telegraph Ave., Berkeley. Owner, Mr. Falk. The house will contain five rooms and bath. The interior will be finished in pine throughout. Floors will be oak floors in principal rooms. Mantels will be of brick. The exterior of the dwelling will be covered with shingles. Plans are being prepared.

Woodland, Yolo Co., Cal.—Residence, 2 story and base, frame, $7,000. Architect Geo. S. Green, 2911 Telegraph Ave., Berkeley. Owner, Dr. Fairchilds. This house is designed for an eight-room dwelling with all modern conveniences. The interior will be finished in oak, redwood and elm. Oak floors will be used in all principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in [illegible] rooms and kitchen. The exterior will be covered with metal lath and [illegible]. Plans are now being prepared.

San Diego, Cal.—Residence, 3 story and base, hollow tile construction, $75,000. Architect A. Struelt, Ferguson Bldg., L. A. Owner, J. D. Bennett. The house will contain in the neighborhood of twenty rooms including a [illegible] room, [illegible] room, etc. A one-story [illegible] building will connect with the main house by an arcade. There will be a two-story garage. The interior of the main house will be finished in [illegible] wood, [illegible] wood, white [illegible] and other hardwoods. Oak floors will be used throughout. Tile will be used in the baths. There will be steam [illegible], a vacuum cleaning system and [illegible] modern mechanical installations. The exterior of the dwelling will be covered with cement plaster. Plans are nearly complete.

SCHOOLS

Haywards, Alameda Co., Cal.—School, 2 story and base, reinforced concrete, $45,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Hayward Union High School District. The [illegible] has been notified that the contractor, C. Christensen of Oakland, who was awarded the general construction of the Haywards Union High School on his bid of $45,000, has withdrawn from the contract, and that it will be necessary to secure new figures. Some slight changes will be made in the plans and specifications. Bids for the work will be opened by the Board of School Trustees on September 27th.

Santa Barbara, Santa Barbara Co., Cal.—School, 2 story and base, reinforced concrete, $90,000. Architect, State Department of Engineering, Sacramento. Owners, State of California. Bids recently opened for the construction of work at the State Normal School show the F. O. Engstrom Co. of Los Angeles low at $90,932. For a complete list of these figures see under Los Angeles and Southern California.

Portland, Ore.—School, 2 story and base, reinforced concrete, $65,000. Architect, City Dept. of Architecture, Portland. Owners, City of Portland. The following bids were opened for the construction of the Ainsworth School. Bids for the glazing, heating, plumbing, plastering and painting will be received later. All bids for the general construction were taken under advisement:

Advance Const. Co.	$62,997
Bross Const. Co.	59,114
Foster & Co.	62,425
George Isackson	54,600
A. H. Lamm	65,940
Litherland & Abrey	77,876
Sound Const. and Eng. Co.	79,988
J. S. Winters & Co.	80,987

El Modeno, Orange Co., Cal.—School, 1 story and base, brick, $20,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, El Modeno School District. The building will cover an area of 102x106 feet. There will be an auditorium seating 350 people, six standard class rooms, office, library and two play rooms. A fan system of heating will be used. The interior will be finished in pine. The exterior of the building will be faced with red stock brick laid in white mortar Working drawings are nearly complete.

Tacoma, Wash.—School, 2 story and base, reinforced concrete and brick, $135,000. Architect's name not given. Owners, City of Tacoma. The following bids were opened for the construction of the Central School building at Tacoma: F. H. Goss Brick Co., Orchard St., $135,000; T. Strausser & Son, $148,542; J. E. Bonnell, $163,470; Olson & Young, $163,505; M. J. Westerfield, $163,700; Blows & Tuell, $163,767; Black & Kent, $165,194; W. B. Young Co., $169,964.50; Knowell Bros., $169,975; Olson & Johnson, $172,900; Cornell Bros., $174,769; Miller & Biehm, $176,000; Dow & Ryden, $183,169; Chalmers, Pearson & Co., $193,049; O. F. Larson, $206,615.

SEWERS, STREET WORK AND WATER SYSTEMS.

Contracts Awarded.

Palo Alto, Santa Clara Co., Cal.—Water system, $20,000. Engineer, City Engineer, Palo Alto. Owners, City of Palo Alto. Contractor, C. A. Bates, 246 Clay St., San Jose. Contract price, $19,240.

Cache Creek, Yolo Co., Cal.—Dam and irrigation work. Cost not stated. Engineers, E. L. Phillips & Co., Capay. Owners, Yolo Water and Power Co. Contractors, Richard Keating & Sons, S. F. Contract price not stated.

—STORE BUILDINGS—

San Francisco—Store alterations, 3 story frame, $5,000. Architect, Arthur J. Laib, Russ Bldg., S. F. Owner, Theo. J. Dierks. This work will consist of the alteration of the lower story of a frame dwelling house into a modern undertaking parlor. The work includes plastering, brick work, plumbing, electrical work and interior finish. Plans are complete and figures are being taken.

San Francisco—Store and offices, 10 story and base. Class A construction. Cost not stated. Architect, Willis Polk, Merchants' Exchange Bldg., S. F. Owners, Insurance Exchange. and six room flats. There will be large bath rooms and modern plumbing. The interior finish will be of pine and redwood throughout. There will be gas grates. Tile will be used in the bath rooms. The exterior of the building will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

Garage and Sales Rooms—2 story and base, brick and steel, $60,000. San Francisco. Architects, Oser Bros., Western Metropolis Bank Bldg., S. F. Owner, I. L. Rosenthal. The building will be erected at a corner of Van Ness avenue and will cover a large ground area. The first floor will be arranged for sales rooms and offices, while the entire second floor will be given over to repair departments and storage space. The interior will be finished in pine and hardwoods. Considerable tile and marble will be used. There will be steam heat. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Officers' Club and Apartments—3 story and base, reinforced concrete, $60,000. Presidio of San Francisco, Cal. Architects, Constructing Q. M. Dept., Fort Mason Owners, U. S. Government. This building will be erected at Fort Winfield Scott and is to cost in the neighborhood of $60,000. The main portion of the building will cover an area of 35x140 feet with an L 32x40 feet in size. The first floor will be arranged for club rooms, fourteen bath rooms, pantry, kitchen and dining room. A large reading room and billiard hall will occupy the greater portion of the second floor. The third floor will be subdivided into apartments. The building will be heated by a hot water system. The design has been worked out in the Mission style, the exterior being covered with cement plaster. Bids will be called for shortly.

Government Work—Buildings, road construction etc. Cost not stated. Presidio of San Francisco, Cal. Architects, Constructing Q. M., Fort Mason. Owners, U. S. Government. Following the visit of the Secretary of War and his tour of inspection of the army posts around San Francisco Bay comes the announcement from the Constructing Quartermaster's Department at Fort Mason, in charge of Lt. Col. George McK. Williamson, to the effect that plans are already underway for five reinforced concrete buildings at the Letterman General Hospital. The work will be handled from the Constructing Q. M. office at Fort Mason. This same office will take figures in a short time for the construction of sidewalks and grading at Fort Winfield Scott. Plans for all Exposition buildings which are to be erected on Government property will have to have the approval of the Constructing Q. M. office, and this has been granted for the fence and greenhouses. Plans are being prepared by the same office for the 17,000 feet of boulevard along the Presidio shore line. This roadway will be from 65 to 70 feet in width. Bids will be called for shortly.

Hotel—4 story and base, brick, $40,000. San Francisco. Architect, Alfred Henry Jacobs, French Bank Bldg., S. F. Owner, Bert Schlessinger. This work was mentioned here when the architect first started the preliminary sketches some time ago. The first floor will contain the main hotel lobby and stores. Upper floors will be arranged for single rooms and baths. There will be steam heat, elevator service and hot and cold running water. The exterior of the building will be faced with pressed brick. Plans will be complete within a few days and bids will be called.

Hotel—5 or 6 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, John Davis Hatch, Humboldt Bank Bldg., S. F. Owner, M. Kitzmiller. Only preliminary sketches have been made for this work and none of the details of construction have been determined upon as yet. There will be stores on the first floor and a number of single rooms above. The building will be erected south of Market street. The exterior will probably be faced with cement plaster.

Hotel—4 story and base, brick, $45,000. San Francisco. Architect, A. J. Bain, Hearst Bldg., S. F. Owner's name withheld. This building will be erected on Mission street near Sixth. There will be stores on the first floor besides the hotel lobby. The upper floors will contain in the neighborhood of 75 rooms and a number of baths. There will be steam heat and elevator service. The exterior will be faced with pressed brick. Plans are being prepared.

Hotel Annex—7 story and base, brick and steel, $75,000. San Francisco. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Charles and Margaret Stewart. The building will have a frontage of 37 feet and a depth of 137 feet. The interior has been arranged for 80 guest rooms, all of which will have connecting baths. The architecture will be similar to the Hotel Stewart, the exterior being faced with pressed brick and terra cotta. Construction will be undertaken within the next two months.

Residence Alterations—Frame construction, $4,500. San Francisco. Architect, none. Owner, A. B. Hallett, 1259 12th Ave., S. F. This work will consist of raising the present building and building a new foundation and putting living rooms in the basement. There will be new plastering, electric work and interior finish. Plans are in the hands of the owner and the work will be done by Day Labor.

Residence—1½ story and base, frame, $3,000. San Francisco. Architect A. W. Richardson, 2733 Mission St., S. F. Owner, W. Harris. The dwelling has been designed for a six-room house with bath. The interior trim will be of pine and redwood with oak floors in some of the rooms. There will be open fire places and tile or brick mantels. Tile will be used in the bath room. The exterior of the dwelling will be covered with metal lath and plaster. Plans are complete and the architect is taking figures.

Cottage—1 story and base, frame, $2,000. San Francisco. Architect, none. Owner, M. C. Warbook, 538 Laidley St., S. F. The cottage will contain five rooms and bath. The interior finish will be of pine throughout. There will be an open fire place in the living room with a tile mantel. The exterior will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

Residence—2 story and base, frame, $2,500. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owners, Oscar Heyman & Bro., 113 Montgomery St., S. F. The dwelling will contain six rooms and bath. The interior will be finished in pine and redwood. There will be open fire places and tile or brick mantels. Some oak will be used in the floors. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $7,000. San Francisco. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner's name withheld. The dwelling will be erected in the Richmond District and will contain in the neighborhood of eight rooms, baths and sleeping porch. All interior finish will be of pine or redwood. Floors throughout will be of oak, except bath room floors which will be of composition. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the kitchen. The exterior of the house will be covered with cement plaster on metal lath and rustic. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $3,000. San Francisco. Architect, Theo. S. Boehm, Hewes Bldg., S. F. Owners, Pockman & Co. The dwelling will contain seven rooms and bath. The interior will be finished in pine throughout. Oak floors will be used in the principal rooms. There will be open fire places and tile and brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are coplete and the work will be done by Day Labor.

Apartment House—3 story and base, frame, $19,000. San Francisco. Architect, W. G. Hind, 46 Kearny St., S. F. Owner, Dr. Clyde S. Payne. This building will be similar to a number of others of the same type constructed by Dr Payne. There will be 12 apartments which are to be arranged in suites of three rooms and bath each. All apartments will have private baths, private entrance and wall beds. There will be steam heat. The exterior of the building will be covered with cement plaster and brick veneer. Plans are complete and segregated figures are being taken for all parts of the work.

Store Alterations—3 story frame, $5,000. San Francisco. Architect, Arthur J. Laib, Russ Bldg., S. F. Owner, Theo. J. Dierks. This work will consist of the alteration of the lower story of a frame dwelling house into a modern undertaking parlor. The work includes plastering, brick work,

plumbing, electrical work and interior finish. Plans are complete and figures are being taken.

Store and Offices—10 story and base. Class A construction. Cost not stated. San Francisco. Architect, Willis Polk, Merchants' Exchange Bldg., S. F. Owners, Insurance Exchange. Bids for the structural steel, excavating and foundation work for this building have been received and are now under advisement. Figures will be called for at once on other parts of the work.

Garage—2 story and base, brick, $6,000. San Francisco. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Thomas Scoble. The building will be erected in the east line of Geary street near 12th Ave. There will be a small garage on the first floor and three living rooms in the upper floor. The interior will be finished in pine throughout. Pressed brick will be used for the exterior finish. Plans are complete and the work will be done by Day Labor.

City Bids Opened.

Bids on North End Police Station and Garage Show Commary and Peterson Low Men.

The following bids were opened at yesterday's meeting of the Board of Public Works. Construction on the North End Police Station attracted the largest number of bidders. OAKLAND AND ALAMEDA COUNTY.

Lodge Hall—3 story and base, brick, $40,000. Oakland, Cal. Engineer, V. N. Dalton, Oakland. Owners, Pythian Hall Association. The building will be erected on 14th street near Fruitvale avenue. There will be two stores on the first floor and large lodge rooms, banquet hall and offices on the upper floors. There will be furnace heat. The interior will be finished in pine and redwood. The exterior of the building will be faced with cement plaster. Bids were opened for the construction on the 14th.

Hotel—5 tory and base, reinforced concrete, $60,000. Oakland, Cal. Architects, E. W. Emmons Eng. Co., Merchants' Exchange Bldg., S. F. Owner's name withheld. The engineering company have plans complete for the construction of this building, but are awaiting the return of Mr. Emmons before starting the construction, which will probably be within the next ten days. The building will be erected on 19th street near San Pablo avenue, and will contain a store and the lobby on the first floor and about 80 rooms on the upper floors. There will be steam heat and elevator service. The exterior will be faced with cement plaster.

Residence—2 story and base, frame, $3,300. Piedmont, Alameda Co., Cal. Architects, E. W. Stillwell & Co., Henne Bldg., L. A. Owner's name withheld. This dwelling has been designed for a seven-room house with bath and sleeping porch. The interior will be finished in pine and redwood. Oak will be used in the floors of the living and dining rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with rustic. Plans are complete and figures are being taken.

Cottage—1 story and base, frame, $2,000. Oakland, Cal. Architect, L. F. Hyde, 2745 26th Ave., Oakland. Owner, L. Schoener. The cottage will contain five rooms and bath. All interior finish will be of pine. There will be open fire places and tile mantels. Oak will be used for the floor in the living room. The exterior of the house will be covered with shingles. Plans are in the hands of the owner and he is taking figures.

Residence—2 story and base, frame, $7,000. Alameda, Alameda Co., Cal. Architect, William C. Hays, Foxcroft Bldg., S. F. Owner, L. C. Ashley. The dwelling will contain nine rooms, bath sleeping porches and a laundry. The interior finish will be of pine and redwood. Oak floors will be used throughout all principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Floors in the bath rooms will be of composition. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Bungalow—1 story and base, frame, $3,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, B. F. Whitton, 2214 Durant Ave., Berkeley. The bungalow will contain six rooms, bath and sleeping porch. All interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

Cottage—1 story and base, frame, $2,500. Oakland, Cal. Architect, L. W. Suckett, Central Bank Bldg., Oakland. Owners, Extension Building Co. The house will contain five rooms and bath. The interior trim will be of pine and redwood. Oak floors will be used in the principal rooms. There will be open fire places with brick or tile mantels. The exterior of the dwelling will be covered with cement plaster and rustic. Plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, $2,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, E. P. Glover, 2445 Webster St., Berkeley. The dwelling will contain five rooms and bath. All interior trim will be of pine. Oak will be used for the floor in the living room. There will be an open fire place and tile mantel. The exterior of the house will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

Bungalow — 1½ story and base, frame, $3,000. Oakland, Cal. Architect, L. W. Suckett, Central Bank Bldg., Oakland. Owners, Extension Building Co. This house will contain six rooms, bath and sleeping porch. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be open fire places. The mantels will be of brick. The exterior of the bungalow will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $5,000. Oakland, Cal. Architect, George Anderson, 5456 College avenue, Oakland. Owner, Mrs. Alton. This work has been mentioned in these columns before. Plans for the house are now complete and figures are being taken. The dwelling will contain eight rooms and bath. All interior finish will be of pine. Oak will be used for flooring in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. The exterior will be covered with shingles. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $4,500. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Robert A. Bowden. This house has been designed for a seven-room dwelling with bath and sleeping porch. The interior will be finished in pine and redwood. There will be oak floors in the principal rooms, furnace heat and open fire places. The mantels will be of brick. The exterior will be covered with cement plaster on metal lath. Plans are being prepared.

Residence—2 story and base, frame, $4,000. Oakland, Cal. Architect, George Anderson, 5456 College avenue, Oakland. Owner, T. Anderson. The dwelling will contain seven rooms, bath and sleeping porch. All interior finish will be of pine or redwood. Oak floors will be used in the living and dining rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. The exterior of the house will be covered with cement plaster on metal lath. Plans for this work are now being prepared.

Bungalow—1 story and base, frame, $2,500. Berkeley, Alaeda Co., Cal. Architect, Hiram K. Lovell, 1617 Felton St., Berkeley. Owners, Davis and Long. The bungalow will contain six rooms, bath and sleeping porch. The interior will be finished in pine throughout. Oak will be used for floors in the principal rooms. There will be open fire places and brick mantels. The exterior of the house will be covered with cement plaster. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $3,000. Oakland, Cal. Architect, Hiram K. Lovell, 1617 Felton St., Berkeley. Owner, Miss E. E. Nichols. The dwelling will contain five rooms, sleeping porch and bath. The interior will be finished in pine and redwood. Oak floors will be used in two of the rooms. There will be open fire places with tile or brick mantels. The exterior of the house will be covered with rustic. Plans are complete and figures are being taken.

Apartment House—3 story and base, frame, $20,000. Oakland, Cal. Architect, none. Owner, E. C. Dalton, 845 Jackson St., Oakland. The house has been arranged to contain 18 apartments of two and three rooms each. There will be private baths and wall beds. All interior finish will be of pine. Some oak floors will be used. There will be steam heat. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who is now taking figures on the work.

Apartment House—2 story and base, frame, $18,000. Oakland, Cal. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building has been mentioned here before when plans were first started for the work Working drawings are now complete and figures are being taken. The building will contain a number of apartments which have been arranged in suites of two and three rooms each with bath. There will be wall beds, steam heat and other modern conveniences. The interior finish will be of pine. The exterior of the building will be covered with cement plaster on metal lath.

School—2 story and base, reinforced concrete, $45,000. Haywards, Alameda Co., Cal. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Haywards Union High School District. The architect has been notified that the contractor, C. Christensen of Oakland, who was awarded the general construction of the Haywards Union High School on his bid of $45,000, has withdrawn from the contract, and that it will be necessary to secure new figures. Some slight changes will be made in the plans and specifications.

Bids for the work will be opened by the Board of School Trustees on September 27th.

Bridge—Concrete and steel. Cost not stated. Berkeley, Alameda Co., Cal. Architect's name not given. Owners, Regents of the University of California. The Regents at their last meeting appropriated funds for the construction of a bridge and roadway from California Hall to Agricultural Hall. Plans will be prepared later.

Market—1 story and base, brick, $15,000. Oakland, Cal. Architects, Whalen Bros., Bacon Bldg., Oakland. Owner, John Rehan. The building has been designed for a Free Market and will be erected at the corner of 5th and Washington streets. There will be a large number of stalls, a concrete floor and considerable tile work. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken by the architects.

Lodge Hall—2 story and base, frame. Cost not stated. Alameda, Alameda Co., Cal. Architect, William Dufour, 2326 Santa Clara Ave., Alameda. Owners, Alameda Eagles' Aerie No 1076. The building has been arranged for two stores on the first floor and lodge rooms, offices and a banquet hall on the upper floor. The interior will be finished in pine and redwood with some hardwood floors. There will be furnace heat. The exterior of the building will be covered with metal lath and plaster. Plans are complete and bids are being taken.

Contracts Awarded.

Stores and Offices—7 story and base. Class A construction, $200,000. Oakland, Cal. Architects, Meyer & Reed, Oakland Bank of Savings Bldg., Oakland. Owners, Thompson Estate. Contractors, P. J. Walker Co., Monadnock Bldg., S. F. Note: This contract has been taken on the percentage basis.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Apartment House—4 story and base, brick, $80,000. Los Angeles, Cal. Architects, Nooman & Kysor, Wright and Callender Bldg., L. A. Owner, Jacob Morris. The structure will cover an area of 100x100 feet, and will contain a large lobby, amusement room and 120 guest rooms, which are to be arranged in two and three room suites. All apartments will have connecting baths and wall beds. The interior will be finished in pine and hardwoods with tile floors in the baths. There will be steam heat, elevator service and a vacuum cleaning system. The exterior will be faced with cement brick. Plans are complete and figures are being taken.

Apartment House—4 story and base, brick, $60,000. Los Angeles, Cal. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owner, E. B. Harbour.. The building will be 56x102 feet. The interior has been arranged to contain 120 rooms, which will be subdivided into 48 two-room and 6 three-room apartments. All will have wall beds and connecting bath rooms. There will be steam heat and elevator service. The interior will be finished in pine and hardwoods. Tile will be used in the baths. The exterior of the building will be faced with pressed brick and artificial stone. Plans are now out for figures.

Apartment House—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, C. W. Chase. The building will be 50x100 feet, and is to contain 108 rooms, which will be arranged in suites of two and three rooms each. All apartments will have private baths and wall beds. There will be steam heat, both freight and passenger elevators and a vacuum cleaning system. The interior of all apartments will be finished inpine. Tile floors and wainscott will be used in the baths. The exterior of the building will be faced with pressed brick. Plans will be complete and ready for figures about October 1st.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, California Real Estate and Building Co., 631 So. Spring St., L. A. Owner, Sidney A. Butler. The building will cover an area of 60x140 feet, and is arranged for 77 rooms, which will be divided in two and three room suites with wall beds and private baths. There will be steam heat and a vacuum cleaning system. The interior finish will be of pine and hardwood. Tile and composition flooring will be used in the bath rooms. The exterior will be faced with pressed brick. Plans are being prepared.

Hotel—4 story and base, brick, $75,000. Los Angeles, Cal. Architect, I. E. Frary, Trust and Savings Bldg., L. A. Owner, D. F. Hill. The building will cover an area of 60x135 feet. There will be a lobby and two stores on the first floor and about 100 rooms and 50 baths on the upper three floors. The mechanical equipment includes steam heat, elevator service and a hot water system. The interior will be finished in pine and redwood. The exterior of the building will be faced with pressed brick and terra cotta. Plans are now being figured.

Residence—3 story and base. Hollow tile construction, $75,000. San Diego, Cal. Architect, A. Stibolt, Ferguson Bldg., L. A. Owner, J. D. Bennett. The dwelling will contain in the neighborhood of twenty rooms including a billiard room, conservatory, music room, etc. A one-story guest building will connect with the main house by an arcade. There will be a two-story garage. The interior of the main house will be finished in teak wood, bean wood, white cedar and other hard woods. Oak floors will be used throughout. Tile will be used in the baths. There will be steam heat, a vacuum cleaning system and other modern mechanical installations. The exterior of the dwelling will be covered with cement plaster. Plans are nearly complete.

Bank—1 story and base, reinforced concrete, $25,000. Alhambra, Los Angeles Co., Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Alhambra Savings Bank. The building will be classical in design and will be occupied by the banking institution only. The exterior will be faced with cement plaster. There will be a large general office, private offices and work space. The interior will be finished in hardwoods and marble. Workings drawings are being completed.

Church—1 story and base, frame, $20,000. Los Angeles, Cal. Architects, Walker & Vawter, Hibernian Bldg., L. A. Owners, Hobart Boulevard Methodist Church. The main auditorium and class rooms will be separated by rolling partitions by use of which the two may be thrown together. Social rooms and a large hall will be provided for in the basement. The exterior of the building will be covered with cement plaster on metal lath. Metal tile will be used for the roof. Plans are being prepared.

Church—1 story and base, brick, $75,000. Long Beach, Los Angeles Co., Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Congregational Church of Long Beach. Revised plans for this building have just been approved by the owners and working drawings are being made. The design is in the Italian Gothic style. There will be a main auditorum seating 1400 people and class rooms having accommodations for 500. Besides these rooms there will be a pastor's study, library and church parlor. The building will cover an area of 100x 150 feet. The exterior will be faced with pressed brick and artificial stone. Plans are being prepared.

Warehouse—3 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Abbott Hardware Co. This work has been mentioned here before. Plans are now complete and figures are being taken. The building will cover an area of 64x48 feet. There will be metal sash and doors. The Kahn system of floor construction will be used. The exterior of the building will be faced with cement plaster.

School—1 story and base, brick, $20,000. El Modeno, Orange Co., Cal. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, El Modeno School District The building will cover an area of 102x106 feet. There will be an audtorium seating 350 people, six standard class rooms, office, library and two play rooms. A fan system of heating will be used. The interior will be finished in pine. The exterior of the building will be faced with red stock brick laid in white mortar. Working drawings are nearly complete.

Contracts Awarded.

Apartment House—4 story and base, brick, $100,000. Los Angeles, Cal. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, Joseph Talbott. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price, $100,000.

Garage—2 story and base, brick and steel, $30,000. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, Mrs. S. H. Van Nuys. Contractors, James H. Jacobs Co., H. W. Hellman Bldg., L. A. Contract price, $27,000

Hotel and Stores—4 story and base, brick, $35,000. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, A. Bernheim. Contractor, J. A. Kemp, 803 28th St., L. A. Contract price, $34,000.

Stores and Offices—12 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, William Curlett & Son, Phelan Bldg., S. F., and Title Ins. Bldg., L. A. Owners, Merchants' Fireproof Building Co. Contractors, Llewllyn Iron Works, North Main and Redondo Sts., L. A. Contract for furnishing and erecting structural steel. Contract price, $130,975.

Complete Bids On Santa Barbara Job.

F. O. Engstrum Co., Low Men For General Construction. Bids Opened September 10th By Board of Control.

The following complete list of figures submitted for the construction of the work at the State Normal School at Santa Barbara has been received from the State Engineer's office at Sacramento. The result of the bids for the general construction were published in yesterday's "Builder."

General Construction.

F. O. Engstrum Co.....$90,932.00
Lewis A. Hicks Co..... 92,200.00
Somers & Lund..... 92,338.00
Magnus Johnson 95,987.07
Fred L. Hansen..... 97,770.00
Los Angeles Planing Mill. 98,248.00

Clearing, Excavation, Etc.

Los Angeles Planing Mill...$7,500

Concrete, per cubic yard.

F. O. Engstrum Co..$10 per cu. yd.
Lewis A. Hicks Co.$17.50 per cu. yd
Somers & Lund.....$13 per cu. yd
Magnus Johnson....$15 per cu. yd
Fred L. Hansen....$4.50 per cu. yd
Los Angeles Plng Mill..$9 pr cu yd

Electric Wiring.

American Elec. & Fix. Co..$2,750.00
Reynolds Elec. Supply Co. 2,867.51
Newbery-Bendheim Elec. Co.
.....$3,840.00

Ornamental Iron Work.

Pacific Orn. Iron Works....$2,225

Time for Completion of Work.

F. O. Engstrum Co.....200 days
Lewis A. Hicks Co.....300 days
Somers & Lund (working).175 days
Magnus Johnson.....200 days
L. A. Planing Mill Co.....300 days

PORTLAND AND OREGON.

School—2 story and base, reinforced concrete, $65,000. Portland, Ore. Architect, City Dept. of Architecture, Portland. Owners, City of Portland. The following bids were opened for the construction of the Ainsworth School. Bids for the glazing, heating, plumbing, plastering and painting will be received later. All bids for the general construction were taken under advisement:

Advance Const. Co..... $62,997
Bross Const. Co. 59,114
Foster & Co. 62,425
George Isackson 54,600
A. H. Lamm 65,940
Litherland & Abrey 77,876
Sound Const. and Eng. Co... 79,988
J. S. Winters & Co..... 80,987

Offices—14 story and base. Class A construction. Cost not stated. Portland, Ore. Architects, Engineering Dept. Pacific Tel. and Tel. Co., New Montgomery St., S. F. Owners, Pacific Tel. and Tel Co. Contractors, Sound Construction and Eng. Co., Lowman Bldg., Seattle. Note: This contract calls for the excavating, reinforced concrete foundations and footings only. Other parts of the work will be out for figures shortly.

Factory Group—Brick and frame construction. Cost not stated. Armstrong, Ore. Architect, Charles N. Elliott, Portland. Owners, Armstrong Mfg. Co. This group of buildings will consist of a one story brick office building, power house, pattern shop, pattern storage building, a large warehouse and a foundry and machine shop. The main office structure will be the first of the group to be erected. The company has plans in preparation for the construction of several other large projects in connection with this plant. Complete details will be given in an early issue.

Library—2 story and base, brick, $10,000. McMinnville, Ore. Architect, Ernest Kroner, Worcester Bldg., Portland. Owners, McMinnville Library Trustees. The building will be in the classic style and will cover an area of 36x72 feet. There will be a large public room, rack room and offices for the librarian. A central heating system will be installed. The exterior of the building will be faced with pressed brick. Plans will be complete within a few days and figures will be called.

SEATTLE AND WASHINGTON.

Lodge Hall—3 story and base, reinforced concrete and brick, $200,000. Seattle, Wash. Architects, Saunders & Lawton, Alaska Bldg., Seattle. Owners, Seattle Masonic Temple Association. This work has been mentioned here a number of times before. Working drawings are now complete and bids will be called for by the first of next month. The structure will cover an area of 60x120 feet. The entire building will be given over to the needs of the Masonic Order. The interior will be handsomely finished throughout. There will be steam heat and other modern improvements. The exterior will be faced with pressed brick and terra cotta.

Stores and Offices—4 story and base, reinforced concrete and steel, $100,000. Seattle, Wash. Architects, Bebb & Mendel, Denny Bldg., Seattle. Owner, George W. Fisher. The building will cover a large corner lot. Plans provide for an eight-story structure, only four of which will be erected at this time. There will be a steel frame and reinforced concrete exterior walls. The exterior will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

Library—1 story and base, tile and brick, $10,000. Auburn, Wash. Architect, David J. Myers, Central Bldg., Seattle. Owners, Auburn Library Trustees. Preliminary plans for this work have received the approval of the Board and working drawings will be ready for figures by October 10th. The interior has been arranged for a large public reading room, office and stack room. There will be furnace heat. The interior will be finished in pine and hardwood. The exterior of the building will be faced with tile.

Church—1 story and base, brick, $25,000. Seattle, Wash. Architect, David J. Myers, Central Bldg., Seattle. Owners, Westminster Church. This work has been mentioned here before. Plans for the building will be complete and out for figures by October 15th. The building will cover an area of 56x116 feet.

Hospital—4 story and base, reinforced concrete, $100,000. Seattle, Wash. Architect, Daniel Huntington, Colman Bldg., Seattle. Owners, City of Seattle. Notice of the appointment of this architect was given here in the last issue. Mr. Huntington has now been appointed to the office of City Architect and will, in the future, design all of the municipal buildings. The salary is $300 per month, and in addition Mr. Huntington retains his private practice.

School—2 story and base, reinforced concrete and brick, $135,000. Tacoma, Wash. Architect's name not given. Owners, City of Tacoma. The following bids were opened for the construction of the Central School building at Tacoma: F. H. Goss Brick Co., Orchard St., $135,000; T. Strausser & Son, $148,542; J. E. Bonnell, $163,470; Olson & Young, $163,505; M. J. Westerfield, $163,700; Blows & Tuell, $163,767; Black & Kent, $165,194; W. B. Young Co., $169,964.50; Knowell Bros., $169,975; Olson & Johnson, $172,900; Cornell Bros., $174,769; Miller & Biehm, $176,000; Dow & Ryden, $183,169; Chalmers, Pearson & Co., $193,049; O. F. Larson, $206,615.

ONCE MORE THE WINDJAMMER.

With a bumper crop of barley estimated at 550,000 tons, California grain men stand to lose immense sums owing to the lack of tonnage for handling the crops. The utmost carrying capacity of all vessels in sight is between 50,000 and 60,000 tons. The ships of England and other nations, which formerly had ample space for the grain, have all their tonnage taken months ahead and most of them are engaged elsewhere at such high rates that they are not considering Pacific Coast shipments.

The situation in California is a sample of what pertains to the whole Coast, including British Columbia, and the scarcity of tonnage will be felt more acutely toward the end of the year, it is claimed.

Old sailing ships which had been towed to the Oakland estuary as obsolete in view of the growth of shipments by steamers a few years ago, are being overhauled and patched up to handle the grain in the absence of steamer tonnage. The estuary for the past six years has become a landmark because of the presence of the immense fleet of sailing ships which had been moored there to rot.

Among the boats are the Ferris S. Thompson, Halcyon, Lurline, Reuce, Charmer, California, Sonoma, Beulah, Little Bonne, Diamond Head, Balboa, and a host of others, consisting of schooners, barks, brigantines and full-rigged ships.

Most of the vessels have been stripped of their boats and gear, but many of them have been kept up in a half interested manner. It was believed that the days of the windjammer were past and the whole fleet could have been bought for a song.

Now ever the worst of the old hulks are being hauled out and patched up to make a voyage or two, and some of them will be unable to pass the inspectors. The freight situation has brought the windjammers to the fore once more and they are as much in demand as they were before steamships became general.—Vancouver Sun.

STATE FAIR OPENS AT SACRAMENTO.

SACRAMENTO, Sept. 14.—With exhibits estimated to be worth more than $3,000,000, representing wide and various types of industry, the Sacramento

State Fair opened at Agricultural Park today.

Months of activity and more than $30,000 have been spent to make this the most successful fair ever held. There will be 476 different exhibits from 25 counties in California, including 100 makes of automobiles. The racing card will contain entries from the best stables in the Pacific States. The eight days of the state fair have been designated as follows:

Saturday, September 14—Sacramento, Masonic and Commercial Travelers' day.

Sunday, September 15—Bay Cities and Turn Verein day.

Monday, September 16—San Joaquin Valley and Marysville day.

Tuesday, September 17—Y. M. C. A., Y. W. C. A. and Retail Merchants' day.

Wednesday, September 18—Knights of Pythias day.

Thursday, September 19—Governor's, '49 (Placerville, Auburn, Oroville) and Children's day.

Friday, September 20—Alameda county, San Diego Exposition, Chico and Woodland day.

Saturday, September 21—San Francisco, Panama-Pacific Exposition and Stockton day.

WALKER FORBIDDEN TO BURN LASSEN TIMBER.

State Forester Homans has turned down the application of T. B Walker, Timber King, to burn over several thousand acres of timber in Lassen County, for the purpose of removing the debris on the forest floor. The refusal of the permit amounts merely to a protest against Walker's method of burning. Under the law Walker can burn on his own land, but if the fire gets out of his control and injures others, he is held responsible.

LOCAL CONTRACTOR IS ON HOSPITAL BOARD.

SACRAMENTO, Sept. 11.—C. J. Corcoran, a San Francisco contractor, was appointed yesterday by acting Governor Wallace a member of the board of managers of the Napa state Hospital to succeed Thomas B. Dozier, whose term has expired. The appointment of J. C. Jones to the position of supervisor of San Bernardino county to succeed E. W. Reed, who died a short time ago, also was announced.

CIVIL SERVICE EXAMINATIONS.

The United States Civil Service Commission announces that examinations will be held in San Francisco at an early dates as follows:

Printer (male), Philippine service; salary $2000 per annum.

Engineer draftsman (male), supervising architect's office; salary $1600 to $2000 per annum.

Chief of the training school (female), Government Hospital for the Insane; salary $1200 per annum and maintenance.

Stenographer, typewriter, translater (female), Bureau of Mines, Washington, D. C.; salary $1200 per annum.

Teacher of metal working and mechanical drawing (male), Haskell Indian School, Kansas; salary $720 per annum and quarters.

Assistant in experimental therapeutics (male), Philippine service; salary $2000 per annum.

PACIFIC ELECTRIC WOULD ISSUE BONDS.

The Pacific Electric Railway of Los Angeles has applied to the State Railroad Commission for permission to issue its unsold bonds to the amount of $79,161,000. The application was regarded as a request by the corporation to be allowed to sell all the bonds remaining in its treasury.

The application is made by the company in three divisions. The first is for permision to issue $5,285,000 of the refunding bonds for the purpose of retiring the outstanding bonds of the Los Angeles Interurban Company, and the Los Angeles and Redondo Railway Company. The second division of the application asks for permission to issue bonds in the amount of $26,226,000 for the purpose of refunding all other outstanding obligations. The third division asks permission to issue the remaining $47,650,000 without specifying in detail for what purposes they are intended.

POWER COMPANIES ALLOWED TO COMPETE.

The State Railroad Commission has rendered a decision in the case of the Pacific Gas and Electric Company versus the Great Western Power Company involving a section of Napa County in the vicinity of Oak Knoll. Under the terms of a decision previously rendered by the Commission there was some doubt as to the right of the Great Western Power Company to enter this portion of Napa County. The Commission has now decided that the Great Western and the Napa Valley Electric Company may both serve the disputed territory in the vicinity of Oak Knoll.

CONTRACTORS WILL HAVE TO GIVE TRUE COSTS.

SACRAMENTO, Sept. 13.—Contractors and owners who are in the habit of securing building permits for an amount much lower than the actual cost of the work to be done for the purpose of saving a few dollars in filing fees will be open to prosecution under the new building ordinance which Building Inspector W. F. Rutan is preparing.

Inspector Rutan has called the attention of the Commissioners to the case of E. J. Pendergast, who got a permit for $3000 and was doing $10,000 worth of work, he said.

Building Inspector Rutan reported that he had refused a building permit for the remodeling of a building on the south side of M, between Fourth and Fifth, known as Churchills, because of the danger that would result from fire from numerous wooden buildings surrounding. He explained that a dance hall, lodging house and garage were housed on the property in frame buildings. The Commissioners informally approved the action.

WATSONVILLE WHARF COMPLETED

WATSONVILLE, September 13.—The commercial wharf, which has been under construction at Port Watsonville since April 4th, was completed Thursday at a cost of more than $100,000. It is the largest on the Pacific Coast, extending into Monterey bay over 1700 feet. It was built by the Watsonville Navigation and Railroad Company, of which F. E. Snowden is president, while the San Francisco Bridge and Construction Company did the actual work.

The electric line of the railroad company, connecting this city and the port, will be extended at once to the end of the wharf to facilitate the shipping of the products of the Pajaro valley to the San Francisco market.

Steamers will be in operation between the port and the metropolis daily within two weeks. The vessels have already been purchased, and will carry both freight and passengers.

Twice-a-week service will also be operated between here and Southern California. The cheap water service is expected to be a big thing in the development of the Pajaro valley.

CONSTRUCTION WORK ABROAD.

CANADA.

(From Consul G. Willrich, Quebec.)

Strength of American Cement in Structural Work Appreciated.

In consequence of the temporary reduction of the Canadian duty on cement, imports have considerably increased. A Quebec firm states that its American cement, coming in under the reduced tariff, costs 3 cents less per barrel than that furnished by the Canadian merger and, moreover, is of greater strength.

This question of greater strength would seem to be an important factor in connection with a future expansion of American exports, and it was suggested that, when this fact is more generally recognized, it is more than likely that specifications for future buildings and works will require a cement of a strength that will give the American manufacturer of the higher grades of cement his chance in competition with the Canadian product, which owing to the quality of stone obtainable in Canada cannot it seams attain the quality of the American product. Such competition would not even be seriously hindered by the restoration and continuance of the regular duty of 12½ cents per 100 pounds, after October 31, 1912.

In view, therefore, of the probability of the construction at Quebec of large and substantial harbor improvements, such as new piers, wharves, docks, sheds, etc., about which there has been much talk, and which, after all, must come some day, it seems that this should be the time for a determined effort to get the American cement into this market.

(From Contract Record, Toronto.)

Edmonton's Building Restriction.

Edmonton will not become a city of architectural monstrosities, commonly called sky-scrapers. The new order of the city council limits the height of the buildings to 10 stories. The by-law was put into shape by the city commissioners, building inspecton, chief of the fire department, municipal architect, plumbing inspector and officials of other departments. Two other amendments are: Two stairways are required in buildings of three stories and additional exits where the area occupied by the structure is more than 2,500 feet, and the installation of back vents to plumbing where more than four fixtures are used.

Construction of Dwellings—Municipal Operations.

The Northern Home Builders, Ltd., capital $500,000, has been incorporated at Edmonton, to construct dwelling houses, 50 of modern type to be erected at once and buildings of lesser value to be constructed as rapidly as they are demanded.

Edmonton's most pressing problem today, as it has been the last nine months, is to house those who have decided to make this city their future abiding place. The municipal census taken on July 6, shows a population of 53,383 in greater Edmonton, a gain of 22,921 in the last 12 months. Edmonton's assessment for the coming year will be approximately $130,000,000, of which $25,000,000 is levied on southside property. Taxes will provide $1,300,000 for the general fund department of the municipal corporation, which owns its waterworks, automatic telephone system, electric street car lines of 30 miles and electric light and power plants. Single tax is in successful operation, and it is given out that the plan will be extended to the rural communities before the close of the year.

MARCONI SECURES OPTION.

The Marconi Wireless Telegraph Company has taken an option no a 600 acre ranch at Bolinas. While the details have not yet been settled it is understood that the company will build a large plant there, a project taking in a wireless service that will include the major portion of the south and west has been considered.

CIVIL SERVICE POSITIONS.

Examinations for positions under twenty-four classifications will be held October 24th by the Civil Service Commissioners, this decision being reached at their regular weekly meeting held Friday night. Among the positions for which examinations are to be held are those of engineers, blacksmiths, carpenters, chauffeurs and for culinary work.

Applications to take the examinations must be made before October 10th.

RAILROAD BRIDGE CONTRACT AWARDED.

The contract for constructing the Oakland, Antioch and Eastern Railroad trestle over Yolo Basin at Glide has been let to the Merwin-Elwell Company. This trestle will be between two miles and two miles and a half in length. Oakland-Antoich employes are now engaged in laying rails for the tracks between Glide and Sacramento. About three miles of rails have already been laid. A crew of workmen in the employ of the railroad is also working at present on the installation of the drawbridge at Montezuma Slough. The contract for building this bridge has been let to the Shattuck-Edinger Company of this city.

The railroad officials have received no intimation from the War Department what its action will be upon the application for permission to construct a bridge across Suisun Bay at Chipp's Island. This application is now in the hands of the Chief Engineer of the War Department at Washington.

DREDGER COMPANY SUED FOR DAMAGES.

COLUSA (Colusa Co.), September 14. Suit has been filed in the Superior Court by J. C. Williams of Yuba County against the Argyle Dredging Company for $50,000 damages, alleging the latter was responsible for the death of George Williams, a son of the plaintiff.

September 7, 1911, George Williams was working on a dredger in Reclamation District No. 108 and was caught and crushed to death by a metallic bucket weighing several hundred pounds. The young man's head was almost severed from his body.

The father alleges that it was through the negligence of the company and its employes that the fatal accident occurred.

IRRIGATION CONTRACT LET.

WOODLAND, Cal.—E. L. Phillips & Co., Consulting Engineers for the Yolo Water & Power Company, have let a contract to Richard Keatinge & Sons, of San Francisco, to build the great concrete dam across Cache Creek, near the town of Capay, and also, to line many miles of irrigating canals with cement. The Yolo Water & Power Co. expect to furnish water to 200,000 acres of land lying between Winters and Woodland.

CITRUS FRUIT RECORD.

LOS ANGELES, Sept. 9.—During the year ended August 31, last, the California Fruit Growers' exchange shipped to the east 9,191,143 boxes of citrus fruit, which was sold for $16,891,490, or $1.84 per box, according to a report issued recently by B. A. Woodford, secretary of the exchange. It required 23,590 cars to take the fruit east. The report stated that prices for the last seven years had averaged $1.82 a box f. o. b. California.

NATIONS COMPETE FOR LABORERS

The shortage of labor in the United States this year has become a matter of general comment. It amounts in several sections of the country to an actual famine.

It first appeared at Pittsburg. It was believed there that shrinkage in the supply was merely local and that the demand and the offers of higher pay would draw laborers from other quarters. But these factors failed to operate. It was found that other regions not only had no labor surplus, but were themselves suffering from insufficiency of supply.

Several explanations are offered, but no single reason suffices. The right explanation results from combining the several ones and then taking also into account the world-wide competition for labor.

One cause is that the development of the country through originating and rushing forward many new undertakings is going on apace. Another is that in each locality the demand for labor made by local enterprises keeps it at home. Another is that America can no longer draw alone on immigration from southern and southeastern Europe.

There has arisen among the newer countries a competition against us for immigration and labor that did not occur in the 80s and 90s. Argentina has become an immensely inviting field for Italians. Portuguese and Spaniards. Brazil has attracted scores of thousands of Germans, though they do not go there in such swarms now as formerly. Canada bids strongly for Britishers to fill her fertile wastes. Italy has opened up new spheres in Tripoli for the Sicilians and the southern Italians. New Zealand seems like a paradise to European laborers.

The international competition for immigrants is an operative power all over the civilized world. It is an overlooked explanation of the shortage of American labor in 1912. It may be draining sources of American supply that had been imagined to be exhaustless. It not improbably may yet prove to be the dominant factor in the situation.—Seattle Post-Inteddigencer.

HEARINGS BEFORE COMMERCE COMMISSION.

WASHINGTON (D. C.), Sept. 11.—The Interstate Commerce Commission has scheduled hearings at San Francisco for October 11th, 14th, 15th in the cases of the Yuba Construction Company, California Pole and Piling Company, and other Northern California cases.

Hearings are scheduled at Reno for October 18th and 19th in the case of the Goldfield Consolidated Mines Company against the Southern Pacific and in other Nevada cases.

INSPECTOR CONDEMNS BRIDGES.

PLACERVILLE (El Dorado Co.), September 11.—The report of Clifford B. Rushmer, who has been inspecting county bridges, has been filed with the Supervisors. In Rushmer's opinion, the O'Keefe bridge across Webber Creek, on the Placerville and El Dorado road, two miles below this city, is positively in a dangerous condition, and he recommends the posting of notices warning people that if they use it it will be at their own personal risk.

He condemns the towers of the bridge across the North Fork of the American River, and says they should be replaced immediately; that in the meantime notices should be posted limiting the loads of vehicles crossing it.

The other bridges were reported to be in fair condition, and most of them good for three or four years yet, with proper repairs at present and with proper care afterwards.

WILL BEGIN WORK AT MODOC INDIAN SCHOOL.

FORT BIDWELL (Modoc Co.), September 11.—Construction work of improvements at the Indian School at Fort Bidwell, Modoc County, is to begin at once. Congressman Raker, at the last session of Congress, secured an appropriation of $15,000 for the purpose.

This appropriation is segragated as follows: $7000 for the construction of water and electric light systems; $3000 for a sewerage system, $3000 for a steam laundry; and $2000 for a complete heating system and accessory buildings.

WELL IRRIGATION INVESTIGATED.

AUBURN (Placer Co.), September 12. O. E. Meinzer, head of the underground waters division of the United States Geological Survey, was in Auburn Tuesday on business con-

nected with his department. He was accompanied by his assistant, Kirk Bryan and Mrs. Meinser.

Meinser and Bryan made a study of wells in Auburn and vicinity and obtained other facts to assist them in their work. Meinser will spend several weeks in various towns of the Sacramento Valley. Bryan will remain in the Sacramento Valley for about two years to make a thorough study of underground waters. The Government is anxious to give assistance in the matter of obtaining water for irrigation purposes from wells and Meinser believes that from investigations thus far made that many communities in the Sacramento Valley will before long get their chief water supply from wells and underground currents.

GEOLOGICAL DISCOVERIES ON THE ISTHMUS.

Amid the material of a dry geological statement given by Donald McDonald, the geologist, to the Canal Commission in the course of an article in the Engineering Record, glints matter that fixes the imagination. He remarks with respect to the Culebra cut slides that these slides never imperiled in the least the undertaking, that they will not do so in the future, that aside from adding to the cost of the enterprise they played no serious part in the work. The observation that is of imaginative interest in this connection is the statement that the fossils found in the excavations and in the material that make up the slides show that the Atlantic and Pacific oceans were once united and that the new ditch will bring together again the once wedded oceans.

The United States cannot move a point toward the recreation of the fabled Atlantic long submerged according to tradition, but it can do very much toward governing the work of geofogical formation in the region in the future, provided only that the cut now made shall last, as the engineer declares it will, for ages hence.

A long work or rock building during the geological ages has been undone in a few years by man, and the work of restoration of the former conditions of interflow of the oceans has been brought about in salutary form. Baltimore American.

TO ERECT MUNICIPAL PAVING PLANT.

CHICO (Butte Co.), September 11.—Trustee A. G. Eames is authority for the statement that the city will probably invest in a paving plant before further paving is done on the residence streets, with possibly the exception of the work on First Street. Eames says that municipal ownership of the plant and the use of lighter asphalt would materially reduce the cost of paving.

STEEL GALENA BOULDERS FOR GREAT EXPOSITION.

RENO (Nev.), September 11.—Edwin Arkell, President of the Nevada United Mines Company of Wedekind, has three large steel galena boulders weighing three and one-half tons, which he intends to send to the Panama-Pacific Exposition to be exhibited. The boulders are on the 135-foot level of the mine and are beautiful in their native state. Arkell is now trying to evolve a method of having them removed to the surface without destroying them.

The Sacramento Bee reviews the story of Abraham Ruef told in last Wednesday's Bulletin. In it he gives the particulars of the trolley bribe and tells how the money was telegraphed to the San Francisco mint by Calhoun and how it was changed from gold to currency by Tirey L. Ford in $50,000 installments and paid to Ruef in the car barns at Oak and Broderick streets. The Bee asks, as thousands of other people are asking, "How can Tirey L. Ford remain on the Board of Prison Directors?"

Ruef's story simply corroborates what was proved at the trial although the jury found that the evidence did not connect Ford with the crime. Ford has many friends and most of them look upon him as a good man that is the victim of circumstances and environment.

He should have resigned from the Prison Board before this. But certainly it is the quintessence of gall to stay on the board in the face of this public confession when all the facts of the transaction are so patent to everyone.

It is a vicious system indeed when the public conscience is so calloused that it condones such acts of bribery and puts a man as prison director over men who are serving time for less crimes than the prison director himself is said to have committed. And it is a sad state of things indeed where a man of the ability and standing of Tirey L. Ford can say that is a part of his job to do such work as that and that he must do it to earn a living.

Many a man who is working in the streets could not be bribed to do such work. If bribery is part of a man's job he had better change his job. At any rate Ford could have made a living outside of the employ of the United Railroads. The fact that such a man is said to have done such work shows how common is the crime and how the matter is looked upon by the public service corporations generally.

What idea must the youth of the land have of the equality of the law when one man convicted of a crime of stealing $50 is wearing stripes while a man accused, in a public confession, of giving a bribe of $200,000 is a prison director over him?

The Contractors' and Dealers' Association starts its work to put into practical operation their ideas with the first of this month here in San Francisco. The organization is already effective in Sacramento and it shows to some extent what can be effected by the organization. If it can enforce the living up to contracts and the payment of bills it will have effected more for the uplift of the building business than anything has done. And there is no reason in the world why it can not. All it needs is effective organization.

If an important creditor in the building business should fail, how many specialty contractors and material dealers would he drag into bankruptcy with him? This can and will be prevented by the organization. Stability and fair conditions are the greatest assets to any kind of business. This can be effected through the Contractors' and Dealers' organization. It is the only way that such conditions can be brought about. There is no other way of getting rid of the charlatan who drags the business in the mire or of preventing peddling of bids and the manifold evils that the responsible man in the business has to bear.

Business for August has generally been rather slack. The end of a vacation season in a presidential year usually marks the lowest ebb in the financial and business tide. The month marks the maturing period of agricultural crops and the transition period from one season to another. Building operations kept up as well as could be expected, the total for the month reaching $1,797,408 as against $2,217,215 for July and $2,058,224 for June. At that it showed a slight increase over the same month last year, the total for August 1911 being $1,686,518.

Of the $1,797,408, $857,228 was for fireproof construction, $697,670 for frame buildings and $242,510 came under the head of additions and alterations. Since the first of January the record is as follows:

January	$1,692,810
February	1,696,232
March	2,146,011
April	3,435,334
May	3,153,910
June	2,058,224
July	2,217,215
August	1,797,408

While the month shows a total of something less than 2 million dollars the average for the year is still more than 2 millions per month. Compared with other years the August record is as follows:

1903	$1,034,489
1904	1,565,568
1905	1,579,514
1906	5,640,508
1907	4,030,887
1908	2,597,110
1909	2,588,723
1910	1,743,357
1911	1,686,518
1912	1,797,408

Compared with other years the month has been about normal. Until November business can be expected to be generally quiet. At that San Francisco looks as good as anywhere else and probably a little bit better.

Willis Polk says the actual work on the exposition will begin in four months. That it will be completed by February 1915 and will be a marvel of beauty and elegance. All of which is interesting and encouraging news and what the people want to hear. It is reported that the chief architect expressed a certain degree of impatience at the people for clamoring to know what is being done and said that they must all be from Missouri.

This is perhaps true. The Fair Directors should remember, however, that outside of the 7½ million dollars subscribed the people of the city have voted 5 millions of bonds and the State 5 million more. Every citizen has an interest in the exposition therefore and there are a lot of things that could be done. The Fair Directors may be the wisest people in the world, but they are only trustees of the peoples' money and there is no good reason why the people should not want to know how

things are going. It is encouraging to learn that the exposition will be completed on time. If it is it will be about the first one on record. There are many unexpected things likely to happen in any enterprise and an early start will hurt no one.

The selection of M. M. O'Shaughnessy as City Engineer seems a wise choice. He is paid a salary commensurate with his reputation and is a man capable and competent to handle the big problems of the city's needs.

Mr. O'Shaughnessy's reputation for ability and integrity is good. He comes to the office without recommendation save these. It is hoped that he will handle the Hetch-Hetchy problem in such a manner as the city will get, at the earliest possible rate, a water supply that is the most essential element of its growth.

The Board of Supervisors have passed to print a declaratory ordinance setting forth their intention to take steps toward the acquisition of a municipal telephone system. It also directs the Board of Public Works to procure through the City Engineer plans and estimates for the cost of constructing such a system. This is a step in the right direction and in accordance with the expressed will of the people. The present telephone service is something to be improved upon. The transfer of the properties of the Home Telephone Company to the Pacific States is in open violation of all their expressed contracts. This transfer should be set aside and immediate action begun to see that this transfer is not consummated. If the Pacific Telephone Company is to remain in possession of the property through lawsuits, appeals and continuances to the Supreme Court the present generation is likely to die of old age before anything is effected. And in the meantime it is not likely to increase popular respect for the majesty of the law or the dignity of courts of justice.

The California Federation of Womens' Clubs have requested the State Highway Commission to use its influence to prevent the new state highway from being defaced by billboards. Advertising has been reduced to an art and in many cases a nuisance. All kinds of billboards and placards greet the eye whenever one travels, on land or sea or even in the air. Patent medicines are advertised from kites. Cigars on line of travel on the bay. Favorite brands of overalls and suspenders and whiskey are printed on the cliffs and trees all over the land and nowhere where the public travels to any extent are the virgin beauties of nature left without the insistent placard of commercialism. This may be good business for the advertiser, but it is an unmitigated nuisance to the public.

The Highway Commission has answered the request by stating that it will do all it can to lessen the nuisance. The agitation being made is likely to result in good and in the confining of advertising bill boards to certain bounds. In Missouri certain classes of advertising are declared a nuisance by law. This seems to be the only effective way of stopping the objectionable features.

According to the Chronicle and Call Tom Finn is about the whole Progressive party. We may look to see him supplant Johnson and Roosevelt in the news columns of these papers. It is just as cheap to manufacture stories about him as anybody else, so give the newspaper men a chance.

It is somewhat amusing to read the great headlines in the Call on the day of the primary election and then read the returns the next day. After all some of the people have some sense and if they read the papers have the ability and the gumption to vote for what they believe to be right.

The political cartoonist comes forward again with the old picture of the full dinner pail represented by the face of President Taft which has something of the dimensions of the President's corpulent surcingle. How old is this dodger for political effect and what an empty and debasing motive it appeals to. Never do the old partisans appeal to the dignity of labor, to the problem of equal opportunity and chance to get ahead by virtue of merit, but it is always something to be handed out by a gracious superior power who will fill the dinner pail and bring about prosperity. So this motive has ever been appealed to. And this prosperity that is promised depends always upon the prosperity of big business and whether or not it is in control. And if the people should dare to assert their own rights in the matter why big business would withdraw its generous support and the dinner pail would be empty.

This has always been the contention whenever there has been an agitation for revision of the tariff downward or any attempt to inquire into the money control. So a great many people are swayed by self interest to vote for things that are against the public welfare and can promise no ultimate good.

Any permanent prosperity must be based on justice and correct economic principles. No one recognized this better than the great Lincoln, who in the troublous times of the civil war was beset by the committees from the financiers who had schemes to keep up the credit of the country and save the nation. Invariably he saw through all these temporary measures and turned them aside with some humorous story or homely illustration.

Prosperity to be lasting must be universal. It depends upon every one getting an equal chance and not upon the whim of any man or set of men investing their capital or doing any particular thing. The high tariff and the full dinner pail talk of those who have fattened off the proceeds of the tariff and have gobbled the industries of the country through their control of the monetary situation does not go any longer. The time has come when the people see that prosperity depends upon other basis than the promise of political bosses and the directors of big business.

It is always unsafe for the contemporaries of any man to predict the place which history will give him. Yet there are a few men who at the time of their death leave work so vast and so important and on so firm a foundation that their fame seems assured. Such were Washington, and Lincoln, and Cromwell, and Bismarck, and John Wesley.

Such, it seems to us, is William Booth, who died recently. Nothing is lacking by which accurately to judge his stature, except the perspective of years. And even this has been partially supplied by his long service of humanity and the monumental works which he has reared.

Our judgment may be wrong. But we believe that when the future historian comes to write his volume covering our time he will place William Booth in the front rank of its great men.

Measured by individual character, by originality of thought, by daring in design, by courage against great odds, by indifference to the most deadly kind of attack, and by his passion for humanity, William Booth was a towering figure.—Philadelphia North American.

The death of General Nogi and his wife by their own hands at the funeral of the late Emperor of Japan shows the virile patriotism of the Japanese people. General Nogi had been a brave and skillful general and had won renown in the Russo Japanese war. His ability had placed him among the world's great soldiers. He had honor and wealth and official position and all the environments of life to make him happy in his age. Yet when his emperor was called agreebly to the ancient customs of his race he plunged the fatal dagger into his vitals and deported with the ruler whom he had faithfully served.

It is this virile patriotism that makes the Japanese soldier what he is. It is this that made him so superior to the Russian who is ruled by a Czar whom many fear but few love and whose government is controlled by nobles who plunder the people without any regard.

It is worthy of comment that the old customs of the Samurai still survive in this day and age of the world. When so able and learned a man as General Nogi and his devoted wife are willing and ready to give up their lives as the last full measure of devotion to their emperor and the traditions of their country.

The Call has an editorial entitled "Johnson's Intemperate Language, The Shame of California." If any body could convey an adequate idea of the moral rottenness of the newspapers of California, such as the Call and the Post and the Los Angeles Times and use temperate language he would certainly have Shakespeare backed off the map as a word painter.

The great strength of Governor Johnson with the people is that he tells the truth and calls a spade a spade. When people listen to him they realize that he is in earnest and that he is telling the truth. As a result they support him and are willing to follow where he leads in spite of all the mud that is thrown and lies that are printed in the papers.

And in this regard there has been a discussion going on between the San Diego Union and the Sacramento Bee as to whether Hiram W. Johnson is an orator as compared to Samuel M. Shortridge, the writer in the Union having it that the wordy Sam is the classical model and such men as Roosevelt and Johnson stole in their commonplace appeals to the multitude.

McClathey contends that Shortridge is not and never was an orator and in support of his claim that Johnson and Roosevelt both possess qualities that Shortridge does not quotes the following from Daniel Webster:

"When public bodies are to be addressed on momentous occasions, when great interests are at stake, and strong passions excited, nothing is valuable in speech further than it is connected with high intellectual and moral endowments. Clearness, force, and earnestness are the qualities which produce conviction. True eloquence, indeed, does not consist in speech. It cannot be brought from far. Labor and learning may toil for it, but they will toil in vain. Words and phrases may be marchaled in every way, but they cannot compass it. It must exist in the man, in the subject, and in the occasion.

Affected passion, intense expression, the pomp of declamation, all may aspire after it; they cannot reach it. It comes, if it comes at all, like the outbreaking of a fountain from the earth, or the bursting forth of volcanic fires, with spontaneous, original, native force.

The graces taught in the schools, the cistly ornaments and studied contrivances of speech, shock and disgust men, when their own lives, and the fate of their wives, their children, and their country, hang on the decision of the hour. Then, words have lost their power, rhetoric is vain, and all elaborate oratory contemptible. Even genius itself then feels rebuked and subdued, as in the presence of higher qualities. Then, patriotism is eloquent, then self-devotion is eloquent.

The clearer conception, outrunning the deductions of logic, the high purpose, the firm resolve, the dauntless spirit, speaking on the tongue, beaming from the eye, informing every feature, urging the whole man onward, right onward, to his object this, this is eloquence; or, rather, it is something greater and higher than all eloquence—it is action, noble, sublime, godlike action."

Johnson is a man who speaks from the heart in words that are easily understandable. He moves, controls and converts his audiences. His language is not a shame to California, but he has published the shame of the newspapers that have so unshamedly served everybody but the public they should serve.

Sixty-two years have elapsed since California became a state of the Union. The Golden State has had a romantic history. Named after the heroine of an old Andalusian romance, the name and the country has been an attraction to the world for three hundred years. The early fathers of the church saw here a field to plant missions and convert the heathen. Since the days of Cortez in Mexico the land has been a place where gold was to be found, a fabled somewhere in which existed the Seven Cities of Cibola or the land of Sulvera wherein the cities were paved with gold. The discovery of gold in 1848 transformed the land into a real El Dorado and since then the great Sierras have poured their yellow treasure into the mints of the world.

Not alone does the state deseve its title of Golden from the precious metal of its mines. The land itself, its scenery, its colors, and its sky are the conceptions which an artist might create as an imaginary golden land. And its fields of grain, its orchards and vines and tree gardens which yearly and daily send out to all the world the fruits and products that are distinctly Californian impress the world with the merit of the title of the Golden State. It is exemplified in the golden poppy, the state flower. It is reflected in every scene of the painter's canvas that transcribes the glories of the High Sierras or reflects the iridescent blue of the greatest ocean of the world.

The Panama canal will open a new highway to this land. It will bring the world of trade and ocean travel to this western shore and be the final link in connecting the state with the world. September 9 1915, will mark the sixty-fifth birthday of California. It will also mark the beginning of commerce on the western coast as a port and point of trade for all the world.

The report of the State Commission of California shows that there were more than 8 thousand industrial accidents during the year 1911. According to the American delegate to the International of Accident Prevention and Industrial Hygiene at Milan, half of these accidents that occur in factories can be prevented by the adoption of safety devices. In Wisconsin, where an Employer's Liability and Industrial Insurance act similar to our own is in force, the accidents reported for the last year amounted to a little more than 5 thousand. This is the result of the installation of safety devices and has minimized the number by about one-third.

The Employer's Liability Act has done more than anything else to bring about the adoption of safety appliances by forcing every body to the same level.

Otherwise the safety device, if it costs anything, is the last thing the big employer will install. Nothing but a congressional statute and a decision of the Supreme Court could force the railroads to equip their cars with safety coupling although the number of employes maimed each year was enormous. Had there been an Employer's Liability Act in effect on them doing away with technical legal defenses they would have installed the safety couping of their own accord.

The State Commission has received many inquiries from employers as to the best kind of safety appliance to install. With ordinary care in this direction a reduction of the total of deaths and serious accidents will be made which will lessen the appalling number revealed by the table of vital statistics.

THE POLITICAL SITUATION.

Statement of The Progressives As To The Electoral Ticket.

SACRAMENTO, Cal., Sept. 10, 1912.

On September 3rd the Republicans of California nominated candidates for the legislature. The election was a plain test of strength between Roosevelt and Taft as the legislative nominees will compose the convention which will select the 13 Republican presidential electors, at the convention to be held in Sacramento September 24th.

As a result of the election about 107 out of the 120 legislative nominees who will sit in the convention will vote for electors favorable to Roosevelt. The remaining 13 are for Taft.

Thus by a vote of 9 to 1 the Republicans of California have directed that the stolen nomination of Taft be repudiated and that Roosevelt be reendorsed as the Candidate of the Republican party of California.

The self-respecting conservatives who favored Taft prior to the election have accepted the verdict. Not so, however, with the other element. A has been formulated whereby the 13 Taft men in the convention will demand that the 107 repudiated the instruction of the people of California and bow to the will of the mal-odorous Republican National Convention which met in Chicago.

Of course the 107 nominees pledged by the people to Roosevelt will laugh at the 13 Taft immortelles, and then will come the big demonstration. The famous 13 will leave the convention, led by little Eddie Wolfe, Attorney for the Emeryville race track, and adjourn to a nice quiet nook where they will solemenly declare themselves the real Republicans of California and nominate 13 electors favorable to Taft. They will then ask the courts to declare them the real Republican nominees and will ask that the electors chosen by the people's convention be thrown out.

This scheme has the endorsement of John D. Spreckels, Patrick Calhoun, M. H. De Young and, Harrison Grey Otis, and these four millionaires are supplying the money to put it through.

Editorial Comment.

[illegible] estimated by mining engineers [illegible] of the Geological Survey [illegible] area of coal deposits in [illegible] California amounts to 500 square miles. The original coal content of this area being approximately [illegible] short tons and the total coal production in the State since it was opened has been over 5 million tons. This is a revelation to most of us as few of us knew of any coal mines of any size in the State or that any coal had ever been worked to any appreciable extent.

Announcement has been made during the past week that work is to be resumed at the Herr coal mine at Sweet, in Siskiyou county. Twenty men are to be put to work and it is reasonably supposed that it will be made a paying proposition. Some four years ago coal was discovered in Stone Canyon in Monterey county, which is said to be a good grade of bituminous coal. So also there has been development of coal mines near Ione in Amador county.

The records of the State Mining Bureau show a coal production as far back as 1861. At that period California coal is one of the sixteen coal producing states. The period of maximum production was in 1880 when the output of that year amounted to 500,000 tons. Since that time the production has been irregular because of the imported coal from Australia, Japan, China, and the State of Washington. Still the coal mines in Utah, New Mexico and Wyoming have taken advantage of freight rates and advantage given to the long haul by the railroad companies.

We are hearing of these coal mines [illegible] the fact that aside from [illegible] supply of fuel oil, California [illegible] appreciable quantity [illegible] and it is a distinct asset [illegible] to settle transportation [illegible] developed into an important [illegible] industries.

[illegible] of Streets of the [illegible] is recommended [illegible] a building [illegible] is used to insure the [illegible] to its former [illegible] The [illegible] recommendation [illegible] make every one [illegible] respect. So also would some definite regulation in regard to the [illegible] street. Of [illegible] have some place [illegible] it be it using [illegible] of the street [illegible] purpose. But [illegible] regulate in [illegible] builder should [illegible] [illegible] the side walks by shippers should be regulated. It is distinctly remembered that before the fire on Sansome street and the wholesale districts the sidewalks were impassable about nine-tenths of the time because of the dry goods boxes piled there. And yet these very merchants who were offending were the first to kick if a contractor dumped a load of sand in the gutter prepartory to using a mixed mortor in a box near the sidewalk. Keep the sidewalks and streets as clean as possible and let there be uniform regulations that apply to all with equal force.

Commercial buildings in the cities of this country are taking on more graceful architectural lines and beauty is becoming an asset of construction that is now a factor in building that is being brought about by the movement for the city beautiful.

Pictures of the detail of the cornice of the Woolworth Building, now in course of construction in New York City, show lines of rare beauty and grace. The building as a whole is a monument to its builder and is one of the most artistic in the great metropolis.

Thirty years ago commercial buildings were put up with a view chiefly to secure a certain amount of space protected from the weather. As a result buildings were constructed with no idea of the fire hazard or their fittings into their surroundings. The main idea was the bare utilities and the idea of getting the greatest interest on the investment. The next step was toward more substantial structures, reducing the fire hazard and providing better light and sanitation.

Our building laws now provide for these requisites in all buildings whether they be tenement houses, factory buildings, or office structures. We are now beginning to realize that there is an actual monetary profit in an architecturally beautiful structure. That grace and beauty in architecture is a positive asset and that it goes hand in hand with permanent construction. And that money expended in proper ornamentation is well spent. Europe long ago learned this lesson. In all large cities of the Continent one is not permitted to erect a building which will prove a disfigurement to surrounding structures or to the symmetry of the street on which it fronts. With the development of city planning we are coming to this idea of symmetry of the city as a whole and the harmonizing of the architectural idea of the buildings that front on the principal streets.

The counter offer of the Spring Valley Water Company to sell its holdings for $28,500,000 and receive some six blocks of land seems to be another [illegible] of angling the proposition and [illegible] the game.

Perhaps a condemnation suit or some action of that sort will be the only method to get the property after all. It would be a good thing to start the proceeding anyway and if opportunity offers for the purchase the suit can be dismissed. If this dickering continues it for drinking water before many years.

In meeting the conditions that confronted him on taking office as Governor of the State of California, one of the first and most effective measures that was passed by the Legislature was the bill creating the Board of Control. Prior to that time the State Board of Examiners, which audited all claims of the state, consisted of the Governor, the Attorney General and the Secretary of State. These officials were all more than busy with their own official duties and the result was that each department bought its own supplies, and conducted its own affairs with practically no auditing or supervision being done and the business of the State Board of Examiners was conducted practically by its Secretary. The expense of the Board of Examiners was $21,000 a year. The yearly expense of the new Board of Control is $10,000.

The law empowered the Board of Control, composed of three members, to exercise a general supervision over the business and financial affairs of the State, and contained a provision that no contract with the State of California was binding unless it first had the approval of this body. These were the principals of the powers granted the Board and to aid it in the work of putting the State's business on a proper basis the law provided for a department of accounting to operate under its direction.

One of the first acts of the Board was to request every Chamber of Commerce to give its members and for the states business. These commercial bodies were notified that they had a right to appeal to the Board of Control if they felt aggrieved at the action of the head of any local institution. The result was immediate. Instead of the ring of four or five contractors who had divided up the state's business there were forty or fifty bidders.

The actual saving to the State by the reviving of competition for the States business aggregating approximately $6,000,000 a year and by the introduction of the proceeding system as been, at a conservative estimate, not less than $500,000 annually.

Irregularities and graft were soon found in the State printing office, the Napa State Hospital, the State Board of Optometry and nearly every State institution. The investigations that have been made and are now going made have saved the state millions of dollars. Modern accounting systems have been installed and the business of the state reduced to a business basis.

For the first time in the history of the State the Board of Control has introduced the idea of civil service. Positions in the auditing department have been filled by competitive examination. So that there is competent men in the department and the affairs of the state are looked after in a competent manner.

The Board of Control cost the tax payers $10,000 a year. Conservatively estimated it saves the state $1,000,000 a year. This may be a reason why there are so many newspaper attacks on the Board. Behind the water front, why the Call charges that some of the inmates of the Napa State Hospital are underfed and why some of the commissions are attacked by the beneficiaries under the old order of things.

The settlement of new territory brings it into the worlds news. Not long since a tornado was reported from Northwestern Canada that wrecked the strongest buildings of Regina, a prosperous town in Saskatchewan. Until the place became settled and cities were built the ravages of tornadoes were unknown because unreported. We have a little earthquake now and then in California but if the total of the years be added up it will no doubt be found that wind and flood and lightning and other ravages of our own states otherwise the damages that are wrought by the zephyrs that now lounge in the city will be up against sometimes visit us.

The American farmer as most of the comforts of his city brethern. The telephone places him within immediate communication with everyone in any business with whom he may have dealings and the rural delivery brings his daily paper to his door. Labor saving machinery has relieved farm work of most of its drudgery and country building is made a pleasant and healthful occupation. Announcements is now made that Thomas A. Edison is putting up a home in Llewellyn Park New Jersey, with an independent electric lighting plant and a complete equipment of electrical apparatus. The purpose of this house is to demonstrate the advantages of electricity to the farmer who is so isolated that he cannot obtain electric power from a central station. This house is now practically complete and will be open soon to the public. The current is generated by a gas gasoline engine which drives a dynamo and the latter is run slowly to operate a battery of storage cells. The portable power plant is then used for the multiplied needs of central, so that the operation of a selected absolutely hand-proof and may be operated by inexperienced hands.

This application of the use of the new storage battery gives to the farmer the use of electricity for lighting purposes for nominal cost. Where power is not available for perfection of the gas engine or the use of the windmill for power purposes can well be applied to storing up light and power. So that in the not far distant future we may look to see the prosperous farmer stand as near independent as anyone in life. The source of food supply raised from the ground, a power and irrigation plant of his own and the means of existence within his own dominion.

Life insurance will become a government monopoly in Italy on the beginning of the new year. Foreign companies operating there will have a grace of sixty days in which to liquidate their business. A number of governments have created monopolies of insurance and Italy is generally said that in manner is a business peculiarly fitted for Government direction.

It would be interesting to see what kind of protests would arise in this country if Life Insurance was proposed to be a government monopoly. The control of the money trust is based chiefly on the control of the Life Insurance companies. No matter how much money the magnates may have they must have the people paying it back to them all the time. This they do in the Life Insurance game. When the big scandal about the corrupt use of funds in the big companies in New York occurred, Thos. F. Ryan was placed in control. What would happen if these big companies were taken over by the government and these powers behind the throne deposed? The government would then control the monetary situation to a great degree and in panics like 1907 J. Pierpont Morgan and John D. Rockerfeller would not have to be appealed to to save the day.

Industrial insurance and state accident insurance is a step in this direction. It is socialistic in its tendencies, but it places responsibility where it belongs and provides for the people which, is the only asset a government has, in fact is the government itself.

In the current number of Sunset contains a descriptive article on the Roosevelt road, which is a description of the scenic marvels of the roadway up the Salt River canyon in Arizona to the Roosevelt Dam. There in the midst of the desert is the greatest of the engineering projects of the Reclamation service. There is perhaps the greatest completed single work of irrigation engineering that was undertaken during Roosevelt's term of office and the dam which holds back the waters of the great reservoir has been given his name. In the rocky walls of the great canyon the water had eroded a natural reservoir. All that remained to be done was to dam the outlet. This was too great an undertaking for private capital. The United States government has there stored up an immense lake of water which is used in the reclamation of the lands of the Salt River Valley and territory that was theretofore arid now blossoms like the rose. There are other great fields for irrigation in the desert lands. The Colorado river flows through thousands of square miles of country that is as fertile as any under the sun. If its waters could be used for irrigation much of the land that is now barren would be productive and be reclaimed to the uses of man. The policy of conservation and reclamation that received its active impulse under Roosevelt is likely to result in much good to the farmer and reclaim lands that were hitherto thought to be irreclaimable.

It seems that hereafter negro lawyers are not to be admitted into membership in the National Bar Association.

Well, causes William Marion Reedy to remark that there is no bar in that association against lawyers who show rich clients how to evade laws made to protect The People. A black skin will keep a lawyer out, but a black heart won't.—Sacramento Bee

Railroad Standards For Concrete Aggregates

Concrete knows no rest, all concrete aggregates to be used, whether for ... work made by ... should be ... engineering.

Wood and steel and stone, we have ... but for some reason or other concrete ... understanding of what constitutes safe aggregate and a ... test should be adopted and included in the specifications.

The National Association of Cement Users is now investigating this problem through its Committee on Specifications and Methods of Tests for Concrete Material. This committee desires ... samples of ... aggregates ... can be found until a practice ... all field and laboratory data and specifications is desired. Address Chas. M. Chapman, care Western ... Co., Kerr & Co., 10 Bridge street, New York.

A new requirement or specification which all cement used by the Delaware, Lackawanna & Western Railroad ... is as follows:

Portland cement shall ... not less than 90 per cent ... a fineness ... sieve of 75 per cent as ... Standard specifications of American Society of Testing Materials ... shall remain sound after ... subjected to ... atmospheres for a period of 2 ... in accordance with ... Autoclave test ... under pressure.

The reason for ... radical requirement ... that ... not ... the ... of distant ... the ... Lackawanna ... included ... Portland ... Vermont ... Portland ... cold ... and ... cold ... cement ... cold ... cement ... cold ... cement

ville, to a point on Bear Creek 3 miles south of Newmire. The deposits occur on both sides of Leopard Creek extending with short interruptions to the valley of the river, thence they follow the river irregularly to a point north of Sawpit. Some deposits occur on the east side of Fall Creek, extending for a distance of about a mile above the mouth, and others are found on the south side of San Miguel River for a mile or more above Fall Creek. In thickness the deposits range from 1 or 2 inches to over 30 feet. From present developments probably only a few thousands tons of ore carrying over 4 per cent of vanadium can be mined profitably, but there are many thousands of tons of vanadium-bearing sandstone which will show between 1 and 2 per cent of metallic vanadium and much more running between 0.5 and 1 per cent. Sufficient ore has been mined in this area and to a less extent in the carnotite fields 10 or 50 miles to the west to cause the price to be reduced in the last three or four years from $5 a pound of metallic vanadium in ferrovanadium to $2.50 or less. The most seriously competing deposits are those of vanadium sulphate at Minasragra, Peru.

The Utah deposits described by Mr. Hess are on the east side of the San Rafael Swell, at a locality marked on some maps as Tidwell, about 15 miles south and west of Green River. These south and west of Green River. These deposits, which were visited by Mr. Hess in July, 1911, are now being actively worked. The mineral mined is carnotite, a vanadium and uranium bearing mineral which impregnates a coarse friable sandstone.

The Stella de los Caballos lies along the east side of the Rio Grande in New Mexico and reaches a maximum height of 1000 feet at Turret Hill south of the vanadium deposits. The vanadium-bearing mineral at this place is vanadinite, a lead vanadate. The vanadium content of the ore has been estimated to be from a fraction of 1 per cent to 3 per cent, but the latter figure is probably much too high.

NEARLY FIVE MILLION DOLLARS.

The value of the brick, tile, terra cotta pottery and various other clay products made in California in 1911, according to the United States Geological Survey, was $4,911,500. This is an increase of $73,115 over the figures for 1910.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reprinted under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco.—Apartment house, 3 story and base, frame, $18,000. Architect, none. Owners, E. J. and W. J. Keenan, 300 Webster St., S. F. The building is to be erected at the southeast corner of Page and Pierce streets and will cover land area of 31x81 feet. There will be 18 apartments of 1 to 2 and 3 room type. All interiors will be finished in pine with some oak floors. There will be wall bed and steam heat. All apartments will have connecting baths. The exterior of the building will be covered with sawlap and brick veneer. Plans are in the hands of the owners and the work will be done by Day Labor.

San Francisco.—Apartment house, 3 story and base, brick and steel, $20,000. Architect, William Bourn, 127 Montgomery St., S. F. Owner's name withheld. Preliminary sketches only have been prepared for this building and complete particulars will not be available for sometime. At present the floor plans are laid out for 1 to 3 room apartments, all of which will have connecting baths. There will be steam heat and wall beds. The exterior will probably be faced with cement pebble. Plans are being prepared.

Stockton, San Joaquin Co., Cal.—Apartment house, 3 story and base, brick and steel, $50,000. Architect, Glenn Allen, 1298 Golden Gate Ave., S. F. Owner, Samuel Henry. This work has been mentioned once before. The architect has awarded contracts for foundation work to Lee Cole. Fireproofing, Cole brick work to Lee Casement to Cowell of Stockton, and for the steel to the Ralston Iron Works. He is now taking figures for the entire structure. The building will be the most modern apartment house structure in Stockton.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architects, M. S. Yeager & Co., Trust & Savings Bldg., L. A. Owner, H. W. Soules. The building will be arranged to contain 120 rooms with bath, all of steel and two and three room suites will have sleeping cabs and disappearing beds. There will be pine and redwood finish, finish, steam heat, vacuum cleaning system and electric service. Some of the suites will have telephone service. Flooring in the corridors will be tiled and the exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

San Francisco.—Apartment house, 3 story and base, brick and steel, $50,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, Tacoma Realty Co., Tacoma, Wash. The building will be erected at the northeast corner of Pine and Jones streets and will contain in the neighborhood of 31 apartments. These will be arranged in suites of three and four with cafes. There will be steam heat, wall beds, a vacuum cleaning system and elevator service. Interiors will be finished in pine and redwood. Composition tile floor ing will be used. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Oakland, Cal.—Apartments, 3 story and base, frame, $20,000. Architect, C. W. Meyer, Central Bank Bldg. Owner's name withheld. The building will be erected on the lake front. Mr. Meyer has also completed plans for a 40 room, 3 story frame apartment of two and three rooms each with bath. The interior trim will be oak, pine, redwood and oak. There will be steam heat, private baths, wall beds and other modern features. The exterior of the building will be covered with cement plaster on metal lath. Plans are now out for figures.

Los Angeles, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, Frank M. Tyler, Hibernian Bldg., L. A. Owner, C. E. Mooney. The building will contain 43 rooms, which will be arranged in two and three room apartments with private cabs, wall and disappearing beds. The interior of all apartments will be finished in pine and redwood with some oak floors. There will be steam heat and a vacuum cleaning system. The exterior of the building will be covered with metal lath and plaster. Plans are now being prepared.

Los Angeles, Cal.—Apartment house, 3 story and base, frame, $27,000. Architect, T. Beverley Kenn, Jr., Title Ins. Bldg., L. A. Owner, W. Deelez. This building has been designed to contain 70 rooms, which will be arranged in suites of two and three rooms each with baths. There will be steam heat and running hot and cold water. The interior finish will be of pine and redwood with some oak floors. Composition flooring will be used in the bath rooms. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

Ocean Park, Los Angeles Co., Cal.—Apartment house, 4 story and base, brick, $40,000. Architects, E. H. MacGibbon & Co., Union Oil Bldg., L. A. Owner, L. B. Byrne. The building will cover an area of 60x93 feet. The first floor has been arranged for three stores. There will be 56 rooms on the upper floors, which will be arranged in two and three room suites. There will be steam heat and open fire places. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures are to be taken at once.

Contracts Awarded.

Los Angeles, Cal.—Apartment house, 4 story and base, brick and steel, $60,000. Architects, Edelman & Barnett, Blanchard Bldg., L. A. Owner, Herman Cohn. Contractor, J. L. Hartzell, 1981 Lansdale Ave., L. A. Contract price, $30,000. Note: This contract does not include the plumbing painting, electric work, steam heatng, elevators, wall beds or fixtures.

BRIDGES AND DAMS.

Ventura County, Cal. — Bridges, frame and concrete, $29,510. Engineer, County Engineer, Ventura. Owners, Ventura County. After spending over $2,000,000 for bridge construction during the past year, there still remains the following bridge work to be done in Ventura County:

	Estimated Cost
Sun bridge	$6,000.00
Barlow bridge	800.00
Santa culvert	8,000.00
Tapo bridge	2,890.00
Santa Susana	6,500.00
Borchard	800.00
Crowley culvert	1,050.00
Conejo Valley (7 culverts)	2,500.00

CHURCHES.

San Francisco.—Church, Class A construction, $150,000. Architects, Shea &

Lotquist, Bank of Italy Bldg., S. F. Owners, Mission Dolores. Plans for a new and modern edifice which is to occupy the corner of the lot on which the old historic Mission Dolores has stood for so many years are nearing completion. The old mission house will be allowed to remain on its present site, while the new building will occupy a much larger portion of the corner of 16th and Dolores streets. Construction will be of reinforced concrete and steel. Plans for the excavating and foundation work will be out for figures within a few days.

Santa Cruz, Santa Cruz Co., Cal.—Church, 1 story and base, frame, $25,000. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, Santa Cruz Methodist Church. The building will be designed in the Mission style with a large bell tower. There will be furnace heat. Besides the main auditorium there will be Sunday school rooms, pastor's study and parlors. The auditorium will have a seating capacity of about 600 people. The interior will be finshed in pine. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

Long Beach, Los Angeles Co., Cal.—Church, 1 story and base, brick, $18,500. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owners, First Church of Christ, Scientist. The architect has just been commissioned to prepare these plans, and none of the details of the construction can be given at this time. Working drawings are now being prepared. Full particulars will be given as the plans progress.

FACTORIES & WAREHOUSES.

San Francisco—Warehouse, 1 story and base, brick and steel, $10,000. Architects, Righetti & Headman, Phelan Bldg., S. F. Owner, M. Casey. The building will cover an area of 52x115 feet, and is to be erected on Bryant street. There will be a cement floor and metal sash and frames. Foundations and walls will be designed heavy enough to carry additional stories. The exterior of the building will be faced with stock brick. Plans are being prepared.

Los Angeles, Cal.—Warehouse, 1 story and base, reinforced concrete. Cost not stated. Architect, W. J. Saunders, International Bank Bldg., L. A. Owners, Sperry Flour Co. The building will be 67x109 feet and of fireproof construction throughout. There will be concrete and asphalt floors, fireproof doors, metal rolling shutters and metal sash and frames. The exterior of the building will be faced with cement plaster. Plans are being prepared.

North Yakima, Wash.—Warehouse, 3 story and base, reinforced concrete. Cost not stated. Architect, W. W. De Veaux, North Yakima. Owners Yakima Hardware Co. The building will be 60x120 feet. Construction will be fireproof throughout with metal sash and frames. There will be a freight elevator. First floor will be of concrete. The exterior of the building will be faced with cement plaster. Plans are complete and figures will be taken at once.

FIRE HOUSES AND JAILS.

Portland, Ore.—Jail, class A construction. Cost not stated. Architect, Emil Schacht & Son, Portland. Owner, City of Portland. Plans for the superstructure of the new City Jail have been completed and are now out for figures. There will be a complete steel frame and exterior walls of stone, steel frame and pressed brick. Separate heating and electric contracts will be let for the electric work, plumbing, cell work and interior finish.

FLATS.

San Francisco—Flats, 3 story and base, frame, $4,000. Architect, none. Owner, L. Costello, 237 14th St., S. F. The building has been designed to contain three modern flats of four and five rooms each. Interiors will be finished in pine and redwood. There will be modern bath room fixtures. Dressers will be built in, the sum of $50 being allowed. Tile will be used in the kitchens. The exterior of the house is to be covered with shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Flats 2, 2 story and base, frame, $7,500. Architect, Frank S. Holland, 100 Haight St., S. F. Owner, Charles Harkins. Each of these buildings will cover an area of 50x41 feet, and has been arranged for two stores on the first floor and two flats above. The interior will be finished in pine and redwood. There will be open fire places and tile antels. Some are glass will be used. The exteriors will be covered with shiplap and rustic. Plans are now being figured.

Oakland, Cal.—Flats, 2 story and base, frame, $3,000. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, R. W. Hocken. Plans provide for two modern flats, each of four rooms and bath. All interior trim will be either of pine or redwood. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Tile will be used in the bath rooms. The exterior of the building will be covered with cement plaster and shingles. Plans are complete and figures are being taken.

San Francisco—Flats, 3 story and base, frame, $20,000. Architect, Henry Shermund, Mills Bldg., S. F. Owner, Katharina Seipel. The building will have three street frontages and cover an area of 23½x120 feet. There will be two stores and an attractive entrance on the first floor. The upper two floors have been arranged for six flats of four, five and six rooms each. The interiors will be finished in pine redwood and elm. There will be open fire places and tile mantels. Considerable built-in furniture will be used. Oak floors are specified in the principal rooms. The exterior of the building will be covered with brick veneer and special run rustic. Plans are complete and figures are being taken.

San Francisco—Flats, 2 story and base, frame, $8,000. Architect, W. H. Crim, Humboldt Bank Bldg., S. F. Owner, J. P. Sweeney. The building has been arranged for stores and flats. There will be four and five room flats on the upper floor and a large store on the ground floor. The interior finish will be of pine. Some oak floors will be used. The exterior of the building will be covered with rustic. Plans are complete and figures are being taken.

Oakland, Cal.—Flat, 1 story and base, frame, $3,500. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owner, Mrs. M. I. Burley. The building has been designed for a store and one flat of five rooms in the rear. The interior finish will be of pine throughout. There will be an open fire place and a brick mantel. Modern plumbing will be installed. The exterior of the building will be covered with rustic. Plans are complete and figures are being taken.

San Francisco—Flats, 3 story and base, frame, $6,500. Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner's name withheld. The building will contain three flats of four and five rooms each with bath. The interior trim will be of pine throughout. Some oak floors will be used. There will be gas grates. The exterior of the building will be covered with shiplap. Plans are being prepared.

GARAGES.

San Francisco—Garage and sales rooms, 3 story and base, reinforced concrete, $80,000. Architect, John Galen Howard, 604 Mission St., S. F. Owners, Pierce-Arrow Motor Car Co. This building has been mentioned here before under another architect's name. The structure will be erected at the southwest corner of Larkin and Geary streets and is to have three street frontages. Construction will be fireproof throughout. There will be concrete floors, metal sash and frames and fireproof rolling doors. A steam heating system will be installed. The ground floor will be occupied by the general offices and display rooms. Shipping departments, storage space and repair department will be located on the upper floors. The interior of the sales rooms will be finished in hardwoods, marble and tile. The exterior of the building will be faced with cement plaster. Plans are being prepared.

Sacramento, Cal.—Garage, 1 story and base, brick and concrete, $15,000. Architect, E. C. Hemings, 1005 K St., Sacramento. Owner, Chauncey H. Dunn. This building will be erected at the corner of 14th and K streets and will cover a ground area of 80x80 feet. The entire structure will be occupied by an automobile firm. The front portion of the bulding will contain handsomely finished display rooms and offices. A commercial garage will occupy the rear portion. Plate glass store fronts will be used. The exterior will be faced with pressed brick. Plans are being prepared.

Los Angeles, Cal.—Garage, 2 story and base, reinforced concrete. Cost not stated. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owner, Miss L. R. Hawkes. All bids for this building, which has been mentioned here before, have been rejected, and the architects are now revising the plans. The structure is designed for a commercial garage and sales rooms and will cover an area of 100x165 feet. Revised plans will be out for figures shortly.

Seattle, Wash.—Garage, 3 story and base, reinforced concrete, $18,000. Architect, none. Owner, Mary Lachen, 1100 East Pike St., Seattle. The building will be 72x76 feet. Plans for the work are now in the hands of the owner, and she is taking figures on the

various parts of the work. The structure is designed for a commercial garage and has already been leased to a tenant. The exterior of the building will be faced with cement stucco.

GOVERNMENT WORK AND SUPPLIES.

Lighting System for Panama Locks.

Within a few days the Isthmian Canal Commission will issue an advertisement calling for bids to install completely the exterior and adjacent electric lighting system of all the Panama locks and adjacent grounds. The entire lighting system of the locks will be classified into three distinct groups: Exterior lighting, operating tunnel lighting, and machine room lighting. The exterior lighting is to illuminate both the approach of lock walls and the channel chamber between the walls. The interior illumination is to consist of the operating tunnels, and the machine room lighting as shown on the drawings furnished with the specifications.

The advertisement will call for bids to furnish the lighting material consisting of panel boards reflectors, outlet boxes, receptacles and tantalum lamps. The approximate quantities needed to carry out the objects of the specifications will be:

- 60 panel boards (3-circuit 110)
- 6 panel boards (6-circuit 110)
- 525 reflectors (exterior lamps)
- 2,100 reflectors (tunnel lamps)
- 5,000 reflectors (machine rooms)
- 525 outlet boxes (lamp standard)
- 800 switches.
- 525 receptacles (for lamp standard lighting).
- 525 receptacles (for lamp standard telephone).
- 100 receptacles (for portable lamps).
- 144 portable lamps.
- 525 lamp brackets (cast-iron).
- 1,050 reflectors (exterior lamps).
- 525 lamp brackets (cast-iron).

Puget Sound Navy Yard, Pier Work, Etc.

The contract for the construction of pier No. 1, removal of old pier No. 3 and dredging at the navy yard, Puget Sound, Wash., bids for which were opened July 29, has been awarded to the International Contract Co., Central Bldg., Seattle, Wash., at $134 for the new pier, $4 for removing old pier, and 25 cents per cubic yard for dredging.

Opening Postponed.

The date of the opening of bids at the bureau of yards and docks, Navy Department, Washington, D. C., for the electric lighting system at the navy yard, Puget Sound, Wash., has been postponed from September 7, 1911, to October 5.

Pearl Harbor, H. T., Storehouse.

The advertisement issued by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., August 6 calling for bids to be opened September 28 for the construction of a coaling storehouse at the naval station, Pearl Harbor, has been withdrawn. The plans and specifications are to be revised and an advertisement will be issued soon for bids for a number of smaller buildings of steel and corrugated iron.

Flats—3 story and base, frame, $4,000. San Francisco. Architect, none. Owner, L. Costello, 237 14th St., S. F. The building has been designed to contain three modern flats of four and five rooms each. Interiors will be finished in pine and redwood. There will be modern bath room fixtures. Dressers will be built in, the sum of $50 being allowed. Tile will be used in the kitchens. The exterior of the house is to be covered with shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

Flats—2 story and base, frame, $7,500. San Francisco. Architect, Frank S. Holland, 100 Haight St., S. F. Owner, Charles Harkins. Each of these buildings will cover an area of 50x41 feet and has been arranged for two stores on the first floor and two flats above. The interior will be finished in pine and redwood. There will be open fire places and tile mantels. Some art glass will be used. The exteriors will be covered with shiplap and rustic. Plans are now being figured.

Church—Class A construction, $150,000. San Francisco. Architects, Shea & Lofquist, Bank of Italy Bldg., S. F. Owners, Mission Dolores. Plans for a new and modern edifice, which is to occupy the corner of the lot on which the old historic Mission Dolores has stood for so many years are nearing completion. The old Mission house will be allowed to remain on its present site, while the new building will occupy a much larger portion of the corner of 16th and Dolores streets. Construction will be of reinforced concrete and steel. Plans for the excavating and foundation work will be out for figures within a few days.

Hotel and Stores—6 story and base, brick and steel, $75,000. San Francisco. Architects, Smith & Stewart, 244 Kearny St., S. F. Owners, Board Realty Co. This building has been mentioned here before when working drawings were first started. The building will be arranged for 100 guest rooms, nearly all of which will have connecting baths. There will be steam heat, elevator service and hot and cold running water in all rooms. Two stores and the lobby will occupy the entire first floor. The exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

Hotel—5 story and base, brick and steel, $65,000. San Francisco. Architect, Woodworth Wethered, 143 2nd St., S. F. Owner, J. G. Barker. Preliminary plans for this building show a structure arranged for 70 guest rooms and 50 baths. There will be a general lobby and office on the first floor. The building will be heated by steam and hot and cold running water will be supplied in all rooms. The exterior will probably be faced with pressed brick. Plans are being prepared.

Hotel and Stores—3 story and base, reinforced concrete, $15,000. San Francisco. Architect Ralph Warner Hart, Hunsdale Bank Bldg., S. F. owner, George E. Billings. The building will be erected on Stewart street, the first floor being arranged for several stores and the two upper floors for single rooms. All rooms will have hot and cold running water. There will be one bath. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

Firms desiring news from certain localities like San Francisco, Los Angeles Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—3 story and [illegible] frame, $18,000. San Francisco. Architect, none. Owners E. L. and W. J. Keenan, 300 Webster street, S. F. The building is to be erected at the southeast corner of Page and Pierce streets and will cover an area of 70x80 feet. There will be 18 apartments, two and three room type. All interiors will be finished in pine with hardwood floors. There will be open fire places and tile mantels. All rooms will have hot and cold running water. There will be one bath to each apartment. The exterior of the building will be covered with shiplap. Plans are in the hands of owners and the work will be done by Day Labor.

Apartment House—3 story and base, [illegible] brick and steel, $30,000. San Francisco. Architect, W. Wade Beasley, 127 Montgomery St., S. F. Owners, name withheld. Reinforced concrete will be used throughout the building and complete particulars will not be available until about Dec. 1st. A plan of the floor [illegible] will be two room apartments and the other will be three room apartments. There will be [illegible] bath to each apartment. There will be [illegible] hot and cold running water. The exterior of the building will be faced with cement plaster. Plans are being prepared.

Hotel—7 story and base, steel and brick, $100,000. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will cover a considerable ground area and will contain over 150 rooms, all of which will have connecting baths. There will be steam heat, elevator service, a vacuum cleaning system and some wall beds. The interior will be handsomely finished in pine, redwood and hardwoods. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

Residences—2 story and base frame, $4,000 each. San Francisco. Architect, J. A. Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co., Both of these houses will be erected on the company's property in Mercedes street. Each house will contain 6 rooms, bath and sleeping porch. The interiors will be finished in pine redwood and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. The exteriors of the houses will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Apartment House—5 story and base, brick and steel, $50,000. San Francisco. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, Theo. J. Roche. The building will be erected at the northeast corner of Pine and Jones streets and will contain in the neighborhood of 34 apartments. These will be arranged in suites of three rooms each with baths. There will be steam heat, wall beds, a vacuum cleaning system and elevator service. Interiors will be finished in pine and hardwood. Composition flooring will be used. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Residence—1 story and base, frame, $3,000. San Francisco. Architect, J. M. Geary, 23rd and Folsom Sts., S. F. Owners, Parkside Home Builders Co. The dwelling has been designed to contain six rooms, bath and sleeping porch. All interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. The exterior of the house will be covered with shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor.

Residence—2 story and base, frame, $8,000. San Francisco. Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner's name withheld. The dwelling will be erected in the Richmond District and has been designed for an eight-room house with baths, sleeping porch and laundry. The interior finish will be of oak, pine and redwood. Oak floors will be used throughout except the bath room which will have composition flooring. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared.

Warehouse—1 story and base brick and steel, $10,000. San Francisco. Architects, Lewis & Bradman, Phelan Bldg., S. F. Owner, M. Casey. The building will cover an area of 62x11 feet and is to be erected on Bryant street. There will be a cement floor and metal sash and frames. Foundations and walls will be designed heavy enough to carry additional stories. The exterior of the building will be faced with stock brick. Plans are being prepared.

Flats—3 story and base, frame, $20,000. San Francisco. Architect, Henry Swetmund, Mills Bldg., S. F. Owner, Katarina Seipel. The building will have three street frontages and cover an area of 29½x120 feet. There will be two stores and an attractive entrance on the first floor. The upper two floors have been arranged for six flats of four five and six rooms each. The interiors will be finished in pine redwood and elm. There will be open fire places and tile mantels. Considerable built-in furniture will be used. Oak floors are specified in the principal rooms. The exterior of the building will be covered with brick veneer and special run rustic. Plans are complete and figures are being taken.

Flats—2 story and base, frame, $8,000. San Francisco. Architect, W. H. Crim, 425 Kearny St., S. F. Owner, J. P. Sweeney. The building has been arranged for stores and flats. There will be four and five room flats on the upper floor and a large store on the ground floor. The interior finish will be of pine. Some oak floors will be used. The exterior of the building will be covered with rustic. Plans are complete and figures are being taken.

Garage and Sales Rooms—3 story and base, reinforced concrete, $80,000. San Francisco. Architect, John Galen Howard, 601 Mission St., S. F. Owners, Pierce-Arrow Motor Car Co. This building has been mentioned here before under another architect's name. The structure will be erected at the southwest corner of Larkin and Geary streets and is to have three street frontages. Construction will be fireproof throughout. There will be concrete floors metal sash and frames and fireproof rolling doors. A steam heating system will be installed. The ground floor will be devoted to the general offices and display rooms. Shipping departments, storage space and repair department will be located on the upper floors. The interior of the sales rooms will be finished in mahogany, marble and tile. The exterior of the building will be faced with cement plaster. Plans are being prepared.

Flats—3 story and base, frame, $6,000. San Francisco. Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner's name withheld. The building will contain three flats of four and five rooms each with bath. The interior trim will be of pine throughout. Some oak floors will be used. There will be gas grates. The exterior of the building will be covered with shiplap. Plans are being prepared.

Hotel—4 story and base, reinforced concrete, $45,000. San Francisco. Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner's name withheld. The building has been designed for a store on the first floor and 71 single rooms on the upper floors. The structure will cover an area of 40x85 feet. There will be a public toilet and bath on each floor. Running hot and cold water will be supplied to all rooms. The interior finish will be of pine throughout. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

Hotel—2 story and base, brick, $15,000. San Francisco. Architects, Fabde & Bearwald, Western Metropolis Bank Bldg., S. F. Owner's name withheld. The building will be erected on Kearny street near Washington and will cover an area of 37½110 feet. The first floor will be subdivided for retail stores. There will be 40 guest rooms on the second floor. All interior finish will be of pine or redwood. Running water, both hot and cold, will be supplied to all rooms. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

Hotel—7 story and base, brick and steel, $120,000. San Francisco. Architect, Washington J. Miller, 45 Kearny St., S. F. Owner, Voorman Estate. Contractor, P. J. Walker, Monadnock Bldg., S. F. Contract price, $120,000.

Bids Opened.

Bids were opened last night for alterations to Fremont School, in Oakland, as follows:

Three sets of bids only were received.

Oliver Duval & Son..	$107,000
Total deductions.....	20,135
Williams Bros. & Henderson.	$96,200
Total deductions	13,250
Van Sant-Houghton.....	$97,000
Total deductions	17,351

Twenty-four deductions were called for in the specifications which possibly accounts for the few bidders.

All bids were referred to the Supervising Architect and City Attorney.

Building Summary.

Yearly Report of Chief Building Inspector.

The report of J. P. Horgan, Chief Building Inspector of the Board of Public Works of San Francisco, shows a total of $22,417,106.00, there being a total of 6,166 building permits issued. His report is as follows:

To the Honorable, The Board of Public Works:

Gentlemen—I have the honor to submit the following annual report upon all private building operations in this city and county during the past fiscal year, ending June 30th, 1912:

Character of Permit	No.	Exp.
Class "A" Bldgs	15	$ 2,564,097
Class "B" Bldgs	15	1,957,400
Class "C" Bldgs	265	7,548,687
Frame	2500	8,370,718
*General	3371	1,976,204
Total	6166	$22,417,106

*Alterations, Additions and Repairs.

The fees collected upon the above amounted to $31,155.40.

In addition to the above more important matters this Bureau received applications as follows:

To move buildings	106
To raze structures	300
Applications filed and withdrawn	134
Applications rejected	24
General complaints received and attended to	700

Total number of applications filed 6684

I wish to further report that I found it necessary to disapprove and reject approximately 3700 applications for various permits owing to implied infractions of the Building Law and impractical construction. The majority of these were subsequently revised and corrected so as to meet with all requirements under instructions and interpretation issued from this office, and the balance withdrawn from the files.

I consider it important at this time to report that over and above the voluntary tearing down and removal of the great number of "temporary buildings" throughout the city, the system recently adopted by the Board of Supervisors in passing resolutions containing lists of temporary structures within the Fire Limits and ordering their immediate demolition has men with success, since nearly all of those listed and notified have complied or expressed an intention to do so within a reasonable time.

I find that owners, architects and builders are now more thoroughly conversant with the requirements of the State Tenement House Law and consequently this Bureau meets with much less difficulty in enforcing strict compliance.

During the year the entire force in the Bureau was kept busy owing to the volume of building operations throughout the city and the outlook is promising for an increase during the ensuing fiscal year.

No improvements were made in this Bureau with the exception of a telephone extension.

Respectfully submitted,
J. P. HORGAN,
Chief Building Inspector.

TO BUILDERS AND CONTRACTORS.

A First Class General or Carpenter Foreman, Architectural Draftsman and Estimator, with planing mill experience listing and detailing, is open for position with progressive firm of Contractors who require the services of an all around man with technical training, who placed in possession of plans for any class of construction will suffice to interpret and direct to completion without further comments. OAKLAND AND ALAMEDA COUNTY.

Flats—2 story and base, frame, $3,000. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, R. W. Hocken. Plans provide for two modern flats, each of four rooms and bath. All interior trim will be either of pine or redwood. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Tile will be used in the bath rooms. The exterior of the building will be covered with cement plaster and shingles. Plans are complete and figures are being taken.

Residences—2, 2 story and base, frame and concrete, $50,000. Berkeley, Alameda Co., Cal. Architect, Loring P. Rixford, Mills Bldg., S. F. Owner, W. E. Woolsey. These buildings have been described in these columns before. Plans were recently out for figures but went too high and are now being revised. Besides the construction of the houses there will be considerable landscape work and concrete retaining walls.

Bungalow — 1½ story and base, frame, $2,300. Berkeley, Alameda Co., Cal. Architect, A. Reinhold Denke, Humboldt Bank Bldg., S. F. Owner, George C. Hard. The dwelling will contain five rooms, sleeping porch and bath. All interior finish will be of pine or redwood. Oak floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with shingles. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $4,500. Berkeley, Alameda Co., Cal. Architect, none. Owners, Patrick-Nelson Co., 2025 Addison St., Berkeley. The dwelling has been designed to contain eight rooms, bath and sleeping porch. The interior finish will be of pine, redwood and hardwoods. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with metal lath and plaster. Plans are in the hands of the owners and the work will be done by Day Labor.

Apartment House—2 story and base, frame, $30,000. Oakland, Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The building will be erected in the Lake Merritt District and will contain about 50 rooms which will be arranged in apartments of two and three rooms each with bath. The interior trim will be of pine, redwood and oak. There will be steam heat, private baths, wall

beds and other modern features. The exterior of the building will be covered with cement plaster on metal lath. Plans are now out for figures.

Residence—2 story and base, frame, $4,500. Oakland, Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The dwelling will be designed for an eight-room house with all modern conveniences. There will be furnace heat and open fire places. Mantels will be of brick and tile. Interior trim will be of pine, redwood and some hardwood. Oak floors will be used in the principal rooms. Tile will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

Residence—1 story and base, frame, $5,000. Oakland, Cal. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owner's name withheld. The dwelling will be erected in Rockridge Park, and, besides the first floor, will contain a finished attic. Interior finish will be of pine, redwood and some hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile and composition flooring will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $4,500. Oakland, Cal. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owner's name withheld. This house will be designed to contain eight rooms, bath and sleeping porch. All interior finish will be of pine and redwood. Oak floors will be used throughout the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

Bungalows—3, 1 story and base, frame. Cost not stated. Oakland, Cal. Architect, none. Owners, Inter Cities Home Builders, 69th Ave., and Arthur St., Oakland. Each of these houses will contain six rooms and bath. All interior finish will be of pine or redwood. Some oak floors will be used. There will be open fire places and tile or brick mantels. The exteriors of the houses will be covered with shiplap and shingles. Owners are now taking figures on all parts of the work and may be seen at the above address.

Residence—2 story and base, frame, $3,500. Berkeley, Alameda Co., Cal Architects, Upton & Swain, Mutual Bank Bldg., S. F. Owner, Charles E. Howell. The dwelling has been designed for a seven-room house with bath and sleeping porch. Interior trim will be of pine and redwood with some hardwood. Oak will be used for floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile and brick. Tile and composition will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Residence—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, E. J. Spence, 6093 Claremont Ave., Oakland. Owners, Claremont Home Builders and Realty Co. The dwelling will contain seven rooms, bath and sleeping porch. The interior will be finished in pine and oak. Oak floors will be used throughout the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $4,000. Oakland, Cal. Architect, George Anderson, 5456 College Ave., Oakland. Owner, T. Anderson. The house has been designed for a seven-room dwelling with bath and sleeping porch and laundry. All interior finish will be of pine. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile and composition will be used in the bath and kitchen. The exterior of the dwelling will be finished with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence Alterations—Frame construction, $2,000. Oakland, Cal. Architect, Claude B. Barton, Security Bank Bldg., Oakland. Owner, Mrs. Haines. This work will include complete alteration and addition of a two-story frame dwelling. There will be new interior finish, plumbing, a furnace heating system and new brick or tile mantels. Plans are being prepared for the work.

Bungalow—1 story and base, frame, $2,000 Berkeley, Alameda Co., Cal. Architect, none. Owners, Peake-Munroe Co., 2035 Shattuck Ave., Berkeley. The bungalow has been designed for a five room house with bath and sleeping porch. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be open fire places and tile mantels. The exterior of the house will be covered with metal lath and plaster. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owner, C. H. Elrod. The dwelling will contain seven rooms, bath and sleeping porch. The interior will be finished in pine throughout. Oak floors will be used in the principal rooms. Tile and composition will be used. There will be furnace heat and open fire places. Mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath.. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $5,000 Oakland Cal. Architect C. B. Barton, Security Bank Bldg., Oakland Owner, A. W. Baker. The dwelling has been designed for a nine-room dwelling with baths and sleeping porch. All interior finish will be of pine. There will be furnace heat and open fire places. Mantels will be of tile or brick. Oak floors will be used in some of the rooms. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $7,000 Oakland Cal. Architect Claude B. Barton Security Bank Bldg. Oakland Owner's name withheld. The dwelling will be erected in the Adams Point District and has been designed to contain eight rooms, baths, sleeping porch and a laundry. The interior will be finished in pine, redwood and oak. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile and composition will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

Flat—1 story and base, frame, $3,500. Oakland, Cal. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owner, Mrs. M. I. Burley. The building has been designed for a store and one flat of five rooms in the rear. The interior finish will be of pine throughout. There will be open fire places and a brick mantel. Modern plumbing will be installed. The exterior of the building will be covered with rustic. Plans are complete and figures are being taken.

Hospital Additions and Alterations—Frame construction, $8,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, Mr. Bates, 2460 Webster St., Berkeley. This work will include the construction of a frame addition, some new plumbing, electric work and interior plastering and finish. The exterior of the new portion of the building will be covered with cement plaster on metal lath. Plans for this work are complete and in the hands of the owner who is now taking figures.

Nurses' Home—2 or 3 story and base, brick. Cost not stated. Oakland, Cal. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owners, King's Daughters. The building will be erected at the corner of Broadway and 39th street. Only preliminary plans have so far been prepared and none of the details of the construction can be given at this time. Full particulars will be given as the plans progress.

School—1 story and base, reinforced concrete, $65,000. Oakland, Cal. Architect, Fred D. Voorhees, Central Bank Bldg., Oakland. Owners, City of Oakland. Plans for the 54th St. School have been approved and figures will be called for shortly. The building contains six class rooms, assembly hall and kindergarten. There will be a central heating system. By the use of the Simplex Windows all class rooms may be converted into open air rooms. The exterior of the building will be faced with cement plaster. Besides this building plans have been approved for the Washington School and the Emerson School, figures on both of which will be called for this week. All school work is in charge of Architect J. J. Donovan

School Addition and Alteration—$80,000 Oakland, Cal. Architect, J. J. Donovan, Oakland. Owners, City of Oakland Bids for the work at the Fremont School were opened on the 16th. Three sets of figures only were presented, the lowest being that of Van Sant-Houghton Co. of $97,000, with total reductions of $17,351. A contract for this work has been awarded to the above mentioned firm.

Stores and Offices—6 story and base Class B construction, $200,000. Oakland, Cal. Architects, Milwain Bros., 173 14th St., Oakland. Owner, Robert Dalziel. The building will cover an area of 120x165 feet. The first floor will be arranged for stores and an entrance to the upper floors. Construction will be of brick and steel and concrete. The exterior of the building will be

faced with pressed brick and terra cotta. There will be steam heat, elevator service, tile floors and other modern conveniences. Meiffert and Barnes will be the architects. A large part of the building is to be leased.

Store Interior Work and Fixtures—$3,000. Oakland. Cal. Architect Charles F. Bacon. Security Bank Bldg. Oakland. Owners, Grand Co. This work will include office fixtures of oak and pine store fixtures, painting, plastering, plumbing and electrical work. Plans to complete and bids are being taken.

Store—Brick and steel work. $50,000. Alameda. Alameda Co., Cal. Architect E. H. Kennedy. Alameda Owner represented by Mr. Bertenshaw, 6th and Harrison streets, Oakland. The exterior of the building will be faced with cement plaster on brick walls. Interior finish will be of pine throughout. Metal tile will be used on the roof. Plans are in the hands of Mr. Benjamin who is now taking figures on the work.

Contracts Awarded.

Stores and Offices—2 stores and store, brick and steel, $45,000. Oakland. Cal. Architect, Arthur T. Brockett. 2nd Kearny St. S. F. Owners, Alameda County Loan Association. The following contracts have been awarded for this work: Grading and foundation to F. E. Nelson; brick, steel, carpenter etc. to Kaufmann & Edwards; steam heat and electric work to Isom Sibley; plumbing to C. T. Dodd; painting to B. Rutgers; roof and skylights to Bowe to J. W. Binder.

SAN JOSE AND THE SANTA CLARA VALLEY.

Church—1 story and base, frame, $25,000. Santa Cruz, Santa Cruz Co., Cal. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, Santa Cruz Methodist Church. The building will be designed in the Mission style with a large bell tower. There will be furnace heat. Besides the main auditorium there will be Sunday school rooms, pastor's study and parlors. The auditorium will have a seating capacity of about 600 people. The interior will be finished in pine. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

School—1 story and base, reinforced concrete, $65,000. San Jose, Santa Clara Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Hester School district. The building will be fireproof throughout, floors, stairways and walls being of reinforced concrete. There will be sixteen class rooms on the main floor and manual training and domestic science departments in the basement. A central heating system will be installed. There will be program clocks and a vacuum cleaning system. The exterior of the building will be faced with cement plaster. Plans for the building have just been selected and the architect is now completing the working drawings.

Theatre—1 story and base, reinforced concrete, $50,000. San Jose, Santa Clara Co., Cal. Architect, William Binder, Rea Bldg., San Jose, associated with Architect Sylvain Schnaittacher, First National Bank Bldg., S. F. Owners, Conservative Realty Co., San Jose. The building has been leased by the Empire Vaudeville and Picture Co., and will be erected on First street near San Antonio. The main body of the house will have a seating capacity of 1200 people. Besides this there will be a large balcony. Construction will be fireproof. The exterior will be faced with cement plaster. Plans are complete and figures are being taken.

SEATTLE AND WASHINGTON.

Warehouse—3 story and base, reinforced concrete. Cost not stated. North Yakima, Wash. Architect, W. W. De Veaux, North Yakima. Owners, Yakima Hardware Co. The building will be 60x150 feet. Construction will be fireproof throughout with metal sash and frames. There will be a freight elevator. First floor will be of concrete. The exterior of the building will be faced with cement plaster. Plans are complete and figures will be taken at once.

Garage—3 story and base, reinforced concrete, $8,500. Seattle, Wash. Architect, none. Owner, Mary Liebeck, 1100 East Pike street, Seattle. The building will be 52x76 feet. Plans for the work are now in the hands of the owner and she is taking figures on the various parts of the work. The structure is designed for a commercial garage and has already been leased to a tenant. The exterior of the building will be faced with cement plaster.

Dormitory—3 story and base, reinforced concrete, $50,000. Mercer Island, Wash. Architect, Edgar Blair, 901 7th Ave., Seattle. Owners, Parental Home. The building is to be a part of the State Institution for Boys. In connection with this building a reinforced concrete power house and laundry will be erected costing $20,000. The same architect is preparing plans for seven bungalows which will be erected at Georgetown by the state which will cost $150,000. This project is a separate institution for boys. Work will be undertaken this year.

PORTLAND AND OREGON.

Residence—2 story and base frame, $20,000. Portland, Ore. Architect Edward T. Foulkes, Crocker Bldg., S. F. Owner, Dr. A. S. Nichols. The dwelling will be erected on a prominent corner and will contain twelve rooms, baths, sleeping porches and a lobby. A large garage will be and tanks will be erected on the same lot. All interior trim will be of pine, redwood and hardwoods, oak floors will be used in the principal rooms. Composition floors will be used in the bath rooms. The walls will be of tile in the kitchen. There will be a hot water heating system and open fire places. Mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and bids will be taken.

Lodge Hall—2 story and base, brick and steel, $40,000. Portland, Ore. Architect, F. W. Bohne, St. Louis. Owners, Portland Knights of Columbus. The selection of this architect was announced in these columns sometime ago. The building will cover an area of 70x120 feet and will have a complete steel frame, exterior walls of reinforced concrete and brick, faced with pressed brick and terra cotta. The interior will be arranged for the exclusive use of the owners and will contain club rooms, offices and a large banquet hall. Plans have been forwarded to John D. Carmody, American Bank Bldg., Portland, and he will have charge of letting all contracts. Plans are now out for figures.

Jail—Class A construction. Cost not stated. Portland, Ore. Architects, Emil Schact & Son, Portland. **Owners,** City of Portland. Plans for the superstructure of the New City Jail have been completed and are now out for figures. There will be a complete steel frame and exterior walls of stone, terra cotta and pressed brick. Separate contracts will be let for the electric work, plumbing, heating, cell work and interior finish.

Intercepting Sewer—Reinforced concrete, $600,000. Portland, Ore. Engineer, City Engineer Hurlburt, Portland. Owners, City of Portland. Plans for the intercepting sewer, extending from Marquam Gulch on the south to the city limits on the north, are complete The object of the construction of this sewer is to carry the sewerage to a point below the city harbor on the Willamette. Bids will be called for shortly.

EMPLOY BRIDGE INSPECTOR.

MARSVILLE (Yuba Co.), September 19.—Yesterday the Supervisors authorized the Thomas & Post Construction Company to employ an inspector to supervise the construction of the Parks Bar bridge. The bridge is to be of concrete to cost $36,000, and the Thomas & Post Company has been awarded the contract. The inspector is to receive $150, and the Supervisors reserve the right to at any time discharge him. County Surveyor Cook refused to take charge of the construction of the bridge.

OAKDALE IRRIGATION DITCH COMPLETED.

OAKDALE, Sept. 20.—The south main canal of the Oakdale irrigation system, on the south side of the Stanislaus river, is completed, as far as the open excavation work is concerned. The contractors have moved away their big steam shovel, having finished ten miles of open canal from the western portal of the 7000 foot tunnel to a point well within the boundaries of the district, where the water will be divided in the smaller laterals to be carried to each 40 acres. Work on the laterals is proceeding, and the distributing system will be finished in two months.

INFESTED TIMBER SOLD.

WASHINGTON, September 19.—Secretary of Agriculture Wilson has authorized the sale of one million feet of lodge pole and pine pole from the beetle infested area of the Lassen forest at one-third cent per lineal foot to utilize the poles and check the bugs.

CONTRACTS FOR POWER.

VALLEJO (Solano Co.), September 20. The bids for the furnishing of power for the pumping operations at Lake Cnabot were opened at the City Hall Wednesday and it was found there was but one bidder, the Great Western Power Company, and it secured the contract. The company agreed to furnish power at the rate of 2 cents per kilowat hour for 75,000 kilowat hours, or a total cost of $1500, and the city on its part agrees to pay this sum whether that much juice is needed or not. As an evidence of good faith the company deposited a check for $1500, though the Charter only requires a check for 10 per cent of the amount, or $150.

TO SUBLET RAILWAY CONTRACTS.

VANCOUVER, B. C., Sept. 19.—J. W. Stewart and P. Welch of the railway contracting firm of Foley, Welch & Stewart, Winch Bldg. Vancouver, and Spokane and St. Paul, are in this city and expect within a few days to sublet a number of contracts for the construction of the proposed G. T. P. line from Vancouver to Fort George. The general contract ecently awarded this firm was in the sum of $16,500,000, the largest contract in the recent history of railroading.

EARLIEST PRODUCTION OF STEEL.

The first steel production in this country was probably made in Connecticut in 1728 by Samuel Higley and Joseph Dewey. Crucible steel was first successfully produced in the United States in 1832 at the works of William and John H. Garrard, at Cincinnati, Ohio. Bessemer steel was first made in this country in September, 1864, by **William F. Durfee** at an experimental plant at Wyandotte, Mich., and open-hearth steel in 1864 by the New Jersey Steel & Iron Co., at Trenton, N. J.

IRRIGATION CONTRACT LET.

WASHINGTON, September 19.—The Interior Department has awarded to Maney Brothers & Company of Boise the contract for the construction of the second unit of laterals of the Klamath project.

The contract involves the excavation of 300,000 yards of earth. The price is $67,212.

EXAMINATIONS FOR CITY CIVIL SERVICE.

Examinations of applicants for positions in the classified civil service of San Francisco will be held in the office of the Civil Service Commission, beginning at 7:15 P. M., Thursday, October 24th, as follows:

Pattern makers, carpenters' helpers, glaziers, ship and machine blacksmiths, ship and machine blacksmiths' helpers; carriage, wagon and automobile woodworkers, marine engineers of gasoline engines, engineers of hoisting and portable engines, engineers of steam rollers, chauffeurs, pantry workers and waiters, cooks, butchers, farmers, gardeners, seamstresses, laundry workers.

These examinations will be based on training, experience, fitness and physical ability. The relative weights of the subjects on a scale of 100 are: Physical ability, 40; training, experience and fitness, 60. The information on which the ratings will be based must be furnished by the applicants in their application blanks.

Applicants must be citizens of the United States, 21 years of age or over, and must have resided in San Francisco for at least one year next preceding date of the beginning of examination. Application blanks may be had by applying in person or by mail.

TO DIG BIG CANAL.

PORTLAND, Ore., Sept. 20.—Marvin Chase, Richmond Beach, this city, reports that he has completed surveys for the Brewster High Line Canal in the Brewster Irrigaton District. His estimates for the work run a little under a million dollars, making it one of the largest projects of its kind in this section to come up this year.

All flumes will be steel lined. The specifications include such items as 10,000,000 feet of lumber, 200,000 lbs. of nails, etc. The intake will be located 3 miles below the town of Twisp, Wn., and the canal will run 12 miles to Carlton, Wn., this section costing about $160,000. The total distance is about 70 miles, and some of the biggest contractors in the country have signified their intenton of bidding on the work.

PETITIONS IN BANKRUPTCY.

The following petitions in bankruptcy have been filed in the United States district court.

Lewis G. Booth, a local salesman, whose liabilities are scheduled at $1525 with no assets. Adolpo J. Junge, a restaurant keeper in Oakland, whose liabilities are $7637, with no assets. Edward D. McKerricher, a grayman at Fort Bragg, whose liabilities are scheduled at $4250, with $752 in available assets.

The National Cartridge company of Napa, involuntary insolvents, filed their schedule, which gives the liabilities at $13,166, with $2312 in available assets.

WINNIPEG TO HAVE BIG WATER PLANT.

WINNIPEG, Sept 18. Prof. Schlichter, employed by the city to investigate a system of water supply advises that Shoal Lake is the best source of supply. The estimated cost of single pipe lines is $6,000,000, the supply about 35,000,000 gallons and the work, if undertaken at once, could be completed by July 1, 1906. Ultimately the Shoal Lake pipe line will cost $12,000,000, according to the report submitted. The present water supply system of the city is strongly condemned.

TIMBER DEAL CLOSED.

WASHINGTON, September 19—Final arrangements for the sale of 500,000,000 feet of Government timber to the Sierra Sugar Pine Company, a California corporation, will shortly be concluded in San Francisco by Chief Forester Henry S. Graves, who is due to arrive here on September 28.

The timber, which stands in the Sierra national forest, has already been awarded after public advertisement, but, under the terms of the advertisement, the contract will not become binding until the extra bid has been shown on the ground what timber the Government will reserve in order to provide for reproduction and as agreed in writing to be terms imposed.

The company will be allowed to cut the full 800,000,000 feet, but it will not be allowed to cut them. As a rule the forest service reserves about one-third of the stand. A banking board of one man sent from Washington, one from the district office in San Francisco and the local forest supervisor will carefully mark a given area to show how the restrictions on cutting apply. Representatives of the company will then go over this area, after which it is expected that the contract will be signed in San Francisco.

The company has twenty-two years in which to cut the timber.

Editorial Comment.

In regard to watered stock and payment of dividends on capital that does not go into the industry but into the pockets of the promoters the case of the Philadelphia Transit Company is a case in point. That company is now employing women as conductors on its cars in the city of Brotherly Love, the reason given that the women work for less and it saves wages. This of course tends to reduce the wages of men all around. They had a strike there some time back and there was a great howl about labor unions and violence. If this sort of thing keeps up women will be the breadwinners in most of the occupations. The earnings of the company are not so small that it requires a reduction in the wages of its employes, particularly under the present high cost of living.

In the march of science and the triumphs of invention one often wonders where the procession will stop. Electricity for instance, the subtle fluid whose effects we see and feel and hear yet can only conjecture what it really is, has become and is daily becoming more and more a servitor of man. Besides light and power it is being used for heating purposes. Electric smelting is now an accomplished fact, electric welding of steel and iron is a fact of every foundry and railway track system, and in some localities electricity is being used for cooking purposes and heating of houses. In places like Idaho Falls, Idaho for instance, where power is cheap and fuel comparatively high, cooking by electricity is a common thing. So also at Seattle where hydro-electric power is abundant and comparatively cheap. So in this state where so many great hydro electric schemes are in course of development we may expect to see electricity put to more varied uses. And as the wireless telegraph has demonstrated that the circumambient ether is itself a conductor of electricity there seems really to be no bounds to the use of electricity or to the possibilities of its development.

The traction expert, Bion J. Arnold, has been employed by the city for quite a number of days at an enormous salary per day. What he has reported seems sensible enough and about what any sensible man would have reported under the circumstances. This report has come high, but it may be worth the money if the Supervisors act on it and take it as authority. This they will perhaps do if they have paid a big price for it where otherwise they would not pay any attention to the same report made by another man of less reputation or at a less cost to the city.

Certain it is that the city must secure some adequate transportation facilities to the exposition grounds and also to its suburban sections. His recommendation that private capital must be enlisted to develop the suburban lines until such time as the city can handle it is perhaps good. But no franchise should be granted for such long term of years that a private monopoly will gain control of the streets, water their stock to such enormous proportions as the United Railroads have and then snap their fingers in the face of the public they serve. The completion and operation of the Geary street road will be an object lesson in municipal ownership, and, if properly conducted, will show what can be done in serving a suburban section.

The city must eventually grow south if it growes at all. Adequate transportation down the peninsula means the upbuilding of that section and it should be made equal in its facilities with the transbay sections and the bay cities.

The Mission Street Viaduct is completed and transportation to the southern end of the city is thereby facilitated. This emphasizes the fact that the city must grow southward, if it grows at all, and that in the southern end of the city limits is about the only place left for the poor man to secure a home.

This viaduct bridges the most important depression between the commercial part of the city and the southern residence district. This is a permanent improvement which will last for all time. It contains two sidewalks, wagon roads on each side and a double car track in the middle. It is about five miles out from the ferry station and marks the expanding growth of the city toward the south. It further emphasizes the necessity of an adequate water supply for in the district beyond the viaduct there is already a lack of water with no prospect of it getting much better. Transportation is necessary, but water must also precede development.

The visit of the company of European Geographers to this city that are traveling about the country, is an event of some importance. San Francisco as one of the principal ports to be benefited by the opening of the Panama canal is an important point in the geography of the world. Lines of travel will be changed. Instead of the old southwest passage to India which the discoverers sought in vain, there will be an artificial waterway which will connect the two oceans and lessen the distance around the world by about one-third. These men being men of authority will publish to the world the facts concerning San Francisco and vicinity and will place the

city in its true relation with other ports of the world.

David Starr Jordan is on of the reception committee to welcome Bryan. This is somewhat different from about ten years ago when the President of Stanford went down to Pacific Grove and fired Professor Ross from the faculty of the University for endorsing Bryan's views in his public speeches. The world has moved since then. Perhaps the powers that are behind the throne at Stanford have changed or Dr. Jordan is more free to express his views now than at that time. In any event Bryan has not changed and many of the people who now support him were either afraid to in former years, or have since changed their opinions.

And in speaking of Roosevelt being a late convert to the cause of progressivism people forget that he has done as much as any other one man to bring this agitation about. Progressivism means the square deal and with all his idiosyncrasies Roosevelt has been the greatest preacher of that doctrine of modern times. As Mr. Bryan says he is an eleventh hour convert to the cause of progressivism, the same might be said of Mr Wilson who some years ago expressed a desire to find some means to knock Mr. Mr. Bryan into a cocked hat.

Now the real progressives that are supporting Wilson are doing so because he is the candidate and representative of W. J. Bryan.

The Sacramento Union, a paper conducted over the Contractors' and Dealers' Association of Sacramento and in an editorial of last Saturday states that the District Attorney ought to bust the trust. What private grief the Union has it does not state or what kind of a grand stand play it is trying to make. Certain it is that it has gotten a lot of misinformation somewhere probably from some hooked contractor and is making a play to his gallaries for effect.

The Sacramento local of the Contractors' and Dealers' Association has been, and is an effective organization and has succeeded in raising the standard of the building business here to a great extent. Contractors can not peddle bid there but can have conducted business without paying them bills. Therefore some have a grievance and no doubt they have seemed a mouthpiece through the Union.

There have been some disgruntled contractors who have had to join the Association at Sacramento against their will. But they have usually been those who were already convicted of some unfair tactics in their own association or peddlers of bids and unfair in their treatment of sub-contractors generally.

The Contractors' and Dealers' Association has not raised the price of building construction to the owner generally. Its aim and intent is to secure honest workmanship and fair conditions in the business generally. To do this it was fair to adopt the principle of the closed shop to a great degree and make the dishonest man pay his bills and live up to his contract or lose work. To put it in other slang as Sacramento has been once in a while somebody insists into pool up there letting about to build-

ing trust and talking about prohibitive prices and talking about prosecutions in the premises. It has inveriably rolled down that there is nothing done but a lot of talk for when it is investigated there is usually some builder at the bottom of it who has been forced to pay his bills much against his will and to the betterment of the business generally.

If the Association in San Francisco were as effective as they are at Sacramento the business would be on a much better basis. The material man would be assured of his money and be able to sell at a closer margin. The honest and capable man would get the profit of his reputation and his ability instead of the unscrupulous charlatan who peddles his bids and steals the profits that legitimately belong to other men. The cost of building to the owner will not be materially advanced, but the standard will be raised and fair conditions established for those who are in the business. If Sacramento has a building trust it would be well if San Francisco and the other cities had the same kind and as effective a trust as the Capitol City.

Bids on the Service Building at the Exposition grounds have been opened and the work bids fair to go on according to program from now on. So also the plans of the Civic Center seem to be going ahead. The Board of Supervisors have also asked for bids on a telephone system according to the provisions of the charter and it looks like something will finally be done in this direction. Meanwhile the Geary Street Railroad is nearing its completion and of course happens will soon be in operation. Which all is much a source of congratulation and felicitation. After a long time something is going to be done and it looks like things will begin to move in the fall of the year.

In the discussion between the Mayor and the Insurance underwriters as to rates charged here in the city the Mayor certainly has the best of the discussion. San Francisco as it is and today is certainly as fire proof as any other modern city. And as the rates for insurance now are much greater than they were in 1905 there seems to be no reason for the raise. Comparison with similar risks in other cities would demonstrate whether or not there is an attempt to charge exorbitant rates to San Francisco owners. Because San Francisco lost by the great fire and because the Insurance companies lost by the same conflagration is no reason that San Francisco should be discriminated against.

The Municipalities League which is now in session at Berkeley has brought to the attention of the public some important phases of the control of municipal government. Professor Reed of the State University has outlined a special plan for the training of experts in municipal government. His idea that all non-elective offices in the municipality should be filled by experts, those experts to be trained for the particular calling by the University.

This is in accord with many of the English cities and especially in Australia and New Zealand. When a municipal office is to be filled in cities of Australia a public examination is held and an effort is made to get the best man for the place. Thus at least in an approximate degree the best and most skilled man is secured for the position. Already in the universities provision is made for training in sanitation for cities. And the suggestion is certainly a good one that training should be provided for those who are to assume the special duties of municipal offices.

An English Scientist, Sir William Ramsey has come forward with a proposition to produce gas from the coal mines of the kingdom that can not be longer mined at a profit. His scheme is to burn the coal in the ground by electrical ignition and by means of forcing steam and air into the shaft to conduct the gas produced from this enclosed combustion to storage tanks by means of pipes leading to the underground chambers of the mines. Thus he would make of the mine a gas retort and use the product in heating and lighting and especially in the gas engines. By such a use of the power developed the energy would be transformed into electricity and used for railroads and all kinds of power transmission. Arrangements have been made with one of the English collieries to put the experiment to the test and see how it works out in practice.

A man in New York by the name of Nichols has solved the problem of the high cost of living and has invented a menu by which he can live on twenty cents a day. As an example of what can be done on the economy side of the Sunday dinner first comes a relish of cabbage salad, one-quarter of a 5-cent head, 1½ cents; then two baked potatoes, 2 cents; then two ears of green corn, 5 cents, and finally, one chop, 5 cents, total cost, 13½ cents.

This is the most luxuriant meal of the week, the Monday dinner costing but nine cents.

While most of us would not care to confine ourselves to the diet prescribed by this man, who has invented a scheme to beat the Beef Trust, especially if we were actively engaged in the building business, still it would be a great deal better for most of us if we didn't eat so much. The horseman feeds the animal under his care what he thinks the animal needs and not what the horse wants. When it comes to feeding himself he usually eats what he wants and not what he really needs. As a result the horse usually has the more hygienic diet and fares better.

The great fault of American people is in eating too much. The system becomes clogged and does not assimilate the food nor is it all necessary. The digestive organs are needlessly overworked. While the New Yorker has formulated his diet principally on the idea of economy the idea of eating less is not only more economical, but more healthy for the most of us.

Uniform City Planning—Proposed Methods Considered By The National Conference

*Paper read before National Conference on City Planning, at Boston, May 19, 1912.

The Executive Committee of the National Conference on City Planning has suggested to its Committees on Legal and administrative methods the preparation of an uniform City Planning Code. England and America offer precedents for such a code, but these precedents are decidedly limited. The English Town Planning Act passed in 1909 under the leadership of John Burns, M. P., is the English precedent, and the Constitution of our States and of the United States prevent it from being of much assistance to us The uniformity of an American Code is suggested by the Uniform Negotiable Instruments Law passed by forty states and the Acts on Sales and certain other topics now being considered by the Legislature of the several states, to avoid the medley of decisions arisng from different interpretations of the common law.

Any code of city planning, with our present knowledge of the subject, can be but tentatively drawn. This was recognized by the Executive Committee in its suggestion that a preiiminary draft only of a city planning code should be submitted with the expectation that it will be recommitted to the succeeding committee on Legal and administrative methods for such changes, alterations and additions as may appear desirable as the result of the deliberations of this congress. As your researches reach more and more under the surface into the relationship of the different elements that enter into city planning and as the natural laws that control such relationships are more and more clearly discovered and enunciated the provisions of the statutory law that should be enacted accordingly will be more and more clearly defined. Your Committee, therefore, offers the drafts of portions of such a code not as a finality, but as a convenient method of presenting the subject for analysis, discussion and suggestion.

The subject is difficult because of the varying laws already in existence throughout the Union. That the laws in each state are entitled to consideration is obvious from any practical point of view. Each state is the sole judge of the functions which are to be delegated to its cities. As the city is but an arm of the state and therefore a mere agent, it can generally exercise no power or authority which is not specifically or by necessary implication conferred upon it. When there are 46 different legislatures with varying knowledge of the needs of cites or of their relative importance, of the questions social as well as governmental that they present, it is but to be expected that the charter powers of municipalities throughout the United States will differ even in important respects from the charter powers of other cities of the same class.

Scope of Proposed Code.

Before the preparation of even these preliminary drafts it was necessary to determine the conclusion that the Committee should come to in regard to the scope of the code. An act that wipes out existng authorities and substitutes a different body will meet the political opposition of all existing authorities.

This Conference is a practical body brought together to get practical results. The best way to get these results is to secure their adoption in principle, without too great concern over details. It has therefore seemed to your Committee the wiser policy at this stage of the development of City Planning to provide for a new body to be superimposed upon existing authorities, who themselves shall be represented in that body, rather than to attempt to create a complete substitute. For this the Connecticut Act that created the Hartford City Plan Commissionoffers valuable suggestions.

Pioneering in Legislation.

In any movement that is so pioneer in character as is the movement for the city planning, it is necessary not to be deterred by the newness of an idea in legislation. We must be prepared to face opposition based on ignorance as well as opposition that takes that form of conservatism that fails or refuses to recognize that each generation must advance and will advance in its theories and practices over those of the foregoing generation. The ideals of one generation, it has been wisely remarked, become the actualities of the next and the law is but the formal recogniton of these ideals in practice.

The fear that an act may have to stand the ordeal of battle before the courts is no reason for failing to make the effort to have such an act passed by the Legislature. The fear that judges are not sufficiently educated to appreciate what is desired to be done is not a reason for failing to press forward the required legislation, but it is a reason for undertaking the education of the judges. When we are breaking the ice we are not on solid ground. Thirty years ago acts to limit the working hours of women to eight hours a day would have been regarded by unanimous courts as infringements of their right to contract as they choose It is now recognized not only that such acts are sound in economis policy but that under the police power of the state they are constitutional in law. Your committee, therefore, does not hesitate to recommend the enactment of provisions some of which doubtless will be contested in the courts.

Why Separate Acts Are Presented.

Your Committee is however, not so determined to emphasize the pioneer character of the investigations of the Conference as to neglect the help that may be derived from practical subdivisions of its work. As it appears likely that certain of the provisions of a City Planning Code will be attacked, your committee deems it advisable at this time to present not one act but several acts which, as time goes by, may be brought together. If an attempt were made now to combine all the provisions that appear desirable in one act, it may well be that one set of its provisions would be held unconstitutional although other provisions were well within the power of the law-making bodies. The questions in such cases is whether the unconstitutionality of the set of provisions so affect the whole Act, as to render the provisions cannot be held valid apart from them. For instance, the power of excess condemnation and the power of preliminary plotting in undeveloped sections so as to prevent the erection of buildings within the limits of the streets plotted, are each of them subject to objections regarded a generation ago as fatal. Why then make the constitutionality of one dependent more or less upon the constitutionality of the other? Why not let each stand or fall on its own merits? Your committee deems it only reasonable that each provision should be construed by itself, confident though they are that each will be generally upheld. We, therefore, at this time do not present a uniform code but instead a series of acts on city planning, all related to each other but to be submitted for enactment separately.

Excess Condemnation.

City Planning necessarily has to do with transportation in the broadest sense. Transportation covers not only vehicular metiods of transportation from one point to another by means of steam railroads or street transit systems on the surface above or below ground but the method of transportation by the streets themselves. The space occupied by streets includes from about 25% to 50% of the area of the developed portions of cities Your committee presents herewith the legal aspect of street reconstruction and of street platting. Street reconstruction chiefly concerns the opening of new streets and the widening of old ones in the central or developed portions of cities and street plotting chiefly has to do with the location of streets in undeveloped areas. While in individual cases reconstruction may possibly be done altogether at the expense of the tax payers, general reconstruction may possibly be done altogether at the expense of the tax payers, general reconstruction such as we have been familiar with for years past and such as will continue necessary through all time in every city can only be undertaken effectively if the city may condemn more land than it wants in order to resell and put restrictions. It is practically [illegible]

tial that the power of excess condemnation shall sooner or later be upheld if American cities are to be rebuilt as European cities are being rebuilt.

The draft of an act authorizing excess condemnation is presented herewith.

Street Plotting.

The other main problem with regard to the street system concerns chiefly the plotting of streets in undeveloped areas. Here is a pleasure to a loyal son of Pennsylvania to be able to say that in mother state points the way for, in Pennsylvania we have an act which provides that the engineering authorities may plot streets and that when the streets are so platted no building shall be erected within the limits thereof or, if erected within such limits, no damages shall be paid the owner when the street is formally opened. By "opening" is meant the requisition of the public right of way. It has been decided in other states that such acts are unconstitutional because they deprive the owner of an important use of his property during the period between platting and opening, without compensation. This act has been upheld in Pennsylvania and it is at least questionable whether it would not now be upheld generally throughout the country as a reasonable exercise of the police power. We believe, however, that it is altogether unnecessary to rely upon the police power because all rights of owners can readily be provided for through compensation by an act slightly varying from that of Pennsylvania.

A draft of such an act is herewith presented. Its main outlines are as follows the latter parts varying from the Pennsylvania Act. The act provides that the proper authority shall have the power to plat streets in undeveloped areas, that thereafter no building shall be erected by the owner within the limits of such streets, or if erected that no damages shall be paid the owner when the formal right of way is acquired through proceedings of eminent domain. The platting of the street does not give no attempt to give title to the right of way but it does deprive the owner of the use of the ground within the right of way for building purposes. The act therefore authorizes and directs that the owner shall be compensated for the deprivation of the use of his property to this extent, when the street is formally opened he is to receive full compensation not only for the easement then acquired by the city, but in addition, for this deprivation between the date of platting and the date of opening. He will, therefore secure compensation for every element of his ownership. Should the street be platted and thereafter the location of the proposed street be changed the act provides that the owner shall then have the right to secure compensation for the deprivation of the use of his property within the platted right of way during the time between the original platting and the subsequent removal from the plan. By this method he will secure compensation for the right of which he had been deprived for that length of time. It will be observed that the owner has no immediate right of action because of the platting of the act. It is unnecessary in our view of the law that he should have any immediate right to such compensation. Justice Sherwood of the Supreme Court of Pennsylvania states that when property is taken by the right of eminent domain "the obligation of compensation is not immediate. It is required only that provision should be made for compensation in the future." Hammont v. Phila. 65 Pa. 146 (1870).

If this statement by one of the two greatest judges of Pennsylvania should not be regarded as law by other states it will then be necesary in such states to provide for immediate compensation for the loss of the use of his property to this extent. But we are satisfied that generally this will not be found necessary except where the State Constitution expressly provides for compensation before any taking at all.

Closely akin to this matter is the power to widen streets gradually by providing that as houses fronting thereon are altered they must be set back to a new building line. For instance, the widening of Chestnut street from 50 to 60 feet has been proceeding since 1887, and you may see four buildings between Thirteenth and Broad streets on the old line. The city has now reached the point where it can order these buildings that remain back to the new line without any widening the public funds. An act to give this power generally is herewith presented.

Plotting of Public Reservations.

The next Act of Assembly that we submit is that concerning the plotting of area in undeveloped sections of the city which areas are intended for parks, playgrounds or public buildings of various kinds. It is just as important to systematic and wise city planning that reservations should be plotted as sites for future parks, playgrounds, school houses, fire houses, libraries, etc., as it is that the streets should be located in advance. But the ground should be reserved generally, and of specially so that future developments may determine the precise NINETEEN SEPT 29 HOYT ose to be made of the particular area. The Act of Assembly herewith presented provides for the plotting of the areas intended for such purposes and also provides that no building shall be erected on such areas, by the individual owner and if erected that no damages shall be given for them. The same provision is inserted providing for compensation to the owner for the loss of the use of his property for building purposes between the date of the plotting and the date of actual condemnation, and likewise, there is the same provision for compensation to the owner should the plotted location be changed.

As to Reservation for Tenements.

Here is a wide field for discussion, but that discussion is sociological rather than legal in our present knowledge of the subject. Until this Conference determines to what extent it believes the policy of providing for the submerged tenth by the erection of tenements similar to those of Liverpool, London and elsewhere, shall be followed in American cities, it is hardly within the province of this committee to attempt a draft of legislation. You don't know what you want and until you do there is no use inventing legal machinery to produce a result which perhaps within a year or two will be a result you may decide is not desirable. Your committee, therefore, does not present any act looking to the plotting of undeveloped areas for such purposes.

The Districting of Cities.

Another suggestion closely akin to the one which your committee has just refused to undertake at the present time provides for the creation of districts in cities. Here your committee believes the Conference is clearer as to what it really wants done than in regard to the subject just considered.

Your committee believes that in view of these two suggestions of the Supreme Court of the United States you will be ready to consider the act which we herewith present providing for the districting of cities so far as the height of buildings is concerned. It does not believe that you are ready to consider an act providing for the districting of cities so far as the use of such property is concerned for housing, business or other purposes.

Some of the Subjects not Covered.

An important subject which we have not covered is the method of procedure in the acquisition of rights of property under proceedings of eminent domain. The New York taxpayer pays none of the cost of opening of streets, 60 feet or less in width, or their grading curbing or paving or other street improvements. Other cities take the taxpayer's money for some or all of these purposes. Your committee believes that the evil from which New York is happily free, should be removed from other cities and to this end suggests that a special session at the next Conference be devoted to this technical but financially important topic. From Ohio Architect, Engineer and Builder

RAZING CHINESE WALL.

Though not numbered among the seven wonders of the ancient world, the great wall of China was well entitled to the eighth place. For two thousand years this great barrier has extended for more than seventeen hundred miles over mountains and through valleys. As proof of the movement for a new China, this historic wall, it is said is now to be demolished, the government being desirous of destroying all that physically recalls the past in the country. The passing of this great barrier, the greatest construction achievement of remote times, will attract world-wide attenton. Like the famous wall built at a still earlier period to exclude the Picts and Scots from England, it long ago outlived its usefulness, and its demolition may well mark the disappearance of the old and the dawning of the new in the world's most populous country, which is now entering the arena of civilized and intelligent nations. Repaired and extended some twenty centuries ago, the great wall of China is of "the most fatherly antiquity," the date of its original building having been lost in the mists of time.

It is said that the project for demolishing the great wall originated some years ago, and that the late empress and her son, whose deaths occurred nearly simultaneously, so suddenly changed the whole aspect of China, had consented to the removal of the barrier and had even signed the

contract for the work when a superstitious fear seized them and the order was revoked.

Descended as they both were from the Tsin dynasty, that built up the wall, and possessed of that worship of ancestry that is so deeply ingrained in the Chinese heart, at the last moment they feared to commit what seemed a sacrilege on the masterpiece of the dead.

But it seems the progressive Chinese possessed of full authority have no such scruples. They are not the descendants of emperors, and there is nothing, therefore, in this case to hold them in check. The wall is the symbol of the ancients and of the force that for so long held the country in check. If it be brought down, the modernists will take it as a sign that the new rule will enforce the new ideals. Modern artillery would speedily reduce the last vestige of the ancient barrier, but it was not built to withstand this sort of attack, and in the days when it reared its head over the landscape it was an impassable stronghold. The foreigner who gazes upon this stupendous construction is amazed. Experts of all nations have cited it as one of the most astounding works ever performed by man.

If he who looks upon the Chinese wall be of an imaginative turn of mind he is transported back twenty centuries to the times of Shi-Hoangti, the greatest of Chinese heroes. China then led the world in wealth and in culture. The rich rewards of conquest constantly inspired the Mongols, wild tribes who lived in the country now called Mongolia, to make forays.

The Mongols had invaded the country on the northern borders and were encroaching farther towards Peking, and the provinces of the south. It was in this crisis that Shi-Hoangti performed the feats of valor that made his name forever famous in Chinese song and annals. Assembling a mighty army, he threw himself on the Mongolian hordes, and, signally defeating them, sent them flying from the Chinese territory.

But it was not enough to have repelled the enemy. The Mongols were a pertinacious foe; they always returned. It became necessary, therefore, to construct a barrier that would unfailingly perform its duty. The work had to be accomplished by hand, since no engineering devices were known to that day. Labor, however, was plentiful in that thickly populated realm, and swiftly the great wall sprang into position, grim and powerful and able to withstand any assault the Mongols might make. Its battlemented walls are 50 feet high, and at intervals of every few hundred feet they bristle with towers, where, in the old days, Chinese warriors stood ever ready to repel the invader. The wall is 25 feet wide and is built for the greater part of the way with mortared brick and stone.

Upon the accession of the Mings, that dynasty duplicated for a considerable extent Shi-Hoangti's wall, and thus for a large part of the distance there is a double wall. The most impregnable portion of the wall was that at Pa-ta-ling, for this gate was only 60 miles from Peking, and there it was that any charges directed against the greatest and richest city of the nation would have to be repulsed.

One great battle was fought there for at the top of the Nankou Pass the gate was the scene of the last stand against the famous Genghis Khan, and when he overrode the defenders it was down the pass and through the gate that the conqueror lost his forces. He took the Mongols into China and subdued a country against which his countrymen had been fighting for 1,300 years. Kubla Khan also entered by this pass when he completed the conquest of China and made of his realm the greatest the world had ever known.

Time and opportunities being taken into account, the building of the great wall of China was probably the greatest construction enterprise ever entered into in the entire history of the world, the Pyamid of Egypt clearly occupied a secondary place. Its destruction, like its creation, will mark an epoch in the world's history. Old things are clearly in the past, and the passing of half a century may well see China in the foremost rank of nations.

The American Contractor.

DESIGN IN CHIMNEY PIECES.

Comments by "The Architect" on the General Subject of Chimney Pieces and Ingle Nooks, with Some Reference to Mr. Guy Codogan Rother's Book of That Name.

Of all the features that go to form points of interest within a house none is of greater importance than that which emphasizes the hearth, the focus of the Romans, whose very name has become in our own language the synonym for the point of concentration and the center of radiation. The study, therefore, of the various means by which the expression of all that the hearth implies has been attempted at various periods of artistic development is one of both absorbing interest and valuable instruction for those who have, in our own day, to produce in modern architecture the accentuation of the most prominent center of the home. Thus Mr. Rothery, in his monograph of the treatment of the fireside has had a subject richly stored with admirable instances of diverse treatment, and he has made good use of his opportunity.

In dealing with chimney-pieces and ingle-nooks our author has adopted the historical method, and has traced the development of the fire place and its adjuncts from the heating arrangements of the Greeks and Romans to the latest devices of the twentieth century. The practical absence of the chimney, and the greater prevalence of the hypocaust system of warming amongst the Romans leads to the inference that the fire place of their civilization must have been closely allied to the primitive methods of semi-nomadic tribes and hut dwellers, and that whilst these latter led, on the one hand, to the central open hearth of our early mediaeval halls, a development in another direction produced the mound-like enclosed stoves of Central Asia and the northern regions of our continent.

As Mr. Rothery points out, the lateral fire place with its consequent chimney-piece and the still further development of the ingle-nook "possess no great antiquity, as measured by the long strides of human progress." The eleventh century of our era seems to have seen the first commencement of the struggle between the primitive, but from the point of view of warmth, effective central open hearth, and the more convenient fire place on a lateral wall, and the well known example at Penshurst shows how protracted was the struggle ere the inconveniences of the former type led to its complete abandonment.

In the days when wood was practically the only fuel of the domestic hearth it will be noticed that the hood of the chimney-piece was of more importance than the jambs. The burning logs occupied a considerable space on the hearth, their smoke was widely diffused, comparatively slow in ascent, and, if at times wafted into the apartment, not entirely unpleasant, either in its odor or its blackness, whilst the wide distribution of the actual sources of heat rays rendered it desirable that lateral as well as frontal radiation should be obtained as far as possible. Hence the broad and strongly projecting hood usually corbelled out considerably from the supporting jambs.

The corbelled hood was most readily and suitably constructed in stone, and hence we may understand why, as Mr. Rothery tells us, "carved stone was the usual material for chimney-pieces up to well in the sixteenth century. Such material as was locally at hand was commonly used. Thus we have hard building material in Derbyshire and Northumberland, white and greyish yellow chalk in Kent and Sussex, hard, but easily handled, sandstone, and the more brittle, greyish black slate in Italy, the soft stones in Normandy and Brittany." The use of stone, occasionally but rarely combined with brick, was then the prevalent custom in mediaeval fire places, and the author gives descriptions of individual instances, both of typical and of exceptional treatment. In this way he builds upon the historical basis of his book an explanatory exposition of the methods of design that find exemplification in the well-chosen examples to which he refers. By grouping together examples of allied treatment, we are led to recognize the existence of types as for example, in the description given us of fireplaces with multiple hearths, a more general method we are told of providing, in the middle Gothic period, for the adequate warming of great halls than the multiplication of separate fire places.

When in the middle of the sixteenth century wood came into favor for chimney pieces, gradually usurping the primary place in England, northern and middle Europe, it should be regarded, we think, as part of the general disposition to develop the art and craft of the joiner in the internal architecture of buildings rather than as something peculiar to the fire place. We may, indeed, see that instead of being a distinct and isolated entity as was the stone built hood the wooden mantel piece became an element in a general scheme of panelled treatment of an interior, and this without the fire place losing the character of the dominant feature of the room. The change from stone to wood also brought with it a variation in the general form of the chimney-piece. The concave, or pyramidal form of the hood gave way to the rectangular and vertical breast,

the stone corbelling to enclosing lines and the chimney-piece became a frame around the fire place rather than a smoke collector above the hearth.

A pleasant interference from the study of this method of this book is given in a further chapter on the use of chimney pieces in Gothic and Renaissance work more particularly in connection with chimney pieces. In this chapter is discussed the merits and the defects of various applications of the figure, and the main lesson is enforced that whilst such figures could not be merely ornament but integral portions of the design and therefore filling the function of support, they should do so without conveying any expression of undue strain or over-powering load.

Resuming the historical method out and on leads us through a consecutive contemplation of the earlier and later Renaissance chimney-pieces to those of the nineteenth century, giving us on the way some excellent criticism of the individual characteristics of the masters of the English school, Inigo Jones, Christopher Wren, Grinling Gibbons, William Kent, Isaac Ware, Robert Dance, William Chambers, Robert Adam, Joan Soane and others. Then we come to the considerations of current practice, in which descriptions of thoughtful design by living architects, with their varied experiments in form and material, are critically furnished. Mr. Rothery draws attention to some excellent applications of the use of brick and other constructive material in modern fire place design, but does not sound the warning note, which strikes us as necessary, of an affected over-accentuation of roughness and rusticity.

Although descended by way of the farm house chimney corner from the mediæval cooded fire place, the inglenook is really a modern institution, and the examples illustrated are therefore of recent design. It is notable that at the present day our architects have let the most part, recognized that the ingle should not be to much of a nook, but that whilst providing a cosy corner should still permit of the adequate warming from the fire place of the remainder of the room.

A final chapter on the closed stoves of Germany and Russia brings to a close a book of high educational value, whose admirably selected illustrations are most usefully supplemented by the opportunities afforded for further study in the cited examples and appended bibliography.—From Construction.

ARCHITECTURAL CLUB'S ANTIOCH OUTING.

The San Francisco Architectural Club returned last Monday week on the steamer J. D. Peters from their annual outing at the Golden Gate Brick Co's Antioch plant where Pratt Bros.' famous bull's head dinner was served.

Forty-three members left Saturday noon on the steamer T. C. Walker at 6 P. M., arriving at Antioch at midnight. All are enthusiastic over the good time and good things they had to eat. A special dinner had been prepared on the Stockton boat Saturday night and after dinner speeches were made by Past President August Headman, E. H. Hildebrand, Captain Petzinger, of the steamer Walker, Vice-President Nye, R. B. Cheyborn, M. Jacobs, C. F. Pratt, Johny Beuttler (chairman of the entertainment committee) and George Greenwood.

Married Men's Baseball Team. Winners of This and Last Year's Games.

On the arrival of the boat at Golden Gate Landing, the crowd was escorted to "Hotel Barewalls" (named for the Club's president), where lunch and refreshments were served. At one o'clock "suites" in the "straw room" were assigned to all, but Headman and Hildebrand were dissatisfied with their room mates and finally caused so much disturbance that the entire hotel was torn to pieces, beds destroyed and left nothing to do but sit up and wait for breakfast time, which was 7 hours away.

Breakfast was served at 8:30 Sunday morning and the forty-three boys consumed the following: 35 large Persian musk melons (first time in America), 60 cups of coffee, 180 hot Parkerhouse rolls, 140 pieces country sausage, 2 Kingham hams, 130 fried eggs and forty large potatoes fried in batter.

The balance of the day was spent in swimming, fishing, watermelon eating contest, tugwar and a baseball game.

A new feature this year was the cooking of two whole lambs instead of the Bull's head. The breakfast and dinner was cooked by C. F. and L. H. Pratt, of the Golden Gate Brick Co., and the members of the club are saying they were the finest meals they ever sat down to.

The lambs were cooked in the following manner. After being well seasoned and wrapped in white cloth they are put in a hole in the ground in which a fierce fire has been burning for 6 hours. The sides and bottom of the hole are lined with brick and after the lambs are put into this hole, it is covered over making a fireless cooker out of the same. The lambs are left in the hole for 24 hours and the heat from the bricks cook them, while the oak coals help to flavor the lambs.

The Pratt Brothers learned this art from the early stock men of Tulare County. The following was the menu for dinner; Vegetable salad (Louie Tait's dressing), baked lamb, boiled bayon beans, boiled potatoes with jackets on, hot Parkerhouse rolls, apple sauce, country milk and coffee. The lambs were so tender that a knife was not used to carve them.

President S. F. Architectural Club and C. F. Pratt, Manager Golden Gate Brick Co., Who Cooked For The Boys.

The following are the results of the atheletic events: Watermelon eating contest, P. R. Ward, 1st, T. Pfluegger, 2nd; Tug of War, Antelier Class; Baseball game, married men's team, score 12 to 2, Umpire, August Headman; Fishing contest, Jas. E. Dwan, 1st (9

catfish, 1 salmon), Geo. Greenwood, 2d (2 bass, 1 catfish).

At 10:30 Sunday night all boarded the "Peters," went to bed immediately, arrived in San Francisco Monday morning at 7 o'clock.

The following are members who attended:

A. Headman, E. Hildebrand, Jas. E. Dwan, H. Nye, John Beutler, L. Cohn, Wm. Helm, T. Pfluegger, R. H. Wilson, Al. Goldman, E. Flanders, R. Locke, E. Bolderman, H. Leasen, P. Simpson, Jay B. Magee, J. Eckley, J. Norgrove, L. H. Pratt, G. Greenwood, W. Hubbard, P. R. Ward, J. Rosebrook, Wm. Garin, W. B. Cleghorn, W O'Keefe, G. Galley, H Lindacher, J. Turk, R. Shaw, J. Norberg, A. Lowenthal, M. Jacobs, A. Schroder, I. Fellner, W. A. Stone, Al. Williams, F. Allamand, P. Brouchoud, T. Mellen, M. Meherin, S. Flawn, M Morrison, Wm. Ohlandt.

Big Improvements For The Presidio.

Constructing Quartermaster's Force Busy on Detail Plans For Buildings, Boulevards and Gardens.

Much activity is being manifested by the various military authorities in command of the United States Army Posts in and around San Francisco Bay and detail plans for extensive improvements at Fort Mason, Fort Winfield Scott and the Presidio are being made. During the recent visit of the Secretary of War a promise was made the Constructing Quartermaster's office at Fort Mason of $1,600,000 for improvements out of the next congressional appropriation and undoubtedly the visit of General Woods, in the near future, will result in securing additional funds for this year's appropriation for the further development of the finest army post in the United States.

A Beautiful Park.

The first step in the big project is the development of plans for the beautification of Fort Mason and all adjacent lands outside of the Fair enclosure. General Murray has already ordered new plans prepared for a landscape scheme which contemplates miles of asphalt roads and cement side walks. An expert gardener will be employed to lay out parks, an alley of roses and palms and to superintend the planting of shrubbery, flowers and vines. Many of the old frame buildings will be removed and others necessary for the use of the post will be covered with ranking vines. The project is a large one and when completed will add to San Francisco one of the most beautiful of the city's parks from which a magnificent view of the entire Exposition grounds can be had. Details are being worked out by Engineer O. W. Degen under the direction of General Murray and Col. George McK. Williamson of the Constructing Quartermaster's Department. Much of the rough work in connection with the scheme will be done by the federal prisoners.

Gravity Oil System.

Only a few of San Francisco's citizens realize the extent of the recent developments undertaken by the United State Army Engineer at the Presidio. A most interesting and successful experiment has just been completed in the installation of the first gravity fuel oil system on a large scale which embraces all buildings within the Presidio Reservation. This system provides for the population of over 5000 and consists of a six-inch fuel oil pipe paralleling all water supply mains, with feeder pipes to all ranges and boilers which have been changed to the oil burning type. Three large oil reservoirs have been erected, one of 10,000 barrels and two of 3000 barrels.

In the recent tests of the system, conducted at the Presidio, a saving of 78% over cost of coal has been shown. So well has this system met the demands made upon it and with such a tremendous saving that an idea has been advanced of supplying San Francisco with a similar system, paralleling all water mains with fuel oil mains for heating and cooking purposes. The Was Department has expressed itself so well pleased with the results obtained at the Presidfo that the installation of a similar system has been ordered for Fort Baker. The system in use at the Presidio was designed in the Constructing Quartermaster's Office at Fort Mason by Engineer O. W. Degen, under the direction of Col. Williamson and Captain Walton.

At Fort Winfield Scott.

Plans have received the approval of the Washington office for a water heating system which is to be installed in Officers' Quarters Nos. 36 and 37 at Fort Winfield Scott. Specifications for this work are now being written and bids will be advertised for as soon as the work is completed. The system will include the installation of three boilers each of 661 square feet radiating surface. Radiators will be of the Rococo Tudor or Italian pattern. When completed this work will cost about $2560. The plant will be connected with the general fuel oil system.

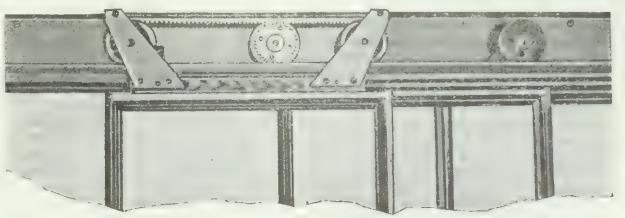
General Hospital.

Plans for the construction of five new buildings which will be erected in the vicinity of the General Hospital, have been completed and sent to Washington for approval. These buildings will include a stable, garage, combustible building, store house and shop building. Construction will be of the reinforced concrete type with exterior of asbestos shingles on the roofs. Stable building will furnish accommodation for 36 horses and will cover an area of 110x40 feet. Besides the main floor there will be a large loft. An estimated cost is placed at $16,000. Store house is to be a two-story and basement structure covering an area of 105x35 feet and will be equipped with an elevator. The cost is estimated at $15,000. The shop building will be a one-story structure 60x90 feet with a complete equipment of machinery, motors, etc., costing about $10,000. Garage will be one-story, 16x28 feet costing in the neighborhood of $3000. The combustible building will be 40 feet long and 32 feet wide, one-story in height and cost, when completed, about $3200. Exteriors of all buildings will be faced with cement plaster. Complete electric work and fixtures are provided for in each. This work, like all of the above, will be handled through the Constructing Quartermaster's office at Fort Mason.

HANGER AND OPERATING DEVICE

Some Distinctive Features of the Improved Monarch Hanger.

The Monarch Improved Hanger and Operating Device is an entirely new combination of hanger and operator for two-thirds opening doors. This hanger has several advantages over other hangers in the market at the present time because it combines all good features of other hangers. The Monarch Hanger is practically noiseless and does not have the unsightly



operating device such as bars connecting the doors which are found on most elevator fronts.

Another good feature of importance especially where automatic elevators are used is the spring mechanism attached to one wheel making it possible to close doors tightly merely by starting them. As generally known, the Automatic Elevator Cars are not a success unless the lock has a perfect electrical contract. This is assured by using the Monarch as the spring is so strong that it carries the door far enough to give the lock the proper contact. By merely revolving the wheel right or left, the spring tightens or loosens and accordingly the door moves quickly or slowly to suit conditions.

The Monarch Hangers are noiseless due to the fact that the wheels have wide bearing surface and run on hardwood tracks, therefore, it is not necessary to use oil or grease on tracks as are required on other hangers and which is usually overlooked by the elevator operator. The Monarch Hangers are roller bearing with 3-16 inch diameter steel pins rolling in graphite. The pick and post wheel device is an extra feature of the Monarch which makes one door travel twice as fast as the other but. It is made of machine brass thereby making it strong and having very little friction.

The Monarch Hanger and Operating Device is used in connection with South California and has proved entirely satisfactory. It is fairly cheap, a California product.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 3 story and base, frame, $12,000. Architect, none. Owner, W. W. Yager, 1029 Hyde St., S. F. The building will cover an area of 32x93 feet, and has been arranged for twelve apartments of two and three rooms each. There will be a central heating system, hot and cold running water in all rooms and wall beds. Each apartment will have its own private bath. Interior trim will be of pine with some oak floors. The exterior of the building will be covered with shiplap and brick veneer. Plans are complete and the work will be done by Day Labor. The same owner also has plans complete for a similar building which will be erected at once on an adjoining piece of property.

Los Angeles, Cal.—Apartment house, 3 story and base brick. Cost not stated. Architect, E. J. Borgmeyer, Stimson Bldg., L. A. Owner, E. C. Bower. This building has been designed to contain 80 rooms, which will be arranged in suites of two and three rooms each with baths and wall beds. The building will cover an area of 188 140 feet. There will be steam heat, elevator service and a vacuum cleaning system. The exterior will be faced with pressed and glazed brick. Plans are now being prepared. Bids will be called for shortly.

Los Angeles, Cal.—Apartment house, 3 story and base, brick and frame. Cost not stated. Architect, E. B. Neinardus, Higgins Bldg., L. A. A two-story and basement frame dwelling will be raised and a story added. When complete the building will contain 13 rooms and 20 baths rooms. There will be new interior finish, plumbing, electric work, plastering and painting. The exterior of the building will be covered with brick veneer. Plans are being prepared and will go out for figures very shortly.

Pasadena, Los Angeles Co., Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, L. A. Cooke, 100 East Colorado St., Pasadena. Owner, Mrs. F. T Dandy The building will contain 53 rooms, which will be arranged in suites of two and three rooms each. There will be private baths and wall beds. There will be steam heat, a vacuum cleaning system and hot water heater. All interior finish will be of pine. Composition floors will be used in the baths. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

Los Angeles, Cal.—Apartment house, 4 story and base, brick and steel, $50,000. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owner, W. A. Barker. The building will cover an area of 60x115 feet, and will contain 81 rooms besides the social room, billiard room and laundry. Apartments will be arranged in suites of two and three rooms each. There will be private entrances and connecting baths. A steam heating plant, elevators and a vacuum cleaning system will be installed. Composition floors will be used in the bath rooms. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Los Angeles, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owner, J. S. Dodge. The building will contain 53 rooms, which will be arranged in suites of two and three rooms each with private baths. There will be steam heat and a vacuum cleaning system. Hot and cold running water will be supplied in all rooms. The exterior of the building will be faced with rustic. Plans are being prepared.

Los Angeles, Cal.—Apartment house, 3 story and base, brick, $50,000. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owner, J. F. Jack. The building has been designed to contain 76 rooms, which will be arranged in suites of two and three rooms each. There will be private baths, steam heat, wall beds and a vacuum cleaning system. Thee will also be a large lobby and amusement room. Interior finish will be of pine and oak. Composition floos will be used in the baths. Exterior of the building will be faced with pressed brick Plans are complete and the architects are taking figures on the work.

Seattle, Wash.—Apartment house, 3 story and base, brick, $50,000. Architects, Blackwell & Baker, Northern Bank Bldg., Seattle. Owner, H. Amon. This work has been mentioned here before. At that time the owner intended to erect a six-story building, but has since changed his mind. A one story structure is now on the site, and this will be extensively altered and two additional stories added. Plans will be eady for figures in about two weeks.

Contracts Awarded.

Los Angeles, Cal.—Apartment house, 3 story and base, brick, $45,000. Architect, Whitting Thompson, Douglas Bldg., L. A. Owner, W. E. Curry. Contractor, Bert Chellis, Higgins Bldg., L. A. Contract price $45,000. Note: Plans for this work have just been started by the architect

Los Angeles, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, U. M. Thomas. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price not stated. Note: The same owner has also awarded to this company a contract to construct 15 frame bungalows on the same tract with the apartment house.

Long Beach, Los Angeles Co., Cal.—Apartment house, 4 story and base, brick. Cost not stated. Architect, A. S. Heineman, San Fernando Bldg., L. A. Owner, Nora T. Waldron. Contractors, Long Beach Improvement Co., Long Beach. Contract price not stated.

San Francisco—Apartment house, 5 story and base, reinforced concrete, $35,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, James E. Reiter. Contractors, Bay City Building Co., S. F. Contract price, $25,000.

BANKS.

Contracts Awarded.

Auburn, Placer Co., Cal.—Bank, 2 story and base, reinforced concrete, $35,000. Architect, Charles S. Kaiser, Mechanics' Institute Bldg., S. F. Owners, Placer County Bank. Contractor, Herdal, Auburn. Contract price not stated.

BRIDGES, DAMS AND HARBOR WORK.

Oakland, Cal. — Bridge, reinforced concrete, $5,000. Engineer, City Engineer P. P. Brown, City Hall Annex, Oakland. Owners, City of Oakland. Plans for the Eighth Street Bridge are being prepared in the City Engineer's office, and it reported that they will be out for figures within two months. This bridge will be 110 feet long and 60 feet in width. Complete particulars will be given when the plans are finished.

CHURCHES.

San Francisco—Church, steel, brick and stone, $150,000. Architects, Shea & Lofquist, Italian Bank Bldg., S. F. Owners, Salesian Fathers. This work was mentioned here when the architects were first commissioned to prepare the plans. The building will have a complete steel frame and will be fire proof throughout. A contract for the excavating and grading has been awarded and plans for the balance of the work are now out for bestres. The interior will be finished in Italian marble, Caen stone and ornamental plaster. The exterior of the building wil

be faced with stone and terra cotta. Plans are out for figures

FACTORIES & WAREHOUSES.

San Francisco—Warehouse, 2 story and base, brick, $10,000. Architect, Oliver Everett, 1940 Webster St., S. F. Owner, Joseph Lenormand. The building will be erected in the south line of Tehama street, near Third, and will be 50x80 feet. Construction will be sufficiently heavy to carry additional stories in the future There will be a freight elevator. Metal sash and doors will be used. First floor will be of cement. The exterior of the building will be faced with stock brick. Plans are now being prepared.

San Francisco—Factory, 1 story and base, reinforced concrete, $12,000. Architect, Frederick H. Meyer, Bankers' Investiment Bldg., S. F. Owners, Spring Patent Tire Co. The building will be erected on a corner in the automobile district and will cover a ground are of 90x120 feet. The factory and shipping rooms will be located in the rear portion of the building and office will occupy the front part. The exterior will be faced with cement plaster. Plans will be completed as rapidly as possible and figures will be called.

Oakland, Cal.—Express depot, 1 story brick. Cost not stated. Architect, J. H. Humphreys, Wells-Fargo Bldg., S. F. Owners, Wells-Fargo Express Co. The building will be erected near the new 16th street depot, and will be used as a train office and warehouse by the owners. There will be metal sash and doors. The exterior of the building will be faced with pressed brick. Considerable structural iron will be used Plans are complete and figures are being taken.

FIRE HOUSES.

Oakland, Cal.—Fire house, 2 story and base, frame, $10,000. Architect F. D. Voorhees, Central Bank Bldg., Oakland. Owners, City of Oakland. The station will be erected on Montgomery street, near Howard street and has been designed to contain quarters for one hose company. Apparatus room, stables, etc. will occupy the first floor, while the second floor will be arranged for living apartments for the firemen. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

FLATS.

San Francisco—Flats 2 story and base, frame, $4,500. Architect, none. Owner, J. Johnson, 488 9th Ave., S. F. The building will cover an area of 25x58 feet, and will contain two flats of five and six rooms each. The interior finish will be of pine and redwood. Some oak floors will be used. There will be large bath rooms in each of the flats. Tile will be used in the kitchen. There will be gas grates and tile mantels. The exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Flats 2 story and base, frame, $3,000. Architect, none. Owner, Lorenzo Del Carlo, 1111 Lombard St., S. F. The building will contain two small flats of four and five rooms each with baths. The interior will be finished entirely in pine and redwood. There will be gas grates in the living rooms with tile mantels. The exterior of the building will be covered with rustic Plans are complete and the work will be done by Day Labor.

San Francisco—Flats, 2 story and base, frame, $4,000. Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner, B. Beccas. This work has been mentioned here before when the plans were being prepared. All drawings are now complete and bids will be taken at once. The building has been arranged for a store on the first floor and two flats of four and five rooms on the upper floors. Interior finish will be of pine and redwood with some oak flooring. There will be open fire places and tile or brick mantels. Tile will be used in the bath room. The exterior of the building will be covered with rustic and shiplap.

GARAGES.

Berkeley, Alameda Co., Cal.—Garage, 1 story, brick. Cost not stated. Architects, Pacific Architectural and Engineering Co., 251 Kearny St., S. F. Owner, Blimm S. Bryant. The building has been designed for a commercial garage. Floor will be of cement and there will be large oil storage tanks. The front portion of the building will contain the office and a repair shop and storage space will occupy the rest of the building. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

San Francisco—Garage, 2 story and base, brick and steel, $30,000. Architects, Oser Bros., Western Metropolis Bank Bldg., S. F. Owners, I. L. Rosenthal & Sons. This building has been mentioned in these columns before. Plans were recently out for figures but bids were too high and plans are now being revised. The building is to be erected on Van Ness avenue, and will have a frontage of 70 feet and a depth of 129 feet There will also be an L, 50x31 feet The front portion of the building will be given over to sales rooms and offices. Repair department and storage space will occupy the balance of the structure. The exterior will be faced with pressed brick. Revised plans will shortly be ready for figures.

GOVERNMENT WORK AND SUPPLIES.

Yards and Docks—Pending Projects.

The following projects bids for which were opened at dates noted below, are pending at the office of the bureau of yards and docks:

August 3, commandant's quarters and five officers' quarters at the naval station, Pearl Harbor.

August 31, one 15-ton locomotive crane for delivery at the naval station, Pearl Harbor, H. T.

Mare Island Yard, Capstan.

The bid of the Hyde Windless Co. Bath, Me., $5,990 is reported has been accepted for furnishing three electrically driven capstans for delivery at the Mare Island navy yard

Office and Laboratory, Puget Sound.

The chief of the bureau of yards and docks, Navy Department Washington D. C., has accepted the bid of the Puget Sound Bridge and Dredging Co. Seattle, Wash., at $8,893, for constructing an office and laboratory at the navy yard, Puget Sound, Wash.

Reclamation Work.

The Secretary of the Interior has awarded contract to Manny Bros. & Co., of Boise, Idaho, for the construction of the second unit Interior, Klamath project, Oregon-California. The work involves the excavation of approximately 300,000 cubic yards of earth, the total contract price being $67,212.50.

Structural Steel Work for Shop Buildings at Balboa.

Bids are to be opened by the purchasing officer of the Isthmian Canal Commission on **October 18, 1912**, under circular No. 730, for structural steel work for the permanent shop buildings at Balboa, Isthmus of Panama, and to erect the crane rails for same. The material is to be furnished for 16 buildings as follows

Structural steel frame work erected in place including erecting crane rails for—

Building No. 1, machine and tool shops.

Building No. 2, forge shop.

Building No. 3, steel storage shed.

Building No. 4, boiler and shipfitters' shop.

Building No. 9, galvanizing building.

Building No. 12, foundry.

Also structural steel frame work erected in place for—

Building No. 5, general storehouse.

Building No. 6, paint shop.

Building No. 7, car shop.

Building No. 8, planing mill.

Building No. 10, lumber and equipment shed.

Building No. 11, pattern storage building.

Building No. 13, coke shed.

Building No. 14, boiler house.

Building No. 15, round house.

Building No. 16, gas house.

Bids are requested under two propositions:

(A) For furnishing and erecting all of the structural steel work for all of the above buildings including erecting crane rails, and

(B) For furnishing a portion of the structural steel work delivered unloaded and stored at the building site by the contractor, not erected or field painted by him as noted.

Prices are to be per pound and the contractor is to estimate the weight of each house.

It is desired that all buildings shall be completely erected and painted not later than June 1, 1913, and the guaranteed time for final erection will be an important factor in awarding the contract. The commission will have the foundations ready for setting of the buildings by February 1, 1913. The buildings are intended to be permanent shops of the Panama Canal organization, the estimated life of material being 75 years or more.

The contract shall [illegible] the construction and erection [illegible] cover the entire [illegible] structural steel work [illegible] for the complete [illegible]

ings. The contractor shall also furnish all the necessary crane stops and cast iron crane rail clips. The crane rails and crane rail splices, with bolts, will be furnished at the building site by the commission and erected by the contractor. The doors, windows and other wood work will be furnished and erected by the commission. The metal screens, roofing, siding, flashing, and connections will also be furnished by the commission, and the masonry plates, anchor bolts, and angles set. No roofing material, gutters, or down-spouts are included in the contract.

The commission will transport free all material and erecting plant from Colon, Cristobal or Balboa to the building site, will furnish without charge storage grounds and necessary tracks near the building site, will do necessary switching, also supply free of cost all electric current and water.

A set of plans may be obtained upon application to the general purchasing officer, Washington, D. C. Such application should be accompanied by a certified check for $25, payable to the order of the disbursing officer.

The buildings are to be of the following dimensions:

Building No. 1 to be 100 feet wide, 358 feet 5 inches long, 13 feet eave to main trusses, and will be equipped with 1 60-ton overhead electric traveling crane and 1 40-ton and 1 20-ton crane.

Building No. 2 will be 90 feet 1 inch wide, 358 feet 5 inches long, 13 feet high to trusses, will be equipped with 1 25-ton overhead electric traveling crane.

Building No. 3 will be 50 feet 1 inches wide, 358 feet 5 inches long, 35 feet high to roof trusses with a monitor the full length of the building, and will be equipped with 1 15-ton and 1 2-ton overhead electric traveling crane.

Building No. 4 will be 120 feet wide, 358 feet 5 inches long, 13 feet high from floor to main trusses and will be equipped with 1 60-ton and 1 20-ton overhead electric traveling crane.

Building No. 5 will be 120 feet wide, 100 feet 1 inches long, with two stories in height, the distance from top of first floor to top of second floor will be 20 feet and from top of second floor to roof trusses 20 feet.

Building No. 6 will be 50 feet 1 inches wide, 253 feet long, 21 feet high from floor to roof trusses.

Building No. 7 will be 122 feet 4 inches wide, 316 feet 6 inches long, 21 feet high from floor to roof trusses.

Building No. 8 will be 122 feet 4 inches wide, 100 feet 7 inches long, 21 feet high from floors to roof trusses.

Building No. 9 will be 10 feet wide, 11 feet 1 inches long, 24 feet high from floor to lower chord of roof trusses. It will be equipped with 2 2-ton overhead electric traveling crane.

Building No. 10 will be 122 feet 4 inches wide, 548 feet 2 inches long and 21 feet high from floor to roof trusses.

Building No. 11 will be 60 feet wide, 120 feet 2 inches long, 2 stories in height, first floor being of concrete and the second of reinforced concrete slab, supported by steel beams and girders. The distance from top of first floor to top of second floor will be 18 feet and from top of second floor to underside of rafter norms to feet.

Building No. 12 will be 119 feet wide, 316 feet 3 inches long, 16 feet from floor to lower chord of roof trusses 43 feet. The center aisle will be equipped with 2 25-ton overhead electric traveling cranes, and the northwest lean-to with 1 15-ton overhead electric traveling crane.

Building No. 13 will be 20 feet wide, 168 feet 8 inches long, 15 feet high from floor to roof trusses.

Building No. 14 will be 50 feet 1 inches wide, 50 feet long and 30 feet high from floor to roof trusses.

Building No. 15 will consist of 15 stalls each 11 feet 2½ inches wide center to center of column at the front, 27 feet 8½ inches wide center to center of columns at the rear, and 76 feet deep, center to center of columns. It will be 16 feet 8 inches high from floor to underside of roof beam at the rear and will have an upward slope toward the front of ¾ inch per foot.

Building No. 16 will be 22 feet wide, 30 feet long, and 12 feet high from floor to roof trusses.

Description of Buildings.

The building in general will be of the usual mill building type of construction with steel frame work. The sides and ends with certain exceptions, will be enclosed for a distance of 6 feet above the floor line by a concrete wall 12 inches thick, outside face of which will be 2 inches outside of the outside face of the steel columns. Protection from sun and rain will be obtained by means of overhanging shed roof along the sides and ends. The space between the top of concrete wall and top of lower sheds will be enclosed by metal screens, the remaining space, except as shown on plans, will be entirely open. The purlins will be extended beyond the end trusses enough to protect the gables.

The panels have in all cases, except for the coastal coaling, boiler house, and pattern storage building, been made the same length, 21 feet 1 inch, and the widths of the aisles of the different buildings have been kept as nearly as possible the same. A standard gauge railroad track will extend the full length of the building site, passing through the middle channels of buildings numbered 1, 2, 3, and 4. The steel required shall be made by the open hearth process.

Reclamation Project Extensions.

A number of important extensions to reclamation projects have been recently approved by the Secretary of the Interior as follows:

Umatilla Project—The west extension of the Umatilla project was formally approved March 7, 1912. The beginning of construction work is contingent upon the completion of satisfactory arrangements with at least 75 per cent of the private lands involved. This extension lies west of the Umatilla River, provides for the ultimate irrigation of about 30,500 acres and is to be supplied by a gravity system with storage development on the Umatilla River independent of the older portion of the project. To the extension have recently been added two areas on the east side of the river, one of 240 acres, including the town site of Umatilla, and one of 850 acres, comprising lands under the Brownell ditch.

Salt River Project—On July 1 the reclamation service was authorized to execute agreements with the Western Canal Construction Co. and the High Line Construction Co., by the terms of which these corporations will construct and transfer to the United States, free of incumbrance, to be operated as a part of the Salt River project, a main gravity canal, known as the Western Canal, and a branch to be operated as a pumping proposition for the irrigation of land above the gravity canal. These lands will receive water on the same basis as other portions of the project and pay the full acreage building charge, but will be given credit for the amount expended in construction. This development will add about 13,000 acres to the irrigable area of the project.

North Platte Project—On August 16 the Fort Laramie unit of the North Platte project was formally approved, with the provisos that no construction work be begun until at least 95 per cent of the private holdings have been pledged for the repayment of the proportional cost of the project, and that instead of the usual organization of water-users a form of trust deed be used which will secure a lien on the lands and require the sale of holdings in excess of 160 acres. This unit lies on the south side of the North Platte River, mainly in Wyoming, and includes part of the "Goshen Hole" country. It will cover approximately 107,000 acres and will obtain its water supply through a main canal diverting from the river at Whalen dam.

Yakima Project—The Secretary approved August 27 a form of special lien contract under which the reclamation service will construct a pumping plant to irrigate about 11,000 acres of land as part of the Sunnyside unit. The cost of this plant is to be borne by the lands benefitted in addition to the regular building charge for gravity lands. Before construction is authorized 95 per cent of the private lands must be subscribed in the Sunnyside Water Users' Association, excess holdings disposed of, and special contracts executed and recorded.

HALLS AND SOCIETY BUILDINGS.

Sacramento, Cal.—Armory work. Cost not stated. Architect, State Architect, Woollett, Sacramento. Owners, State of California. Bids were opened in Sacramento today, October 2nd, for the electric work, plumbing and heating and ventilating for the Sacramento Armory. A complete list of these bids will appear in the next issue.

Los Angeles, Cal.—Armory, 2 story and base. Class A construction. Cost not stated. Architect, State Architect Woollett, Sacramento. Owners, State of California. Bids will be opened on October 21st for the construction of this building. The work will be figured both as a whole and segregated. Plans and specifications can be secured from the State Department of Engineering at Sacramento. A complete description of the work will appear in the next issue of the Building and Industrial News.

Contracts Awarded.

Sacramento, Cal.—Armory work. Cost not stated. Architect, State Architect, Woollett, Sacramento. Owners, State of California. Contractors, California Construction Co., Monadnock Bldg., S. F., contractor for structural steel. Contract price, $13,500.

HOSPITALS.

San Mateo, San Mateo Co., Cal.—Hospital, 3 story and base, reinforced concrete, $150,000. Architect, Lewis P. Hobart Crocker Bldg., S. F. Owners, Red Cross Hospital Association. Plans for an extensive addition to the present building are complete and figures are being taken. The building will contain the most modern operating rooms, wards and special treatment rooms of any institution of its kind on the coast. Besides the above mentioned rooms there will be a number of private wards. The exterior of the building will be faced with Stockton terra cotta. Plans are now out for figures.

Stockton, San Joaquin Co., Cal.—Hospital, 2 story and base, brick and reinforced concrete, $100,000. Architect, Walter King, Elks' Bldg., Stockton. Owners, St. Joseph's Home, represented by Father McGeorge. Plans for the building are now being prepared and provide for a two-story and basement structure with foundations and walls of sufficient strength to carry and additional story. There will be two public wards and a number of private rooms operating rooms and baths. There will be two elevators a steam and hot water system of heating and a vacuum cleaning system. All interior work will be finished in white enamel. The exterior of the building will be faced with cement plaster or pressed brick. Bids will be called for on both the brick and steel and reinforced concrete type of construction.

HOTELS.

San Francisco—Hotel, 4 story and base, brick and steel, $50,000. Architects, Welsh & Carey, Western Metropolis Bank Bldg. S. F. Owner, W. F. Poladian. The building will be designed for a large restaurant on the first floor and consist of 60 rooms and baths on the upper three floors. There will be a central heating system and running hot and cold water. The interior will be finished in pine throughout. The building will be erected on Washington street, between Montgomery and Sansome, and will extend through to Commercial. The exterior will probably be faced with cement plaster. Plans are now being prepared.

San Francisco—Hotel, 3 story and base, reinforced concrete, $25,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will cover an area of 100x72 feet. The first floor is to be arranged for stores and the upper floors will be subdivided into about 70 guest rooms. There will be steam heat and running hot and cold water in all rooms. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

San Francisco—Hotel, 7 story and base, brick and steel, $65,000. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. This work has been mentioned here before when plans were first started. Probate proceeding are now completed and the owners are now ready to get the construction under way. The building will cover an area of 37½x87½ feet. A large lobby and office will be located on the first floor, while the upper floors will be divided into considerably over 100 guest rooms. The mechanical equipment will consist of steam heat elevators, a vacuum cleaning system and hot water heater. About 50 per cent of the rooms will have connecting baths. The exterior of the building will be faced with pressed brick. Plans will be out for figures within a few days.

Oak Knoll, Los Angeles Co., Cal.—Hotel addition and finishing construction, $100,000. Architect, Myron Hunt, Hibernian Bldg., L. A. Owner, H. E. Huntington. At the preent time the building consists of a four-story structure 150x50 feet, with three of the floors finished. Two additional stories will be added. Each floor contains about 78 rooms and 40 baths. Construction throughout will be of the reinforced concrete type. The interior will be handsomely finished. The exterior will be faced with cement plaster. Plans are being prepared.

Los Angeles, Cal.—Hotel, 3 story and base, brick, $40,000. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owners, Bryant and Bradford. There will be several stores in the first floor and about 60 rooms and 20 baths on the upper floors. There will be steam heat and hot and cold running water in all rooms. The exterior of the building will be faced with pressed brick. All interior finish will be of pine. Plans are complete and the architects are taking figures on the work.

Ocean Park, Los Angeles Co., Cal.—Hotel, 6 story and base brick and steel. Cost not stated. Architects, Eager & Eager. Story Bldg., L. A. Owner, E. A. Allen. The building will cover an area of 85x75 feet. There will be three stores besides the lobby and office on the first floor. Upper floors will be subdivided into about 96 guest rooms. All rooms will be provided with either tub or shower baths. There will be steam heat, both freight and passenger elevators, a vacuum cleaning system and all other conveniences. The exterior of the building will be faced with pressed brick. Architects are now completing the plans and will call for figures within a short time.

Sacramento, Cal.—Hotel, 6 story and base. Class A construction. $250,000. Architects, Cuff & Diggs, Sacramento. Owners, Marsh Investment Co. Bids for the construction of this building, which has been mentioned here a number of times, were opened on September 24th. Twelve sets of figures were received. Lindgren & Co., and Lewis A. Hicks Co., both San Francisco firms, were tied at low for $260,000. This amount is considerable in excess of the estimated cost and it is doubtful if a contract will be let at that figure. For a complete list of all bids received see under Sacramento, Stockton and Northern California in this issue.

Contracts Awarded.

Los Angeles, Cal.—Hotel, 4 story and base, brick, $35,000. Architects, Garrett & Bixby, Currier Bldg., L. A. Owners, L. L. Bowen and W. C. Norman. Contractor, J. H. Pence Builders' Exchange, L. A. Contract price, $34,960.

RAILROAD CONST., STATIONS AND EQUIPMENT.

Redondo Beach, Los Angeles Co., Cal. Railroad shops, etc. brick construction. Cost not stated. Engineer, N. E. Halsey, Pacific Electric Bldg., L. A. Owners, Pacific Electric R. R. Co. Six building are to be erected, and will be used for shops, barns, etc. One will be 200x460 feet, another 130x200, the others 40x110 feet, 40x85 feet and two 40x40 feet. Exterior walls will be of stock brick. There will be metal window frames and sash. Plans are being prepared.

RESIDENCES.

San Francisco—Residence, 2 story, attic and base, frame, $8,000. Architect, Oliver Everett, 1940 Webster St., S. F. Owner, J. A. Bergerot. The dwelling will contain in the neighborhood of nine rooms, bath and laundry. All interior finish will be either of pine or oak. Hardwood floors will be used throughout the first story. There will be steam heat and open fire places. Tile and composition will be used in the bath room and kitchen. Mantels will be of tile and brick. There will be some ornamental iron. The exterior of the house will be covered with brick veneer and shiplap. Slate will be used on the mansard roof. Plans have been out for figures and a contract will be awarded shortly.

San Francisco—Residences, 2, 2 story and base, frame, $2,000 each. Architect, none. Owner, A. Klahn, 27 Chenery St., S. F. Each of these houses will contain six rooms and bath. The interior will be finished in pine and redwood. There will be open fire places with tile and brick mantels. The exteriors of the houses will be covered with shingles and brick veneer. Plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Bungalow, 1½ story and base frame, $2,000. Architect, none. Owner, Ralph J. Hutton 1039 Franklin St., S. F. The dwelling has been designed for a six room house with bath and laundry. The interior will be finished in pine and redwood with some oak floors. There will be open fire places and tile or brick mantels. Tile will be used in the bath and kitchen. The exterior of the house will be covered with shingles. Plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, $6,000. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Mr. Sheehan. This house will be erected in the Richmond District and will contain seven rooms and bath. The interior finish will be of pine and oak with oak floors in the principal rooms. There will be furnace heat and open fire places. Composition floors will be used in the bath room. Tile will be used in the kitchen. Mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and ready for figures.

San Francisco—Residence, 2 story and base frame and stuck, $7000. Architect, Frederick H. Meyer, Brokers' Investment Bldg., S. F. Owner, Louis S. Boady. The dwelling is to be

designed for an eight-room house with sleeping porches, baths and laundry. The interior will be finished in pine, redwood and hardwoods. Oak floors will be used throughout except in the bath rooms, which will have composition flooring. There will be a central heating system and open fire places. Mantels will be of brick or tile. The exterior of the house will be covered with veneer pressed brick. Plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, $2,000. Architect, none. Owner, O. M. Bullock, 1952 Broadway, Oakland. The bungalow will contain six rooms and bath. The interior finish will be of pine and hardwood. Oak floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

Oakland, Cal.—Bungalow, 1 story and base frame. Cost not stated. Architects, Hutchinson, Bros. 1st Broadway, Oakland. Owner, R. H. Van Sant. The dwelling is to contain six rooms and bath. All interior trim will be of pine. Some oak floors will be used. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with shingles. Plans are in the hands of the owner and the work will be done by Day Labor.

Piedmont, Alameda Co., Cal.—Residence work, concrete wall, works, etc. $4,500. Architect W. H. Ratcliff, First National Bank Bldg., Berkeley. Owner, A. H. Breed. The work will consist of the construction of a frame garage, concrete retaining wall, fences, works and landscape gardening. Plans are complete and the architect is now taking figures on the work.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame. Cost not stated. Architect none. Owner, Joan Franklin, 1515 Dwight Way, Berkeley. The dwelling will contain six rooms and bath. All interior finish will be either of pine or redwood. Oak floors will be used in the dining room and living room. There will be open fire places and brick mantels. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The dwelling, a design designed for an eight-room house with sleeping porch, attic and a laundry. The interior will be finished in pine redwood and hardwoods. Oak floors will be used in the principal rooms. There will be a central heating system and open fire places. Mantels will be of tile and brick. Composition flooring will be used in the bath rooms. Tile will be used in the kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

Piedmont, Alameda Co., Cal.—Residence, 2 story and base, frame, $3,000. Architects, Mulvey & Bros., Design Bldg., Oakland. Owner, Miss A. C. Bronse. The house as best designed to contain seven rooms, attic and sleeping porch. The interior will be finished in pine, redwood and some oak. Oak floors will be used in the principal rooms. Tile will be furnace and open fire places. Mantels will be of brick. Tile and composition will be used in the bath room and kitchen. The exterior of the house will be covered with shingles. Plans are complete and the architects are taking figures on the work.

Oakland, Cal.—Residence, 2 story and base, frame, $7,000. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The dwelling will be designed for a 9-room house with hall and sleeping porch. All interior finish will be of pine. Oak floors will be used throughout the first floor. There will be tile hearths and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

Oakland, Cal.—Residence, 2 story and base, frame. Cost not stated. Architect E. J. Sorlien, Cor. Claremont Ave., Oakland. Owners, Craig Bros. Cost. The house will contain six rooms, attic, and sleeping porch. All interior finish will be of pine or redwood. Oak will be used in the floors of the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, $5,000. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner, name withheld. The dwelling will contain 10 rooms consisting of eight rooms, bath and sleeping porch. There will be a central heating system and open fire places. Tile and composition flooring will be used in the bath rooms. All interior finish will be of pine, the redwood. Oak floors will be used throughout. Mantels will be of brick and tile. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

Alameda, Alameda Co., Cal.—Residence, 1 story, base, frame, $3,000. Architect, A. W. Smith, 1010 Broadway, Oakland. Owners, Delanoy & Randlett. The house will contain six rooms and bath. Interior trim will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with shingles. Plans are in the hands of the owners and the work will be done by Day Labor.

SCHOOLS.

Oakland, Cal.—School, 2 story and [illegible] brick, $100,000. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, City of Oakland. The building is to be known as the Washington School and will contain [illegible] rooms, assembly hall and kindergarten. Plans for work complete and bids will be received by the Architect, L. P. Hobart, until [illegible] at office of Architect. Bids will be opened on the 15th inst. and contract awarded on October 1st by the Board of Education. On the same date bids will be opened for the Longfellow School, a reinforced concrete structure costing $100,000 and designed by Architect C. W. Dickey. Bids for the Emerson School, designed by Architect John Galen Howard and estimated to cost $150,000 will be opened on the same date. The Emerson School will contain 18 class rooms. Construction will be brick. Plans for all of these buildings can be secured from the supervising architect, J. J. Donovan, Oakland.

Santa Monica, Los Angeles Co., Cal.—School gymnasium and grand stand, $50,000. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Santa Monica Polytechnic High School District. There will be two separate buildings one for girls and the other for boys. Both will be equipped with shower baths, cloth[illegible] work and a central heating system. In connection with these two buildings comes development of an athletic field. This project involves the construction of about 1,200 feet of brick wall about 10 feet high. Two ornamental gateways are to be provided for. Plans are being prepared.

Santa Ana, Orange Co., Cal.—School, 4 buildings, brick construction, $160,000. Architects, Wilkes & Davis, Story Bldg., L. A. Owners, Santa Ana Polytechnic High School District. The accepted design provides for four buildings, an administration, academic, manual arts and a cafeteria. Architecture is to be Grecian. Construction will be of brick with cement plaster on the exterior. The sum of $160,000 is available for building purposes exclusive of furnishing. Plans are being prepared.

SEWERS, STREET WORK AND WATER SYSTEMS.

San Francisco—Power house, 1 story [illegible] reinforced concrete, $100,000. Architect, Charles Peter Week, Mutual Bank Bldg., S. F. Owners, Union Iron Works. This work has been mentioned, but no other plans were let out for figures. All bids received are rejected, as the plans were changed. New bids will probably be taken within a week or ten days. The building is planned to be of reinforced concrete, with all interior trim of metal. The exterior will be faced with cement plaster.

Contracts Awarded.

Niles, Alameda Co., Cal.—Road work, $[illegible]. Engineer, County Surveyor, Oakland. Owners, Alameda County. Contractors, P. Orch & Co. Contract price, $[illegible].

STORES & OFFICE BUILDINGS.

San Francisco—Store and lofts, 2 story, brick, $10,000. Architects, O'Brien Bros. Claus Bldg., S. F. Owners, Water Front Realty Co. This work will consist of repairs and alterations to the two-story brick building recently damaged by fire. There will be new plastering, plumbing and electric work. Bids received and given under advisement. A contract will be awarded within a few days.

Stockton, San Joaquin Co., Cal.—Store addition, 1 story, brick. Cost not stated. Architect, Walter King, Gill Bldg., Stockton. Owner, S. J. Adams. The addition, with the [illegible]

feet. The exterior will be faced with pressed brick. Interior finish will be of pine. There will be galvanized iron cornice and skylights. Plans are being prepared.

Los Angeles, Cal.—Stores and lofts, 3 story and base, brick. Cost not stated. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, Gerhard Eshman. The building will be 45x85 feet, and has been designed for use by a furniture house. There will be metal window sash and frames. Interior finish will be of pine and oak. There will be one freight elevator. The exterior of the building will be faced with pressed brick. Plans are now being prepared and will go out for figures within a few days.

Los Angeles, Cal.—Stores and offices, 12 story and base. Class A construction, $400,000. Architects, Barnett, Haynes & Barnett, St. Louis, represented by George. Barnett, Wright and Callender Bldg., L. A. Owner, John Brockman. The building will be erected at the southeast corner of 7th St. and Grand Ave., and will cover an area of 65x134 feet. There will be a complete steel frame with exterior walls faced with pressed brick and terra cotta. Only preliminary plans have been prepared and complete details cannot be given for some little time.

Palo Alto, Santa Clara Co., Cal.—Store addition and alterations, brick construction, $15,000. Architect, Henry Shermund, Mills Bldg., S. F. Owner, Frazer & Co., Palo Alto. This work will consist of the construction of a one-story brick and plate glass addition to the present building, and of a large addition in the rear. The entire building when completed will be used as a department store. The interior finish will be of pine and hardwood. The second floor will be of plate glass in metal bars. Plans for this work are complete and figures are being taken.

Los Angeles, Cal.—Stores and lofts, 6 story and base, reinforced concrete. Cost not stated. Architect, E. C. Thorne, 631 So. Spring St., L. A. Owners, Chapman Bros. The building will cover an area of 50x100 feet. The first floor will contain retail stores. The upper floors will be arranged for light lofts. There will be both freight and passenger elevators and steam heat. There will be metal sash and frames. The exterior of the building will be faced with terra cotta and pressed brick.

Contracts Awarded.

Los Angeles, Cal.—Stores and lofts, 8 story and base. Class A construction, $150,000. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, Blacke, Contractor, Carl Leonardt, H. W. Hellman Bldg., L. A. Contract price, $150,000.

SEALED PROPOSALS.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 733—Proposals for Water Closets, Lavatories, Reinforcing Steel Bars, Valves, Wrought Iron and Steel Pipe, Vitrified Sewer Pipe and Specials, Grease Cups, Steam Gauges, Hammers, Padlocks, Chisels, Bronze Wire Cloth, Emery Cloth, Galvanized Buckets, Water Coolers, Steel Cable, Tiller Rope, Belt Lacing, Rubber Belting, Ship Auger Bits, Bronze Bars, Poultry Netting, Brass Tubing, Twist Drills, Saws, Files, Files, Stovepipe, Shovels, Rules, Sponges, Tacks, Paint and Sash Tool Brushes, Railway Flags, Gasoline, Packing, Hose, Scratch Pads, Hand Blotters, Paper, Lumber and Cross Ties.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. **October 17, 1912,** at which time they will be opened in public, for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 733) may be obtained from this office or the offices of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal., also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 732—Proposals for furnishing Lighting Material for all Panama Locks, Consisting of Panel Boards, Reflectors, Outlet Boxes, Receptacles and Portable Lamps. Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. **October 15, 1912,** at which time they will be opened in public, for furnishing the above mentioned material. Blanks and general information relating to this circular (No. 732) may be obtained from this office or the offices of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash., Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR ELECTRIC APPARATUS.

ELECTRICAL APPARATUS—U. S. Reclamation Service, Federal Building, Los Angeles, Cal.—Sealed proposals will be received at this office until **October 11, 1912,** for furnishing electrical apparatus, including 275-horsepower motors; one 30,000-volt oil circuit breaker, three 30,000-volt, single phase, expansion fuses; two automatic controllers, three 50 Kva transformers, one 1 Kva transformer and one 3 phase electrolytic lighting arrester. For further information address O. H. ENSIGN, consulting engineer.

PROPOSALS FOR PUMPING APPARATUS.

PUMPING APPARATUS—U. S. Reclamation Service, Los Angeles, Cal.—Sealed proposals will be received at this office until **October 11, 1912,** for furnishing f. o. b. shipping point pumping apparatus, including two horizontal centrifugal pumps, two do, two butterfly gates, four foot valves for pumps and one hot water. Further information may be had upon application to O. H. ENSIGN, consulting engineer.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 730—Proposals for Furnishing and Erecting the Structural Steel Framework of Two Permanent Shop Buildings at Balboa (approximately 7,000,000 pounds).—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. **October 18, 1912,** at which time they will be opened in public for furnishing the above mentioned material. Blanks and general information relating to this circular (No. 730) may be obtained from this office or the offices of the assistant purchasing agent 1086 North Point street, San Francisco, Cal.; also from the engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S army, general purchasing officer.

PROPOSALS FOR BUILDINGS.

THE BOARD OF EDUCATION of the City of Oakland, State of California, requests and will receive proposals or bids for the furnishing of all the materials, labor and workmanship required in connection with the construction and completion of a one-story reinforced concrete wood frame school building containing nineteen class rooms, manual training, domestic and art, modeling, plant, bicycle, boiler and play rooms, principal's office, club rooms, library, teachers' room, assembly room, kitchen, store rooms, etc., to be known as the Emerson school and to be erected on the block of land located on the southerly side of Forty-ninth street between Lawton and Shafter avenues in the City of Oakland.

The Board will also request and will receive proposals or bids for the furnishing of all material, labor and workmanship required in connection with the construction and completion of thee-story reinforced concrete additional wings containing assembly hall, club room, entrance hall, kindergarten, Manual training, domestic room, class rooms, lavatories, corridors, etc., together with certain changes, alterations, replacement, etc., of plumbing, heating, ventilating electrical, and other equipment and arrangement in the present building all to be erected upon the grounds of and to be joined with the present structure of the Longfellow school, which is located on the easterly side of Market street, between Thirty-ninth and Agan streets in the City of Oakland, California.

The Board also requests and will receive proposals or bids for the furnishings of all the materials, labor and workmanship required in connection with the construction and completion of two-story and basement brick additions or wings containing assembly hall, club room entrance hall, kindergarten, manual training room, music room, domestic science room and eight class rooms, lavatories, corridors, etc., together with certain changes, alterations, replacements, etc., of plumbing, heating, ventilating, electrical and other equipment and arrangement in the present building, all to be erected upon the grounds of, and to be joined to the present structure of the Washington school which is located on the easterly side of Shattuck avenue between Fifty-ninth and Sixty-first streets in the City of Oakland, California.

All said materials, labor and workmanship are to consist of that required by and be in accordance with the plans, drawings and specifications prepared therefor and on file in the office of Lloyd J. Donovan, the Supervising Architect of the City of Oakland, to which said plans and specifications reference is hereby made.

All proposals shall be made upon and conform to the requirements of the

form of proposals prepared and furnished by the City, through the Supervising Architect, and shall be enclosed in separate sealed envelopes, endorsed "Bid for Emerson School," "Bid for Additions to Longfellow School," "Bid for Additions to Washington School," addressed to the Board of Education, and deposited by the bidder or his agent with the Board while in session between 5 o'clock and 6 o'clock p. m. Pacific time on the **21st day of October, 1912,** in the rooms of the Board in the City Hall Annex, No. 1728 Broadway, Oakland, California, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Board.

The contract for the furnishing of all the labor and materials entering into the construction and completion of each building, including plumbing, heating, ventilating, and electrical work, blackboards and other equipment indicated on the drawings and called for in the specifications for each of the school houses, is to be let or awarded as a whole or general contract. And each bidder shall at the time of submitting his proposal to the Board deliver and deposit in the care of said board, in a separate sealed cover addressed to the Supervising Architect, a subdivision of his proposal on a form which will be furnished the bidder and which shall show a true estimate for all the work included in each of the following groups or branches into which the said specifications are subdivided, together with a list of the subcontractors in each of the various groups of the work to whom the bidder proposes to sublet such portions, namely:

1. Preparation of Site. 2. Structural iron or steel. 3. Concrete, plain or reinforced. 4. Stone, brick and terra cotta. 5. Roofing. 6. Paving. 7. Rough carpentering and mill work. 8. Sheet metal. 9. Architectural metal. 10. Lath and plaster. 11. Glass and glazing. 12. Marble and tiling. 13. Painting. 14. Blackboards. 15. Finished hardware. 16. Plumbing and gas fitting. 17. Heating and ventilating and vacuum cleaning. 18. Electrical work. 19. Architectural terra cotta.

A bound set of the forms of proposal and of the required affidavits, agreement, bonds, acknowledgment and specifications, will be furnished contractors on demand at the office of the Supervising Architect of the City of Oakland, Security Bank Building, corner Eleventh and Broadway, Oakland.

All information relative to the requirements of bidding and all directions necessary to explain and make definite any of the provisions of the specifications or drawings, will be given by the Supervising Architect upon application at his office.

The right is reserved by the Board in accordance with the provisions of the charter of the City of Oakland, to reject any or all bids submitted.

By order of the Board of Education of the City of Oakland, California.

J. W. McCLYMONDS,
Secretary of the Board of Education of the City of Oakland.

NOTICE TO CONTRACTORS.

SEALED bids will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, **Monday, October, 21, 1912,** and bids then and there to be publicly opened and read, for the Armory for the National Guard of California at Los Angeles, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Bids will be received as a whole or in subdivisions as follows:

First—For the Entire Building, including excavation.

Second—For Mason Work.

Third—For Structural Steel Work.

Fourth—For Carpenter and Mill Work.

Fifth—For Metal Lathing and Plastering.

Sixth—For Sheet Metal and Roofing.

Seventh—For Painting, Staining and Glazing.

Eight—For Ornamental Metal Work.

Ninth—For Marble, Terrazzo and Tile Work.

Tenth—For Plumbing, Sewers and Gasfitting.

Eleventh—For Steam Heating and Ventilating.

Twelfth—For Electric Wiring.

A certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Twenty-five Dollars ($25.00) will be required on plans and specifications. The deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, Cal., in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, Cal., and plainly marked on the envelope "Proposals for Los Angeles Armory."

(Signed) W. F. McCLURE,
State Engineer.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 73.—Isthmian Canal Commission, Office of the General Purchasing Officer, Washington, D. C. Sealed proposals, in triplicate, will be received at this office not later than 2:30 o'clock p. m. on the **25th day of December, 1912,** at which time they will be opened in public, for furnishing miscellaneous electrical supplies. F. C. BOGGS, major corps of engineers, U. S. army, general purchasing officer.

Firms desiring news from certain localities like San Francisco, Los Angeles Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—2 story and base, frame, $12,000. San Francisco. Architect none. Owner, W. W. Yager, 1029 Hyde St., S. F. The building will cover an area of 32x93 feet and has been arranged for twelve apartments of two and three rooms each. There will be a central heating system, hot and cold running water in all rooms and wall beds. Each apartment will have its own private bath. Interior trim will be of pine with some oak floors. The exterior of the building will be covered with shiplap and brick veneer. Plans are complete and the work will be done by Day Labor. The same owner also has plans complete for a similar building which will be erected at once on an adjoining piece of property.

Hotel—4 story and base, brick and steel, $50,000. San Francisco. Architects, Welsh & Carey, Western Metropolis Bank Bldg., S. F. Owner, W. F. Paladini. The building will be designed for a large restaurant on the first floor and a hotel of 60 rooms and 20 baths on the upper three floors. There will be a central heating system and running hot and cold water. The interior will be finished in pine throughout. The building will be erected on Washington street, between Montgomery and Sansome, and will extend through to Commercial. The exterior will probably be faced with cement plaster. Plans are now being prepared.

Hotel—3 story and base, reinforced concrete, $25,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will cover an area of 40x72 feet. The first floor is to be arranged for stores and the upper floors will be subdivided into about 30 guest rooms. There will be steam heat and running hot and cold water in all rooms. The exterior of the building will be faced with cement plaster. Plans are complete and bids are being taken.

Hotel—, story and base, brick and steel, $60,000. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. This work has been mentioned here before when plans were first started. Probate proceedings have been completed and the owners are anxious to get construction under way. The building will cover an area of 37½x87½ feet. A large lobby and office will be located on the first floor, while the upper floors will be subdivided into considerably over 100 guest rooms. The mechanical equipment will consist of steam heat, elevators, a vacuum cleaning system and hot water heater. About 50 per cent of the rooms will have connecting baths. The exterior of the building will be faced with pressed brick. Plans will be out for figures within a few days.

Residence—2 story, attic and base, frame, $8,000. San Francisco. Architect, Oliver Everett, 1910 Webster St., S. F. Owner, J. A. Bergerot. The dwelling will contain in the neighborhood of nine rooms, bath and laundry. All interior finish will be either of pine or oak. Hardwood floors will be used throughout the first story. There will be steam heat and open fire places. Tile and composition will be used in the bath rooms and kitchen. Mantels will be of tile and brick. There will be some ornamental iron. The exterior of the house will be covered with brick veneer and shiplap. Slate will be used on the mansard roof.

Plans have been out for figures and a contract will be awarded shortly.

Residences—2, 2 story and base, frame, $2,000 each. San Francisco. Architect, none. Owner, A. Klahn, 27 Chenery St., S. F. Each of these houses will contain six rooms and bath. The interior will be finished in pine and redwood. There will be open fire places with tile and brick mantels. The exteriors of the houses will be covered with shingles and brick veneer. Plans are in the hands of the owner and the work will be done by Day Labor.

Bungalow—1½ story and base, frame, $2,000. San Francisco. Architect, none. Owner, Ralph J. Button, 1039 Franklin St., S. F. The dwelling has been designed for a six-room house with bath and laundry. The interior will be finished in pine and redwood with some oak floors. There will be open fire places and tile or brick mantels. Tile will b eused in the bath and kitchen. The exterior of the house will be covered with shingles. Plans are in the hands of the owner and the work will be done by Day Labor.

Residence—2 story and base, frame, $6,000. San Francisco. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, Mr. Sheehan. This house will be erected in the Richmond District and will contain seven rooms and bath. The interior finish will be of pine and oak with oak floors in the principal rooms. There will be furnace heat and open fire places. Composition floors will be used n the bath room. Tile will be used in the kitchen. Mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and ready for figures.

Residence—2 story, attic and base, frame and brick, $10,000. San Francisco. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owner, Louis S. Boady. The dwelling has been designed for an eight-room house with sleeping porches, baths and laundry. The interior will be finished in pine, redwood and hardwoods. Oak floors will be used throughout except in the bath rooms which will have composition flooring. There will be a central heating system and open fire places. Mantels will be of brick or tile. The exterior of the house will be covered with veneer pressed brick. Plans are complete and figures are being taken.

Flats—2 story and base, frame, $4,-500. San Francisco. Architect, none. Owner, J Johnson, 488 9th Ave., S. F. The building will cover an area of 25x58 feet and will contain two flats of five and six rooms each. The interior finish will be of pine and redwood. Some oak floors will be used. There will be large bath rooms in each of the flats. Tile will be used in the kitchen. There will be gas grates and tile mantels. The exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

Flats—2 story and base, frame, $3,-000. San Francisco. Architect, none. Owner, Lorenzo Del Carlo, 1441 Lombard St., S. F. The building will contain two small flats of four and five rooms each with baths. The interior will be finished entirely in pine and redwood. There will be gas grates in the living rooms with tile mantels. The exterior of the building will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Flats—2 story and base frame, $4,-000. San Francisco. Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner, B. Beccas. This work has been mentioned here before when the plans were being prepared. All drawings are now complete and bids will be taken at once. The building has been arranged for a store on the first floor and two flats of four and five rooms on the upper floor. Interior finish will be of pine and redwood with some oak flooring. There will open fire places and tile or brick mantels. Tile will be used in the bath room. The exterior of the buildng will be covered with rustic and shiplap.

Church—Steel, brick and stone, $150,-000. San Francisco. Architects, Shea & Lofquist, Italian Bank Bldg., S. F. Owners, Salesian Fathers. This work was mentioned here when the architects were first commissioned to prepare the plans. The building will have a complete steel frame and will be fire proof throughout. A contract for the excavating and grading has been awarded and plans for the balance of the work are now out for figures. The interior will be finished in Italian marble. Caen stone and ornamental plaster. The exterior of the building will be faced with stone and terra cotta. Plans are out for figures.

Warehouse—2 story and base, brick $10,000. San Francisco. Architect, Oliver Everett, 1940 Webster St., S. F. Owner, Joseph Lenormand. The building will be etected in the south line of Tehama street, near Third, and will be 50x80 feet. Construction will be sufficiently heavy to carry additional stories in the future. There will be a freight elevator. Metal sash and doors will be used. First floor will be of cement. The exterior of the building will be faced with stock brick. Plans are now being prepared.

Factory—1 story and base, reinforced concrete, $12,000. San Francisco. Architect, Frederick H Meyer, Bankers' Investment Bldg., S. F. Owners, Spring Patent Tire Co. The building will be erected on a corner in the automobile district and will cover a ground area of 9ox12o feet. The factory and shipping rooms will be located in the rear portion of the building and office will occupy the front. The exterior will be faced with cement plaster. Plans will be completed as rapidly as possible and figures will be called.

Garage—2 story and base, brick and steel. San Francisco. Architects, Oser Bros., Western Metropolis Bank Bldg., S. F. Owners, I. L. Rosenthal & Sons This building has been mentioned in these columns before. Plans were recently out for figures but bids were too high and plans are now being revised. The building is to be erected on Van Ness Avenue and will have a frontage of 70 feet and a depth of 129 feet. There will also be an L 50x31 feet. The front portion of the building will be given over to sales rooms and offices. Repair department and storage space will occupy the balance of the structure. The exterior will be faced with pressed brick. Revised plans will shortly be ready for figures.

Power House—1 story and base, reinforced concrete, $100,000. San Francisco. Architect, Charles Peter Weeks, Mutual Bank Bldg. S. F. Owners Union Iron Works. This work has been mentioned here before when plans were first out for figures. All bids received were regared as too high and the plans will be revised. New bids will probably be taken within a week or ten days. The building is classical in design, fire proof throughout, with all interior trim in metal. The exterior will be faced with cement plaster.

Stores and lofts—2 story and base, brick, $10,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Water Front Realty Co. This work will consist of repairs and alterations to the two story brick building recently damaged by fire. There will be new plastering, plumbing and electric work. Bids are in and have been taken under advisement. A contract will be awarded within a few days.

Store Addition—1 story, brick. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, Walter King, Elks' Bldg., Stocktor Owner, S. J. Vololini. The addition will be 23x33 feet. The exterior will be faced with pressed brick Interior finish will be of pine. There will be galvanized iron cornice and skylights. Plans are being prepared.

Contracts Awarded.

Apartment House—5 story and base, reinforced concrete, $35,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, James E. Reiter. Contractors Bay City Building Co., S. F Contract price, $35,000.

Figures Opened For Service Building

Seventeen Sets of Figures Submitted For Construction of The First World's Fair Building.

Seventeen bids were received by the Panama-Pacific International Exposition Company for the construction of the Service Building, the first structure to be erected for the 1915 World's Fair in this city. Fred A. Fisher presented the lowest figure at $55,111 and will probably be awarded the work. The Service Building is to be a large two-story structure over 200 feet long and 90 feet in width. Construction will be of frame with exterior covered with cement plaster. Among the seventeen sets of figures submitted is that of Strehlow-Freese & Peterson, an Eastern firm, probably specializing on exposition work.

General Construction.

H. S. Williams	$65,451
C. P. Moore Bldg. Co.	66,927
Reese & Rountree	58,900
Strehlow-Freese & Peterson	59,991

Oak floors will be used in the principal rooms. There will be a central heating system and open fire places. Mantels will be of tile and brick Composition flooring will be used in the baths Tile will be used in the kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared

Residence—2 story and base, frame. $3,500. Piedmont, Alameda Co., Cal. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, Mrs. A. C. Brouse. The house has been designed to contain seven rooms, bath and sleeping porch. The interior will be finished in pine, redwood and some oak. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile and composition will be used in the bath room and kitchen. The exterior of the house will be covered with rustic and shingles Plans are complete and the architects are taking figures on the work.

Residence—2 story and base, frame, $5,000. Oakland, Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The dwelling has been designed for an eight-room house with bath and sleeping porch. All interior finish will be of pine. Oak floors will be used throughout the first floor. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile will be used in the bath room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

Residence—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, E. J. Spence, 6093 Claremont Ave,, Oakland. Owners, Craig & Currie. The house will contain six rooms, bath and sleeping porch. All interior finish will be either of pine or redwood. Oak will be used in the floors of the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base frame. $5,000. Oakland, Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The dwelling will contain in the neighborhood of eight rooms, bath and sleeping porch There will be a central heating system and open fire places. Tile and compositon flooring will be used in the bath room. All interior finish will be of pine and redwood. Oak floors will be used throughout. Mantels will be of brick and tile. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

Bungalow—1 story and base, frame, $2,000. Alameda, Alameda Co., Cal Architect, A. W. Smith, 1010 Broadway, Oakland. Owners, Delanoy and Randlett The house will contain six rooms and bath. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with rustic Plans are in the hands of the owners and the work will be done by Day Labor

Bridge—Reinforced concrete, $35,000 Oakland, Cal. Engineer, City Engineer P. F. Brown, City Hall Annex, Oakland. Owners, City of Oakland. Plans for the Eight Street Bridge are being prepared in the City Engineer's office, and it is reported they will be out for figure within two months This bridge will be 110 feet long and 60 feet wide Complete particulars will be given when the plans are finished.

Fire House—2 story and [illegible] frame $10,000. Oakland, Cal. Architect E. D. Voorhees, Central Bank Bldg., Oakland. Owners, City of Oakland. The station will be erected on Montgomery street near Howard street and is being designed to contain quarters for one engine company. Apparatus room, stables, etc., will occupy the first floor, while the second floor will be arranged to [illegible] living apartments for the firemen. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and [illegible] are being taken.

Express Depot—1 story brick. Cost not stated. Oakland, Cal. Architect J. H. Humphreys, Wells Fargo Bldg., S. F. Owners, Wells-Fargo Express Co. The building will be erected near the new 16th street depot and will be used as a main office and warehouse by the owners. There will be metal sash and doors. The exterior of the building will be faced with pressed brick. Considerable structural iron will be used. Plans are complete and figures are being taken.

Garage—1 story brick. Cost not stated. Berkeley, Alameda Co. Cal. Architects, Pacific Architectural and Engineering Co., 251 Kearny St., S. F. Owner, Elmira S. Bryant. The building has been designed for a [illegible] garage. Floor will be of cement and there will large oil storage tanks. The front portion of the building will contain the office and a repair shop, the storage space will occupy the rest of the building. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

School—2 story and [illegible] brick and steel, $100,000. Oakland, Cal. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, City of Oakland. The building is to be known as the Washington School and will contain nine class rooms, assembly hall and kindergarten. Plans have been completed by the architect and turned over to City Architect J. J. Donovan, who is to have charge of all school buildings. Bids will be opened on the [illegible] inst. by the Board of Education. On the same date bids will be opened for the Longfellow School, a reinforced concrete structure, costing $100,000 and designed by Architect C. W. Dickey. Bids for the Emerson School, designed by Architect Jean Gaiten Howard and estimated to cost $100,000, will be opened on the same date. The Emerson School will contain 18 class rooms. Construction will be fireproof. Plans for all of these buildings can be secured from the supervising architect, J. J. Donovan, Oakland.

Contract Awarded.

Road Work—$50,000. Niles, Alameda Co., Cal. Engineer, County Surveyor, Oakland. Owners, Alameda County. Contractors, P. Oxen & Co. Contract price, $47,856.

SAN JOSE & SANTA CLARA VALLEY.

Hospital—2 story and basement reinforced concrete, $55,000. San Mateo, San Mateo Co. Cal. Architect, Lewis P. Hobart, Crocker Bldg. S. F. owner, Red Cross Hospital Association. Plans for an extensive addition to the present building are complete and figures are being taken. The building will contain the most modern operating rooms, baths and special treatment rooms of any institution of its kind on the coast. Besides the above mentioned rooms there will be a number of private wards. The interior of the building will be lined with stocking, terra cotta. Plans are now out for figures.

Store Addition and Alterations—Brick construction $15,000. Palo Alto, Santa Clara Co. Cal. Architect, Henry Seymour, Mills Bldg. S. F. owner, Frazee & Co. Palo Alto. This work will consist of the construction of a concrete brick and plate glass addition to the present building and of a large addition in the rear. The entire building when completed will be used as a department store. The interior trims will be of pine and hardwood. The second floor will be of plate glass in metal sash. Plans for this work are complete and figures are being taken.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

Hotel—6 story and base. Class A construction, $250,000. Sacramento, Cal. Architects, Cuff & Diggs, Sacramento. Owners, Marsh Investment Co. Bids for the construction of this building, which has been mentioned here a number of times, were opened on September 24th. Twelve sets of figures were received. Lindgren & Co. and Lewis A. Hicks Co., both San Francisco firms were tied at low for $260,000. This amount is considerable in excess of the estimated cost, and it is doubtful if a contract will be let at that figure. For a complete list of all bids received see under Sacramento, Stockton and Northern California in this issue.

Armory Work—Cost not stated. Sacramento, Cal Architect, State Architect, Woollett, Sacramento. Owners, State of California. Bids were opened in Sacramento today, October 2nd, for the electric work, plumbing and heating and ventilating for the Sacramento Armory. A complete list of these bids will appear in the next issue.

Hospital—2 story and base, brick and reinforced concrete, $100,000. Stockton, San Joaquin Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owners, St. Joseph's Home, represented by Father McGough. Plans for the building are now being prepared and provide for a two-story and basement fireproof structure with foundations and walls of sufficient strength to carry an additional story. There will be two public wards and a number of private rooms, operating rooms and baths. There will be two elevators, a steam and hot water system of heating and a vacuum cleaning system. All interior work will be finished in white enamel. The exterior of the building will be faced with cement plaster or pressed brick. Bids will be called for of both the brick and steel and reinforced concrete type of construction.

Contracts Awarded.

Bank—2 story and base, reinforced concrete, $34,000 Auburn, Placer Co, Cal. Architect, Charles S. Kaiser, Mechanics' Institute Bldg., S. F. Owners, Placer County Bank. Contractor, Heidal, Auburn. Contract price not stated.

Armory Work—Cost not stated. Sacramento, Cal. Architect, State Architect Woollett, Sacramento Owners. State of California Contractors, California Construction Co., Monadnock Bldg., S. F. Contractor for structural steel. Contract price, $13,500

Building Contracts Awarded.

Armory—2 story and base. Class A construction Cost not stated. Los Angeles, Cal. Architect, State Architect Woollett, Sacramento. Owners, State of California. Bids will be opened on October 21st for the construction of this building. The work will be figured as a whole and segregated. Plans and specifications can be secured from the State Department of Engineering at Sacramento. A complete description of the work will appear in the next issue of the Building and Industrial News.

School Gymnasium and Grand Stand—$60,000. Santa Monica, Los Angeles Co., Cal. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Santa Monica Polytechnic High School District. There will be two separate buildings, one for girls and the other for boys. Both will be equipped with shower baths, electric work and a central heating system. In connection with these two buildings comes development of an athletic field. This project involves the construction of about 1200 feet of brick wall 8 feet to 16 feet high. Two ornamental gateways are to be provided for. Plans are being prepared

School—4 buildings brick construction. $160,000. Santa Ana, Orange Co., Cal. Architects, Withey & Davis, Story Bldg., L. A. Owners Santa Ana Polytechnic High School District. The accepted design provides for four buildings, an administration academic manual arts and a cafeteria. Architecture is to be Grecian. Construction will be of brick with cement plaster on the exterior. The sum of $160,000 is available for building purposes, exclusive of furnishing. Plans are being prepared

Stores and Lofts—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, Gerhard Eshman. The building will be 45x85 feet, and has been designed for use by a furniture dealer. There will be metal windows and frames. Interior finish will be of pine and oak. There will be one freight elevator. The exterior of the building will be faced with pressed brick. Plans are now being prepared and will go out for figures within a few days.

Stores and Offices—12 story and base. Class A construction, $400,000. Los Angeles, Cal. Architects, Barnett, Haynes & Barnett, St. Louis, represented by George D. Barnett, Wright and Callender Bldg., L. A. Owner, John Brockman. The building will be erected at the southeast corner of 7th street and Grand avenue, and will cover an area of 68x136 feet. There will be a complete steel frame with exterior walls faced with pressed brick and terra cotta. Only preliminary plans have been prepared and complete details can not be given for some little time.

Stores and Lofts—6 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, E. C Thorne, 631 So. Spring St., L. A. Owners, Chapman Bros. The building will cover and area of 50x100 feet. The first floor will contain retail stores. The upper floors will be arranged for light lofts. There will be both freight and passenger elevators and steam heat. There will be metal sash and frames. The exterior of the building will be faced with terra cotta and pressed brick.

Contracts Awarded.

Apartment House—3 story and base brick, $45,000. Los Angeles, Cal. Architect, Whitting Thompson, Douglas Bldg., L. A. Owner, W. E. Curry Contractor, Bert Chellis, Higgins Bldg., L. A. Contract price, $45,000. Note: Plans for this work have just been started by the architect.

Apartment House—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, F. M. Thomas. Contractors Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price not stated. Note: The same contract was also awarded to this company a contract to construct 15 frame bungalows on the same tract with the apartment house.

Apartment House—4 story and base brick. Cost not stated. Long Beach, Los Angeles, Co., Cal. Architect, A. S. Heineman, San Fernando Bldg., L. A. Owner, Mrs. Nora T. Waldron. Contractors Long Beach Improvement Co., Long Beach. Contract price not stated.

Hotel—4 story and base brick $[illegible]000. Los Angeles, Cal. Architects, Garrett & Bixby, Currier Bldg., L. A. Owners, L. L. Bowen and W. C. Norman. Contractor, J. H. Pence, Builders' Exchange, L. A. Contract price, $34,980.

Stores and Lofts—3 story and base Class A construction, $150,000. Los Angeles Cal. Architects Morgan, Walls & Morgan Story Bldg., L. A Owner, Bilicke Contractor Carl Leonardt, H W. Hellman Bldg., L. A. Contract price, $150,00.

SEATTLE AND WASHINGTON.

Apartment House—3 story and base brick, $50,000. Seattle Wash. Architects, Blackwell & Baker, Northern Bank Bldg., Seattle Owner H. Amon This work has been mentioned before. At that time the owner intended to erect a 16-story building [illegible] not engaged in mind. A modified structure is now on the site and this will be extensively altered and two additional stories added. Plans will be ready for figures in about two weeks.

THE OIL-PRODUCING STATES.

Since the beginning of the oil industry in the United States over 2,500,000,000 barrels have been produced and the total value of the oil, reckoned in the crudest condition of the mouth of the well, is over $2,000,000,000. More than half of this oil has come from New York, Pennsylvania, West Virginia and Ohio, and all has been produced in two years over half a century. In the first half of this period nearly the entire product came from the Eastern fields, but lately the declining production of the Eastern States has been more than compensated by the enormous output in the West, so that of the total product of the United States 972,429,805 barrels have been produced west of the Mississippi river, and at this time the midcontinent and California fields are the controlling influences in the oil production of this county. If a line is drawn across Ohio separating its eastern oil across from the Lima area and the Lima oils are included in the Western production, then the West already exceeds the East in the total produced.

The rank of the States is easily remembered when one recognizes California, Oklahoma and Illinois as forming a class by themselves, the lowest (Illinois)producing over 30,000,000 barrels, and the three furnishing three-fourth of the entire output. The second group includes Louisiana, West Virginia, Texas, Ohio and Pennsylvania, in which Louisiana furnished a surprise by yielding the greatest product on record for that State (over 10,000,000 barrels), and passing to the head of this group, while the slight gain from two pools in Texas put that State in advance of Ohio again. In the third group, comprising Indiana, Kansas, New York, Kentucky, Colorado, Wyoming, Missouri, Utah and Michigan, the largest State production is less than a fourth of the lowest in the second group and, combined, these States produced less than 2.2 per cent of the total. The changes which may be expected in 1912 may advance the rank of West Virginia by the development of the Blue Creek pool, Kansas may change places with Indiana and Wyoming may head the third group. Indianapolis News

BEGIN TUNNEL CONSTRUCTION.

MONTGOMERY CREEK (Shasta Co.), September 23. A [illegible] compressor has arrived here on its way to the scene of [illegible] of the Mt. Shasta Power Company in the Big Bend of the Pit.

The company has begun active construction work on its 7-mile tunnel that is the biggest part of its power development of 200,000 horsepower. Two smaller air compressors are in commission [illegible] big ones. When the new and larger compressor is set in place, the two smaller compressors will become [illegible] at each end of the tunnel. Construction work will be pushed [illegible] compressor will [illegible] in operation all the [illegible] of the present [illegible] contract.

TO COLONIZE AND IRRIGATE LANDS

DIXON Solano Co.), September 23.—Some mysterious persons are bonding and to the extent of many thousands of acres in the country east and northeast of Dixon and Elmira. Who the people are is being kept dark here, but they are being aided in their operations by Henry Peterson of the Bank of Dixon, who has been out with the agent of the intending purchasers.

The purpose of these getting the bonds is evidently to water and colonize the lands and the plans for this are being learned through words passed to one person and another during the operations of the agent. Canals will be run along the courses of the dry sloughs and the water carried in these will be pumped into the lands for irrigation purposes. In the wet season the canals will serve the purposes of drainage.

The lands being bonded are along, or not far from, the Oakland-Antioch & Eastern routes, and that line and the water ways will furnish transportation. So far bonds have been taken on about 30,000 acres, and the agents are still at work. The prices fixed are not at all high, being considered only a fair figure for such lands.

The country is not now developed for any particular purpose, but is capable of extensive development, which now seems likely to come.

BUILDING BOOM IN TEHAMA.

TEHAMA (Tenama County), September 23. The greatest building boom that Tehama has ever experienced is at its height just now. The business buildings now in course of construction on Main Street would cover nearly two blocks if grouped.

Three of the new stores under construction are of reinforced concrete. This Winter the First National Bank of San Francisco will erect a building on Main Street that will cost $10,000. A number of residences are under construction and many more planned.

MUNICIPAL OWNERSHIP PETITION

BERKELEY, September 23.—Initiative petitions for municipal improvements totaling $1,000,000 have been put into circulation here. They call for the establishment of a municipal light and water plant, the establishment of playgrounds and baths, and a truck garden for the children.

The electric light and power plant as proposed would cost $475,000, the municipal water plant would represent an outlay of $800,000, the public truck garden $10,000, and the playgrounds and shower baths $10,000. It will be necessary to have the signatures of at least 15 per cent of the voters at the last Mayoralty election sign the petition before the City Council can pass the ordinances proposed or submit the propositions to the people at a special election. The initiative has been drawn up by the Municipal Ownership League of California.

NEWS IN BRIEF . . . . . TIMBER SALE AND CREOSOTING PLANT.

SUSANVILLE (Lassen Co.), September 21.—The announcement by the Forest Service that all of the lodgepole timber over a large area of the Lassen National Forest will be sold to check the attacks of forest insects has been followed by the statement that if the sale of the timber is consummated that a large creosoting plant may be established here. The timber is well adapted for telephone and other transmission poles and experiments have proven that when creosoted it will last as well in the ground as cedar.

The timber is within the Robber, Rock, Bailey and Pine Creeks, and Susan River watersheds in Lassen County. These areas are all situated near the head of the Susan River directly west of Susanville, and are all tributary to the Fernley and Lassen branch of the Southern Pacific, which is now under construction.

It is roughly estimated that these areas will produce over a million poles, ranging in size from large transmission line poles to small poles of the class used for rural telephone lines.

The Railroad Commission has ordered the Southern Pacific Company to build a $15,000 station in Berkeley. This is establishing a precedent and the company will fight it in the courts. It seems like some such action would have to be taken to get railroad companies to build in many places. Sacramento for instance, which is a railroad center and badly in need of a Union station, is provided with a dingy old smoke house that has no accommodations for the traveling public.

If the Commission were empowered to compel action of the companies to provide suitable accommodations for the public where large numbers of people must take the trains it would be a good thing for the public.

THE USES OF PUBLICITY.

More and more as time goes on publicity is being used to attain ends of private interests. The time is past when the columns of the newspapers and other publicity mediums of a like nature were sought only by politicians and others who could realize upon such publicity. In these strenuous days quantities of the matter which appears in newspapers and periodicals is inspired by men who are paid to bring to the favorable notice of the public some phase of a subject which will result in future gain of his employers. Those employers may be a group of manufacturers who are interested in some particular line of goods, they may be capitalists whose future plans include the launching of some great project to which the public must first be educated, they may be the executive heads of a city or a country bent on the publicity which brings prosperity.

An interesting event of this nature took place recently when one of the largest lumber associations in the United States launched a publicity campaign with the object of bringing to the notice of the public in a more forcible manner the advantages of the use of lumber for building and other purposes. It seems that similar campaigns have been vigorously carried on for several years past by manufacturers of cement, of steel shingles, steel lath, tiles and the many other substitutes for lumber. The public has been gradually educated to the uses of these materials. This particular lumber associatian has at last realized that publicity has proven a most efficient weapon in the hands of their competitors and the lumbermen have been obliged to take up the same means in order to keep their place in the business world.—Western Canada Contractor.

FACTORY TO BE BUILT.

The West Coast Kalsomine Company, which has been operating a manufacturing plant for the making of Kalsomine, Cold Water Paint, and kindred products, at Nobel Station, on the Dupont Powder Company plant, has just purchased the Stauffer Chemical Co's property at the foot of Grayson street on the Southern Pacific track in Berkeley, and will erect a large and fully equipped, modern, up-to-date plant, for the manufacture of these products.

The West Coast Kalsomine Company has the only factory of this character on the Pacific Coast, and their business is increasing very rapidly, and the Company is entitled to the support of the people who believe in Home Industries. Factories of this kind are an asset to the community.

BUILDINGS TO BE TORN DOWN.

The following is a list of buildings to be torn down in the Fire Limits, according to the Records of the Bureau of Building Inspection, since September 1st, 1912:

September 4th, Symon Bros., Nos. 25 and 23 Embarcardero street.

September 4th, Dolan Bros., No. 111 Fremont street.

September 11th, Huntington Roach Co., Nos. 259-261 Minna street.

September 12th, A. B. McCreery, S Market 150 E 8th (entrance to Central Theatre)

September 13th, Symon Bros., No. 261 Embarcadero street.

September 13th, Dolan Wrecking Co., SW 8th and Market streets.

September 18th, Symon Bros., No. 215 Golden Gate Ave.

FILE ESTIMATES FOR STATE REFORMATORY.

Estimates showing the plans of the special Commissioners, into whose hands was left the selection of a site for a State Reformatory for First Offenders and the construction of the institution, were filed Tuesday in the office of the State Controller. It is estimated that for the next two fiscal years $362,000 will be required, and before the institution will be finished it will have cost the State of California $1,000,000, but the total will be divided for a number of years, and in that way will not be felt by the tax payers.

These estimates were filed by D. J. Oliver, Chairman, E. A. Walcott and Judge C. E. McLaughlin, the Commissioners, with the State Controller so as to provide data for fixing appropriations

Judge C. E. McLaughlin said it was planned to construct the institution entirely by convict labor, the two State Prisons supplying the required skilled and unskilled labor. Plans will be made for a reservoir above the site for the reformatory—which will be in Napa County, near Yountville. This reservoir will be built first

for the storage water and for the generation of electrical power.

There is likely to be a clash over this reformatory, the State Engineer, Wilbur F. McClure, claiming that the work should be done under the State Department of Engineering. The act making the appropriation of $150,000 for the site provides that the Commissioners selected shall name architects and engineers to prepare plans for the building and that they shall hav charge of its construction.

State Engineer McClure said that he had taken up the matter with the Attorney General. The building law and the State Engineering law, says Mcclure, provide that all such work shall be done under the direction of the State Department, and he wants to have a ruling on this matter before it has gone so far as to affect preparations for building.

BIG SURVEY FOR RAILWAY IN THE FAR NORTH.

EDMONTON (Alberta), September 25. Engineers and surveyors in the employ of the Alberta, Peace River Eastern Railway Company, which purposes building a new transcontinental line from Hudson bay to the Pacific Coast, by way of Edmonton, have started on ponies on a trip of more than 2000 miles into the north country to survey the route. From Lesser Slave lake the party will continue the trip by dog trains, consuming over one year in the undertaking. The new line, it is said, will cost over $40,000,000.

NEW OIL COMPANY FORMED.

NEW YORK, Sept. 25.—A new petroleum company, to be known as the California Petroleum corporation, it is announced, will be incorporated under the laws of some state to be approved by William Salomon and company, with a capital of $35,000,000, the common and preferred issues to share equally in the stock divison. This company, it is said, will acquire a controlling interest in the American Petroleum company and the American Oil Fields company and when fully organized will be one of the largest oil companies in this country, confining its operation to producing and marketing of fuel oil.

CONCRETE BUILDING AT ORLAND.

ORLAND (Glenn Co.) September 25. A two-story reinforced concrete building, 60 by 120 feet in dimensions, is to be erected at the northwest corner of Fourth and Colusa Streets. The dwelling house of Joseph Sperlich, pioneer, is being removed to make way for it. The lower floor will have two store rooms and the upper floor will be used as an annex to the Hotel Royal. A report is current that a new bank will occupy one of the first floor rooms.

J. F. Silvers is erecting a reinforced concrete building on Fifth street, between Walker and Swift streets. It will be a one-story structure of two rooms.

MORE DOCKS FOR S. P.

SACRAMENTO, Sept. 26—In preparation for a great increase in freight shipments along the Sacramento River next year, the Southern Pacific is building a wharf at Hood, about nineteen miles below the city, and will shortly commence the construction of a wharf at Walnut Grove, about twenty-seven miles below Sacramento.

The Hood wharf is partally completed. The piles have been driven and a portion of the floor laid. The railroad has entered into a contract with W. L. Graff to build the warehouse over the wharf at a cost of $3365. The wharf is about 200 feet in length.

Present plans call for a wharf at Walnut Grove about the same size as that at Hood. Work on this will be commenced in the near future. It is intended to have the platform ready for the fruit business next year.

FINAL PLANS FOR NEW BANK BUILDING AT AUBURN ACCEPTED

AUBURN (Placer Co.), September 25. The final plans for the new Placer County bank building, to be erected on Railroad Street in Auburn, were decided upon yesterday afternoon at a meeting between Dunning Rideopt of Marysville, President of the bank, local Directors and the architect, Charles S. Kaiser of San Francisco. The cost of the building, equipped for business, will be about $34,000.

Contractor Herdal will begin the construction in a few weeks.

SURVEYING ROUTE FOR ELECTRIC ROAD.

WOODLAND (Yolo Co.), September 25.—A crew of surveyors under Engineer R. E. Pierce of the Dozier Construction Company, arrived in Woodland Monday and in the afternoon began the survey of the extension of the Sacramento Valley Electric Railroad from Woodland to a point on the proposed line of the Oakland, Antioch and Eastern line, southeast of Dixon, near Denverton.

WYBRO PANELS IN OAKLAND.

Dr. F. R. Jordan, with offices in the Security Bank Building in Oakland, is engaged in building quite a number of residences in the district around Grand Avenue Boulevard in Oakland. The Doctor is his own contractor and builds to sell. He has put up quite a number of high class residences in that fashionable district, and in practically all his houses he uses the WYBRO Panel. He recognizes that for an elegant and lasting job the WYBRO is the only Veneered Panel to use. White Bros., the pioneer hardwood lumber dealers of San Francisco, are the distributors of Wybro in this market.

OIL FUEL SHIP ATTRACTS ATTENTION.

A dispatch to the New York Herald from New Orleans dated September 14th says: The first of the Hamburg-American line's new oil burning vessels to arrive here was the Christian X., which reached port yesterday from Hamburg after a successful voyage. The Christian X. is the new "stackless" type, equipped with Diesel engines using a low grade of petroleum oil. The driving machinery, which is extremely compact, does away with cumbersome coal bunkers, the necessity of many stokers and the delay of coaling.

The Christian X. left Hamburg on July 22, and on her first day, with good weather, made an average of 11½ nautical miles an hour. Later, under heavy weather and storm conditions, her general average for the trip was 11.01 nautical miles an hour. She spent four days in port at Havana and eight at Vera Cruz, and consumed 710 tons of oil. This is a creditable record for a vessel of this size driven by oil engines, for the Christian X. is 370 feet long by 53 feet beam and loaded, her tonnage is 9800. She has two heavy duty engines, which can be controlled by a single lever, and reversed from full speed ahead to full speed astern in less than nine seconds.

The exhaust gases, after being cooled, pass out forty-nine feet above the deck through the after mast, which is hollow.

CHAMBER OF COMMERCE PUBLISHES FINE BOOK.

A new book, splendidly edited and illustrated with descriptive pictures, presenting the charm and advantages of living in San Francisco, has just been issued by the Chamber of Commerce of this city. The book is far the most artistic that the chamber has ever edited, the binding being in purple and gold, with the title, "San Francisco, California, 1915," in embossed letters. The book is crowded with facts, figures and statistics, and gives in descriptive writing a full and comprehensive understanding of all of San Francisco, from its business interests to that picturesque Chinese quarter of the city, which resembles a part of the orient dropped into a modern Class A American city, such as San Francisco is.

LAST STEAMER OF THE SEASON LEAVES DAWSON.

SEATTLE, September 26.—The St. Michael, the last steamer from Dawson, Y. T., for Fairbanks, Alaska, left the Klondike port today. She will winter at Fairbanks. For more than seven months the people of the Yukon valley will have no connection with the busy world, except by dog sled and horse stage lines. The last boat from White Horse to Dawson, on the Upper Yukon, will leave the former port between October 4th and 8th, the time depending on the stage of water, which is becoming low with the freezing of the country that feeds the stream. The hydraulic mining plants are suspending operations.

WOMAN'S CLUB WILL ERECT STRUCTURE.

FAIROAKS (Sacramento Co.), September 27.—The Woman's Thursday Club of Fairoaks held a special meeting Thursday afternoon to receive and act upon the report of the Building Committee, which has been engaged in raising funds and planning to build a suitable building for club purposes and as well afford a large hall for entertainment and public use.

The report shows that a sum in excess of $3000 has been subscribed.

Plans for the building have been accepted and action was taken empowering the Committee to proceed at once to submit bids and commence work on the building. In order to lay the foundation considerable grading will be required and this work will be started at once.

PETITIONS IN BANKRUPTCY.

The following petitions in bankruptcy were filed Tuesday in the United States district court: Joseph Amaral, a merchant at Tomales, Marin county, whose liabilities are $178.87, with $627.95 in assets. Frank W. Partlow, a [illegible] contractor, whose liabilities are scheduled at $864.21, with no assets.

PIPE LINE BEING LAID RAPIDLY.

BAKERSFIELD, Sept. 8. [illegible] construction of the General Pipe Line Company's 154-mile pipe line from the Midway-Maricopa territory to San Pedro is progressing at the rate of a mile a day. The line is to be completed by next February and will have a capacity of 25,000 barrels a day. The total cost of the line, including pumping stations will be about $2,500,000.

The General Construction Company has the contract but the trenching and pipe laying is being done by Mahoney Brothers, the well known pipe line builders who have built [illegible] of the lines from the Kern and Coalinga fields to the bay at Port Costa.

The pipe line is being laid at the rate of a mile a day and about 200 men are in the Mahoney employ. Besides this there are [illegible] head of stock.

Eight-inch pipe is being laid and the construction is in charge of three gangs of men. The one working out from Sumner's station has progressed 15 miles from the San Emidio station of the line in the direction of Fort Tejon pass. Twelve two-ton trucks are in commission, and 3,000 tons of pipe line material were delivered to Mahoney Brothers at Conn[illegible]

The route of the pipe lin[illegible] general that of the Midway [illegible] pany line which is now complete. The pipe for th[illegible] building and not [illegible] route but there is still n[illegible] borers for the pipe line tr[illegible] hauling.

An agreement is made by [illegible] structing Quartermaster [illegible] Sur. that a gravity and [illegible] installed at the Presidio [illegible] for the purpose of furnishing [illegible] to the proposed [illegible] reservation, the plant to [illegible]

Editorial Comment.

The Initiative proposition, to allow San Francisco to consolidate with the [illegible] comes up for action at the November election. This should receive the consideration of all people interested in San Francisco and the success of the city.

The community of interest that lies in the harbor of San Francisco makes this practically one community. Water supply, lighting systems and manufacturing interests all combine to give unity. Not only that but the residence of people make them divide their right to vote and participate in government between their residence and the place where they earn their livelihood.

Los Angeles has included its suburban districts within its corporate limits. Its growing in the matter of real estate population, building statistics and similar industrial features is a marked increase over its former figures. Here at San Francisco we have hundreds of thousands of people going daily on the ferries and trains to their industrial homes. These residential districts should be included into the greater San Francisco and the borough system would provide for local self government and at the same time solve many questions which are common to all to be handled by the whole population for the good of all. It only requires some one real growth of the city in population, in building statistics and everything else that results in its material development.

The Building and Loan Association seems to be in for a political going over. Not withstanding the fact that the [illegible] of the Continental contend that it is a violation of designing [illegible] it is [illegible] that it has long been under [illegible] and the methods [illegible] In the case of the [illegible] Association it seems to have been a case of overzealousness on the part of the officials in charge. The [illegible] seeking to help the [illegible] workingmen and to [illegible] use [illegible] people's money to help one another [illegible] and [illegible] have developed. How [illegible] for the members [illegible] to [illegible] for their [illegible] and the [illegible]

things in his possession that the public have a right to know.

If the Standard Oil Company or any public man have been associated in relations that are not right it is Hearst's duty to publish it if he knows it. He is simply placing himself in the position of a blackmailer and making his newspapers blackmailing sheets instead of purveyors of news to the people.

Relative to the Initiative petition which is to come up at the general election to allow the bay cities to consolidate with San Francisco the "Builder" is in receipt of the following letter on the subject from a subscriber in Oakland:

Oakland, October 1, 1911.

Daily Pacific Builder:—

Have just read your editorial on "consolidation." Herewith find some more arguments on the same subject.

The Opponents of Consolidation.

We all love some people for the enemies they make. Now who are the chief opponents of consolidation? The Tribune is one, the paper that was the advocate of Calhoun, the paper that is opposing our present Governor, the paper that told the people that Taft was sure to carry California. Why is the Tribune so very opposed to consolidation. Is it because the Tribune is the "County Official Paper" and gets an enormous sum annually out of the county? It looks as if Mr. Calhoun was afraid his organ wouldn't get the County printing if the consolidation took place, don't it?

Incidentally the Enquirer is the official organ of the Oakland City Government and collects annually a stupendous amount for the printing they do. Of course, they would hate to lose that fat contract, therefore they are opposed to consolidation.

Mayor Mott and the members of his administration tell us that if we consolidate we will never have our water front, that San Francisco wants to throttle us, more particularly in our desire to be a waterfront city, etc., etc. Now some two years ago the Supreme Court gave a decision in which all question as to the ownership of the Oakland water front was decided, and decided in favor of the City. Within a year thereafter this same Mayor Mott and his administration had leased away for fifty years, for merely nominal rents, over 75% of this water front.

The frantic hysteria of the present Oakland administration on the consolidation idea makes one suspect that there is some other corporation to which they want to lease for a life time, the remaining lonesome 25%.

The Oakland Chamber of Commerce is also opposed to the annexation. They also tell us that San Francisco wants to suppress our waterfront, they completely forget that we have already given to the S. P. Co., the Key Route and the Western Pacific, three-fourths of it. They never opposed the idea of donating this water front to these corporations, but now suddenly are possessed of a great fear that San Francisco is going to take the shovel with which the first dirt was turned at her Exposition grounds, and with it dig up the little one-fourth that lies on Oakland's western boundary and transport it bodily across the bay.

Go all along the line and you will find that the opponents of the proposed consolidation are people with some special interest or profitable graft, they don't want to lose their job, they don't want their special interest absorbed.

Now consolidation, including San Francisco, Oakland, Alameda, Berkeley, Emeryville, Piedmont, Albany, Richmond, San Mateo, Burlingame, San Rafael,, Sausalito, etc., would eliminate some eleven or tweleve sets of city officers and would install one set of officers instead, and thereby save at least 50% expense. It would eliminate altogether the County tax charges on all the annexed cities. Of course, all the practical politicians who now have jobs are opposed as they might not get a job under the new deal.

Are you more interested in keeping some loafer in office than you are in eliminating your county taxes and one-half the official expenses of your present municipal government?

Are you silly enough to think as San Francisco and the Bay Cities advance, that they will not need and use every bit of water front they can get? Don't you honestly think that one of the real reasons for which they want to annex is because they need and want that 25% of our water front and want it badly, want to send their shipping here and establish houses of commerce here? Don't you know that the real reason they are pushing this thing along is because they must have this water front and are afraid that we Oaklanders, through our present officials, will lease away for nothing a year what little now remains?

Some idea of the congested population of great cities may be gained from the number of passengers carried by the street car lines of New York City. The newer travel of that city has increased with such amazing rapidity that the Public Service Commission has provided for future extensions of the road on a more generous plan. $350,000,000 is to be spent on new developments and the total number of miles of single track including the existing subway and elevated lines in Manhattan and the Bronx and the Rapid Transit Company will be six hundred and twenty-nine miles, as against the length of two hundred and ninety-six miles of the existing line. According to statistics, for the year ending June 30, 1911, about 800 million passengers were carried. When the new system has been completed the total annual capacity for the same territory will be upwards of three billion passengers.

The San Francisco Chamber of Commerce has issued a statistical report for the year 1911. It is a most interesting document as the figures show many facts that few are familiar with. As an item of suburban population the data on passengers carried on the bay ferries shows that during 1911 there were 37,161,401 people carried by these boats. Of these more than thirty-one million were carried to Alameda and Oakland, while some five and one-half million landed from the Sausalito and Richmond boats. This shows a daily transfer of 101,812 persons for every day in the year.

The report that the members of the Congress of Applied Chemistry has visited Mt. Tamalpais and the wonder parts of Marin County calls attention to the fact that this is becoming more and more a convention city. The Geographers have just left and now the Chemists have visited us. These men are the great discoverers in the field of science. The physical world is the field of their search. The most intricate body is analyzed into its component elements and on the advance of this science depends our knowledge of the physical world. The visit of these men, who leave the result of their researches as a heritage to posterity, will do much to acquaint the thinking world with San Francisco and its environs.

The San Francisco Call says that Progressive Legislation has reduced thousands of citizens to the political level of aliens and that the "Darkest South" furnishes no parallel of the serfdom that is imposed upon the Taft Republicans of California.

The fact is that they have had an equal show and were beaten at the polls just as they were beaten at the presidential primary. As it happens there is no steam roller in the courts at present, and the result is that the court has decided the only way it could decided by declaring that 101 is more than 14 and that delegates who are elected in precisely the same manner have the right to vote for the people they choose.

No one can say that he did not have a chance to vote at the primary. That is more than could be said of the old rule. Then the bosses controlled the conventions and as a rule the people that were nominated on either ticket were favorable to the powers that be in politics.

The Taft people would not put their electors on by petition Oh, no! They are the simon pure, dyed in the wool organization men and they must have the advantage of everything or they won't play. The fact is that they know they will get licked if they fight fairly. They have so long profited by the votes of the unthinking and the prejudice of the party that they know if they faced a new issue on its merits they would hopeelessly lose. So they are doing the natural thing, stickng to their grievance and howling to high heaven. Let them rave. They have had their chance and an equal show and if some of the old pirates are disfranchised the country will profit by it.

Experiments now being undertaken by the civic authorities in Berlin to obtain an absolutely fireproof theatre will be awaited by architects the world over with unusual interest. A model theatre has been set up on a plot measuring 50x80 feet, with a 30-foot auditorium and a 50-foot proscenium. The main part of the building is of steel and armored concrete. Furnishings and equipment made of several materials are to be used to determine their resisting qualities against fire. A series of no less than a hundred experiments have been arranged by the authorities. A special entry allows complete observation during the progress of the experiments.

Unit Costs For Concrete Industrial Buildings. Data Based On Actual Costs Of Construction.

(By Chester S. Allen, with Lockwood, Green & Co., Engineers, Boston, Mass.)

(From a paper read before the National Association of Cement Users.)

Unit costs are harmless when used with judgment and prudence, but likely to bring remorse and mutual when employed promiscuously. Rare and talented indeed, is the man who possesses the experience, judgment and intuitive sense to know when, where and how properly to modify any tables or statements of unit costs to meet the peculiar conditions of each individual case. While the figures given in this paper are all taken from structures erected during the past two years under the writer's supervision, the wide range of territory, local conditions, and different seasons of the year under which the various pieces of work have been executed are so great as to render the information given of value only in a very general way.

As a general proposition, we have found that reinforced concrete is the lowest priced fireproof material suitable for factory construction; and, while it is true that its first cost will generally run from 5 to 20 per cent more than first class mill construction, we have recently had several instances where, with lumber at a high price, reinforced concrete has worked out cheaper than brick and timber. It is especially adapted to heavy construction, say for floor loads of 200 pounds per square foot and over, where the spans are 15 to 20 feet centers, and even then it can compete with it.

The unit costs of projected or completed buildings are commonly figured at so many per cubic foot or often per square foot of area occupied.

Where no coal pockets are included it has been our experience that 1000 tons capacity reinforced concrete elevator and pockets cost from $5.50 to $7.00 per ton of capacity. Steel bins, exclusive of the foundation, average from $2.50 to $3.00 per ton of capacity.

On much of the smaller concrete work which has been done under our supervision it has been possible owing to the contract being let on a percentage or a cost-plus basis, for us to obtain quite accurate and comprehensive cost data. This data of course, is only of value when all the cost items of the specific case is known; but the average results are at least interesting.

The average unit cost of the concrete in the floors, including the beams, girders and slabs, was $6.10 per cubic yard and in the columns $6.70 per cubic yard. Where 1:2:4 mixture was used for the columns the average cost was $7.50 per cubic yard. This cost was made up of the items of cement, sand, stone, gravel, labor and plant. The cement, of course, varied greatly with the demand; but the average net cost was $1.75 per barrel, including 3 cents for tests. The sand averaged 50 cents per cubic yard, and the crushed stone $1.25 per cubic yard. The cost of labor in unloading the materials and mixing and placing the concrete varied from 90 cents to $1.90 per cubic yard. The cost of plant, consisting of rental, depreciation, repairs of mixing and hoisting towers, erection of same, power and coal, and losses and waste on the small items, ranged from 50 cents to $1.50 per cubic yard of concrete placed.

Next to the proper design of the structural features of a concrete building, the economical design of the form work is of paramount importance. The truth of this statement is borne out by the fact that on the average job the cost of the forms amounts to about one-third the cost of the entire structure. On the buildings under consideration, the average cost of the forms for the floor, including beams, girders and slabs, was 10 cents per square foot, and for the columns, 13 cents per square foot. The lowest cost was in a building of the so-called "mushroom, or flat slab style of construction, where, as the intelligent use of standard panel, low flat slab forms, the cost was for an artistic but not extravagant two story cochere and 1-story cochere was 35 cent per square foot. This last item takes into account the fact that the temporary structural arrangement is not as economical proposition.

The cost of the hoist of making, setting and stripping the forms varied according to the proximity of the structure, and out of hoisting, erection of, the supervision and the skill of the workmen from 2 to 12 cents per square foot. The cost of removal, and oil divided by the square foot of forms, averaged from 2½ to 4½ cents per square foot.

The cost of reinforcing the concrete ranged from $1.60 per ton, the average cost from $1.77 to $1.90 per ton.

Concrete in floor units, 12 inches or less in depth and under the concrete arches, concrete roofs, etc., in accordance with the usage in 11 cities to which I have written, the cost of the steel ranges from 1½ cents to 2½ cents per pound. Where pounding, either by hand or machine, is required, the cost is somewhat higher.

In some of the early experimental days of reinforced concrete construction, the cost of the steel ranged from 3½ cents to 4½ cents per pound. The writer has used and seen used the cold twisted bar, and while the cost was slightly less than the plain round bar, it is not as satisfactory for concrete work as the latter purpose.

The cost of concrete work in the walls has been either as included in a 12 inch brick wall, resting on the concrete wall beam. The average cost of these walls was about 15 cents per square foot. There is practically no difference in cost between the solid and the 12-inch brick curtain wall, as the saving of material is offset by the great amount of extra labor in cutting and laying the banner brick.

An excellent and inexpensive spandrel wall is constructed by placing 8 by 12 by 18-inch vitrified tile. This is a form set out wall and when properly laid in cement mortar makes a rigid weather proof curtain wall. The cost of this wall averages about 25 cents per square foot. If the tile is exposed on both sides, the cost is about 38 cents per square foot.

Where Solvay corrugated wall was erected in place after the skeleton frame was completed, the average cost was 10 cents per square foot, and when poured simultaneously with the columns, 18 cents per square foot. Pour-inch cast concrete slabs cost about 35 cents per square foot.

Where concrete blocks made a very cheap and light curtain wall, the price being about the same as for the 8-inch tile the writer's experience with them has been rather unfortunate on account of their extreme porosity.

Where the location of the building has demanded special treatment of the exposed surfaces we have generally specified rubbing with a block of carborundum. The average cost of this work has been 4 cents per square foot. In two instances portions of the structure were sand blasted, with a resulting cost of 2 cents per square foot.

Concrete piles were used in the foundation of several of the buildings and the average cost of the piles was $1.15 per lineal foot.

The most common method of waterproofing concrete structures is by the application of foreign materials into the concrete to be waterproofed, compounded to the concrete mixture, the use of paint or felt and sprayings, and occasionally grading the proportioning the aggregate and cement.

We have in addition added lime to the proportion of 10 per cent to the weight of the cement and have used a solid bituminous paint. Painted concrete similar to that of the cement and cost from 2 to 3 cents per square foot of surface covered, including material and labor. We have also used a specially prepared cement for the purpose of waterproofing concrete, but in this case the cost is about 4 cents per square foot of surface covered. The cost of this work is about the same as the above.

careful study of each particular case to determine the cheapest type of construction and most economical spacing of columns. As a general proposition, we have found that for light loads with the most economical spacing of columns has been 18 feet each way; and for flat slab construction, 20 feet each way. For heavy loads, such as 300 pounds per square foot and over, it has been our experience that the cheapest column spacing for beam and girder construction is 15 feet by 15 feet by 17 feet. In arriving at the most economical layout, it is always well to bear in mind that the construction which allows the greatest simplicity of form units, together with the minimum number of repetitions of same, is invariably the one that will work out cheapest in the end. The fact that the actual amount of concrete or steel required for a certain floor construction is less than that required in another by no means implies that this is actually the cheapest floor construction, as the unit labor of the form work may easily have been increased out of all proportion.

Plans Wanted.

Sacramento School Commissioners are busy completing the final arrangements for securing plans for the several new school buildings to be erected in that city. An effort is being made to secure the services of an expert school architect to act in the capacity of an Advisory Architect, for which services he is to receive one per cent of the cost of the buildings. Several applications have been received from both local and out of town architects. Seven Sacramento architects are endeavoring to persuade the School Board to place the work of design in the hands of a commission composed entirely from among their number, who will form an Advisory Board and carry the entire work of design and supervision to completion. This matter will undoubtedly be settled at the next meeting of the School Board. There is a fund of $800,000 available for the construction of new buildings.

The Town of Larkspur, Marin County, is to have a new City Hall, costing in the neighborhood of $10,000. Competitive plans are to be called for on this work. All applicants must file their names with the Clerk of the Board of Town Trustees on or before 5 p. m. of October 16th, and upon such filing will receive full information regarding the competition. E. G. Vocke is the Clerk of the Board and may be addressed at Larkspur.

Pride Court, Foresters of America, in the city of Marysville, have appointed a committee to secure plans and specifications for the construction of a new $25,000 lodge building for the order in that city. The proposed building is to be erected on a corner site and will probably be a three-story brick or concrete structure. An effort will be made to complete the building by May of next year. Full information can be secured from the Secretary of Pride Court Marysville.

Competitive plans for two high school buildings of brick and frame construction will be received by the Board of Trustees of the Union High School District in the city of Orange, Orange County, California, until October 24th. New buildings must conform to the design of the present school, which is classic. It is proposed that the following departments shall be represented: Household Science, Botany, Physics, Geography and Music in one building about 50x100 feet two stories with full basement. Manual Training, Commerce Art and Applied Art in the other building, about 60x100 feet two stories with basement, about 20x40 feet. Entire work is not to exceed $40,000. Complete information can be obtained from George C. Woods, Secretary of the Board, Orange.

Native Sons of the Golden West at San Jose have recently purchased a building site on North First street, and will shortly take up the matter of securing plans and specifications for a new building. The site selected is the new Eiks building, now under construction, and has a frontage of 60 feet and a depth of something over 100 feet. A Building Committee has been appointed, but no steps have been taken towards securing plans. The organization will probably put between $50,000 and $75,000 into the construction of their building.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 3 story and base, frame, $15,000. Architects, Rhodes & Marisch, 3372 16th St., S. F. Owner, F. E. Mersereau. The building will be erected in the Mission District and will have a street frontage of 25 feet and a depth of 110 feet. A large retail store will occupy the entire first floor. On the upper floors there will be a total of ten apartments arranged in suites of two and three rooms each. Each apartment will have private entrance and connecting doors. A hot water heating system will be installed. There will be wall beds. Interior trim will be of pine and elm with oak floor borders. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

San Francisco—Apartment house, 3 story and base, brick and steel, $35,000. Architect S. Herman, 127 Montgomery St., S. F. Owner, Dr. Henry Weis. The building will be arranged for stores on the first floor and about 14 apartments of two and three rooms on the upper floors. All apartments will have connecting baths and will be equipped with wall beds. There will be steam, heat and elevator service. Interior trim will be of pine and oak. The exterior of the building will be faced with cement plaster. Preliminary plans only have been prepared.

San Francisco—Apartment house, 5 story and base, reinforced concrete and steel, $40,000. Architects, Rhodes & Marisch, 3372 16th St., S. F. Owner, Mrs. Julia Cronan. The structure will be erected on Bush street near Mason, and will have a frontage of 32 feet on Bush by a depth of 123. A basement nearly on a level with the sidewalk line has made it possible for the architects to locate the general office, lobby and housekeeper's room in the front portion of this floor. In the rear portion will be storage rooms, and space for the mechanical equipment. Thirty-five two-room suites will occupy the balance of the building. Interior finish will consist of mahogany, pine, elm and oak. Tile will be used in the bath rooms and kitchens. There will be private entrances and dressing rooms to all apartments. Connecting baths are also provided. A hot water system of heating will be used. There will be wall beds, a vacuum cleaning system, dumb waiters and garbage chutes. The exterior of the building will be faced with pressed brick and artificial stone. Plans are now out for figures.

Oakland, Cal.—Apartment house, 3 story and base, frame, $35,000. Architect, D. D. Kearns, Investors' Bldg., S. F. Owner R. L. Horn. The building will be erected on 24th street, between Telegraph avenue and Grove street. There will be 81 rooms, which will be arranged in 12 three-room suites and 24 two room suites. All apartments will have connecting baths and wall beds. Interior finish will be of pine and redwood. Some oak floors will be used. There will be a central heating system. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Oakland, Cal.—Apartment house, 2 story and base, frame. Cost not stated. Architect, Leonard H. Ford, 1701 Oxford St., Berkeley. Owner, Magnus Smith. The first floor of this building will be arranged for stores. There will be a total of three large apartments on the second floor. Interior finish will be of pine throughout. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Los Angeles, Cal.—Apartment house, 4 story and base, reinforced concrete. Cost not stated. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owner's name withheld. The building will cover an area of 75x85 feet and will contain 108 guest rooms, which are to be arranged in suites of two and three rooms each. There will be an amusement room, ladies' parlor, lobby and billard rooms. All apartments will have connecting baths, wall beds and private dressing rooms. There will be steam heat and elevator service, a vacuum cleaning system and dumb waiters. The exterior of the house will be faced with cement plaster. Plans are complete and the architect is taking figures on the work.

Los Angeles, Cal.—Apartment house and stores, 2 story and base, brick cost not stated. Architect, Fred Biren, Broadway Central Bldg., L. A. Owner, H. R. Hindman. The building will cover an area of 50x75 feet. The first floor will be arranged for two stores, while the second floor will be subdivided into four two-room apartments and two three-room apartments.

Cement floors will be used in the stores. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Los Angeles, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, Fred Biren, Broadway Central Bldg., L. A. Owner, E. H. Mathis, 606 So. Spring St., L. A. The building will contain 51 rooms, which will be arranged in two and three room suites. There will be steam heat and wall and disappearing beds. The exterior of the building will be covered with shiplap. Plans are in the hands of the owner and he is now taking figures on the work.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, none. Owner, F. E. Browne, 3219 So. Figueroa St., L. A. The building will cover an area of 100x135 feet, and will contain a total of 132 guest rooms, which will be arranged in two and three room suites. There will be private baths and wall beds. Steam heat, elevators and a vacuum cleaning system will be installed. Entrance and vestibule will be finished in marble. The exterior of the building will be faced with pressed brick. Plans are in the hands of the owner who is now taking figures on the work.

Los Angeles, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, M. D. L. Scott, Douglas Bldg., L. A. Owner, Dr. H. S. Haughawout. The building will cover an area of 40x149 feet and will contain 54 apartments of two and three rooms each with private baths and wall beds. Interior finish will be largely of pine and redwood. There will be steam heat and a vacuum cleaning system. The exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are being taken.

Los Angeles, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, M. D. L. Scott, Douglas Bldg., L. A. Owner, Mrs. E. H. Schuster. The building has been designed to contain 161 rooms, which will be arranged in two and three room apartments. The structure will cover an area of 75x100 feet. There will be steam heat, private baths, a vacuum cleaning system and wall beds. All interior finish will be of pine. Composition flooring will be used in the bath rooms. The exterior of the building will be covered with cement plaster on metal lath. Plans are now out for figures.

Portland, Ore.—Apartment house, 3 story and base, brick. Architects, Goodrich & Goodrich, Abington Bldg., Portland. Owner's name withheld. The structure will cover an area of approximately 50x100 feet and has been arranged for a number of two and three room apartments. All apartments will be equipped with disappearing beds and will have connecting baths. There will be a steam heating system installed. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

Los Angeles, Cal.—Apartment house, 1 story and base, brick, $50,000. Architects, Neher & Skilling, Pacific Electric Bldg., L. A. Owner, J. A. Forthman. Contractors, Barkelew & Gould, 1017 E 21st St., L. A. Contract price, $50,000.

San Francisco—Apartment house, 3 story and base, frame, $20,000. Architects Rhodes and Marisch, 3372 16th St., S. F. Owner, F. A. Mersereau. Contractors, MacArthur Bros, S F. Contract price $20,000

—BANKS—

Escalon, San Joaquin Co., Cal.—Bank, 2 story and base, brick and steel. Cost not stated. Architect, W. J Wright, San Joaquin Valley Bank Bldg., Stockton. Owners, Escalon State Bank. The building will occupy a corner site. The entire first floor will be occupied by the bank and will be subdivided for general office space, public space and private offices. There will be coin and safety deposit vaults. Business offices will be located on the second floor. A central heating system will be installed. Interior finish in the banking rooms will be of hardwood throughout with mahogany predominating. Considerable bronze will be used. The exterior of the building will be faced with white Medusa cement. Plans are being figured.

BRIDGES, DAMS AND HARBOR WORK.

Stockton Channel, San Joaquin Co., Cal. Dredging channel. Cost not stated. Engineers, U. S. Engineers, 405 Custom House Bldg., S. F. Owners, U. S. Government. Sealed proposals will be received at the offices of the U. S. Engineer, S. A. Cheney, Custom House Bldg., S. F. on October 24th for enlarging the Stockton Diverting Channel near Stockeon. Complete particulars can be secured from the engineer.

Stockton, San Joaquin Co., Cal.—Culverts, 11, reinforced concrete. Cost not stated. Engineer, County Engineer Quail, Stockton. Owners, San Joaquin County. Bids will be opened today, October 8th at Stockton for the construction of eleven concrete culverts in the Sharp Lane Road District. The McMillan floor system will be used.

San Francisco — Harbor improvements, wharfs, sea wall, etc. Cost not stated. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. At the last meeting of the State Board of Harbor Commissioners plans for a number of the new docks which are to be constructed from the nine million dollar bond issue were approved. Seven of these new docks, which are to be of the highest type of reinforced concrete construction, are to be erected between Powell and Lombard streets. Plans also provide for new docks to take the place of old ones at Mission and Howard streets. Bids are to be called for at once for the construction of a trench and frame platform crossing for the Belt Line Road over Market street at the Ferry.

Fresno, Fresno Co., Cal.—Bridge, concrete and steel. Cost not stated. Engineer, City Engineer, Fresno. Owners, City of Fresno. Bids will be received up to 9 p. m. of October 21st for the construction of a bridge over Dry Creek at Forthcamp avenue. Complete plans and specifications may be had from the City Clerk, W. H. Ryan.

Bellingham, Wash—Dock, frame and concrete construction. Cost not stated. Architects, Blackwell & Baker, Northern Bank Bldg., Seattle. Owners, Inland Navigation Co. Plans have been completed for a dock 100x300 feet upon which will be erected a two-story frame building. The first floor of the building will be used for storage purposes and the second for offices. A steam heating system will be installed. Bids will be taken on this work at once.

CHURCHES.

Los Angeles, Cal.—Church, frame construction. Cost not stated. Architects, Walker & Vawter, Hibernian Bldg., L. A. Owners, Hobart Boulevard M. E. Church. The building has been designed in the Mission style, and will cover an area of 80x102 feet. An auditorium 53x53 feet, a pastor's study and ten class rooms will complete the interior of the building. The exterior will be finished with cement plaster on metal lath. A red clay tile roof will be used. Working drawings are nearly complete.

FACTORIES & WAREHOUSES.

San Francisco—Warehouse, 2 story and base, brick, $10,000. Architect, Fred B. Wood, 2211 Steiner St., S. F. Owner, C. E. Holmes. The building has been designed for storage purposes only and will cover an area of 37½x80. Construction will be heavy enough to carry additional stories if future requirements demand. A cement floor will be used on the first story. A freight elevator will be installed. Exterior walls will be faced with pressed brick. Plans are complete and figures are being taken.

Los Angeles, Cal.—Warehouse, 2 story and base, brick. Cost not stated. Architect, W. J. Saunders, International Bank Bldg., L. A. Owners, Sperry Flour Co. The building will be 64x109 feet with heavy concrete foundation, walls of brick and sheet metal and Underwriters' shutters. Besides this structure there will be a frame bin building 45x100 feet and 50 feet high, which will contain 24 bins. Plans for both of these buildings are complete and the architect is taking figures for the construction.

FIRE HOUSES.
Contracts Awarded.

Portland, Ore.—Hall, reconstruction. Class A. $65,000. Architects, Emil Seiaecht & Son, Portland. Owners, City of Portland. Contractor, J. S. Winters, Portland. Contract price, $67,340.

FLATS.

San Francisco—Flats, 1 story frame addition, $2,000. Architect, C. J. Rousseau, Phelan Bldg., S. F. Owner's name withheld. A two-story frame building is now on the site and one additional story will be added. New plumbing, painting, plastering and electrical work will also be called for in the present building. Exterior finish will be of shiplap. Plans are complete and figures are being taken.

GARAGES.

San Francisco — Automobile sales rooms, etc., 3 story and base. Class A

construction, $60,000. Architect C. A. Meussdorffer, Humboldt Bank Bldg. S. F. Owner, C. L. Tilden. The building has been leased for a term of years to a well known automobile concern and remodeling will be started at once. Address to be announced. Contract to Van Nessen-Place and Gear. Heating plant to be erected. Ten apartments on ground floor will be used for office and store rooms and will be handsomely finished. The rear section, second and third floors will be given over to hotel rooms, lodging, dormitories and dining room. Reinforced concrete type of construction with reinforced concrete floors will be used throughout. Considerable metal trim and metal sash and frames will also be used. The exterior of the building will be of brick with cement plaster. Plans are complete and bids are being taken.

Los Angeles, Cal.—Garage, 1 story, brick. Cost not stated. Architects, Konig & Tourtellotte, Consolidated Realty Bldg., L. A. Owner, Louis H. Tolhurst. The building will be constructed for commercial garage and will be 90x90 feet with an L in the rear 60x60 feet. Cement floor will be used throughout. The front portion of the main building will be pressed brick construction. The exterior will be treated with grazed tile. Plans are complete and bids are to be taken at once on the various parts of the work.

Contracts Awarded.

Los Angeles, Cal.—Garage, 2 stories and base, brick and concrete, $55,000. Architects, Parkinson & Bergstrom. Summit Bldg., L. A. Owner, Mrs. L. B. Hawkes. Contractor, Mix Plaster Mfg. Co., 530 Mesquit St., L. A. All work except excavation and lighting fixtures. Contract price $53,000.

GOVERNMENT WORK AND SUPPLIES.

Buildngs at Bremerton.

A contract amounting to $5,000 was recently awarded to Paul Studer, P. O. Box 54, Bremerton, Wash., for the construction of five frame buildings for the U. S. Marine Corps at the Naval Labor, Bremerton. The bids were opened August 26 at Bremerton.

San River Irrigation Project.

The Secretary of the Interior has awarded the contract for $10,000 to John L. B. Meyer, of Augusta, Montana, for logging and sawing timber in connection with the San River Irrigation project, Montana. The estimated expenditures involved are indeterminate, but will vary in accordance with the requirements for timber for temporary structures, forms, bridges, etc. About 500,000 feet B. M. are involved at the rate of 1000 feet B. M. per month, with privilege on the part of the United States to extend the requisition to include an additional 500,000 feet B. M. The contract rates are: (a) Logging, felling and sawing: Length 20 feet to 30 feet $10; additional price for any sizes in length of 18 feet 50 cents, 20 feet 50 cents, 22 feet 75 cents, 24 feet 75 cents, 26 feet, $1, 28 feet $1.50, 30 feet, $1.50; (c), piling for seasoning, per M feet, B. M., $1; (d), sizing, per M feet, B. M., on side run one edge $3; on piling also make per M feet B. M. 75 cents.

Pearl Harbor Officers' Quarters.

The contract for the erection of officers' quarters at the naval station, Pearl Harbor, H. T., has been awarded to the Spalding Construction Co., Portland, Ore., at $60,250.

HALLS AND SOCIETY BUILDINGS.

San Francisco—Store, lofts and stores, 1 story and basement brick, to cost $5,000. Architect Frederick H. Meyer, Bank of Italy Bldg. Owners, Mrs. Catherine Hillman and Sons. The work will soon be started. The entire work will be completed by March 1st next. The building will be used by the San Francisco Press Club and will be equipped as clubrooms in every way. There will be retail stores on the first floor. Special interior arrangements and fittings are to be installed in the Press Club rooms. Two walls of the building will be of brick construction. The exterior of the building will be treated with grazed tile. Work is progressing rapidly and will be completed and ready for occupancy by January 1st next.

Sacramento, Cal.—Armory, 1 story, and base, $100,000. Architect A. Hall, Sacramento. Owner, State of California. An extension of time has been granted at which to receive bids for the erection and equipping of the armory at this building. Bids will be opened on October 4th at Sacramento. It has also been decided to install a heating plant for this building. Architect's plans for bids for the structure and for the heating plant are now ready. The contract for $110,000 was awarded to the California Construction Co.

HOSPITALS.

Patton, Los Angeles Co., Cal.—Hospital work, frame construction, $85,000. Architect State Architect, Woodleft Sacramento. Owners State of California. Work has been received from State Architect to the effect that all bidders invited to bid on the contract of the heating work at the Southern State Hospital at Patton have been notified and that nearly all will be filed at noon 9 o'clock, to-day, September 1st. The lowest bid was in excess of the amount available for construction.

Contracts Awarded.

Los Angeles, Cal.—Hospital group of buildings, frame and concrete construction. Cost not stated. Architect Hunt & Burns, Laughlin Bldg., L. A. Owners, Commission Hospital Association. Contractor, J. D. Keat Co. Santa Monica. Contract price not stated.

HOTELS.

San Francisco—Hotel, 5 story and base, brick and steel, $75,000. Architect Milton Latenser, 11 Ellis St., S. F. Owner, C. and S. Gerke. The building will be erected on the northeast corner of Geary and Jones streets, and is one of several large improvements contemplated on Geary street in the near future when the municipal road will be completed. The structure will be equipped for stores on the first floor and 3 large and spacious lodge rooms. A total of one hundred and seventy guest rooms will complete the upper five floors. There will be steam heat, electric service and a vacuum cleaning system. The exterior of the building will probably be faced with pressed brick. Plans are nearly complete and bids will be called for shortly.

San Francisco—Hotel 7 story and base, reinforced concrete and steel, $80,000. Architect, Henry C. Skidmore, Pacific Bldg., S. F. Owner, W. W. Anderson. Mr. Anderson is a well known builder, and will construct this building under his personal direction. There will be stores and a lobby on the main floor and about 125 guest rooms and connecting baths on the upper floors. Steam heat and elevators will be installed. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

Los Angeles, Cal.—Hotel, 5 story and base, brick and steel. Cost not stated. Architect, S. T. Norton, Title Ins. Bldg., L. A. Owners, Yap Len, Mgr. Sing Fat & Co., L. A. The building site is 50x90. Plans provide for stores on the first floor and a total of 81 guest rooms on the upper floors, about 30 of which will have connecting baths. There will be steam heat and elevator service. Running hot and cold water will be supplied to all rooms. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Torrance, Los Angeles Co.,—Hotel, 2 story and base, brick. Cost not stated. Architect, Irving J. Gill, Title Ins. Bldg., L. A. Owners, Dominguez Land and Water Co. The building will cover an area of 114x124 feet. There will be two stores besides the lobby on the first floor and 36 guest rooms and 8 baths on the second floor. Rector system of heating will be installed. Hot and cold running water will be supplied to all rooms. The exterior of the building will be faced with cement plaster. Plans are being prepared.

San Francisco—Hotel, 5 story and base reinforced concrete, $35,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owners, Harry G. and J. O. Richards. The building will be erected in the south line of Sutter street near Hyde, and will contain in the neighborhood of 100 guest rooms, nearly all of which will have connecting baths. A store and the hotel lobby will occupy the first floor. There will be steam heat and elevator service. Hot and cold running water will be supplied to all rooms. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

Los Angeles, Cal.—Hotel, 3 story. Class A construction. Cost not stated. Architectural Dept. California Real Estate and Building Co., 631 So. Spring St., L. A. Owners, California Real Estate and Building Co. Only preliminary plans have been prepared for this building. A site on Coronado, between Chapman and Second has not secured. Present plans show a total of 235 guest rooms and 100 baths, besides parlors, hall rooms, lobby and large dining room. Complete details will be given as the plans progress.

—LIBRARIES—

Contracts Awarded.

McMinnville, Ore.—Library, 1 story and base, brick and steel, $10,000. Architect, Ernest Kroner, Portland. Owners, Town of McMinnville. Contractors, J. F. Wineland Building and En-

gineering Co., Portland. Contract price, $10,000.

PUBLIC BATHS.

San Jose, Santa Clara Co., Cal.—Public bath house, 1 and 2 story and base, reinforced concrete, $65,000. Architect, William Binder, Rea Bldg., San Jose. Owners, City of San Jose. An elaborate public bath house is a part of the scheme for improvements at Alum Rock Park. Plans for a building 88x 165 feet have been completed by the architect and are now out for figures. The structure will contain 40 bath rooms besides a plunge 40x90 feet. Construction will be entirely of reinforced concrete. Tile will be used in the floors and sidewalks. Only the highest type of plumbing will be used. A heating system will be housed in a separate building. The exterior of the bath house will be faced with cement plaster. A tile roof wll be used. Plans are now complete and figures are being taken.

RESIDENCES.

San Francisco—Residence, 2 story and base, frame, $12,000. Architects, Havens & Toepke, 46 Kearny St., S. F. Owner, Frank Amrys. This dwelling will be erected on Filbert street near Scott, and will contain ten rooms, baths and sleeping porch. All interior finish will be of pine, redwood or oak. Oak floors will be used throughout. There will be a central heating system and open fire places. Tile will be used in the bath rooms and kitchen. The exterior of the hause will be covered with cement plaster on metal lath. Plans are now being prepared.

San Francisco—Residence, 2 story and base, frame, $12,000. Architect, Arthur J. Laib, Russ Bldg., S. F. Owner, Mr. Wertheimer. The house has been designed for a ten room dwelling with baths, sleeping porches and a laundry. The interior will be finished in pine and hardwoods. Oak floors will be used in the principal rooms. SEALED PROPOSALS.

PROPOSALS FOR CONSTRUCTING BUILDING.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including **12 o'clock noon, Monday, October 21, 1912,** and bids then and there be publicly opened and read, for the Armory for the National Guard of California at Los Angeles, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Bids will be received as a whole or in subdivisions, as follows:

FIRST—For the Entire Building, including excavation.

SECOND—For Mason Work.

THIRD—For Structural Steel Work.

FOURTH—For Carpenter and Mill Work.

FIFTH—For Metal Lathing and Plastering.

SIXTH—For Sheet Metal and Roofing Work.

SEVENTH—For Painting, Staining and Glazing.

EIGHTH—For Ornamental Metal Work.

NINTH—For Marble, Terrazzo and Tile Work.

TENTH—For Plumbing, Sewers and Gasfitting.

ELEVENTH—For Steam Heating and Ventilating.

TWELFTH—For Electric Wiring.

A certified check in the sum of ten per centum (10%) of the amount of bid must accompany each bid.

A deposit of Twenty-five Dollars ($25) will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, Cal., in good condition.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, Cal., and plainly marked on the envelope "Proposals for Los Angeles Armory."

(Signed) W. F. McCLURE,
State Engineer.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at the office of the Director of Works, in the Exposition Building, Fine and Battery Streets, San Francisco, California, at **10 a. m. on October 15th, 1912,** for the following work:

Contract No. 10.

For constructing a Roadway Trough Post Mason Military Reservation in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company, or cash in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract, the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progress payments will be made.

The right is reserved to reject any or all bids and to waive technical defects if to the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 617 Exposition Bldg., by depositing $5.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee

WILLIAM H. CROCKER,
Chairman of the Committee.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company, at the office of the Director of Works, in the Exposition Building, Fine and Battery Streets, San Francisco, California, at **10 a. m. on October 15th, 1912,** for the following work:

Contract No. 12.

For constructing South Garcia Sewer, in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company or cash in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (50) per cent of the contract price will be required for the faithful performance of the contract, the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progress payments will be made.

The right is reserved to reject any or all bids and to waive technical defects if to the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, at Room 617 Exposition Bldg., by depositing $5.00, which will be refunded upon the return of the plans and specifications in good condition.

By order of the Buildings and Grounds Committee

WILLIAM H. CROCKER,
Chairman of the Committee.

SAN FRANCISCO.

Road Work—Cost not stated. San Francisco. Engineers, Engineering Dept. Panama-Pacific Exposition Co., Exposition Building, S. F. Owners, Panama-Pacific Exposition Co. Plans have been completed for the construction of that part of the Fair Boulevard within the limits of Fort Mason Military Reservation. Bids are now being called for and will be opened on October 15th. For official proposal see under sealed proposals in this issue.

Sewer Work—Cost not stated. San Francisco. Engineers, Engineering Dept. Panama-Pacific Exposition Co., Exposition Bldg., S. FR. Owners, Panama-Pacific Exposition Co. Bids will be opened on October 15th for contracts 11 and 12, which call for the construction of sewers within the Fair site. Contract No. 11 is for the North Service Road Sewer and contract No. 12 is for the South Garden Sewer. Plans and specifications may be had from the office of the Director of Works. For official proposals see under Sealed Proposals in this issue.

Apartment House—3 story and base frame, $15,000. San Francisco. Architects, Rhodes & Marisch, 3372 16th St., S. F. Owner, F. E. Mersereau. The building will be erected in the Mission District and will have a street frontage of 25 feet and a depth of 110 feet. A large retail store will occupy the entire first floor. On the upper floors there will be a total of ten apartments arranged in suites of two and three rooms each. Each apartment will have a private entrance and connecting baths. A hot water heating system will be installed. There will be wall beds. Interior trim will be of pine and elm with oak floor borders. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

Apartment House—5 story and base, brick and steel, $35,000. San Francisco. Architect, S. Heiman, 127 Montgomery St., S. F. Owner, Dr. Henry Welsh. The building will be arranged for stores on the first floor and about 34 apartments of two and three rooms on the upper floors. All apartments will have connecting baths and will be equipped with wall beds. There will be steam heat and elevator service. Interior finish will be of pine and oak. The exterior of the building will be faced with cement plaster. Preliminary plans only have been prepared.

Apartment House—5 story and base, reinforced concrete and steel, $40,000. San Francisco. Architects, Rhodes & Marisch, 3372 16th St., S. F. Owner, Mrs. Julia Cronan. This structure will be erected on Bush street near Mason, and will have a frontage of 32 feet on Bush by a depth of 123 feet. A basement nearly on a level with the sidewalk line has made it possible for the architects to locate the general office, lobby and housekeeper's room in the front portion of this floor. In the rear portion will be storage rooms and space for the mechanical equipment. Thirty-five two-room suites and five single rooms will occupy the balance of the building. Interior finish will consist of mahogany, pine, elm and oak. Tile will be used in the bath rooms and kitchens. There will be private entrances and dressing rooms to all apartments. Connecting baths are also provided. A hot water system of heating will be used. There will be wall beds, a vacuum cleaning system, dumb waiters and garbage chutes. The exterior of the building will be faced with pressed brick and artificial stone. Plans are now out for figures.

Club Rooms and Stores—4 story and base, brick and steel, $75,000. San Francisco. Architect, Frederick H. Meyer. Bankers' Investment Bldg., S. F. Owners, Hillbush and Silverberg. This work has been mentioned here before when the architect first started the plans. A large portion of the building has been leased to the San Fancisco Press Club, and will be fitted up in an elaborate manner. There will be retail stores on the first floor. Special interior fittings and finish are to be installed in the Press Club rooms. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick and terra cotta. Working drawings are nearly complete and figures will be called for at once.

Hotel—6 story and base, brick and steel, $75,000. San Francisco. Architect, Milton Lichtenstein, 111 Ellis St., S. F. Owners, G. and S. Gump. The building will be erected at the northeast corner of Geary and Jones streets and is one of several large improvements contemplated for Geary street in the near future when the municipal road will be completed. The structure will be arranged for stores on the first floor and a large and spacious lobby. A total of something over 100 guest rooms will complete the upper five floors. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will pobably be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

Hotel—7 story and base, reinforced concrete and steel, $65,000. San Francisco. Architect, Harry C. Skidmore, Foxcroft Bldg., S. F. Owner, W. W. Anderson. Mr. Anderson is a well known builder and will construct this building under his personal direction. There will be stores and a lobby on the main floor and about 125 rooms with connecting baths on the upper floors. Steam heat and elevators will be installed. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

Residence—2 story and base, frame, $12,000, San Francisco. Architects, Havens & Toepke, 16 Kearny St., S. F. Owner, Frank Amrys. This dwelling will be erected on Filbert street near Scott and will contain ten rooms, baths and sleeping porch. All interior finish will be of pine, redwood or oak. Oak floors will be used throughout. There will be a central heating system and open fire places. Tile will be used in the bath rooms and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

Residence—2 story and base, frame, $12,000, San Francisco. Architect, Arthur J. Laib, Russ Bldg., S. F. Owner, Mr. Wertheimer. The house has been designed for a ten-room dwelling with baths, sleeping porches and a laundry. The interior will be finished in pine and hardwoods. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile will be used in the baths and kitchen. The exterior of the house will probably be covered with cement plaster on metal lath. Plans are nearly ready for figures.

Residence—2 story and base, frame, $2,500. San Francisco. Architect, none. Owner, E. Catherini, 3679 19th St., S. F. The dwelling will contain six rooms and bath. All interior trim will be of pine or redwood. Some oak floors will be used. There will be open fire places with attractive brick mantels. Tile will be used in the bath room. The exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

Residences—2, 2 story and base, frame, $5,500 and $4,800 each. San Francisco. Architect, none. Owner, E. N. Fritz, 1401 Masonic Ave., S. F. These houses will be erected on Buena Vista avenue, near Frederick street. Both will contain eight rooms and bath, sleeping porch and laundry. Exterior design of both will be similar, cement plaster on metal lath being used. Interior finish will be of pine, elm and hardwood. Oak floors will be used in the pincipal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Tile and composition will be used in the bath rooms and kitchens. Plans are complete and the owner will do the work by Day Labor.

Residences—2, 2 story and base, frame, $2,700 and $4,000 each. San Francisco. Architect, J. M. Geary, 23rd and Folsom Sts., S. F. Owners, Parkside Home Building Co., Crocker Bldg., S. F. One dwelling will contain six rooms and bath, the other eight rooms and bath. Interiors will be finished in pine, redwood and elm. Oak floors will be used in several rooms. There will be composition flooring in the baths. Furnace heat will be installed in the larger house. There will be open fire places and tile and brick mantels. The exteriors will be covered with shingles in both cases. Plans are complete and the work is being done by Day Labor.

Theatre and Hotel—6 story and base, brick and steel. Cost not stated. San Francisco. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owners, Down Town Realty Co. The architect states that work has been resumed by the owners on the theatre building at Mason and Eddy streets. This large structure has long remained untouched, but finances have been secured and work will proceed at once.

Harbor Improvements—Wharfs, sea wall, etc. Cost not stated. San Francisco. Engineer, Asst. State Engineer, Ferry Bldg., S. F. Owners, State of California. At the last meeting of the State Board of Harbor Commissioners plans for a number of the new docks which are to be constructed from the nine million dollar bond issue were approved. Seven of these new docks, which are to be of the highest type of reinforced concrete construction, are to be erected between Powell and Lombard streets. Plans also provide for new docks to take the place of old ones at Mission and Howard streets. Bids are to be called for at once for the construction of a trench and frame platform crossing for the Belt Line Road over Market street at the Ferry.

Warehouse—2 story and base, brick, $10,000. San Francisco. Architect, Fred B. Wood, 2211 Steiner St., S. F. Owner, H. E. Holmes. The building has been designed for storage purposes only and will cover an area of 37½x80. Construction will be heavy enough to carry additional stories if future requirements demand. A cement floor will be used on the first story. A freight elevator will be installed. Exterior walls will be faced with pressed brick. Plans are complete and figures are being taken.

Flats—4 story, frame addition. San Francisco. Architect, C. J. Rousseau, Phelan Bldg., S. F. Owner's name withheld. A two-story frame building is now on the site and one additional story will be added. New plumbing, painting, plastering and electrical work will also be called for in the present building. Exterior finish will be of shiplap. Plans are complete and figures are being taken.

Automobile Sales Rooms, Etc.—3 story and base. Class A construction, $80,000, San Francisco. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, C. L. Tilden. This building has been leased for a long term of years to a well known automobile house and construction will be started at once. A large site at the northeast corner of Van Ness avenue and Geary street is to be improved. The front portion of the first floor will be used for offices and sales rooms and will be handsomely finished. The rear portion, second and third floors will be given over to repair rooms, shipping departments and storage space. Reinforced concrete type of construction with reinforced concrete floors will be used throughout. Considerable metal trim and metal sash and frames will also be used. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

Hotel—5 story and base, reinforced concrete, $35,000, San Francisco. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owners, Henry G. and J. O. Richards. The building will be erected in the south line of Sutter street near Hyde, and will contain in the neighborhood of 100 guest rooms nearly all of which will have connecting baths. A store and the hotel lobby will occupy the first floor. Tenderloin will be steam heat and elevator service. Hot and cold running water will be supplied to all rooms. Plans are complete and figures are being taken.

Picture Show—1 story, frame, $10,000., San Francisco. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, Dr. J. M. Moss. The building has been designed for a moving picture house and will be erected in the Richmond District. There will be one large main auditorium. A system of ventilation will be installed. The exterior of the building will be covered with cement plaster. Plans are complete and figures are being taken.

Contracts Awarded.

Apartment House—3 story and base, frame, $20,000. San Francisco. Architects, Rhodes & Marisch, 3372 16th St., S. F. Owner, F. A. Merreau. Contractors, MacArthur Bros., S. F. Contract price, $20,000.

OAKLAND AND ALAMEDA COUNTY.

Apartment House—3 story and base, frame, $35,000. Oakland, Cal. Architect, D. D. Kearns, Investors' Bldg., S. F. Owner, R. L. Horn. The building will be erected on 24th street between Telegraph avenue and Grove street There will be 84 rooms which will be arranged in 12 three-room suites and 24 two-room suites. All apartments will have connecting baths and wall beds. Interior finish will be of pine and redwood. Some oak floors will be used. There will be a central heating system. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Apartment House—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, Leonard H. Ford, 1704 Oxford St., Berkeley. Owner, Magnus Smith. The first floor of this building will be arranged for stores. There will be a total of three large apartments on the second floor. Interior finish will be of pine throughout. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and bids are being taken.

Residence—2 story and base, frame, $4,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Junk-Riddell Co., Berkeley National Bank Bldg., Berkeley. The house will contain eight rooms, bath and sleeping porch. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile and composition will be used in the bath room and kitchen. The exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $4,500. Piedmont, Alameda Co., Cal. Architect, A. Merrill Bowser, 1000½ Broadway, Oakland. Owner, James Roundtree. The dwelling will contain eight rooms, baths and sleeping porches. Interior trim will be of pine, redwood and oak. Oak flooring will be used in a number of the rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Composition flooring will be used in the bath room. Tile will be used in the kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $2,500. Berkeley. Alameda Co., Cal. Architect, none. Owner, E. I. Krocsa, 1619 Scenic Ave., Berkeley. The dwelling has been designed for a five-room house with bath and sleeping porch. The interior finish will be of pine throughout. Oak floors will be used in the living and dining rooms. There will be open fire places and brick mantels. Tile will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Stores—1 story and base, brick and steel, $15,000. Oakland, Cal. Architect, C. W. Dickey, Oakland Bank of Savings Bldg., Oakland. Owners, Surety Mortgage and Building Co. The building will be erected on 15th street east of Broadway and will cover a considerable area. There will be several stores with large plate glass windows and patent store fronts. The interiors will be finished in pine and hardwood. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for within a week.

Power Station—1 story and base, steel and concrete. Cost not stated Alameda, Alameda Co., Cal. Architect, Engineering Dept. City of Alameda. Owners, City of Alameda. In addition to the power house proper there will be erected a one-story concrete building for fire alarm switchboards, and office building and a frame garage. The power house will be Class A throughout. The exterior will be faced with cement plaster. Plans are complete and out for figures. Bids will be opened on October 16th. The sum of $150,000 has been appropriated for this work.

Contracts Awarded.

School—2 story and base, reinforced concrete, $52,594. Haywards, Alameda Co., Cal. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Haywards Union High School District. Contractors, Thurston & Co., Oakland. Contract price, $52,594.

SAN JOSE & SANTA CLARA VALLEY

Public Bath House—1 and 2 story and base, reinforced concrete, $65,000. San Jose, Santa Clara Co., Cal. Architect, William Binder, Rea Bldg., San Jose. Owners, City of San Jose. An elaborate public bath house is a part of the scheme for improvements at Alum Rock Park. Plans for a building 88x165 feet have been completed by the architect and are now out for figures. The structure will contain 10 bath rooms besides a plunge 40x90 feet. Construction will be entirely of reinforced concrete. Tile will be used in the floors and sidewalks. Only the highest type of plumbing will be used. A heating system will be housed in a separate building. The exterior of the main house will be faced with cement plaster. A tile roof will be used. Plans are now complete and figures are being taken.

Residence additions and Alterations Frame and concrete, $15,000. Los Gatos, Santa Clara Co., Cal. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owner, W. B. Wellman. The work will include an addition of some six or seven rooms and six bath rooms. The main portion of the house will be completely altered and new interior finish will be put in. There will be new electric work, plastering and plumbing. The exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Apartment House—4 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owner's name withheld. The building will cover an area of 78x95 feet and will contain 108 guest rooms which are to be arranged in suites of two and three rooms each. There will be an amusement room, ladies' parlors and orchard rooms. All apartments will have connecting baths, wall beds and private dressing rooms. There will be steam heat and elevator service, a vacuum cleaning system and dumb waiters. The exterior of the house will be faced with cement plaster. Plans are complete and bee are afect is taking figures on the work.

Hospital Work—Prime contraction, $85,000. Patton, Los Angeles Co., Cal. Architect State Architect Woollett, Sacramento. Owners, State of California. Word has been received from Sacramento by the effect that all figures received for the construction of the various work at the Southern State Hospital at Patton have been rejected and that new figures will be called as soon as the plans can be revised. The lowest bid was in excess of the amount available for construction.

Hotel—4 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, S. T. Norton, Title Ins. Bldg., L. A. Owner, Yaje Lee, Mgr., Sing Pal & Co., L. A. The building site is 50x90 feet. Plans provide for stores on the first floor and a total of 61 guest rooms on the upper floors, about 30 of which will have connecting suites. There will be steam heat and elevator service. Running hot and cold water will be supplied to all rooms. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Hotel—7 story and base, brick. Cost not stated. Torrance, Los Angeles Co., Cal. Architect, Irving J. Gill, Title Ins. Bldg., L. A. Owners, Dominguez Land and Water Co. The building will cover an area of 114x124 feet. There will be four store fronts, the lobby on

...ed, 1 story, brick and frame. Cost not stated. Omonita Park, Los Angeles Co., Cal. Architect, J. Martyn Haenke, Central Bldg., L. A. Owner, Huntington Hall School for Girls. This work has been mentioned here before. In connection with the school building a frame gymnasium will also be erected. Plans for both of these buildings are complete and bids are now being taken.

Stores—1 story and base, brick, $45,000. Los Angeles, Cal. Architects, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Owner, Lorenzo Vignolo. The work will include the construction of this one-story building, an addition of one story, also of brick construction. The addition will be subdivided for apartments. Several stores will occupy the new building. Patent fronts will be used and a cement floor. Interior trim will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Stores and Offices—13 story and base. Class A construction, $800,000. Los Angeles, Cal. Architect, J. Martyn Haenke, Central Bldg., L. A. Owners, Home Builders, Mason Opera House Bldg., L. A. The proposed building will have a frontage of 117 feet on Spring street, 108 feet on 8th street and 121 feet on Main street, with 400 office rooms in the twelve upper stories and quarters for a banking institution and the new offices for the building company on the ground floor. Details of construction have not yet been fully decided upon, but it will be absolutely fireproof with exterior facing of either glazed brick or terra cotta. The building details will be handled by the building committee of "Home Builders," of which C. Wesley Roberts, Citizens' Bank Bldg., is chairman. Work upon the new building cannot be commenced before April, 1913, owing to leases on the building now occupying the site.

Concrete Pier and Amusement Building—Reinforced concrete and frame. Cost not stated. Los Angeles, Cal. Architects, Large & La Casse, Central Bldg., L. A. Owners, Maier Pier Co. The pier will be 1300 feet long and 750 feet wide. The building will consist of a dance hall, 250x250 feet, bowling alley, 100x100 feet; shooting gallery, merry-go-round, ship cafe, baby incubator building, 50x100 feet, and a half a dozen other concession buildings. There will also be a parking place on the pier for 50 automobiles. Buildings will rest on reinforced concrete piers and the buildings will be of fireproof construction, probably of steel frame with metal lath and plaster for exterior walls. The architects will commence the preparation of working drawings immediately, and expect to have the plans ready for contractors for figuring in about 60 days.

Contracts Awarded.

Apartment House—1 story and base, brick, $50,000. Los Angeles, Cal. Architects, Nehet & Skilling, Pacific Electric Bldg., L. A. Owner, J. A. Forthman. Contractors, Barkelew & Gould, 161 E. 21st St., L. A. Contract price, $50,000.

Hospital Group—3 buildings, frame and concrete construction. Cost not stated. Los Angeles, Cal. Architects, Hunt & Burns, Laughlin Bldg., L. A.

...ed, 1 story, brick and frame. Cost not stated. Los Angeles, Cal. Architect, M. D. L. Scott, Douglas Bldg., L. A. Owner, Dr. H. S. Haughawout. The building will cover an area of 65x70 feet, and will contain 11 apartments of two and three rooms each, with private baths and wall beds. Interior finish will be largely of pine and redwood. There will be steam heat and a vacuum cleaning system. The exterior of the building will be faced with cement plaster on metal lath. Plans are complete and figures are being taken.

Apartment House—1 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, M. D. L. Scott, Douglas Bldg., L. A. Owner, Mrs. E. H. Schuster. The building has been designed to contain 16 rooms, which will be arranged in two and three room apartments. The structure will cover an area of 75x100 feet. There will be steam heat, private baths, a vacuum cleaning system, and wall beds. All interior finish will be of pine. Composition flooring will be used in the bath rooms. The exterior of the building will be covered with cement plaster on metal lath. Plans are now out for figures.

Church—Frame construction. Cost not stated. Los Angeles, Cal. Architects, Walker & Vawter Bldg., L. A. Owners, Hobart Boulevard M. E. Church. The building has been designed in the Mission style and will cover an area of 80x102 feet. An auditorium 75x55 feet, a pastor's study and ten class rooms will complete the interior of the building. The exterior will be finished with cement plaster on metal lath. A red clay tile roof will be used. Working drawings are nearly complete.

Warehouse—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect W. J. Saunders, International Bank Bldg., L. A. Owners, Sperry Flour Co. The building will be 60x100 feet, with reinforced concrete foundation walls of brick. Sheet metal and Underwriters' shutters will be used. Besides this structure there will be a frame bin building 18x100 feet and 50 feet high, which will contain 24 bins. Plans for both of these buildings are complete and the architect is taking figures for the construction.

Garage—1 story, brick. Cost not stated. Los Angeles, Cal. Architects, King & Taylor, Consolidated Realty Bldg., L. A. Owner, Louis H. Tolhurst. The building has been designed for a commercial garage and will be 60x160 feet with an L 60x80 feet. Cement floor will be used throughout. The front portion of the main building will be finished for offices. The exterior will be faced with glazed tile. Plans are complete and figures are to be taken at once on the various parts of the work.

Hotel—3 story. Class A construction. Cost not stated. Los Angeles, Cal. Architectural Dept. California Real Estate and Building Co., 631 So. Spring St., L. A. Owners, California Real Estate and Building Co. Only preliminary plans have been prepared for this building. A site on Coronado, between Chapman and Second, has been secured. Present plans show a total of 337 guest rooms and 200 baths, besides parlors, ball rooms, lobby and public dining room. Complete details will be given as the plans progress.

Residence—2 story, attic and base, frame, $50,000. San Diego, Cal. Architect, Walter Webber, Ferguson Bldg., L. A. Owner, A. S. Bridge, 2770 6th St., San Diego. The dwelling will contain in the neighborhood of twenty rooms and six baths. A two-story garage with four servants' rooms will also be erected on the property. Interior finish will be of oak, walnut, elm and cedar. All baths will be finished in tile with composition floors. There will be a steam heating system. Art and plate glass will be used. The exterior of the house will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are complete and figures are being taken.

School—2 story, brick and frame. Cost not stated. Omonita Park, Los Angeles Co., Cal. Architect, J. Martyn Haenke, Central Bldg., L. A. Owner, Huntington Hall School for Girls. This work has been mentioned here before. In connection with the school building a frame gymnasium will also be erected. Plans for both of these buildings are complete and bids are now being taken.

Stores—1 story and base, brick, $45,000. Los Angeles, Cal. Architects, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Owner, Lorenzo Vignolo. The work will include the construction of this one-story building, an addition of one story, also of brick construction. The addition will be subdivided for apartments. Several stores will occupy the new building. Patent fronts will be used and a cement floor. Interior trim will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Stores and Offices—13 story and base. Class A construction, $800,000. Los Angeles, Cal. Architect, J. Martyn Haenke, Central Bldg., L. A. Owners, Home Builders, Mason Opera House Bldg., L. A. The proposed building will have a frontage of 117 feet on Spring street, 108 feet on 8th street and 121 feet on Main street, with 400 office rooms in the twelve upper stories and quarters for a banking institution and the new offices for the building company on the ground floor. Details of construction have not yet been fully decided upon, but it will be absolutely fireproof with exterior facing of either glazed brick or terra cotta. The building details will be handled by the building committee of "Home Builders," of which C. Wesley Roberts, Citizens' Bank Bldg., is chairman. Work upon the new building cannot be commenced before April, 1913, owing to leases on the building now occupying the site.

Concrete Pier and Amusement Building—Reinforced concrete and frame. Cost not stated. Los Angeles, Cal. Architects, Large & La Casse, Central Bldg., L. A. Owners, Maier Pier Co. The pier will be 1300 feet long and 750 feet wide. The building will consist of a dance hall, 250x250 feet, bowling alley, 100x100 feet; shooting gallery, merry-go-round, ship cafe, baby incubator building, 50x100 feet, and a half a dozen other concession buildings. There will also be a parking place on the pier for 50 automobiles. Buildings will rest on reinforced concrete piers and the buildings will be of fireproof construction, probably of steel frame with metal lath and plaster for exterior walls. The architects will commence the preparation of working drawings immediately, and expect to have the plans ready for contractors for figuring in about 60 days.

Contracts Awarded.

Apartment House—1 story and base, brick, $50,000. Los Angeles, Cal. Architects, Nehet & Skilling, Pacific Electric Bldg., L. A. Owner, J. A. Forthman. Contractors, Barkelew & Gould, 161 E. 21st St., L. A. Contract price, $50,000.

Hospital Group—3 buildings, frame and concrete construction. Cost not stated. Los Angeles, Cal. Architects, Hunt & Burns, Laughlin Bldg., L. A.

Owners, Children's Hospital Association. Contractors, J. D. Keen Co., Santa Monica. Contract price not stated.

Garage—2 story and base, brick and concrete $53,000, Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owner, Miss L. R. Hawkes. Contractors, Alta Planing Mill Co., 830 McGarry St., L. A. All work except elevators and lighting fixtures. Contract price, $53,000.

PORTLAND AND OREGON.

Stores and Offices—3 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architects, Bridges & Webber, Hamilton Bldg., Portland. Owner, George W. Bates. The building will cover an area of 50x80 feet. There will be several retail stores on the first floor. Upper two floors will be subdivided for offices and lofts for light manufacturing purposes. There will be elevators and steam heat. The exterior of the building will be faced with cement plaster. Plans are being prepared.

Stores—2 story and base brick and steel, $30,000. Portland, Ore. Architects, McNaughton & Raymond, Concord Bldg, Portland. Owners, Rosenthal & Co. The building will be erected on 10th street between Washington and Adler streets. The first floor will be arranged for display room purposes while the second floor will contain stock rooms. A freight elevator will be installed. There will be modern plumbing. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Apartment House—3 story and base, brick, Portland, Ore. Architects, Goodrich & Goodrich, Abington Bldg., Portland. Owner's name withheld. The structure will cover an area of approximately 50x100 feet and has been arranged for a number of two and three room apartments. All apartments will be equipped with disappearing beds and will have connecting baths. There will be a steam heating system installed. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Stores and Offices—6 story and base, Class A construction. Cost not stated. Portland, Ore. Architect's name withheld. Owners, Cohn Bros., Portland. This firm has just secured a 35-year lease on the important corner at Third and Yamhill streets, and as soon as the present leases expire, which will be January 1st, 1913, will start the construction of a modern building. Details of construction have not been completed, and other than the fact that the structure will cover a site 50x 100 feet, and that the first and second floors will be arranged for stores, the upper floors for offices, nothing can be published. Details will be given as soon as available.

Contracts Awarded.

Jail Reconstruction—Class A, $65,000, Portland, Ore. Architects, Emil Schacht & Son, Portland. Owners, City of Portland. Contractor, J. S. Winters, Portland. Contract price, $67,340.

Library—1 story and base, brick and steel, $10,000. McMinnville, Ore. Architect, Ernest Kroner, Portland. Owners, Town of McMinnville. Contractors, J. F. Wineland Building and Engineering Co., Portland. Contract price, $10,000.

SEATTLE AND WASHINGTON.

Dock—Frame and concrete construction. Cost not stated, Bellingham, Wash. Architects, Blackwell & Baker, Northern Bank Bldg. Seattle. Owners, Inland Navigation Co. Plans have been completed for a dock 100x 300 feet, upon which will be erected a two-story frame building. The first floor of the building will be used for storage purposes and the second for offices. A steam heating system will be installed. Bids will be taken on the work at once.

Theatre—2 story and base, reinforced concrete and steel, $50.000. Wenatchee, Wash. Architect, J. A. Creutzer, Seattle. Owner, J. W. Ferguson. The theatre will cover a lot 50x120 feet. There will be the main auditorium and two balconies. The interior will be finished in ornamental plaster. There will be steam heat and a modern system of ventilation. Construction will be fire proof. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

Stores and Offices—10 story and base, steel and concrete, $200,000. Tacoma, Wash. Architects, Grove & Heath, Tacoma. Owners, National Realty Co. The structure will be in the nature of an addition to the present 8 story building and will cover a lot 50x120 feet adjoining the present building. The building will be built in units, the first being a 12-story structure. Plans are nearly complete and operations will be started shortly. The same architects are nearly ready to receive bids for a 14-story brick and steel office building in the same city.

NEW LINE TO REDWOOD PARK.

SAN JOSE, Oct. 5.—Direct communication by electric railroad between this city and the California redwood park in the big basin is planned by the Southern Pacific. An electric line connecting Congress Springs, a resort in the Santa Cruz mountains above Saratoga, and the famous park will be running within the year, it is predicted.

NEW LINE SECURES RIGHTS IN SACRAMENTO VALLEY.

SACRAMENTO, Oct. 5.—Probably no railroad was ever projected that found such a welcome when it came to rights of way as the Sacramento Valley Electric, which is now getting a line down the west side of the Sacramento Valley from Red Bluff to a point below Dixon, in Solano County, where connections will be made with the Oakland, Antioch and Eastren Railroad for San Francisco Bay, when completed. M. F. Caldwell, the right of way agent, is working his way south and late reports from him are to the effect that he has not as yet been obliged to make any payments for rights of way. He says that people are so anxious for the west side line that they are donating strips of property.

Considerable discussion is being had throughout the valley on account of the quick running time that the proposed electric line will make. The engineers report that more than two hours will be shaved off of the present time of travel by train from Red Bluff to San Francisco. Corresponding time reductions will be made along the line.

30,000 ACRES OF TIMBER MAY BE SOLD.

WILLOWS Glenn Co.), October 5.—Next Saturday lumber cruising for a proposed sale of 30,000 acres of timber in the California National Forest to the Goodyear Lumber Company will begin back of Alder Springs.

Joseph C. Elliott, lumber man of the United States Forest Service, who will head the cruising expedition, arrived in Willows Thursday from San Francisco and left for the Forest. He will be joined at Alder Springs by T. J. Noddin, a ranger cruiser, and together with other service men, they will spot the ripe trees.

An application made by Lamont Rolands, Vice President of the Goodyear Company, to Acting Assistant District Forester Swift Berry at San Francisco for an estimate of the merchantable lumber in the great woods surrounding the present fee-simple holdings of the lumber company is said to be the cause of the activity. The Goodyear Company owns and controls about 22,000 acres. If it succeeds in buying the ripe trees in 30,000 acres of the Government forest its holdings will require from twenty to thirty years to turn the pines into lumber.

Willows is declared to stand the best chance of any town in the field to get the mills. The Southern Pacific Company, it is asserted, would extend the Fruto Railroad to the base of the mountains on Grindstone, rather than build a new line out from some other point on the main line.

CONSIDERS HIGH LEVEL BRIDGE.

CALGARY, Oct. 4.—The city is considering the construction of a high level bridge on Center street. Plans have been submitted by F. W. Leonard, consulting engineer, Spokane, who offers in conjunction with Scott & Hicks Construction Co., Spokane, to build the bridge for $603,513. The proposed bridge will be of reinforced concrete, with twelve arch spans, and a concrete approach at each end supplemented with ornamental towers. Allowance is made for a 40-foot roadway with double car tracks and a five foot walk on each side, cantilevered, or overhanging. The lower deck allows a roadway of 24 feet with 5 foot walks on each side, with a vertical clearance of 14 feet.

NOTICE TO ARCHITECTS.

Competitive plans will be received by the Council of Larkspur for a Town Hall to be erected in Larkspur. All applicants must file their names with the Clerk of the Board on or before 5 P. M. October 16, 1912, and upon such filing will receive full information regarding said competition.

E. G. VOCKE,
Clerk of Board of Trustees, Town of Larkspur.

BIG IRRIGATION PROJECT.

Roy M. Pike, representing the Yolo Water & Power Company, has announced that an investment of $10,000,000 will be made in an extensive irrigation project affecting the welfare of Yolo and Lake counties. White & Co., the New York bankers, are behind the project.

Pike will make his headquarters in San Francisco. He said Thursday that the advent of White & Co.'s millions into California activities would mean greater commercial progress and expansion.

Last spring the New York bankers bought the Craig and Stephens' interests, controlling the Yolo Water and Power Company. The big eastern concern then arranged to finance a much greater project and to carry to completion one of the most important irrigation systems in the west.

RESERVOIR SITE LOCATED.

Along with the congratulations extended to the visitors from Victoria, B. C., should be congratulations to that city upon her remarkable showing in the building arena during the present season. Probably no other city in western Canada has porportionately advanced so rapidly as has Victoria during 1912. Western Canada has generally been going to the front very rapidly and Victoria is among the first of the cities of this rapidly growing commonwealth.

PETITIONS IN BANKRUPTCY.

Petitions in insolvency have been filed in the United States District Court as follows: Caesar Abbiate, cigar dealer, San Francisco, debts $1400, no assets; B. H. Ames, clerk, Altmeda, debts $776, no assets; Fred W. Zora, electrician, Sacramento, debts $505, no assets. Several other creditors of the McNutt Hospital of this city filed another petition in involuntary insolvency. They and the amounts they allege to be due to them are as follows: California Baking Company, $550; L. Dinkedspiel Company, $160; Isaac Upham Company, $135; H. F. Mahon, $1011; James S. Gledhill, clerk, San Francisco, debts $1847, assets $323.

ALTURAS (Modoc Co.), October 4.—The Forestry officers at work surveying proposed reservoir sites on Rattlesnake, near Alturas, have located a proposed site in which 50,000 acre feet of water can be impounded.

The reservoir would drain over eighty sections of land and the water, which runs to waste every Spring, can fill the reservoir and give water sufficient to irrigate practically every foot of sage brush land between Alturas and Clover Swale, on both sides of Pit River, a country five miles wide by twelve miles long.

It is estimated the cost of the system would be about $100,000, which would have to be put in by either private capital or by Government appropriations.

Every little while some inventor comes forward with a mechanical device to utilize the energy of the sun's rays for power and storage purposes. An interesting report has just been made by the British Consul at Alexandria concerning a solar power plant to be established near Cairo in Egypt to irrigate the country of the Nile Valley. The plant to be used is imported from Philadelphia and is said to have satisfactorily demonstrated its possibilities for power purposes in a country where sunshine is a permanent asset of the climate.

Numerous engines have been built to utilize the sun's rays but none of them have ever worked satisfactorily. Great concave mirrors have been built which focused the sun's rays on boiler tubes that converted water into steam. Attempts have been made for thermo electric development but none have been of practical value till a man in Philadelphit developed a plan of thermo electric storage by means of ordinary glass coated with asphaltum. By multiple expansion of the number of panes of glass used he increased his power storage indefinitely. So that he has practically achieved a working principle that can be developed to commercial results.

The sun is the great source of all energy. In the great arid districts there are scarcely any cloudy days in the year. There are no waterfalls for developing hydro-electric power. Here is a field for the inventor to harness nature's primal source of energy and make the desert blossom like the rose. It is the field for applied science to extend its operations to practical benefit.

REFORMER AT LAST.

Even Eddie Wolfe had to put a plank against reviving race-track gambling into his Bolting Thirteen platform. It was in all the other platforms, and to omit it from his would be to put the other twelve of his party into an impossible position. But how it must have hurt Eddie, the last survivor of the defenders of race-track gambling in the California legislature. He must have recalled the days when he, with Frank Leavitt, bossed the Senate of California in the interest of the pool gamblers. Fond memories must have come back of the times when Public Morals committees of both houses were dominated by men themselves directly concerned in the gambling industry. And he may have remembered the final contest, when, with fine scorn of reformers, he stood alone fighting the battles of the gamblers against an overwhelming majority of the legislature. Two such fights he made, one against the original law, and the other against the amendments which safeguarded it against the evasions invented by his friends and former associates. And not at last to be forced to become a reformer himself! It is the final drop into chaos. Even to be reduced to the chairman of a party of thirteen members is nothing to that.—Fresno Republican.

MIXERS IN DEMAND.

Lansing Company Has Placed Several Carloads on the San Francisco Market and More Arrive.

Manager J. O. Ernsberger, of the Lansing Co. reports having established a record within the last few months in the sales on their concrete mixers in this territory. Several carloads of these machines have been received by the local office and all have been placed in the district around the bay within a few months. Another carload shipment is now being unloaded at the Brannan Street warehouse, a number of which are already sold.

NORTHERN ELECTRIC TO CUT TIME TO SACRAMENTO.

The Northern Electric Railway Company has made application to the State Railway Commission to issue $8,500,000 in bonds for improvement purposes. The purpose is to raise funds to complete the final link in its railway line to give its terminal here and cut down the time between San Francisco and Sacramento from thirty to forty minutes.

The new piece of road, which will be built with the money that is to be invested, will run from Vallejo to Sacramento in as nearly a straight line as possible. With this line completed to tide water a fast line of boats will complete the system and land its passengers and freight directly in San Francisco. According to the application the bonds are to be in the denomination of foreign money and will be marketed abroad.

When completed the system will extend from Chico to this city, and, with its laterals and branches, will be about three hundred miles in extent and will tap some of the most fertile agricultural districts in California.

Of the $8,500,000 to be raised it is estimated that it will cost $5,500,000 to complete the actual building operations. With the remaining $3,000,000 a portion of some bonds already voted will be retired and the balance will probably be used to acquire fast boats to run between this city and Vallejo.

OFFER FOR STATE BONDS.

SACRAMENTO, October 2.—State Treasurer E. D. Roberts announced that he has a proposition on hand for the sale of $23,600,000 worth of State bonds, $16,400,000 of which are State highway bonds and $7,250,000 harbor bonds, or all of the remaining unsold bonds of the State of California to one concern at par and accrued interest to date of delivery, to be made on sixty-day notice as the money is required.

If this deal is put through, and it is subject to the approval of the Governor, the State Highway Commission and the Advisory Board to the Department of Engineering, it will be the largest deal ever put through in the State of California if not in the entire West.

Roberts announced that he will recommend this action so far as it concerns the State highway bonds, but feels that the Harbor Board bonds should bring a premium, as they are long-term bonds, running until 1985, maturing by lots after 1950.

Seven hundred and fifty thousand dollars of the $2,000,000 San Francisco harbor and improvement bonds were sold Tuesday by State Treasurer E. D. Roberts. These bonds are for

the improvement of the San Francisco water front by the construction of wharves and docks by the State, which controls the harbor.

The bonds were sold in several parcels, as follows: Fifty thousand dollars to the Capital National Bank of Sacramento, $50,000 to N. W. Halsey & Co. of San Francisco, $50,000 to the Hibernia Savings and Loan Society of San Francisco, $50,000 to the State Board of Control, $100,000 to the State Board of Control, $100,000 to the Hibernia Savings and Loan Society, $250,000 to the Hibernia Savings and Loan Society, $100,000 block to the same concern.

CANAL BOOMS SOUTHERN SHIPPING

WASHINGTON, October 2.—A report from Australia to the Bureau of Foreign and Domestic Commerce said that new steamers are now building for the Australian-oversea and coast trade, representing an aggregate of 230,000 tons. They include some of the finest liners that have ever been seen in Australian waters. The number of new vessels is twenty-eight. Others are planned by different companies. The opening of the Panama canal in October, 1913, is largely responsible for this activity.

NEW ROUTE FOR WESTERN PACIFIC.

Indian Valley Course Favored.

Activities in the engineering offices of the Western Pacific indicate that the proposed change by the Western Pacific of its route through the Sierra from Keddie to Doyle will soon be instituted. The engineers have surveyed a new route to connect Keddie with Doyle by way of Indian Valley, Greenville, Nevis, Big Meadows, Mountain Meadows, Susanville and Honey Lake Valley, and just as soon as this is approved by Vice President Charles S. Schlacks, who is expected home shortly from a tour of Europe, the work will be begun.

The rights of way along the new route already have been contracted for, it is claimed, and the change will prove especially beneficial to the Western Pacific because it will still give the road a 1 per cent grade, while also enabling it to avoid such tunnel troubles as have hampered its train movements.

The tunnel troubles at Spring Garden and Chilcoot cost the road a big sum of money last Winter, especially the Chilcoot fire, which has forced the company to use a shoo-fly track over the mountain, keeping in commission two helper engines constantly.

Just what disposition will be made of the present line from Keddie to Doyle, tapping the timber and other resources in and about Portola, Beckwith, Sloat and other points from which it now gathers tonnage is doubtful, but it is believed it will be maintained as a feeder. Under such an arrangement division headquarters would probably remain at Portola, it was said recently.

The Nevis-Greenville route would give the road a line more free from snow and tunnels. Two tunnels would be all that would be required, one small one from Wolf Creek grade above Greenville to the Big Meadows branch, and another about 350 feet long from the Big Meadows to the Mountain Meadows plains.

NEW RAILROAD TOWN IN LASSEN.

AMEDEE (Lassen Co.), October 3.—The Gibsons and others interested have laid out a new townsite, to be called Litchfield in Honey Lake Valley, Lassen County, between the present town of Standish and the station of Hot Springs, or Purser, on the Nevada, California and Oregon Railroad. The new town is on the main line of the Southern Pacific Fernley branch, and, being located on high ground, with every advantage of sheltered location, soil and water, is expected to become an important town.

It is close to the old original overland road crossing the continent, which comes across the desert from the east, climbs the Smoke Creek Canyon and runs down into Honey Lake, crossing the tracks of the Nevada, California and Oregon at the summit just bove Hot Springs station.

This was one of the three most important overland roads, the two others being the southern by Tahoe and Placerville, and the northern by Fort Bidwell, in Modoc County.

The Lassen County people figure if shops are built at Litchfield that town will become the second town in Lassen County and the heaviest shipping town of agricultural and livestock products.

AN OUTLET FOR CHINA'S MILLIONS

It is hoped that, as in India, the population will quickly increase, and not remain, as it has been for centuries, apparently stationary, owing to unchecked epidemics, terrible famines and frequent rebellions, all causing a tremendous loss of life. It is now known that there are large areas of land in China itself that could be made to support many millions more people, but China must look to the vast regions of Eastern Mongolia, with its present very sparse population of nomads, and its magnificent heritage in Manchuria. There is no doubt that these regions can easily support 100,000,000 people instead of less than 20,000,000, as at present, and export much foodstuff as well. Roughly, taking the forty-fifth parallel of latitude, which passes south of Harbin, as a boundary, China possesses about 300,000 square miles of territory north of this line, of which not one-tenth is under cultivation. Northwest of Harbin the country might be made to carry a moderate population, but the rainfall is so irregular and usually small that it is not a hopeful territory unless it can, by scientific methods, be improved. To the east and northeast of Harbin lies a magnificent region, entirely unsurveyed and largely unknown, containing over 100,000 square miles of plains or hills, most of which might be cultivated. This section is especially favored as compared with all Nort China with an adequate supply of moisture; it is an entirely different zone as regards its general humidity from even Southern Manchuria, as it is influenced by the warmer and moisture-laden winds which originate with the Japanese gulf stream.

Eastern Mongolia is an excellent region for the rearing of cattle, horses and sheep, and already something has been done by the Chinese Government to introduce new and improved breeds. The merino wool species of sheep cross well with the hardy fat-tailed Mongolian. The Mongol people can well afford to use the rents they are permitted to draw in perpetuity from all Chinese settlers for any of their lands which are cultivated to supply themselves with improved breeds of animals, for all of which they now have splendid markets and an increasing demand. The cessation of poppy culture has already had a marked effect on the people, and they are much better in every way. The opening of the great market for wheat in Harbin has afforded the farmers a way of growing rich without the opium. The Russian and Chinese Eastern Railway and the good waterways are awaiting the development of this beautiful country. The old Tartar tribes in Northeastern Manchuria are few in numbers and decreasing.—Robert T. Turley in Geographical Journal.

MECHANICS' LIBRARY SITE ACCEPTED.

Chief among the offers accepted by the Board of Supervisors last Monday was that of the Mechanics' Library of its block between Polk and Larkin streets for $700,000. The official announcement of this offer was received with applause. Supervisor Caglieri stated that when it was acted on by the Board of Trustees of the library there was not a dissenting vote.

The payment will be made in $350,000 cash and $350,000 worth of City Hall and Civic Center municipal bonds, which are to go the holders of the present mortgage on the lot.

The price paid for the other lots taken Monday was $233,670.16.

NEW YORK'S TALLEST SKY-SCRAPERS.

America is pre-eminently the land of the skyscrapers, and New York their especial location, though Chicago is coming well to the front as a competitor. In no other spot in the world is space at such a premium as in New York. The land area is so small for the population and for the amount of business to be done that the real estate value is enormous, hence space must be utilized, and as a result we have the skyscrapers.

The Metropolitan Life Insurance building, on the southeast corner of Madison square at Swenty-third street, held supremacy in height till the erection of the Woolworth building. This huge campanile is 700 feet 3 inches high, and has fifty stories, with two acres more of floor space than the latest marvel. The Singer building, at the corner of Broadway and Liberty street, has a total height from the basement floor to base of flagstaff of 742 feet, the height from the street to the main roof being 612 feet 1 inch. It has forty-one stories and nine and one-half acres of floor space. The Bankers' Trust Company building, at the corner of Wall and Nassau streets, is 539 feet high and has thirty-nine stories. The Times building, at Forty-second street and Broadway, is 419 feet high and has twenty-eight stories. —Christian Herald.

PROPOSE ROAD TO BIG BASIN.

SAN JOSE, September 30.—Andrew

the appointment of a committee of California Sempervirens Club members to conduct a campaign to insure the passage by the next Legislature of a bill appropriating sufficient money to build a road along the westemn foothills of the Santa Clara valley into the State Redwood Park in the Big Basin. The committee consists of A. P. Murgotten, Henry L. Middleton, E. A. Hayes, Rev. James P. Morrissey, president of Santa Clara College, and Herbert C. Jones. This committee will P. Hill, the presdent, has announced meet tomorrow evening to start the campaign.

SUGAR COMPANY TO ISSUE BONDS.

The Alameda Sugar Company has issued a statement that it will issue $1,500,000 in bonds to raise money to develop its beet sugar plant at Meridian, Sutter County.

The issue will be secured by 10,350 acres of land in the vicinity of Meridian and by the new factory, which will cost $1,000,000. The land is estimated to be worth $200 per acre. Three thousand acres are now being deep plowed for the crop of 1913.

The statement also says that the 1913 crop will be handled at the Alameda factory of the company and that the Meridian factory will be in operation by 1914.

ENGINEER DRAFTSMAN (MALE).

Supervising Architect's Office.

October 16-17, 1912.

The United States Civil Service Commission announces the postponement to October 16-17, 1912, of the open competitive examination for engineer draftsman for men only, announced to be held on September 11-12, 1912. From the register of eligibles resulting from this examination certification will be made to fill six vacancies in the office of the Supervising Architect, Treasury Department, at entrance salaries ranging from $1600 to $2000 per annum, and vacancies as they may occur requiring similar qualifications, unless it is found to be in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion.

Competitors will be examined in the following subjects, which will have the relative weights indicated.

Subjects.	Weights
1. Practical questions in engineering construction	60
2. Training, experinece, and fitness	40
Total	100

Two days of seven and one-half and seven hours, respectively, will be allowed for the examination.

A rating of at least 70 in the subject of training, experience, and fitness is a prerequisite for consideration for this position.

Competitors in this examination will be allowed to use a slide rule, and should bring for use throughout the examination a [illegible] handbook. Explicit instructions regarding the use of handbooks in the examination will be printed on the sheet. Each competitor should also bring a drawing board, drawing instruments, pens, ink, and pencils, but not drawing paper.

The duties of this position are confined to the engineering problems involved in first class building construction. The examination will consist of practical questions based upon the work required, particular attention being paid to fireproofing and to designing in steel and reinforced concrete. Applicants must have had not less than five years' practical experience, of which at least two years should be in either steel designing or construction work. A degree in civil engineering from a technical school of recognized standing will be considered as equivalent to not more than two years of the five years above mentioned.

Statements as to training, experience, and fitness are accepted subject to verification.

Age, 18 years or over on the date of the examination.

Under an act of Congress applicants for this position will be required to be examined in the State or Territory in which they reside and to have been actually domiciled in such State or Territory for at least one year previous to the date of the examination.

This examination is open to all male citizens of the United States who comply with the requirements.

Persons who comply with the requirements and desire this examination should at once apply either to the United States Civil Service Commission Washington, D. C., or to the secretary of the board of local examiners, for application and examination Form 1312. No application will be accepted unless properly executed and filed with the Commission at Washington. In applying for this examination the exact title as given at the head of this announcement should be used in the application.

As examination papers are shipped direct from the Commission to the places of the examination, it is necessary that applications be received in ample time to arrange for the examination desired at the place indicated by the applicant. The Commission will therefore arrange to examine any applicant whose application is received in time to permit the shipment of the necessary papers.

Reissued September 16, 1912.

TO CONSIDER WAY OF RIVER CONTROL.

A conference to settle the rights of way on the lower Sacramento River necessary for flood control will be held before the State Board of Control on October 8th. Those who will be present at the meeting are State Engineer McClure, Major S. A. Cheney of the Federal Engineering Corps, United States District Attorney John McNab, the members of the State Reclamation Board, Captain A. E. Anderson of the San Joaquin and Sacramento River Improvement Association, the members of the State Board of Control and representatives of the landowners who have interest in the 7,227 acres of land that will be necessary for the rights of way, besides the land already purchased.

This work will be what is popularly known as "pulling the cork."

The Federal Government requires that deeds to all the rights of way necessary for the work shall be given Uncle Sam before the work is begun.

The object of this conference is to bring about an amicable settlement of the transfer of the land out of Court.

PETITIONS IN BANKRUPTCY.

A petition in involuntary bankruptcy has been filed in the United States district court against the McNutt Hospital, Inc.

The petitioning creditors are Johnson Bros., Inc., $1,647; Murphy, Grant & Co., $1,372; Coffin-Redington Company, $833. It is alleged that the corporation committed an act of bankruptcy in favoring certain creditors.

Louise W. Shearer of Napa filed a petition in bankruptcy Monday to protect herself as a stock holder in the defunct California Safe Deposit and Trust Company. She owns 150 shares of stock, which she says has no value at this time. In filing her petition she gives the list of depositors of the banking company as her creditors. The petition made three large typewritten volumes. No totals of her liabilities and assets are given.

OLD BRICKS USED.

MARYSVILLE (Yuba Co.), October 1 Bricks that were brought "around the Horn" sixty-five years ago are being used in the walls of one of Marysville's modern buildings, being built by I. C. Evans on D street, Fourth and Fifth.

The bricks were placed originally in the walls which for years surrounded the grammar school building at B and Seventh streets. Experts declare them to be of far better quality than the bricks being made nowadays. Men, who as boys played in the shadow of the school yard walls, are now engaged in razing the walls and cleaning the bricks for their new offices.

TWIN PEAKS TUNNEL MAPPED AND ROUTED.

Maps outlining the route and grades of the proposed Twin Peaks tunnel have been approved by the Board of Works and submitted to the Supervisors. The maps were prepared by City Engineer O'Shaughnessy, but contain no departure from the plan laid down by Traffic Expert Bion J. Arnold some months ago. The assessment district has been mapped out and other preliminary details arranged. When the Supervisors approve the maps the next important step will be the adoption of the assessment district, which will require the hearing of protests from interested property owners.

Word has been received at this office from Gus Turner, one of the largest holders of the Travelers' Hotel Company stock at Sacramento, to the effect that no definite steps have been taken, relative to the revision of the hotel plans or toward awarding a contract on the figures recently received. Mr. Turner stated that some action would be taken within the next ten days. Construction of a six-story steel and reinforced concrete hotel structure, costing $400,000 is anticipated.

BOOKS

For Home Study, Practical and Scientific.

CARPENTRY. By Gilbert Townsend. 160 pp. 224 illus. A working manual for Carpenters and Woodworkers in general. Not a theoretical treatise, but a practical working guide. Price $1.00

MASONRY CONSTRUCTION. By A. E. Phillips and A. T. Byrne. 145 pp., 44 illus. Latest and best American methods Price $1.00

WATER SUPPLY. By F. E. Turneaure. 160 pp., 40 illus. An exhaustive compendium for sanitary and Waterworks Engineers and all interested in matters affecting public health. Price $1.00

HIGHWAY CONSTRUCTION. By A. E. Phillips and A. T. Byrne. 145 pp., 80 illus. Modern Methods for Road Builders and all interested in better ways of communication. Price. $1.00

REINFORCED CONCRETE. By Walter Loring Webb and W. Herbert Gibson. 150 pp., 140 illus. A manual of practical methods for Architects, Builders, Contractors, Civil and Sanitary Engineers. Information for the first time made known to the world. Based on recent construction work, special tests, etc. Price $1.00

ESTIMATING. By Edward Nichols. 140 pp., 35 illus. For all workers in Building trades. Tells how to estimate intelligently. Price $1.00

CONTRACTS AND SPECIFICATIONS. By James C. Plant. 138 pp., fully illus. Forms of government and private contracts, specifications, bonds, etc., duties and responsibilities of Architects Contractors and Owners. Price $1.00

STAIR - BUILDING AND STEEL SQUARE. By Fred T. Hodgson and Morris Williams. 130 pp., 180 illus. Only up-to-date work on these subjects. Price $1.00

STRENGTH OF MATERIALS. By Edward R. Maurer. 150 pp., 58 illus. For Architects, Builders, Steel and Concrete workers. Enables one to avoid mistakes. Price $1.00

MECHANICAL DRAWING. By Ervin Nenlson. 176 pp., 140 illus. Complete course in projections, shade lines, intersections and developments, lettering with exercises and plate. Price $1.00

POWER STATIONS AND TRANSMISSION. By G. C. Shaad. 176 pp., 43 illus. For Electrical Workers. Up-to-date practice. Price $1.00

PATTERN MAKING. By James Ritchey. 160 pp., 250 illus. For Wood and Metal Workers and Moulders. Methods of building up and finishing, fully described Price $1.00

ARCHITECTURAL DRAWING AND LETTERING. By Bourne, von Holst and Brown. 200 pp., 55 drawings Complete course in making working drawings and artistic lettering for architectural purposes. Price. $1.50

FREEHAND AND PERSPECTIVE DRAWING. By H. E. Everett and W. H. Lawrence. 192 pp., 120 illus. An authoritative treatment of the artistic side of drawing, teaching the reader first how to see and then how to transform this visual conception into a permanent record on paper. Price $1.00

ELECTRIC WIRING AND LIGHTING By C. E. Knox and G. C. Shaad. 192 pp., 150 illus. A practical guide to approved modern methods of lighting by electricity and of installing conductors for the transmission and utilization of electricity for power lighting, heating and other uses Price $1.00

SEWERS AND DRAINS. By A. Marston. 176 pp., 60 illus. A new work containing complete, practical information for the Civil and Sanitary Engineer on the selection and construction of sewerage and drainage systems and sewage disposal plants for cities, towns and other municipalities. Price $3.00

SHEET METAL WORK. By W. Neubecker. 320 pp., 380 illus. A complete manual of practical self-instruction in the art of pattern drafting for light and heavy gauge metal, skylight work and roofing, cornice work etc. Price $3.00

PLUMBING. By W. B. Gray and C. B Ball. 256 pp., 250 illus. A reliable and up-to-date reference work on Plumbing and the allied subjects of House Drainage and Sanitation. Price $1.50

HEATING AND VENTILATION. By C. L. Hubbard. 256 pp., 180 illus. A practical manual of hot air, steam and hot water heating, and modern systems of ventilation. Price...$1.50

STEEL CONSTRUCTION. By E. A. Tucker. 275 pp., 275 illus. Covers every phase of the use of steel in structural work. Based on actual experience, special tests, etc. For Architects, Bridge Builders, Contractors, Civil Engineers. Price. $1.50

"THE ESTIMATOR" for local use of Architects, Engineers and Builders Published by Firestone & Roofing Co., 704 Market St., San Francisco. Price postpaid $1.00

MASONRY AND REINFORCED CONCRETE. By W. L. Webb and W. M Gibson. 400 pp., 300 illus. A practical and authoritative guide to approved American methods in the selection, preparation and depositing of building stone, brick, cement, and other masonry materials, and embodying the latest practice in the application of concrete and concrete steel to structural work. Price. $3.00

SURVEYING. By Alfred E. Phillips 225 pp., 133 illus. For Civil Engineers and Students. All details of field work explained. Price..... $1.50

BUILDING SUPERINTENDENCE. By Edward Nichols. 225 pp., 250 illus Costly mistakes occur through lack of attention at proper time, hurtful to owner and discreditable to Architect and Builder. Gives thorough knowledge of methods and materials Price $1.50

BRIDGE ENGINEERING - ROOF TRUSSES. By F. O. Dufour. 384 pp 340 illus. A manual of practical instruction in the calculation and design of structural steel truss and girder bridges for railroads and highways, including also the analysis and design of roof trusses and other details of mill building construction Price $3.00

REFRIGERATION. By C. Dickerman and E. B. Boyer. 128 pp., 60 illus. A complete guide to the principles and mechanical details and practices of modern systems of artificial cooling including the construction, equipment and operation of various types of refrigerating plants, such as ammonia compression and absorption, brine compressed air, carbonic anhydride etc Price $1.00

Upon receipt of price quoted we will send postpaid, to any address, any book listed here Remit by Postal Money Order, Express Money Order Bank Draft or Registered Letter, payable to

SEALED PROPOSALS.

PROPOSALS FOR CANAL SUPPLIES. CANAL CIRCULAR 732. Proposals for Water Closets, Lavatories, Reinforcing Steel Bars, Valves, Wrought Iron and Steel Pipe, Vitrified Sewer Pipe and Specials, Grease Cups, Steam Gauges, Hammers, Padlocks, Chisels, Bronze Wire Cloth, Emery Cloth, Galvanized Buckets, Water Coolers, Steel Cable, Tiller Rope, Belt Lacing, Rubber Belting, Ship Auger Bits, Bronze Bars, Poultry Netting, Brass Tubing, Twist Drills, Snip's Felt, Files, Stovepipe, Shovels, Rules, Sponges, Tacks, Paint and Sash Tool Brushes, Railway Flags, Gasoline, Packing, Hose, Scratch Pad, Hand Blotters, Paper, Lumber and Cross Ties.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. **October 17, 1912,** at which time they will be opened in public for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 732) may be obtained from this office or the offices of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal., also from the U. S. engineer offices in the following cities: Seattle, Wash., Los Angeles, Cal., F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR CANAL SUPPLIES. CANAL CIRCULAR 732. Proposals for furnishing Lighting Material for all Panama Locks, Consisting of Panel Boards, Reflectors, Outlet Boxes, Receptacles and Portable Lamps.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. **October 15, 1912,** at which time they will be opened in public for furnishing the above mentioned material. Blanks and general information relating to this circular (No. 732) may be obtained from this office or the offices of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal., also from the engineer offices in the following cities: Seattle, Wash., Los Angeles, Cal., F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR ELECTRIC APPARATUS. ELECTRICAL APPARATUS, U. S. Reclamation Service, Federal Building, Los Angeles, Cal. Sealed proposals will be received at this office until **October 11, 1912,** for furnishing electrical apparatus, including 275-horsepower motors, one 30-kilowatt oil circuit breaker, two 7,500-volt, single-phase expulsion fuses, two automatic switches, two 50-KVA transformers, one 1-KVA transformer and one 3-phase electrolytic lighting arrester. For further information, address O. H. ENSIGN, consulting engineer.

PROPOSALS FOR PUMPING APPARATUS. PUMPING APPARATUS, U. S. Reclamation Service, Los Angeles, Cal.—Sealed proposals will be received at this office until **October 11, 1912,** for furnishing, at the U. S. tipping point pumping apparatus, including two horizontal centrifugal pumps, two 45-inch outside gates, four foot valves for pumps and one flat valve. Further information may be had upon application to O. H. ENSIGN, consulting engineer.

PROPOSALS FOR CANAL SUPPLIES. CANAL CIRCULAR 730. Proposals for Furnishing and Erecting the Structural Steel Framework of the Permanent Shop Building at Balboa (approximately 7,000,000 pounds).—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. **October 18, 1912,** at which time they will be opened in public for furnishing the above mentioned material. Blanks and general information relating to this circular (No. 730) may be obtained from this office or the offices of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal., also from the engineer offices in the following cities: Seattle, Wash., Los Angeles, Cal., F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

Architect J. B. Ogburn, Richmond, is completing the working drawings for a reinforced concrete bank and lodge building, which is to be erected at Lincoln Place, County, for the Indian Valley Bank. The first floor of the building will be occupied by the bank while the second floor is to be fitted up for lodge rooms for the Masonic order in that town. The design is in the classic style with the exterior of the building faced with cement plaster. An estimated cost of $15,000 has been placed on the work. Plans are completed and figures will be called for at once.

Editorial Comment.

New York is a cosmopolitan city and is said to have more Jews than were in Jerusaleum, more Italians than there is in Rome, more Irish than in Dublin, and generally speaking more foreigners than Americans.

The new municipal building, which has attracted the attention of architects and building engineers all over the world is nearing completion and will soon be occupied. Like King Solomon's Temple, that is told of in Holy Writ, more than seven years have been occupied in its building and when completed it will be of monumental proportions and be the largest building of its kind in the world.

While it is of entirely different character and built for an entirely different purpose there are some interesting comparisons. According to the old historians the Temple of Solomon required seven years to build and it employed 153,300 men in its construction. New York's municipal building has required 6000 men. But this does not take into account the workers in the iron mines, the steel plants, the thousand and one special occupations which wrought the particular machines, the cement, the power and the finished material that has gone into the structure. The Temple of Solomon was built by hand labor. The stones were quarried and hewn by hand, the timbers were felled and prepared by hand, the gold and bronze were hammered and cast by hand and all the special equipment of the structure was wrought by hand labor.

New York's municipal building when completed will cost $18,000,000. The height of the building from the Chambers street curb to the top of the tower is 580 feet. The area of land occupied by the site is two acres. Twenty-six tons of steel were used in the frame work and 700,000 cubic feet of granite for the wall or ashlar facing of the building. In it will be housed all the municipal departments except the Board of Health, the Department of Corrections, the Police and Fire Departments and the Department of Docks and Ferries.

Seven years of work with modern building machinery, employing six thousand men has produced a building as wonderful as was the Temple of Solomon forty centuries ago. Building methods have progressed since then. And while the architectural ideas of that time are still used the use of steel and machinery in construction has so revolutionized building that a comparison of methods are interesting and instructive evidence of progress.

Mayor Rolph has succeeded in bringing attention to Insurance rates in such manner that they will no doubt bring about a reduction of the rates. Now if the Mayor or somebody else having the power and inclination to regulate the telephone company would get busy and regulate it. The service is daily growing worse and worse. Whatever system they have it is a bad one, or they do not employ one-half enough operators to take care of the work. Supervisor Murphy has been quoted as saying that he is not in favor of the automatic phone as he wants some human intelligence between him and the end of the line. If he can find any human intelligence in the present system, he can do more that most people.

In the meantime the Pacific States Telephone Company is in quiet and undisturbed possession of all the Home Telephone Company's property in direct and open violation of their written contract with the City and County of San Francisco.

Senator Marshall Black of the Palo Alto Building & Loan Association, is a confessed defaulter, his peculations having extended over a term of years. He has not even been arrested as yet. His shortage is reported to have exceeded over a term of years and during the time he was using the depositors' money he was flying high, and seeking popular favor by espousing the cause of the people in the State Legislature. Whether the depositors suffer by his act or not he should be charged with the crime of which he is guilty and appear before the bar of justice to answer for his deeds. There, whatever merit he deserves could be pointed out to him and the laws of the state vindicated wherein they are said to apply equally to all.

There is an appealism of the Declaration of Independence that all men are created equal that men are equal before the law, and an equal application that the law is no respecter of persons. The fact that a man or will make restitution does not lessen the crime. That he posed as a progressive and friend of the people does not mitigate the wrongful act. He ought to be in custody and answer for his deeds the same as an other offender against the law.

New York does not maintain [illegible] and great bridges to make money, but to add to the comfort, convenience and prosperity of the people. For the same reason our cities maintain great parks and splendid boulevards. Following a different policy and considering a deficit as natural does a Postmaster General. He would has demoralized the postal service of the United States, producing inconvenience, actual loss on the part of large numbers of people and [illegible] developing a [illegible] profanity.

Our various [illegible]

more for the people than they did a generation ago. The investment is a good one, and the people do not complain at taxation so long as public money is honestly and intelligently expended. In the mean time our enthusiasm for progress should not drive us from the Temple of Reason, with its spacious ante room devoted to the uses of Prudence. It is at once unwise and unjust to heavily tax the present generation for the exclusive benefit of those to follow. Hence municipal ownership of subways, for instance, should be planned and constructed on conservative lines, and should, to the furthereste possible extent, be kept free from the baneful influences of politics.—American Contractor.

The laying of the high pressure mains for fire protection has kept the streets torn up and nearly impassable for many months and serves to emphasize the fact that the person who tears up the streets is always on the job. And this serves to call attention to the fact that in this progressive and scientific age there is no provision made for the repair of pipes and cables than that of tearing up the pavement and then covering it up again.

In London and Paris underground pipes are placed in galleries. In Paris the sewers being used, while in London the city has constructed pipe galleries under a number of new streets.

The inconvenience of the constant street disturbance is apparent to everyone. To have the main streets of the city upreaved at all times and again replaced is an unmitigated nuisance. And the advantage of permanent galleries that would contain the pipes and lines of the public service corporations is apparent for facility in construction and repairs.

Of course, there is the danger of the pipes and power lines in close proximity. Yet if proper precautions are taken in the construction these dangers can be obviated. As in London heavy power lines and gas mains are laid side by side and no explosions have occurred.

The Taft Republicans demand that a special session of the Legislature be called in order to put their electoral delegates on the ticket. This can not be done under the Referendum provision of the constitution.

Under this provision no Act of the Legislature goes into final effect until ninety days following final adjournment during which period a Referendum petition may be filed.

The only exceptions to the Referendum are Acts "calling elections," levying taxes or providing appropriations, and "urgency measures necessary for the immediate preservation of the public peace, health or safety."

The November election is already provided for by a general state law so that it can not come under the head of "calling elections."

No other session of the legislature can be called. The truth is the Taft people want something to howl about and have no desire to get their names on the ballot. If they had they would have put them on by petition as that course has been open to them all summer. They have had an equal chance. They were beaten fairly in May and in September and the only kick they have coming is that the State of California does not submit to the dictate of the steam roller of the Chicago Convention.

Numerous newspapers are calling attention to the report recently made by the New York Commissioner of Accounts as to the results of seven years of ownership and operation of the Staten Island ferry by the city. The report shows a loss of $4,450,699 up to the close of 1911. A still worse showing is made by the Thirty-ninth street (Brooklyn) ferry, the loss having been nearly $3,000 a day during the entire period of operation; the total being $6,625,000. The argument drawn from these and other similar showings is that municipalities are foolish to make improvements that can be avoided.

While it is doubtless true that private corporations, being free from political influence and political pulls, can conduct business of any kind more economically than municipal and other governments, it by no means follows that municipal ownership is not in the interest of the people, at least when proper projects are developed in a proper way. Few doubt the wisdom of our postal system, the operations of our Reclamation service, or the maintenance of water works and fire departments by cities.

The Railway Company that controls the street railways of Havana have ordered an electric storage battery train for use on a line running one hundred miles out from Havana. Heretofore the train has been operated by a steam locomotive drawing a single coach. Instead of this a train consisting of three cars equipped with Edison storage batteries will be used. This will be the first train of its kind to be put into practical use.

The Edison storage battery is said to be of very rugged character and practically fool-proof. As to its life no figures can be given at the present time for the reason that no batteries of this type have been in service long enough to determine their full life. They have been in use for six years without showing any material depreciation. The possibilities and practical uses to which they can be put have yet to be demonstrated and the establishment of this line will put them to the test.

The Screw-Patcher Company, which has for many years been located at Sacramento, will move its entire plant and factory to this city, locating at South San Francisco. This company has plans prepared and will at once start to build an elaborate plant for the manufacture of pipe of all descriptions. There will be four or five buildings located next to the plant of the Western Meat Company and the equipment will make it the best plant for the manufacture of pipe on this coast. This equipment will enable them to handle one and one-half inch pipe and construct pipe six to seven feet in diameter.

This plant will employ from one hundred to one hundred and fifty men continuously.

The reason given for this transfer of the factory is cheaper transportation for raw materials and direct water communication with all parts of the world.

The mining industry and irrigation projects makes the manufacture of steel and iron pipe an important industry on this Coast. The coming of this pioneer pipe house to San Francisco emphasizes the importance of this port as a manufacturing center.

The Fish and Game Commission have done much to make the rivers and streams open for the common sportsman who owns no preserve. The public stock of the state is no longer used to stock private preserves.

The Supervisors of Shasta County have lately taken up the question and have instituted legal proceedings to make the McCloud river freely accessible to the public.

Miles of the stream have been made private property by wealthy landowners who have erected barbed wire fences to shut out the public although the river is stocked with fish at the expense of the people.

Under the new state law the Supervisors of a county may condemn rights of way along streams so that the public may have access to public waters that are stocked at the public expense. This is one of the many reforms effected by the Johnson administration that has tended to restore their rights to the people.

EDISON.

Thomas A. Edison has been one of the most useful Americans of his generation. Incidentally his great services to society have made him a man of affairs and of large means, which he puts to the use of the community again. Things done for the general welfare have always absorbed his interest. Money has been a minor consideration with him.

The views of such a man on the political situation will command attention everywhere. They are the views of a typical American citizen who has reflected on a rich experience, with his country's welfare at heart.

The old political stuff, Mr. Edison says, makes him sick. He has heard it too often. His observation has convinced him that our industrial system is crude and unjust and cruel. Germany has done much better, considering its limited resources, and the weight of its militarism. If America should deal with its problems on the lines suggested by Germany and urged in the Progressive platform, this country would achieve wonderful things.

"We're coming to a new era," he says. "We've got to transform everything. And we've got to have a big, strong, honest man at the head. Teddy's that man. I go the whole way with him."

Isn't Edison saying here what millions of Americans are thinking?—Kansas City Star.

The Harbors of The Pacific Coast.---Terminal Facilities For The Panama Canal Trade.

By Wm. Hosea Ballou, Sc. D.

(Reprinted from the Scientific American.)

The coast line of the Pacific coast of the United States is defined by the United States Coast and Geodetic Survey as 1,852 miles long from headland to headland, and 8,900 miles long with indentations. Originally its natural harbors may be said to have been confined to San Francisco, San Diego, those on Puget Sound and the Columbia River. As populations increased in California, Oregon and Washington, there was a corresponding growth in water-borne traffic, and Congress, from time to time, made appropriations for the improvement of rivers and harbors. Oregon has received the greatest sum, $24,500,000; California's appropriations have totaled $19,300,000, and Washington has been granted $10,175,000.

To the above should be added the immense outlay for railway terminal wharves, muncipal wharf systems, and the expenditures by corporations and individuals, bringing the total up to probably over $100,000,000.

State of Oregon.

Portland Harbor.—Portland is located on the Willamette River, 12 miles above its entrance into the Columbia River, which is 110 miles from the mouth of the latter, and at present is the head of deep-water navigation. Light-draft boats may ascend the Willamette 150 miles. By using the State portage road between Celilo and Big Eddy, they may ascend the Columbia and Snake rivers 537 miles, this last stretch being the greatest of American logging and rafting waterways. Logs from 20 to 90 miles inland are floated over tributaries to saw and shingle mills upon its banks. Rafts of logs and piling timbers, of 6,000,000 feet each, are towed over it during the season, and thence by ocean to California ports. The annual commence amounts to eight million tons, valued at $75,000,000, of which a little over one-half is sea-going.

Congress is asked to appropriate $1,344,000 additional for use this year in continuing the jetty work at the mouth of the Columbia River, bringing up the total expenditure to date of $11,488,000. More than as many millions will be required before this important entrance is under permanent control, and, it is doubtful if its annual maintenance for dredging, etc., will ever be less than at present, about $105,000. Of the projected seven-mile jetty (the longest, by far, ever conceived), only about 19,000 feet were completed on the first of June, leaving some 18,000 to be constructed on the ocean end, in at least 40 feet of water. When it is finished there will be still the north jetty to build two-thirds as long and as costly. At the present rate of construction, it will require twelve years to complete the present south jetty and sixteen years to build the north jetty. Thus a total of twenty-eight years must elapse before Portland can hope for a 40-foot channel such as admits shipping to New York harbor. Of its vast utility and necessity, however, there can be no doubt. The mouth of the Columbia River, which it is to control when completed, is 8,000 feet wide. The navigable channel within it swings like the nervous coils of a snake, moving its position 2,500 feet annually, first one way and then back again. The necessity of jetties on both sides, to compel the channel to remain in one place, is thus shown, so that by the use of dredges it may be kept at the required depth.

Coos Bay.—Coos Bay is the second Oregon harbor in size, and it presents no especially natural difficulties to overcome. Vessels drawing 22 feet of water may now cross the bar at high tide, enabling the port of Marshfield to handle, last year, 300,000 tons of freight and 25,000 passengers, between it, San Francisco and Portland. The harbor is 180 miles south of the mouth of the Columbia River, and it is the principal ocean port of Oregon, being located in the center of or adjacent to the vastest forest region and the most fertile valleys.

The Coos jetty has a history far more inviting than that of any other on the Pacific Coast. When its construction was commenced in 1879, were only ten feet of water on the bar. The first project called for 1,760 feet of jetty, which was speedily built, at a cost of only $213,750. As the channel still continued movable, tortuous and unstable, Congress in 1890 ordered the north jetty continued to a length of 9,600 feet and the construction of a south jetty 4,200 feet long. The extension of the north jetty was completed in twelve years, at a cost of only $721,720, of which $196,721 was for maintenance. The channel deepened naturally and became stable, so that it was not necessary to construct the south jetty. Deducting maintenance, it will be seen that the actual cost of this jetty was only $77 per foot. After a lapse of ten years, the condition of the jetty is practically normal. Its enrockment has only slightly subsided. Its tramway and receiving wharf only have been destroyed, the result of the work of the teredo and consequent decay.

State of Washington.

Tacoma Harbor.—Tacoma has one of the deepest harbors extant, ranking from 500 to 600 feet in depth. At the south end of the harbor are extensive tidal flats, bare at low water. The city water front is along the southwestern shore and the harbor lines have been established around the south end of the bay and along its western side. Several waterways extending into the flats have been projected, of which the most important, the City Waterway, has been completed at a cost of $162,-180. Its depth varies from 25 feet to 15 feet at its south end. Tacoma's great harbor problem remains unsolved, and has languished for three years. This project called for the deepening of the Puyallup waterway for a width of 500 feet and a length of 3,650 feet. When one-half of the work was completed, at a cost of $159,-585, freshets brought down such large deposits in November, 1909, that the 1,181,599 cubic yards dredged were replaced by more than 1,000,000 cubic yards of debris. All work was then stopped and the channel has since refilled. A board of government engineers decided, after a survey, that the only solution of the problem was to divert the bed of the Puyallup River and have it empty elsewhere than into the waterway of that name. As such diversion is not comprehended in the scope of Government operations, it will never be done unless private, city or state interests do it. Meantime, Tacoma is going ahead with its whaf terminals on an extensive scale, leaving the Puyallup for later consideration.

Grays Harbor.—Grays Harbor is the name of a top-shaped bay fourteen by seventeen miles in area, forming the mouth of the Chehalis River. On it are located the thriving sawmill cities of Aberdeen, Hoquiam, Cosmopolis and others, which contribute about 800,000 tons annually, mostly of lumber products, to commence. Here the usual jetty problem was encountered at the outset a convex bar having primevally formed two miles out at sea, across a channel about 100 feet deep, diminishing landwards to 30 feet. The two entrances through the bar had 12 to 13 feet of water, periodically shifting. In 1896 Congress authorized a south jetty three and a half miles long to control the tidal currents existing between two sandy peninsulas, 12,500 feet distant from each other. In 1902 when the $1,000,-000 authorized for the work had been expended and 13,734 feet of rubble-stone jetty completed, further work on it was abandoned. In 1907 Congress authorized a north jetty of 9,000 feet length, and in 1910, its extension to 16,000 feet to bring up its outer end opposite of the end of the south jetty. Local interests contributed the land for the trestle approach and operating plant. The jetty trestle is at present 12,784 feet long and the enrockment messed up to 9,376 feet, 8 feet wide at the crest to the middle level. Nature offers no such tremendous opposition and difficulties here as at the mouth of the Columbia River, but, on the latter, it is doubtful if the latter has any rival extant for battering and destructive powers.

Seattle's engineering projects do not call for much comment. The chief work concerns the Lake Washington Union which has [illegible]

Washington, on its borders. A navigable connection with Puget Sound is proposed for the former, and the improvement of the Black and Duwamish rivers forming the connecting link of the latter. A channel has been dredged 50 feet wide and 16 feet deep, between the sound and the wharves at Ballard in Salmon Bay, a distance of 2,000 feet, with a turning basin 175 by 500 feet wide. A cut has been excavated between Lake Union and Salmon Bay to control the water level of the former. From Ballard to the lock in the channel is 75 feet wide and 16 feet deep. In June, 1910, Congress authorized the construction of double locks to be located at the entrance to Salmon Bay, and unbroken channelway thereafrom, through Salmon Bay and Lake Union to Lake Washington. The canal or canal is to lower Lake Washington to the level of Lake Union. The cost estimate was $3,555,000 of which Congress appropriated $2,400,000, for the locks and accessories only, Seattle agreeing to pay for the channel work and to secure the Government from all damages for lowering Lake Washington or raising the level of Salmon Bay.

California.

San Diego.—San Diego's bar was originally cut by a channel 300 feet wide and 24 feet deep at mean low water. In 1875 Congress appropriated $80,000, with which a dike was thrown across the mouth of the San Diego River for the purpose of preventing its deposits from injuring the harbor. In 1890 Congress authorized the construction of a 7,500-foot jetty on Zuniga Shoal at the harbor entrance, and the maintenance of a channel 24 feet deep. When this project as completed the channel first deepened from 18 to 28 feet, then subsided to 24 feet. Continued dredging increased the minimum depth to 27 feet. The average tide here is 4.8 feet, as against 18 feet in the Pacific Northwest. In 1910, Congress authorized a channel 30 feet deep at the outer bar and 600 feet wide so as to admit the Pacific squadron and enable the warships to go to La Playa. This work will be completed by the time of the opening of the Panama Canal and the Panama-California Exposition at San Diego in 1915. The harbor has an area of twenty-two square miles, ceded to the city by the State. The city has appropriated $1,000,000 for a modern wharf system, with wharves 1000 feet in length each and an additional sea wall 5000 feet long. There are still 1000 feet which can be utilized for commerce. A belt line railway is being built along the entire water front to facilitate the movement of freight.

Los Angeles.—Los Angeles harbor was created by the annexation of San Pedro's outer and Wilmington's inner harbors. Originally San Pedro Bay was an open roadstead protected on the west by a bluff known as Point Fermin but exposed from other directions. In 1897 Congress made available $2,900,000 to build a breakwater from Point Fermin 8,500 feet out into the Pacific ocean. The fund was subsequently to extend the breakwater 9,250 feet from Deadman's Island, to terminate in 30 feet of water. This portion of the work consists of two straight arms, connected by a curve 1,800 feet long, having a radius of 1,910 feet. The westerly arm is 3,000 feet long. Easterly arm 4,450 feet long. Deadman's Island has been connected with the mainland by continuing the breakwater to 11,275 feet in length. The breakwater is 122 to 194 feet wide at the base, 38 feet wide at low water and 20 feet wide on top, 14 feet above low water. This breakwater can only be described as one of the greatest extant, creating, as it does, a magnificent roadstead out in the ocean. To construct it 2,563,777 long tons of rock were used, with rocks weighing three tons each and upward.

On invitation, Mr. Irving T. Bush, projector of the Bush Terminals of Brooklyn, has inspected Los Angeles' harbors with a view of suggesting how they can be made to anticipate the further increase of trade to result from the opening of the Panama Canal. He recommends the construction of a wharf three-quarters of a mile long. Such a wharf would be 2,960 feet longer than any now extant. The city has now twenty-two miles of improved water front.

San Francisco.—San Francisco has the great advantage that it is a practically natural harbor. The Government has never had to concern itself in its behalf, except to remove rocks, which mostly projected above water, where they could always be seen and avoided. This natural harbor is forty miles long and from three to ten miles wide, with thirty-six square miles of anchorage area, ranging from 40 to 90 feet in depth. Its main entrance, Bonita Channel has a permanent, unsilting depth of 48 feet, which never has and probably never will require dredging. It has other channel entrances also none of which have less than 30 feet of depth. The only impediment to navigation were the rocks mentioned marked with buoys or lighthouses. Of these, Blossom, Arch and Stag rocks Nos. 1 and 2 have been removed to a depth of 30 feet, and also Noonday rock, thirty-three miles west of the entrance. Work was stopped on Lemon rock at a depth of 24 feet, when the city took the base over for a wharf and included it in the pier head line. In 1910 Congress authorized a depth of 40 feet of water to replace Centissimi rock, in Bonita Channel, and 35 feet of water in the place of two rocks near the Mail Dock. In this work $515,928 have been spent and $250,000 more have been authorized. It is evident that San Francisco harbor must remain the only one on the Pacific Coast for many years, that can admit the largest of the world's vessels.

Oakland.—Oakland commenced harbor building in 1874, and work has been done intermittently ever since. It is now a greater harbor than it has commerce for, and speculation is rife as to what benefits will accrue from its future enlargement. As it is, 64 per cent of its tonnage goes on ferry transfers across the bay, consisting of overland freight consigned to San Francisco. The harbor is essentially the San Antonio estuary, an arm of San Francisco Bay. The project of 1874 resulted in the construction of two high-tide training walls at the entrance, a tidal canal one and a half miles long and 100 feet wide, connecting with San Leandro Bay, a tidal basin with a channel to San Francisco Bay and three steel bridges across the tidal canal. Next, a number of channels were excavated into Oakland and the jetty was extended 500 feet. Since then canals and waterways have been deepened, the main channel to 30 feet and the widening processes have been continued up to 500 feet. Today the tidal canal has been extended to four and three-quarters miles in length, the channel around the tidal basin to two and three-eights miles and the channel in the tidal canal to two and one-quarter miles. Congress has authorized further improvements to the extent of an addtional $705,482 and has appropriated $150,000 of it to be spent this year.

CONSTRUCTION WORK ABROAD.

SOUTH AFRICA.

(From Consul Edwin N. Gunsaulus, Johannesburg.)

New Construction Work in Johannesburg District.

There is little abatement in the building activity which has been such a marked feature in Johannesburg and in other towns of the Transvaal during the last two years.

During July $550,000 of building plans in Johannesburg were approved by the Municipal Council, while for the first six months of this year the estimated cost of erection of buildings approved amounted to $5,478,394. For the year ended June 30, 1912, the estimated cost of building construction, plans for which were approved, reached $10,072,730. The six months' building plans in Johannesburg, approved by the Municipal Council, included 833 dwellings, 151 stores, shops and offices, and 732 miscellaneous buildings, such as additions to warehouses and public buildings.

In Daily Consular and Trade Reports for January 29, 1912, mention was made of all the more important construction work then in prospect and in process of completion. Since that report the following Government buildings have been completed: Jeppes high school, $196,750; Turffontein school, $55,000. Newtown school, $60,000; trade school, $50,000; additions to telephone exchange, $69,500; police barracks, Fordsburg, $67,500; additions to jail (female prison), $163,750; dome of observatory, $22,500.

Following is a list of some of the principal Government buildings now in course of erection in Johannesburg: Girls' high school, Barnato Park, $150,000, central police barracks, $100,000, Doornfontein school, Doornfontein, $60,000; Good Hope school, Fordsburg, $50,000. In addition tenders are now being invited for Booysens school, $11,000; new school, with manual training and cookery addition, Roodepoort, $52,000; police barracks, Booysens, cost estimate not given.

For erection of Government buildings tenders are called for by the Public Works Department, the construction being carried on under supervision of the district engineer; address, District Engineer, Public Works Department, Room 27, New Law Courts, Johannesburg.

Town Hall.

The only contract thus far awarded in building the new town hall (now well started, and which will cost with fittings and furniture, $1,600,000) is for erecting the building at a cost of

$1,325,000. The matter of fittings and furniture required for the different offices and rooms of the building will probably not be taken up for several months. The architects state that it is practically certain that most of the woodwork, such as counters, doors, etc., will be made locally, utilizing as far as possible South African woods.

The town hall will include, in addition to the many offices for municipal purposes, a fine auditorium, in which it is proposed to install a large pipe organ. It is likely that most of the office equipment will be of steel construction.

Palladium Theatre.

The Johannesburg Estates Co. (Ltd.), will erect a two-story brick building, steel frame, in which will be the new Palladium Theatre, with stores on the ground floor. The upper story will consist of twenty modern flats. Total cost of building, including furnishings of theatre, will be nearly $260,000.

The chief portion of the building is the theatre, which is to be a high-class music hall (vaudeville), and will have seating accommodation for 1,600. The Palladium Theatre Co, which has leased the theaure furnished from the Johannesburg Estate Co., intends giving the best vaudeville shows and will include a few pictures at popular prices. It is stated that the Palladium will be the handsomest and most commodious theatre in South Africa. The amount to be expended on decorations and furnishings will be about $25,000. The order has been given to an English firm for carpets, the contract price being $5,500. The contract to supply the seating has also been awarded to a British manufacturer. The theatre will be opened shortly before Christmas next.

The name and address of the company owning the building is Johannesburg Estates Co. (Ltd.), F. Hilner, secretary, P. O. Box 268, Johannesburg, the theatre lessees being Palladium Theatre Co. (Ltd.), A. A. Noble, secretary, 11 Steyler's Building, Johannesburg.

Union Club Building.

The Union Club of South Africa, having a membership of 3,700, is having built a clubhouse, four stories, of stone and brick, at a cost of $165,000. The furnishings will cost another $50,000. It has been decided by the directors of the club that, aside from the billiard tables, carpets, and curtains, all articles of furniture, such as chairs, tables, and fixtures, shall be made in South Africa, and, as far as possible, of South African hardwood, such as teak and stinkwood.

There will be rooms for the accommodation of the staff only. The building is to be completed by March, 1913. Mr. G. Mitchell is secretary and manager of the club; address, P. O. Box, 1112, Johannesburg. Messrs. Herbert Baker & Fleming are the architects; address, Exploration Buildings, Commissioner street, Johannesburg. Mr. James Thompson is the builder; address, P. O. Box 312, Johannesburg.

Y. M. C. A. Building—Art Gallery.

The Young Men's Christian Association of Johannesburg has almost completed erection of a three-story building as a home for their association, at a cost of $85,000. The furnishings, including a gymnasium and all modern appointments, it is estimated will cost an additional $30,000. Leck, Emley & Dickson, architects, P. O. Box 7603, Johannesburg; H. W. Soutter, chairman building association, Y. M. C. A., P. O. Box 1001, Johannesburg.

The building of the Johannesburg Municipal Art Gallery in Joubert Park is another enterprise which will soon be underway, although the contract for the structure has not yet been let. The building will cost $125,000 and will be constructed by the Johannesburg municipality, under supervision of Mr. E. H. Waugh, chief of architectural department.

Business Blocks.

Mosenthal Bros. & Co. (Ltd.), one of the largest wholesale firms of South Africa, dealers in general merchandise, are erecting a seven-story $225,000 brick and stone building, with steel frame, in Johannesburg, for their own business.

Patlansky Bros., oil merchants, are having erected a four-story, $75,000 building in Johannesburg, ground floor to be used for their own busness purposes and upper floors for offices and flats.

C. Meischke, a well known local builder and contractor, is erecting a four-story office building on Market sale merchants, has just been complet- Square, at a cost of $200,000.

The new additions to the building of Randles Bro. & Hudson, general wholeed, the contract price being $65,000.

Butter and Cheese Factory—New Market Building.

Joseph Baynes (Ltd.), proprietor of Nels-Rust Dairies, is building a three-story butter and cheese factory at Wanderer's View, at a cost of $125,000. Address, Jos. Baynes (Ltd.), P. O. Box 1679, Johannesburg.

Among the municipal enterprises now well under construction is the new market hall being erected at Newtown, at a cost of something like $500,000. This embraces a huge hall, an annex, a long open shed, and two large asphalted yards, one for the reception of goods by rail along the siding and the other for use of local producers and sellers. The central market building is more than one eighth of a mile in length, the outside measurements being 671 by 120 feet. The steel framework, weighing 600 tons, is already erected. When completed, the building will provide adequate accommodation for offices, a bank, post office, cafe, an exchange measuring 60 by 50 feet, and numerous other conveniences. The annex, to be used chiefly for fish and poultry, is 80 by 120 feet, the main portion being octagon in shape, with a diameter of 77 and height of 77 feet. In the market enclosure is a building of red-tiled roof and decorative pillars for lavatory purposes, erected at a cost of $12,000

(From Consul Nathaniel B. Stewart, Durban.)

Increased Government Expenditures for Public Improvements.

The estimated expenditures by the government of the Province of Natal from provincial revenues only during the year ending March 31, 1913, for which sums have been approved, are as follows: General administration, $105,137; education, $882,744; hospitals and charitable institutions, $171,325 roads and local works, $1,947,700; total, $3,107,206. There is an increase of $785,078 above the provincial appropriations for 1911-12. The greater part of the increase occurs under the head of roads and local works, both for maintenance and repairs, and for new works. For new buildings there is appropriated $554,552, and for new bridges a sum of $337,891.

Nearly the whole of the new buildings planned are for schools, and there is no large project in the list. The completion of Pietermaritzburg College, $49,206; a school for boys, Durban, $48,665; two schools for infants, Durban, each at $38,932; and improvements to Addington Hospital, Durban, $45,799, are the most important of the projects. Under new bridge construction the most important projects are the Umhlatuzana River bridge, $63,265, the Amatikulu bridge, $21,899; and the Prince Albert Falls bridge, $19,466

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 3 story and base, frame, $15,000. Architects, H. Geilfuss & Son, 45 Kearny St., S. F. Owner's name withheld. This building has been mentioned here before when plans were first started. Working drawings are now well advanced and will go out for figures very shortly. The building will be erected in the Golden Gate Park Pan Handle, and is arranged for six apartments of four rooms and bath each. Interior finish will be of pine and redwood with oak floors. There will be steam heat and open fire places. Wall beds will be used in all apartments. The exterior of the building will be covered with cement plaster and klinker brick veneer.

San Francisco—Apartment house alterations, frame flats to apartments, $10,000. Architect, J. W. Walker, 1182 Oak St., S. F. Owners, J. F. and S. J. Jackson. The present flat building will be altered so as to contain nine small apartments of two and three rooms each. There will be wall beds and connecting baths. A central heating system will be installed. Interior finish will be of pine throughout. The exterior of the building will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

San Francisco—Apartment house, 3 story and base, frame, $10,000. Architect, none. Owners, C. J. and W. J. Keenan, 200 Webster St., S. F. The building will be very similar in design to several other structures erected recently by the same owners. The building lot is 31x81 feet, and the building will contain nine apartments of two and three rooms. There will be wall beds and connecting baths. A central heating system will be installed. All interior finish will be of

pine. Some oak floors will be used. The exterior of the building will be covered with brick veneer and cement plaster. Plans are complete and in the hands of the owners who will do the work by Day Labor.

Oakland, Cal.—Apartment house, 4 story and base, brick and frame, $55,000. Architect, A. Merrill Bowser, 1007 Broadway, Oakland. Owner's name withheld. The building will be erected on Broadway near Sixth street. The first floor has been subdivided into eight small stores, while the upper floors are arranged for 24 three-room apartments, with connecting baths and wall beds. There will be steam heat. All interior finish will be of pine. The exterior of the building will be covered with brick veneer. Plans are now being prepared.

Stockton, San Joaquin Co., Cal.—Apartment house, 4 story and base, brick and steel, $100,000. Architect, Glenn Allen, 1396 Golden Gate Ave., S. F. Owners, Home Builders' Investment and Security Co. 28 North San Joaquin St., Stockton. This work has been mentioned here before when plans, prepared by the owners, were out for figures. These drawings are being entirely revised and new figures will be called. The structure covers a large area and will contain in the neighborhood of 100 apartments of the two and three room type. A steam heating plant, vacuum cleaning, elevators and all other modern features will be installed. The exterior will be faced with pressed brick.

San Pedro, Los Angeles Co., Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, Alfred F. Priest, Fay Bldg., L. A. Owner, A. J. Warner. The building will be 50x110 feet. The first floor will be arranged for offices and the upper floors subdivided into 45 rooms. Suites will consist of two and three rooms each with bath. There will be steam heat. Canal Circular 737.

Bids are being called for by the purchasing officer, Isthmian Canal Commission, Washington, D. C., to be opened October 25 under circular No. 737 for furnishing gasoline engines, 9 right hand and 9 left hand complete, except motor, dual switch counterweight case and locks. The schedule is divided into two classes as follows:

Class 1, 18 guard valve engines.

Class 2, Spare parts for above, to be furnished any time within a period of two years.

Canal Circular 739.

Bids are to be opened under circular 739 at the purchasing office, Isthmian Canal Commission, Washington, D. C., on October 30, for the necessary equipment for the new Colon water works. The following equipment will be required in connection with the work.

All cast iron pipe and fittings designed to bear a maximum pressure of 40 pounds per square inch, to be standard and not to be charged bored and bored. The contractor will furnish all bolts and 1/8 inch rubber gaskets for each joint of flanges. The 20-inch cast iron bell and spigot pipe shall be regular standard designed for 48 pounds pressure all wrought iron pipe and fittings to be commercial galvanized screwed or flanged.

There will be required 30 hydraulic valves as follows: 6 15-inch waste valves, 6 6-inch sewash valves, 6 14-inch wash valves, 6 10-inch effluent valves, and 6 12-inch do, all to be standard cast iron body, bronze mounted, gate valves 3 inches in size and lower to be brass or bronze, globe valves to be bronze. The three pressure reducing valves shall be similar to the Foster air or steam pressure reducing valve. The three pressure-relief valves to be standing iron body. There will be 16 4-inch globe angle valves, 3 14-inch foot valves and 5 12-inch swing check valves. Fittings to be galvanized wrought iron to be welded 14-inch pipe.

There will be 8 upper alum dissolving screens and 8 lower. Eight screens to have copper screening, 20-inch mesh, and 8 to have brass mesh. Six effluent controllers are required. There is to be an alum controller and alum measuring device, with indicator.

The six operating tables are to be any standard filter operating table, having a black slate top, with paneled quartered oak or mahogany sides.

The alum mixer is to consist of a propeller driven through a vertical line of shafting and beveled gear by a 10-horsepower induction motor to operate 2-phase, 2-wire, 3-phase current, 220 R. P. M. Motors to be of the squirrel-cage induction type. Each motor must be furnished with a 3-phase starting compensator.

One of the two traveling hoists shall be pneumatic and trolley combined to trolley not to be geared capacity 2,000 pounds, trolley to be built to run on lower flange of 9-inch, 211-pound eye beam. Trolley shall be designed to lift 2,000 pounds a maximum lift of 35 feet. Hoist to be equipped with motor. The second hoist will be ordinary chain trolley block giving a capacity of 1,000 pounds. Trolleys not to be geared.

Scales desired are to be standard portable platform, to weigh from ½ to one pounds. There shall be two air compressor geared direct to induction motor. Air receiver to be any standard make design for horizontal position.
position.

Traveling crane shall be hand operated; 6 tons maximum capacity, lift of 12 feet.

There are to be two centrifugal fire pumps, electrically driven, horizontal, 2 or 3 stage, and pumps direct connected to induction motor, designed to handle filtered fresh water. Each pump shall have a guaranteed capacity of 3,000 gallons per minute. Motors for same are to be 300 horsepower.

The switchboard shall consist of a slate panel 90 inches in height and of sufficient width to give proper spacing for the instrument and switches.

HALLS AND SOCIETY BUILDINGS.

Oakland, Cal.—Auditorium, 2 story and base. Class A construction, $500,000. Architect, Supervising Architect J. J. Donovan, Oakland. Owners, City of Oakland. Bids will be opened for the excavating and piling for the new auditorium on October 21st. The work will require a total of 2,004 piles and is to be completed in 75 days. for the construction of this building with the Ransome Concrete Co., of Sacramento. Some slight changes may be made in the original plans but no new figures will be taken.

Ocean Park, Los Angeles Co., Cal.—Hotel, 3 and 4 story and base, reinforced concrete. Cost not stated. Architect, Thornton Fitzhigh, Pacific Electric Bldg., L. A. Owner, G. M. Jones. The building will cover an area of 80x180 feet. The front portion of the building will be four stories high and the rear three. Stores and the hotel office will occupy the first floor. About 100 guest rooms are provided for on the upper floors. There will be steam heat and elevator service. A large dance pavilion will also be provided for. The exterior will be faced with cement plaster. Plans are now being prepared.

Los Angeles, Cal.—Hotel, 3 story and base, brick. Cost not stated. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owners, Bryan and Bradford. The building will be 75x119 feet. The first floor will be arranged for stores and the upper floors will contain a total of 60 guest rooms and 20 baths. There will be steam heat. Hot and cold running water has been provided for all rooms. The exterior of the bulding will be faced with pressed brick. Plans are complete and figures have been taken. A contract will be awarded within a day of two.

Portland, Ore.—Hotel 4 story and base, frame, $75,000. Architects, Johnson & Meyer, Selling Bldg., Portland. Owner, W. R. McGarry. The main part of the building will be four stories high and 150 feet long with a 60-foot wing on each end. It will contain about 100 rooms for guests and will be finished throughout in the rustic. A wide porch with balconies will extend across the entire front of the structure. It is to be heated by steam or hot water, will have hot and cold water in each room, and is to be lighted with electricity. Garage, stable and other buildings are also to be erected. Plans are being prepared.

Los Angeles, Cal.—Hotel, 3 story and base, frame. Cost not stated. Architects, Dennis & Farwell, Fay Bldg., L. A. Owner, F. P. Fay. The building will be 57x136 feet with three stores and lobby on the first floor and a total of 10 rooms on the upper floors. There will be steam heat, elevator service and hot and cold running water. The exterior will be faced with pressed brick. Work will be done by Day Labor and the architects are now taking figures for certan parts of the work.

Los Angeles, Cal.—Hotel, 2 story and base, brick. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, Joseph Sresovich. The building has been arranged for stores on the first floor and a number of guest rooms on the upper floors. There will be steam heat and running hot and cold water. The interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Portland, Ore.—Hotel, 7 story and base, reinforced concrete, $60,000. Architect, John G. Wilson, Portland. Owner, Cord Sengstake. The building is the first of several large improvements which will shortly be undertaken on lower Seventh street in expectation of the early completion of the Broadway bridge. This structure will cover an area of 40x100 feet, and is to contain several stores besides the hotel lobby on the first floor. The upper floors have been arranged for a total of 84 rooms and 24 baths. Lobby will be finished in marble and tile. There will be steam heat, elevator service and running hot and cold water. The exterior of the building will be faced with pressed brick. Plans are being prepared.

—LIBRARIES—

Los Angeles, Cal.—Library, 2 story and base, brick, $30,000. Architects, Train & Williams, Exchange Bldg., L. A. Owners, City of Los Angeles. The building will be erected at the corner of Pasadena and Piedmont avenues. Design is in the classic style with the exterior faced with pressed brick. There will be two public rooms, stack rooms and offices for the librarian. A central heating system will be installed. The interior will be finished in pine and oak with hardwood floors. Plans are now being prepared.

POST OFFICES.

Contracts Awarded.

Santa Barbara, Santa Barbara Co., Cal.—Post office, 2 story and base, brick and steel, $105,000. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Contractor, Eugene Schuler, Wahpeton, North Dakota. Contract price, $105,015.

RAILROAD CONST., STATIONS AND EQUIPMENT

Eugene, Ore.—Terminal station, 1 story brick. Cost not stated. Architects, Doyle, Patterson & Beach, Portland. Owners, Oregon Electric Railroad. The building will be 130 feet in length and will contain two waiting rooms, baggage, express office and offices of the company. There will be a central heating system, probably steam. Interior finish will be of pine. The exterior of the building will be faced with pressed brick. Plans are complete and were put out for figures on October 15th.

RESIDENCES.

San Francisco—Residence, 3 story and base, frame, $7,000. Architect, none. Owners, S. A. Born Building Co., 660 Market St., S. F. The dwelling will be erected on West Clay street, and has been designed to contain nine rooms, three baths, a garage and sleeping porches. Interior finish will be of pine, redwood, white enamel and hardwoods. Oak floors will be used throughout except in the baths which will have composition floors. There will be a central heating system and open fire places. Mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

San Francisco—Residence, 1 story and base, frame, $2,000. Architect E. E. Young, 251 Kearny St. S. F. Owner, Thomas Scoble, 363 14th Ave., S. F. The dwelling will be similar in design to a number of other houses recently erected by the same owner in this city. The house will contain seven rooms, bath and sleeping porch. There will be open fire places and tile or brick mantels. Interior trim will be of pine and redwood. Oak floors will be used in the principal rooms. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Residence, 2 story, attic and base, frame, $4,500. Architect, none. Owners, Conservative Building and Investment Co., Foxcroft Bldg., S. F. The house has been designed to contain eight rooms, bath and sleeping porch. All interior finish will be of pine or redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with metal lath and plaster. Plans are in the hands of the owners and the work will be done by Day Labor.

San Francisco—Residence, 2 story and base, frame, $10,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, C. T. Cutten. The dwelling will contain eight rooms, baths, sleeping porch and laundry. Interior finish will be of pine, redwood and hardwoods. There will be furnace heat and open fire places. Oak floors will be used throughout except in the baths, which will have composition flooring. Mantels will be of brick. Tile will be used in the kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

San Francisco—Residence, 2 story and base, frame, $5,000. Architect, Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling will be erected on Mercedes Way and has been designed to contain eight rooms, bath and a garage. Interior finish will be largely of pine with some oak panels. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick or til Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

San Francisco—Bungalow 1½ story and base, frame, $2,000. Architects, Rhodes & Marisch, 3372 16th St., S. F. Owner, Raymond McAneny. The house will contain six rooms and bath. Interior finish will be of pine and redwood throughout. Oak floors will be used in the living and dining rooms. There will be an open fire place with a brick mantel. The exterior of the house will be covered with rustic and shiplap. Plans are complete and figures are being taken.

San Francisco—Residences, 1, 2 story and base frame $2,000 each. Architect, Theo. S. Boehm, Hewes Bldg., S. F. Owners, J. W. Rapple Investment Co. These houses are to be erected on a new tract being developed by the owners and are the first of a large number of dwellings planned. Each house will contain seven rooms and bath. Interior trim will be of pine and redwood. Some oak floors will be used.

There will be open fire places and tile or brick mantels. Tile will be used in the kitchens and baths. The exteriors of the houses will be covered with rustic, cement plaster on metal lath and klinker brick veneer. Plans are being prepared. The owners have not decided whether the work will be done by contract or Day Labor.

San Francisco.—Residence, 2 story and base, frame, $3,000. Architect, none owner. E. Yagge, 136 Alpine St., S. F. The dwelling has been designed for a six room house with bath. There will be oregon oak floors open fire places and tile or brick mantels. Interior trim will be of pine throughout. The exterior of the house will be covered with shingles. Furnace heat will be installed. Plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1 story and base, frame, $2,500. Architect none. Owner, J. A. Pinkerton, 1931 Berryman St., Berkeley. The house has been designed for a six room dwelling. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be open fire places and tile or brick mantel in the living room. Tile will be used in the hall and kitchen. The exterior of the dwelling will be covered with shingles and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, $4,000. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, E. C. Brickson. Plans provide for a seven room house with bath and sleeping porch. All interior trim will be of pine or redwood. Oak floors will be used in the principal rooms. There will be open fire places and furnace heat. Living room, mantels will be of brick. Tile will be used in the hall, bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

Berkeley, Alameda Co., Cal.—Residences, 2 story and base frame, $3,500 each. Architects Hutchinson Bros., 170 12th St., Oakland. Owner, George H. S. Hall, Union Savings Bank Bldg., Oakland. Each of these houses will contain seven rooms, bath and sleeping porch. Interior trims will be of pine and redwood. Some oak floors will be used. Furnace heat will be installed. There will be open fire places and stone mantels. Tile will be used in the halls and kitchens. The exteriors of the houses will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

Palo Alto, Santa Clara Co., Cal.—Residence, 2 story and base, frame, $15,000. Architects, William Curlett & Son, Phelan Bldg., S. F. Owner, William E. Slade. The dwelling is being designed for an extensive country home and will contain in the neighborhood of 11 rooms, several baths and a lavatory. Interior will be finished in the redwood and cedar. There will be a vacuum cleaning system, open fireplaces, tile and brick mantels. The exterior of the house will be of oak except [illegible] rooms. Attic will be finished in tile with composition floors. Mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

Los Angeles, Cal.—Residence, 2 story and base, brick and frame. Cost not stated. Architects, Withey & Davis, Story Bldg., L. A. Owner, Malcolm Naughton. The dwelling will contain 12 rooms, several baths, sleeping porches and a laundry. A garage will also be erected on the same lot. The interior of the house will be finished in pine, cedar and redwood. Oak floors will be used in all principal rooms. Baths will be finished in tile with composition floors. There will be furnace heat and an automatic water heater. A vacuum cleaning system will be installed. There will be open fire places and stone, tile and brick mantels. The exterior of the house will be covered with cement plaster. Plans are being prepared.

Seattle, Wash.—Residence, 2 story and base, brick, $40,000. Architects, Bebb & Mendel, Denny Bldg., Seattle. Owner, S. S. Loeb. Only preliminary plans have been prepared and details of the dwelling are not obtainable at this time. Sketches show a building containing about 16 rooms, several baths and other features. The interior will be handsomely finished in hardwoods. All modern conveniences will be installed. The exterior will probably be faced with pressed brick. Details will be given as the plans progress.

Contracts Awarded.

Los Angeles, Cal. — Residence, 2 story and base, brick, $15,000. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owner, Lee Phillips. Contractor, John L. Conner, 435 West 31st St., L. A. Note: This work has been taken on the percentage basis.

Tulare, Tulare Co., Cal.—Residence, 2 story and base frame $12,000. Architect's name not given. Owner, R. Linder. Contractor, J. H. Kohl, Fresno. Contract price, $11,690.

—SCHOOLS—

Oakland, Cal.—Schools, 3, 2 story and case brick and steel $90,000 each. Architect, Supervising Architect, J. J. Donovan, Oakland. Owners, City of Oakland. The following is a complete list of all firms now figuring the work on the three new school buildings, bids for which will be opened on October 24st

Washington School.

I. B. Ackerman & Son, Oakland; Van Sant-Houghton Co., San Francisco; Nes Anderson, Oakland, W. V. Murray, Alameda; H. B. Brigham, Oakland; Lindgren Co., San Francisco; Farrell & Reed, San Francisco; Roberts Bros. Co., San Francisco; Williams Bros. & Henderson, San Francisco; A. J. Mazurette, Oakland; Clinton Fireproof Co., San Francisco. W. N. Concannon, San Francisco.

Longfellow School.

Lindgren Co., San Francisco; C. A. Lindgren Co., C. A. Hicks, San Francisco; W. V. Murray, Alameda; Williams Bros & Henderson, San Francisco; Thurston & Co., San Francisco; Farrell & Reed, San Francisco; Foster-Vogt Co., San Francisco, Lang & Bergstrom, San Francisco, Van Sant-Houghton Co., San Francisco; O. B. Ackerman & Son, Oakland.

Emerson School.

Lindgren & Co., San Francisco; H. B. Brigham, Oakland; Van Sant-Houghton Co., San Francisco; W. N. Concannon Co., San Francisco; Clinton Fireproof Co., San Francisco; Robert Greig, Oakland; J. W. Carr, San Francisco; D. B. Farquharson, San Francisco; C. Christenson, Oakland; Lange & Bergstrom, San Francisco.

Lodi, San Joaquin Co., Cal.—School, 2 story and base, brick and steel, $150,000. Architects, Stone and Wright, Stockton. Owners, Lodi Union High School District. This building has been mentioned here before when the architects were first commissioned to prepare the plans. The structure will contain a number of class rooms, domestic science and manual training departments. When complete the structure will be one of the most modern high school buildings erected in the state. There will be fireproof halls and stairways. The mechanical equipment will include steam heat and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

South Pasadena, Los Angeles Co., Cal.—School, 2 buildings, 3 story, brick and concrete, $70,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, South Pasadena High School District. These two buildings will be in addition to the building already under construction. Each of the structures will cover a ground area of 65x100 feet. One building will be used for domestic science and the other for manual training. Each will have steam heat. The exteriors will be faced with Redondo brick. Plans are now being prepared.

San Diego, Cal.—School, 2 story and base, brick and steel. Cost not stated. Architect, T. C. Kistner, American National Bank Bldg., San Diego. Owners, City of San Diego. Plans for this building have been completed and have received the approval of the Board of Education. The building will contain ten class rooms, assembly hall and principal's office. Interior finish will be of pine. There will be steam heat and a modern system of ventilation. The exterior will be faced with pressed brick. Bids are now being taken and will be opened by the Board on November 4th.

San Fernando, Los Angeles Co., Cal.—School, 2 story and base, reinforced concrete, $50,000. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, San Fernando Union High School District. Competitive plans for this work have just been selected. Ten plans were submitted in competition. None of the details of construction are obtainable at this time. Working drawings are being prepared, and as soon as plans have progressed far enough a detailed description will be published.

Contracts Awarded.

Nees Colony, Fresno Co., Cal.—School, 1 story and base, frame, $7,000. Architects, A. C. Swartz & Son, Fresno. Owners, Nees Colony School District. The following bids were received for the construction of the new building in the Nees District: Martin & Witter, $6,760; Christian & Kohl, $7,583; J. C. Chesti, $8,500. Bids for the heating system were H. A. Hansen, $115; Griffin & Betteridge, $131.

SEWERS, STREET WORK AND WATER SYSTEMS.

San Francisco—Sewers, vitrified iron stone. Cost not stated. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be opened on October 23rd for a 12-inch sewer with manholes, etc., which is to be constructed in Peralta avenue. Full information may be secured from the City Engineer. For proposal see under Sealed Proposals in this issue.

San Francisco—Street work, paving, grading and curbs. Cost not stated. Engineer, City Engineer, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids will be opened on October 23rd for street work as above described. Full information can be had from the City Engineer. For proposal notice see under Sealed Proposals in this issue.

Inglewood, Los Angeles Co., Cal.—Laying pipes for supply system. Cost not stated. Engineer, City Engineer, Inglewood. Owners, City of Inglewood. Bids for furnishing and laying pipe for the Grevillea Avenue Park system will be received up to and including the 21st day of October. For full particulars apply to the City Engineer.

Yucaipa, San Bernardino Co., Cal.—Reservoirs and pipe lines. Cost not stated. Engineer, F. C. Finkle, I. W. Hellman Bldg., L. A. Owner, Redlands and Yucaipa Land Co. Plans are being prepared for two concrete reservoirs and twenty miles of pipe line. This work will be erected in the Yucaipa Valley. Plans will be completed shortly and bids will be called.

San Diego, Cal.—Pipe, etc. Cost not stated. Engineer, City Engineer, San Diego. Owners, City of San Diego. Superintendent Fay, of the Water Department, states that plans have been completed for the following work to be done under the recent bond issue: 1400 feet of 36-inch pipe on Oregon street; 2,580 feet of 36-inch pipe on University avenue, 4,390 feet of 30-inch pipe on University avenue, 980 feet of 30-inch pipe on Polk avenue; 8,090 feet of 30-inch pipe on Thirtieth street; 4,150 feet of 24-inch pipe on Thirteeth street, 2,930 feet of 16-inch pipe on B street, 360 feet of 16-inch pipe on Twenty-fifth street, 2,640 feet of 16-inch pipe on El Cajon avenue; 3,720 feet of 16-inch pipe on El Cajon avenue; 16,000 feet of 12-inch pipe in Old Town from Lower Point Loma reservoir to Stephens and Lewis streets; 11,000 feet of 10-inch pipe on Grand avenue; 21,000 feet of 8-inch pipe on to La Jolly reservoir; 2,650 feet of 12-inch pipe on University boulevard. The work will be started as soon as the validity of the bond issue is determined.

STORES & OFFICE BUILDINGS.

San Francisco—Store fixtures. Cost not stated. Architect, W. H. Crim, 425 Kearny St., S. F. Owners, Shumate Pharmacy. The Shumate Co. are fitting up a new store at Union and Steiner streets and will spend a large sum in fixtures. The work will include electric work, plastering and a large amount of cabinet work. Plans have been completed and the architect is now taking figures on the job.

San Francisco—Stores and offices, 4 story and base, reinforced concrete, $40,000. Architects, Frye & Schastey, Monadnock Bldg., S. F. Owners, Hop Woe Society. The building will be erected on Stockton street near Clay, and is to cover a considerable ground area. The first floor will be arranged for stores and the upper floors for offices. Negotiations are now underway with a Chinese government official, who may take a whole floor of the building, in which case the interior will be elaborately finished. There will be steam heat. The exterior will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

Lincoln, Placer Co., Cal.—Stores and offices, 2 story and base, brick, $10,000. Architect, Allen D. Fellows, East Auburn. Owners, Williamson and Ingram, Lincoln. The building will occupy a site on the principal business corner in Lincoln, and has been arranged for stores on the first floor and a number of modern offices on the second floor. Interior finish will be of pine or redwood. There will be large plate glass store fronts. Roof will be of metal tile. The exterior of the building will be faced with pressed brick. Plans are now being prepared. Work will probably be done by Day Labor.

Los Angeles, Cal.—Stores and lofts, 3 story and base, brick and steel. Cost not stated. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, Gernard Eshman. The building will be 124x85 feet. The first floor will contain stores. Upper floors will be divided into small lofts for light manufacturing purposes. There will be steam heat and elevator service. Metal window frames and sash will be used. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken by the architects.

Contracts Awarded.

Portland, Ore.—Stores and lofts, 3 story and base, reinforced concrete. Cost not stated. Architects, Bridges & Webber, Portland. Owner, George W. Bates. Contractors, Hurley-Mason Co., Portland. Contract price not stated.

Los Angeles, Cal.—Stores and lofts, 6 story and base, reinforced concrete, $63,500. Architects, William Curlett & Son, Phelan Bldg., S. F., and Title Ins. Bldg., L. A. Owner, Frank P. Flint. Contractor, Carl Leonardt, H. W. Hellman Bldg., L. A. Contract price, $63,500.

THEATRES.

Seattle, Wash.—Theatre, 8 story and base, steel and reinforced concrete, $350,000. Architect, B. Marcus Priteca, Empire Bldg., Seattle. Owner, Alexander Pantages. The building is to be erected at the corner of 3rd avenue and University street, and will cover an area of 60X120 feet. The main auditorium and balconies will occupy the greater portion of the first four stories. A large number of modern offices will occupy the remainder of the building. Construction will be fireproof throughout. A large amount of metal lath will be used. All modern mechanical equipment will be installed. The exterior will be faced with pressed brick and terra cotta. Plans are being prepared and work will be started before the end of the year.

Contracts Awarded.

Los Angeles, Cal.—Theatre, 1 story and base, brick, $13,127. Architect, none. Owner, D. S. Kornblum. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price, $13,127.

SEALED PROPOSALS.

NOTICE TO CONTRACTORS.

Firms desiring news from certain localities like San Francisco, Los Angeles Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—3 story and base, frame, $15,000. San Francisco. Architects, H. Geilfuss & Son, 45 Kearny St., S. F. Owner's name withheld. This building has been mentioned here before when plans were first started. Working drawings are now well advanced and will go out for figures very shortly. The building will be erected in the Golden Gate Park Pan Handle, and is arranged for six apartments of four rooms and bath each. Interior finish will be of pine and redwood with oak floors. There will be steam heat and open fire places. Wall beds will be used in all apartments. The exterior of the building will be covered with cement plaster and klinker brick veneer.

Apartment House Alterations — Frame flats to apartments, $10,000. San Francisco. Architect, J. W. Walker, 1183 Oak St., S. F. Owners, J. F. and S. J. Jackson. The present flat building will be altered so as to contain nine small apartments of two and three rooms each. There will be wall beds and connecting baths. A central heating system will be installed. Interior finish will be of pine throughout. The exterior of the building will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

Apartment House—3 story and base, frame, $10,000. San Francisco. Architect, none. Owners, C. J. and W. J. Keenan, 300 Webster St., S. F. The building will be very similar in design to several other structures erected recently by the same owners. The building lot is 31x81 feet, and the building will contain nine apartments of two and three rooms. There will be wall beds and connecting baths. A central heating system will be installed. All interior finish will be of pine. Some oak floors will be used. The exterior of the building will be covered with brick veneer and cement plaster. Plans are complete and in the hands of the owners who will do the work by Day Labor.

Factory—4 or 5 steel and corrugated iron buildings, $75,000. South San Francisco. Engineer, Edward S. Cobb, Los Angeles. Supervisor of Construction Hoyt, Monadnock Bldg., S. F. Owners, Schaw-Batcher Co., S. F. Schaw-Batcher Co. are the largest manufacturers of pipe in the west and have formerly had their factory located at Sacramento. The determination to move to San Francisco was made on account of the superior water shipping and general traffic rates. A large site has been secured and excavations will be started at once. Plans are complete for four buildings, the largest of which will cover an area of 250x150 feet. All buildings will have steel frames with exterior covering of corrugated iron. Much new mechanical equipment will be installed, including new machinery which will handle 1½-inch plates. The company are now manufacturing pipe 72 inches in diameter. Plans for the buildings are in the hands of Mr. Hoyt, who is now taking figures on the various parts of the work.

Flats—2 story and base, frame, $10,000. San Francisco. Architects, H. Geilfuss & Son, 45 Kearny St., S.F. Owner's name withheld. These flats will be erected in the Richmond District and are designed for large residential flats with all modern conveniences. There will be two flats of five and six rooms each. Interior finish will be of pine, redwood and hardwood. Oak floors will be used throughout. A central heating system and open fire places will be installed. Bath rooms will have composition floors. Mantels will be of brick. A garage will be built in the basement. The exterior of the building will be covered with klinker brick and cement plaster. Plans are complete and figures are being taken.

Flats—2 story and base, frame, $7,500. San Francisco. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, George A. Dolan. The building will contain two modern residential flats of five and six rooms each. All interior trim will be of pine and redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Composition flooring will be used in the bath rooms. The exterior of the building will be covered with cement plaster. Plans are complete and figures will be called for at once.

Hotel—7 story and base, brick and steel, $175,000. San Francisco. Architect, Arthur G. Scholz, Phelan Bldg., S F. Owner, P. J. Gartland. Mr. Gartland has recently purchased a large corner site at the southwest corner of Geary and Larkin streets, and has announced his intention to improve the same at once with a substantial hotel structure. A number of stores will be provided for in the first floor besides a large and attractive hotel lobby and office. The six upper floors will be arranged for about 200 rooms, a large percentage of which will have connecting baths. The mechanical equipment will include steam heat, elevator service, a vacuum cleaning system and other features. Construction will be of steel with exterior walls faced with pressed brick or terra cotta. Preliminary plans only have been prepared, but working drawings will be made at once.

Hotel—7 story and base. Class A construction, $200,000. San Francisco. Architects, Righetti & Headman, Phelan Bldg., S. F. Owners, Austin Ulp Hotel Co. This company, we'd, is composed mostly of eastern capital, has just purchased a lot in O'Farrell street having a frontage of 90 feet and a depth of 137½ feet. Preliminary plans for a modern hotel structure on this lot have been approved by the owners and work will be started as soon as detail drawings can be made. The plans provide for several stores on the first floor besides the hotel lobby and office. Upper floors will contain a total of 250 rooms and 213 baths. All modern conveniences will be installed including steam heat, vacuum cleaning system, elevator service and wall beds. Construction will be fireproof, a complete steel frame being used with exterior walls faced with pressed brick and terra cotta. The interior will be finished in hardwoods, marble and white enamel. Plans are now being prepared.

Residence—3 story and base, frame, $7,000. San Francisco. Architect, none. Owners, S. A. Born Building Co., 660 Market St., S. F. The dwelling will be erected on West Clay street, and has been designed to contain nine rooms three baths, a garage and sleeping porches. Interior finish will be of pine, redwood, white enamel and hardwoods. Oak floors will be used throughout except in the baths, which will have composition floors. There will be a central heating system and open fire places. Mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $3,000. San Francisco. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Thomas Scoble, 363 14th Ave., S. F. The dwelling will be similar in design to a number of other houses recently erected by the same owner in this city. The house will contain seven rooms, bath and sleeping porch. There will be open fire places and tile or brick mantels. Interior trim will be of pine and redwood. Oak floors will be used in the principal rooms. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

Residence—2 story, attic and base, frame, $4,500. San Francisco. Architect, none. Owners, Conservative Building and Investment Co., Foxcroft Bldg., S. F. The house has been designed to contain eight rooms, bath and sleeping porch. All interior finish will be of pine or redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with metal lath and plaster. Plans are in the hands of the owners and the work will be done by Day Labor.

Residence—2 story and base, frame, $10,000. San Francisco. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, C. T. Patten. The dwelling will contain eight rooms, bath, sleeping porch and laundry. Interior finish will be of pine, redwood and hardwoods. There will be furnace heat and open fire places. Oak floors

wall to wall throughout except in the baths, which will have composition flooring. Mantels will be of brick. Tile will be used in the kitchens. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and bids are now being taken.

Residence—2 story and base, frame, $5,000. San Francisco. Architect, Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling will be erected on Mercedes Way, and has been designed to contain eight rooms, bath and a garage. Interior finish will be largely of pine with some oak panels. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. Tile will be used in the bath rooms and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Bungalow—1½ story and base, frame, $2,000 San Francisco. Architects, Rhodes & Mariscn, 3372 16th St. S. F. Owner, Raymond McAvene. The house will contain six rooms and bath. Interior finish will be of pine and redwood throughout. Oak floors will be used in the living and dining rooms. There will be open fire places with brick mantels. The exterior of the house will be covered with rustic and shiplap. Plans are complete and figures are being taken.

Residences—1 2 story and base, frame, $3,000 each. San Francisco. Architect, Theo. S. Bochm. Hewes Bldg., S. F. Owners, J. W. Rapple Investment Co. These houses are to be erected on a new tract being developed by the owners, and are the first of a large number of dwellings planned. Each house will contain seven rooms and bath. Interior finish will be of pine and redwood. Some oak floors will be used. There will be open fire places and tile or brick mantels. Tile will be used in the kitchens and baths. The exteriors of the houses will be covered with rustic, cement plaster on metal lath and klinker brick veneer. Plans are being prepared. The owners have not decided whether the work will be done by contract or Day Labor.

Residence—2 story and base, frame, $3,000. San Francisco Architect none. Owner, Karl Yngve, 130 Alpine St., S. F. The dwelling has been designed for a ten-room house with bath. There will be some oak floors, open fire places and tile or brick mantels. Interior finish will be of pine throughout. The exterior of the house will be covered with shiplap. Furnace heat will be installed. Plans are complete and the work will be done by Day Labor.

Stable and Warehouse — 1 story, frame, $7,000. San Francisco. Architect C. Pfleger, Crocker Bldg., S F. Owner, G. Lindauer, 124 Clara St., S. F. The building has been designed for storage purposes. There will be a cement floor. The exterior will be covered with corrugated iron. Plans are complete and in the hands of the owner, who will do the work by Day Labor.

Flats—3 story and base, frame, $4,000 San Franc. Architect, none. Owner, J. B. Pene, 1655½ Mason St., S. F. The building has been arranged for three small flats of four and five rooms each. The interiors will be housed in pine and redwood. There will be open fire places and tile mantels. Thirty-gallon boilers will be installed. The exterior of the building will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

Store Fixtures—Cost not stated. San Francisco. Architect, W. H. Crim, 425 Kearny St., S. F. Owners, Shumate Pharmacy. The Shumate Co are fitting up a new store at Union and Steiner streets and will spend a large sum in fixtures. The work will include electric work, plastering and a large amount of cabinet work. Plans have been completed and the architect is now taking figures on the job.

Stores and Offices—4 story and base, reinforced concrete, $40,000. San Francisco. Architects, Frye & Schastey, Monadnock Bldg., S. F. Owners, Hop Woe Society. The building will be erected on Stockton street near Clay, and is to cover a considerable ground area. The first floor will be arranged for stores and the upper floors for offices. Negotiations are now underway with a Chinese government official who may take a whole floor of the building, in which case, the interior will be elaborately finished. There will be steam heat. The exterior will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

Fire House—2 story and base, brick. Cost not stated. San Francisco. Architect, City Architectural Commission, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans have been completed and turned over to the Board of Public Works for Engine House No. 47. This building will be erected at the northwest corner of Wilde and Girard streets. The first floor is arranged for the apparatus room and stables. Living quarters for one engine company are provided for in the second floor. The exterior of the building will be faced with pressed brick. Bids will be opened on October 23rd. For proposal notice see under Sealed Proposals in this issue.

Sewers—Vitrified iron stone. Cost not stated. San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be opened on October 23rd for a 12-inch sewer with manholes, etc., which is to be constructed on Peralta avenue. Full information may be secured from the City Engineer. For proposal see under Sealed Proposals in this issue.

Street Work—Paving, grading and curbs. Cost not stated. San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be opened on October 23rd for street work as above described. Full information can be had from the City Engineer. For proposal notice see under Sealed Proposals in this issue.

OAKLAND AND ALAMEDA COUNTY.

Apartment House—4 story and base, brick and frame, $55,000. Oakland, Cal. Architect, A. Merrill Bowser, 1007 Broadway, Oakland. Owner's name withheld. The building will be erected on Broadway near Sixth street. The first floor has been subdivided into eight small stores while the upper floors are arranged for 24 three-room apartments with connecting baths and wall beds. There will be steam heat. All interior finish will be of pine. The exterior of the building will be covered with brick veneer. Plans are now being prepared.

Flats—2 story and base, frame, $4,000. Oakland, Cal. Architect, none. Owners, Inter Cities Home Builders, State Savings Bank Bldg., Oakland. Plans for this work are in the hands of the above mentioned firm and they are subletting all parts of the work. The building is arranged for two six-room flats with baths and other conveniences. Interiors will be finished in pine and redwood. Some oak floors will be used. The exterior of the building will be covered with rustic. Plans are in the hands of the owners.

Auditorium—2 story and base. Class A construction, $500,000. Oakland, Cal. Architect, Supervising Architect J. J. Donovan, Oakland. Owners, City of Oakland. Bids will be opened for the excavating and piling for the new auditorium on October 21st. The work will require a total of 2,004 piles and is to be completed in 75 days. Plans for the balance of the work will be completed by that time and bids will be called.

Bungalow—1 story and base, frame, $2,500. Berkeley, Alameda Co. Cal. Architect, none. Owner, J. A. Pinkerton, 1931 Berryman St., Berkeley. The house has been designed for a six-room dwelling. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be open fire places and tile or brick mantels in the living room. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with shingles and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

Residence—2 story and base, frame, $4,500. Berkeley, Alameda Co. Cal. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, B. C. Dickerson. Plans provide for a seven-room house with bath and sleeping porch. All interior finish will be either of pine or redwood. Oak floors will be used in the principal rooms. There will be open fire places and furnace hea[t] Living room mantels will be of room and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

Residences — 3, 2 story and base, frame, $3,500 each. Berkeley, Alameda Co., Cal. Architects, Hutchison Bros., 470 13th St., Oakland. Owner, George H. S. Haly, Union Savngs Bank Bldg., Oakland. Each of these houses will contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood. Some oak floors will be used. Furnace heat will be installed. There will be open fire places and stone mantels. One will be used in the baths and kitchens. The exteriors of the houses will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

Schools—3, 2 story and base, brick and steel, $90,000 each. Oakland, Cal. Architect, Supervising Architect, J. J. Donovan, Oakland. Owners, City of Oakland. The following is a complete list of all firms now figuring the work on the three new school buildings, bids for which will be opened on October 21st:

Washington School.

I. B. Ackerman & Son, Oakland; Van Sant-Houghton Co., San Francisco; Nils Anderson, Oakland; W. V. Murray, Alameda; H. B. Brigham, Oakland; Lindgren Co., San Francisco; Farrell & Reed, San Francisco; Roberts Bros. Co., San Francisco; Williams Bros. & Henderson, San Francisco; A. J. Mazurette, Oakland; Clinton Fireproof Co., San Francisco; W. N. Concannon, San Francisco.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

Church—1 story and base, frame, $10,000. Bay Point, Contra Costa Co., Cal. Architect, Francis N. Reid, Concord. Owners, Catholic Church of Bay Point. The building is to be designed in the Mission style with an exterior covered with cement plaster on metal lath. A clay tile roof will be used. Main auditorium will have a seating capacity of 450 people. Interior will be fuished in pine and oruamental plaster. Plans are nearly complete and figures will be called for shortly.

Bridge—Concrete and wood. Cost not stated. Chico, Butte Co., Cal. Engineer, City Engineer Martin C. Polk, Chico. Owners, City of Chico. Plans and specifications have been approved for repairs to the bridge over the Little Chico Creek at Ninth avenue and Orange street. The work will include the removal of the three present piers and widening the bridge some thirty feet. Blds will be called for at once.

Bridge—Steel truss and reinforced concrete piers, $1,600,000. Suisun Channel, Cal. Engineer, Consulting Engineer, Col. W. H. Heuer, Pacific Bldg., S. F. Owners, Oakland, Antiock and Eastern R. R. Co., S. F. Unofficial advise from Washington to the Oakland, Antioch and Eastern states that the War Department has acted favorably in the matter of granting permission to construct this structure. It will be a matter of eight or ten days before official confirmation is received. Mr. Arnstein, who is handling the matter for the railroad, states that the company has had one one estimate on the cost of construction from an eastern firm and places the cost of the work at $1,600,000. The bridge will span a channel 3,090 feet wide, and is to be equipped with a lift 200 feet wide lifting 100 feet high. Piers will be of reinforced concrete. Construction will be undertaken on receipt of official confirmation from the War Department.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

Apartment House—1 story and base, brick and steel, $100,000. Stockton, San Joaquin Co., Cal. Architect, Glenn Allen 1396 Golden Gate Ave., S. F. Owners, Home Builders' Investment and Security Co., 28 North San Joaquin St., Stockton. This work has been mentioned here before when plans, prepared by the owners, were out for figures. These drawing are being entirely revised and new figures will be called. The structure covers a large area and will contain in the neighborhood of 100 apartments of the two and three room type. A steam heating plant, vacuum cleaning, elevators and all other modern features will be installed. The exterior will be faced with pressed brick.

Bridge—Steel and concrete, $25,000. Dyerville, Humboldt Co., Cal. Engineer, County Surveyor Conners, Eureka. Owners, Humboldt Co. A site near Dyedville has been selected for the new bridge which is to span the Eel River on the line of the new State Highway. Plans will be prepared for this work at once. The structure will be of steel and concrete. Two other new highway bridges are to be erected in Humboldt County as soon as sites can be selected.

Hotel—6 story and base, steel and brick, $250,000. Sacramento, Cal. Architects, Cuff & Diggs, Sacramento Owners, Travelers' Hotel Co. It is reported on excellent authority that the Marsh Investment Co., owners of the new Travelers' Hotel, will sign a contract for the construction of this building with the Ransome Concrete Co. of Sacramento. Some slight changes may be made in the original plans but no new figures will be taken.

Stores and Offices—2 story and base brick, $10,000. Lincoln, Placer Co., Cal Architect, Allen D. Fellows, Ros. Auburn. Owners, Williamson and Ingram, Lincoln. The building will occupy a site on the principal business corner in Lincoln, and has been arranged for stores on the first floor and a number of modern offices on the second floor. Interior finish will be of pine and redwood. There will be large plate glass store front. Roof will be of metal tile. The exterior of the building will be faced with pressed brick. Plans are now being prepared. Work will probably be done by Day Labor.

School—2 story and base, brick and steel, $150,000. Lodi, San Joaquin Co., Cal. Architects, Stone & Wright, Stockton, Cal. Owners, Lodi Union High School District. This building has been mentioned here before when the architects were first commissioned to prepare the plans. The structure will contain a number of class rooms, domestic science and manual training departments. When complete the structure will be one of the most modern high school buildings erected in the state. There will be fireproof halls and stairways. The mechanical equipment will include steam heat and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are complete and bids are now being taken.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Bank—2 story and base, reinforced concrete, $15,000. Greenville, Plumas Co., Cal. Architect, J. B. Ogborn, Richmond, Cal Owners, Indian Valley Bank. This building will be arranged with banking rooms on the first floor and a lodge hall on the second floor. The interior of the banking rooms will be finished in hardwoods, marble and tile. There will be concrete vaults and other special features. A lease has been made with the Masonic Lodge for the second floor, which will be fitted up to meet their special requirements. A central heating system will be installed. The design is in the classic style and the exterior will be faced with cement plaster. Plans are complete and figures are being taken.

Hotel—3 and 4 stories and base, reinforced concrete. Cost not stated. Ocean Park, Los Angeles Co., Cal. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owner, G. M. Jones. The building will cover an area of 50x150 feet. The front portion of the building will be four stories high and the rear three. Stores and the hotel office will occupy the first floor. About two guest rooms are provided for on the upper floors. There will be steam heat and elevator service. A large dance pavilion will also be provided for. The exterior will be faced with cement plaster. Plans are now being prepared.

Armory—2 story and base, concrete and steel, $30,000. Los Angeles, Cal. Architect, State Architect Woodcutt, Secretary Owners, State of California. Notice has been sent out by the State Department of Engineering to the effect that bids will not be opened but that work on October 21st as at first advertised. An extension of time has been granted and bids will now be opened on November 21st. Plans are being sent to contractors on application.

Hotel—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owners, Bryan and Bradford. The building will be 60x113 feet. The first floor will be arranged for stores and the upper floors will contain a total of 60 guest rooms and 20 baths. There will be steam heat. Hot and cold running water has been provided for all rooms. The exterior of the building will be faced with pressed brick. Plans are complete and figures have been taken. A contract will be awarded within a day or two, now being prepared.

Residence—2 story and base, brick and frame. Cost not stated. Los Angeles, Cal. Architects, Withey & Davis, Story Bldg., L. A. Owner, Malcolm Naughton. The dwelling will contain 12 rooms, several baths, sleeping porches and a laundry. A garage will also be erected on the same lot. The interior of the house will be finished in pine, cedar and redwood. Oak floors will be used in all principal rooms. Baths will be finished in tile with composition floors. There will be furnace heat and an automatic water heater. A vacuum cleaning system will be installed. There will be open fire places and stone, tile and brick mantels. The exterior of the house will be covered with cement plaster. Plans are being prepared.

Library—2 story and base, brick, $30,000. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, City of Los Angeles. The building will be erected at the corner of Pasadena and Piedmont avenues. Design is in the classic style with the exterior faced with pressed brick. There will be two public rooms, stack rooms and offices for the librarian. A central heating system will be installed. The interior will be finished in pine and oak with hardwood floors. Plans are now being prepared.

School—2 buildings, 3 story, brick and concrete, $70,000. South Pasadena, Los Angeles Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, South Pasadena High School District. These two buildings will be in addition to the building already under construction. Each of the structures will cover a ground area of 65x100 feet. One building will be used for domestic science and the other for manual training. Each will have steam heat. The exteriors will be faced with Redondo brick. Plans are now being prepared.

Apartment House—3 story and base, brick. Cost not stated. San Pedro, Los Angeles Co., Cal. Architect, Alfred F. Priest, Fay Bldg., L. A. Owner, A. J. Warner. The building will be 50x110 feet. The first floor will be arranged for offices and the upper floors subdivided into 45 rooms. Suites will consist of two and three rooms each with bath. There will be steam heat. Wall beds will be used in all apartments. The exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

Apartment House—3 story and base, frame. Cost not stated. Santa Monica, Los Angeles Co., Cal. Architect, Frank T. Kegley, Consolidated Realty Bldg., L. A. Owner, S. K. Nole. The building will be 50x90 feet and will contain 44 rooms, which are to be arranged in suites of two and three rooms each. There will be private baths and wall beds. Steam heat will be installed. Bath rooms will have composition floors. The exterior of the building will be covered with cement plaster on metal lath. Revised plans have been completed and figures are being taken.

Bank—2 story and base, brick. Cost not stated. Glendale, Los Angeles Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, First National Bank of Glendale. The building will cover an area of 26x100 feet. The banking institution will occupy the entire first floor. A number of modern offices are to be provided for in the second story. Interior finish of the banking rooms will be of hardwoods, marble and bronze. There will be fireproof vaults. A central heating system will be installed. The exterior of the building will be faced with glazed brick. Plans are being prepared.

Bridge—Reinforced concrete, $17,000. Old Town, San Diego Co., Cal. Engineer, City Engineer Rumsey, San Diego. Owners, City of San Diego. Plans and specifications for the construction of a reinforced concrete bridge over the San Diego River at Old Town are complete and have been approved. Bids will be called for within a few days. Complete information can be secured from the City Engineer.

Laundry Plant—Reinforced concrete construction, $100,000. Los Angeles, Cal. Architect's name not given. Owners, Excelsior Laundry, L. A. Permission has just been granted this company to construct a large plant at the corner of Wall and Pico streets. The owners have not as yet announced their selection of an architect, and no de-

tails of the work are available at this time. Complete information will be given as soon as an architect is selected.

Garage—2 story and base, brick and concrete. Cost not stated. Long Beach, Los Angeles Co., Cal. Architects, Austin & Lochridge, 18 Locust Ave., Long Beach. Owner, Mr. Walker. The building has been designed for a commercial garage and will be fire proof throughout. Cement floors will be used and metal trim. The exterior of the building will be faced with cement plaster. Plans are complete and the architects are taking figures on the work.

Garage—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. R. Kelly, Story Bldg., L. A. Owner's name withheld. The building will be 145x75 feet and has been designed for a commercial garage. Cement floor will be used. There will be metal window frames and sash. A gasoline storage system will be installed. The exterior of the building will be faced with tapestry brick. Plans are nearly complete and figures will be called for at once.

Hospital—1 story and base, hollow tile construction, $15,000. San Diego, Cal. Architect, W. Templeton Johnson, Coronado. Owners, Talen Workers Hospital. The first unit only of this group will be erected at this time. The building will contain two wards, 18 private rooms, operating room, four baths and attendants' quarters. The exterior will be covered with cement plaster. Working drawings are now being prepared.

Hotel—3 story and base, frame. Cost not stated. Los Angeles, Cal. Architects, Dennis & Farwell, Fay Bldg., L. A. Owner, F. P. Fay. The building will be 57x136 feet with three stores and lobby on the first floor and a total of 40 rooms on the upper floors. There will be steam heat, elevator service and hot and cold running water. The exterior will be faced with pressed brick. Work will be done by Day Labor, and the architects are now taking figures for certain parts of the work.

Hotel—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, Joseph Sresovich. The building has been arranged for stores on the first floor and a number of guest rooms on the upper floors. There will be steam heat and running hot and cold water. The interior finish will be of pine throughout. The exterior of the building will be faced with pressed brick. Plans are being prepared.

School—2 story and base, brick and steel. Cost not stated. San Diego, Cal. Architect, T. C. Kistner, American Bank Bldg., San Diego. Owners, City of San Diego. Plans for this building have been completed and have received the approval of the Board of Education. The building will contain ten class rooms, assembly hall and principal's office. Interior finish will be of pine. There will be steam heat and a modern system of ventilation. The exterior will be faced with pressed brick. Bids are now being taken and will be opened by the Board on November 11th.

School—2 story and base, reinforced concrete, $50,000. San Fernando, Los Angeles Co., Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, San Fernando Union High School District. Competitive plans for this work have just been selected. Ten plans were submitted in competition. None of the details of construction are obtainable at this time. Working drawings are being prepared, and as soon as plans have progressed far enough a detailed description will be published.

Laying Pipes for Supply System—Cost not stated. Inglewood, Los Angeles Co., Cal. Engineer, City Engineer, Inglewood. Owners, City of Inglewood. Bids for furnishing and laying pipe for the Grevillea Avenue Park system will be received up to and including the 21st day of October. For full particulars apply to the City Engineer.

Reservoirs and Pipe Lines—Cost not stated. Yucaipa, San Bernardino Co., Cal. Engineer, F. C. Finkle, I. W. Hellman Bldg., L. A. Owner, Redlands and Yucaipa Land Co. Plans are being prepared for two concrete reservoirs and twenty miles of pipe line. This work will be erected in the Yucaipa Valley. Plans will be completed shortly and bids will be called.

Pipe, Etc.—Cost not stated. San Diego, Cal. Engineer, City Engineer, San Diego. Owners, City of San Diego. Superintendent Fay, of the Water Department, states that plans have been completed for the following work to be done under the recent bond issue: 1400 feet of 36-inch pipe on Oregon street; 2,580 feet of 36-inch pipe on University avenue; 4,390 feet of 30-inch pipe on University avenue, 980 feet of 30-inch pipe on Polk avenue; 8,090 feet of 30-inch pipe on Thirtieth street; 4,150 feet of 24-inch pipe on Thirtieth street; 2,930 feet of 16-inch pipe on B street; 360 feet of 16-inch pipe on Twenty-fifth street; 2,640 feet of 16-inch pipe on El Cajon avenue; 3,720 feet of 16-inch pipe on El Cajon avenue; 16,000 feet of 12-inch pipe in Old Town from Lower Point Loma reservoir to Stephens and Lewis streets, 11,000 feet of 10-inch pipe on Grand avenue, 2,000 feet of 8-inch pipe on to La Jolly reservoir; 2,650 feet of 12-inch pipe on University boulevard. The work will be started as soon as the validity of the bond issue is determined.

Stores and Lofts—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, Gernard Eshman. The building will be 42x85 feet. The first floor will contain stores. Upper floors will be divided into small lofts for light manufacturing purposes. There will be steam heat and elevator service. Metal window frames and sash will be used. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken by the architects.

Contracts Awarded.

Apartment House—4 story and base, brick and steel, $55,000. Los Angeles, Cal. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owner, W. A. Barker. Contractor, Charles G. Ross, Grosse Bldg., L. A. Contract price, $55,000.

Residence—[illegible] story and brick, $15,000. Los Angeles, Cal. Architects, Hunt & Eyre, Laughlin Bldg., L. A. Owner, Lee Phillips. Contractor, Jean L. Conner, 435 West 21st St., L. A. Note: This work has been taken on the percentage basis.

Apartment House—3 story and base, frame, $30,500. Los Angeles, Cal. Architect, none. Owner, S. Barton Brown. Contractors, Main Building and Investment Co., Thorpe Bldg., L. A. Contract price, $30,500.

Stores and Lofts—6 story and base, reinforced concrete, $63,500. Los Angeles, Cal. Architects, William Curlett & Son, Phelan Bldg., S. F., and Title Ins. Bldg., L. A. Owner, Frank P. Flint. Contractor, Carl Leonardt, H. W. Hellman Bldg., L. A. Contract price, $63,500.

Church—Steel and brick construction, $80,000. San Diego, Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, First Baptist Church of San Diego. Contractors, Simpson Construction Co., San Diego, general construction, $71,450. Heating and ventilating, Hazard-Gould Co., San Diego, $1,989. Art glass and furniture will be under separate contracts.

Bank Additions and Alterations—1 story, brick, $15,000. San Dimas, Los Angeles Co., Cal. Architect's name not given. Owners, Bank of San Dimas. Contractor, George Ford, San Dimas. Contract price, $15,000.

Bridge—Reinforced concrete, $18,000. Santa Ana, Orange Co., Cal. Engineer, City Engineer, Santa Ana. Owners, City of Santa Ana. Contractors, Young Construction Co., Hibernian Bldg., L. A. This contract has been taken on the basis of cost plus 15 per cent.

Wharf—Concrete and wood, $60,994. Wilmington, Los Angeles Co., Cal. Engineer, City Engineer, Wilmington. Owners, Town of Wilmington. Contractors, Russell-Green-Foell Co., Higgins Bldg., L. A. Contract price, $60,-994.25.

Warehouse—3 story and base, reinforced concrete, $13,000. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Abbott Hardware Co. Contractors, J. F. Hall-Martin Co., Stimson Bldg., L. A. Contract price, $13,000.

Lodge Hall—2 story and base, brick, $75,000. El Centro, Imperial Co., Cal. Architect's name not given. Owners, El Centro Masonic Temple Association. Contractor, W. E. Johnson, El Centro. Contract price, $24,925.

Post Office—2 story and base, brick and steel, $105,015. Santa Barbara, Santa Barbara Co., Cal. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Contractor, Eugene Schuler, Wahpeton, North Dakota. Contract price, $105,015.

Theatre—1 story and base, brick, $13,127. Los Angeles, Cal. Architect, none. Owner, D. S. Kornblum. Contractors, Milwaukee Building Co., Wright and Callender Bldg., L. A. Contract price, $13,127.

PORTLAND AND OREGON.

Hotel—4 story and base frame, $75,-000 Portland Ore. Architects, Johnson & Meyer Selling Bldg., Portland Owner, W. R. McGarry. The main part of the building will be four stories high and 150 feet long with a 60-foot wing on each end. It will contain about 100 rooms for guests and will be finished throughout in fine taste. A wide porch with balconies will extend across

the entire front of the building. It is to be heated by steam or hot water will have hot and cold water in each room and is to be lighted by electricity. Garages, stores and several buildings are also to be erected. Plans are being prepared.

Hotel—4 story and base, reinforced concrete, $80,000. Portland, Ore. Architect, John G. Wilson, Portland. Owner, Cecil Seengstake. The building is the first of several large improvements which will shortly be undertaken on lower Seventh street in expectation of the early completion of the Broadway bridge. The structure will cover an area of 100x50 feet and is to contain several stores besides the hotel lobby on the first floor. The upper floors have been arranged for a total of 81 rooms and 24 baths. Lobby will be finished in marble and tile. There will be steam heat, elevator service and running hot and cold water. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Terminal Station—1 story brick. Cost not stated. Eugene, Ore. Architects, Doyle, Patterson & Beam, Portland. Owners, Oregon Electric Railroad. The building will be 170 feet in length, and will contain two waiting rooms, baggage express office and offices of the company. There will be a central heating system provided, steam. Interior finish will be of pine. The exterior of the building will be faced with pressed brick. Plans are complete and were out for figures on October 15th.

Theatre—8 story and base steel and reinforced concrete, $300,000. Portland, Ore. Architect, B. Marcus Priteca, Empire Bldg., Seattle. Owner, Alexander Pantages. The building is to be erected at the corner of 3rd avenue and University street, and will cover an area of 60x120 feet. The main auditorium and balconies will occupy the greater portion of the first four stories. A large number of modern offices will occupy the remainder of the building. Construction will be fireproof throughout. A large amount of metal trim will be used. All modern mechanical equipment will be installed. The exterior will be faced with pressed brick and terra cotta. Plans are being prepared and work will be started before the end of the year.

Contracts Awarded.

Armory—1 story and base, reinforced concrete and brick, $70,000. Portland, Ore. Architect, State Architect, Portland. Owners, State of Oregon. Contractor, Charles H. Veatch, Portland. Contract price, $79,760.

Stores and Lofts—3 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architects, Bragaw & Wesner, Portland, Ore. George W. Bates, Contractors, Hyde-Mason Co., Portland. Contract price not stated.

SEATTLE AND WASHINGTON.

Residence—2 story and base, brick, $10,000. Seattle, Wash. Architects, Robb & Mercer, Lecha Bldg., Seattle. Owner, S. S. Loeb. Only preliminary plans have been prepared and details of the dwelling are not certain at this time. Sketches show a building containing about 16 rooms, sleeping baths and other features. The exterior will be handsomely treated in hardwoods. All modern conveniences will be installed. The exterior will be faced with pressed brick. Details will given as the plans progress.

Garage—1 story and base, mill construction, $7,000. Seattle, Wash. Architect, V. W. Voorhees, Eitel Bldg., Seattle. Owner, L. W. Roe. The building will be erected at the corner of Union and 12th streets, and is to cover an area of 75x132. Plans provide for a 14 foot ascend and an 18-foot descent. Cement floor will be used over the entire area. Window frames and sash will be of metal. The exterior of the building will be faced with pressed brick. A central gasoline storage system will be installed. Plans are nearly complete and will go out for figures within a few days.

Contracts Awarded.

Lodge Hall—2 story and base, brick and stone, Seattle, Wash. Architect, F. W. Boone, New York Bldg., Seattle. Owner, Knights of Columbus. Contractor, T. H. Ryan, 618 3rd Ave., Seattle. Contract price, $60,000.

Lodge Hall—3 story and base, brick and steel, $60,000. Seattle, Wash. Architect, F. W. Boone, New York Bldg., Seattle. Owner, Knights of Columbus. Contractor, T. M. Ryan, 618 3rd Ave., Seattle.

TO OFFER HARBOR BONDS FOR SALE.

SACRAMENTO, Oct. 5.—Regarding the proposed sale of the $23,600,000 bonds of State highway and State harbor improvement bonds in one concern, it was announced yesterday at the Capitol by State Treasurer E. D. Robert that he will advertise for this proposed sale about the first of next month. This will be the first step toward the State's selling all the unsold bonds at one time and to one concern at par with accrued interest.

The bonds are divided into $16,000,000 for the State highways, out of the original $18,000,000 and $7,250,000 for other improvements out of the original $9,000,000.

This sale will establish a bond disposal record for the State. It will be the largest amount ever sold in one lump in California, and it is thought that the total is the largest in the West.

The proposal has been submitted to Governor Johnson, to the Department of Engineering, the State Advisory Board of the Department of Engineering, and the State Harbor Commission, and when permission is granted the sale of the bonds will be consummated. The Harbor Commission is willing, and it is thought that the Department of Engineering and the Highway Commission will also concur.

RAILROAD COMMISSION SETS DATE FOR EXPRESS HEARING.

The State Railroad Commission has set October 21st as the date for the beginning of an investigation into the rates and practices of the three express companies operating within the State. They are the Globe, American and Wells-Fargo companies, and the Commission has already completed a compilation of rates now in effect that, it is claimed, will show the express companies to an unfavorable light. The alleged incongruity of tariffs and alleged violations of the long and short haul laws are two features of this comparison, it is claimed, that will be revealed.

Only a short time ago the Interstate Commerce Commission slashed the interstate express rates and this decision alone, it was claimed at the time, meant a saving of nearly half a million dollars to local shippers annually. The Commission will sit en banc at the hearing.

ELECTRIC RAILWAY CONVENTION FOR SAN FRANCISCO.

CHICAGO, October 7.—The American Electric Railway Association, whose officers visited San Francisco last May, is holding its annual convention in Chicago this week, where a great exhibition of railway material, appliances and equipment is shown in connection with the association's campaign of education. The convention is held in the huge building known as the International Amphitheatre, adjoining the Union Stock Yards. Five thousand persons have registered attendance.

The association has been asked to select San Francisco for its convention city in 1915.

FIRST TRAIN OVER TIDEWATER AND SOUTHERN.

STOCKTON, October 8.—The first train to pass over the tracks of the Tidewater and Southern Railroad left Stockton Monday shortly after 1 o'clock amid the waving of flags, the tooting of steam whistles and ringing of bells.

More than a hundred well-known Stocktonians boarded the train. The train followed the Western Pacific tracks until those of the Tidewater and Southern were reached, when the switch was made and the train proceeded to Modesto over the maiden rails.

ALASKA GOLD DECREASING.

WASHINGTON, October 7.—A report of the Geological survey on Alaska gold mining says that the estimated value of the combined production of the Forty Mile and Seventy Mile districts for 1911 was $212,000, an increase of $12,000 over the output of 1910, due to success of two dredgers on the headwaters of Forty Mile river.

The value of the gold production of the Fairbanks district in 1911 is estimated to be approximately $4,500,000, a decrease of $1,600,000 from the output for 1910, due mainly to the fact that most of the bonanzas have been worked out. The Circle precinct in 1911 produced gold with an estimated value of $350,000, which exceeds that of any other year since 1898.

NEW EXPERIMENT FARM.

CHICO, October 5.—Another demonstration farm is to be established in Glenn county, about twenty miles from this locality. The Government will establish a potato experiment farm in Chico, in the Willows section. This farm will be of twenty acres, and the land, and water which is to irrigate the land, has been donated to the Government by the Kuhn Syndicate, locally known as the Sacramento Valley Irrigation Company, which has one of the largest irrigation projects in the West in Glenn county.

CONSTRUCTION WORK CEASES AT BIG BEND.

OROVILLE (Butte Co.), October 11. Construction operations at the Big Bend power plant of the Great Western Power Company, to which an addition of two units is being made, ceased Wednesday. It is believed that the cessation of operations is only for the Winter.

About fifty machinists, carpenters, concrete men and laborers were affected.

BOND ISSUE FOR SUISUN.

SUISUN (Solano Co.), October 11.—The Town Trustees have decided to call a special election to vote upon the proposition to issue bonds to raise money to build about two miles of pipe line for the municipal water system to replace the old pipe which has outlived its usefulness, and City Attorney C. J. Goodell was instructed to prepare the preliminary papers for calling the election.

Owing to the lack of sufficient rainfall last Winter, the supply of water in the system gave out over three months ago and the consumers have been supplied with water for domestic purposes during the Summer by means of tank wagons furnished by the town, while water for the sewer system has been pumped into the mains from the tide water in the adjacent slough, an arm of Sunsun Bay leading directly to the town limits.

RUSH WORK FOR FERNLEY-LASSEN LINE.

Orders have been issued from the office of Vice-President E. E. Calvin, in charge of operation and construction of the Southern Pacific, for the rushing to completion of that portion of the new Fernley-Lassen branch from Lassen to Fall River Mills, a distance of 182 miles. The estimated cost of construction of the entire line is $5,000,000. The line will have a branch twelve miles long to the timber holding of T. B. Walker, the Minneapolis lumber king, all of which is in Northeastern California. The new road is one of a series of projects by which the railroad hopes to intrench itself against the encroachments of the Western Pacific.

LARGEST PAYROLL IN HISTORY OF SPARKS.

SPARKS (Nev.), October 11. On the fifteenth of this month, the monthly pay day for Sparks, it is estimated that the disbursement by the Southern Pacific will be about $110,000. This is the largest pay roll for the town since the shops were constructed. Sparks is rapidly increasing in population.

DAMAGES UNDER NEW LIABILITY LAW.

MODESTO, Oct. 10.—Theodore Williams was awarded damages of $6000 by a jury in his suit for $29,000 against the Southern Pacific Company for damages under the terms of the new employers' liability and compensation act. The son of the plaintiff, Glen Williams, was killed by a train about a year ago.

WORK IS STARTED ON NEW SCHOOL BUILDING.

BUTTE CITY (Glenn Co.,) October 10.—Work has been commenced by Contractor W. R. Zumwalt on the new school building at this place. The old building will first be moved. The new one, of modern type, will occupy the site.

INCREASE OF STATE WEALTH.

SACRAMENTO, October 10.—The grand total of the assessed valuation of property in the State of California for 1912 is $2,920,400,512, according to a tabulated report by counties sent by State Controller Nye to the printer today. The increase of $320,483,822 over the valuation assessed throughout the State in 1911 is not considered an abnormal one by the Controller's office. It reports the development of the State during the last year.

A DISHONEST NATION CAN NOT SURVIVE.

From Henry Ward Beecher's Address on Public Dishonesty.

A corrupt public sentiment produces dishonesty. A public sentiment in which dishonesty is not disgraceful; in which bad men are respectable, are trusted, are honored, are exalted, is a curse to the young. The fever of speculation, the universal derangement of business, the growing laxness of morals is, to an alarming extent, introducing such a state of things.

If the shocking stupidity of the public mind to atrocious dishonesties is not aroused; if good men do not bestir themselves to drag the young from this foul sorcery; if the relaxed bands of honesty are not tightened and conscious tutored to a severer morality our night is at hand—our midnight not far off. Woe to the guilty people who sit down upon broken laws and wealth saved by injustice! Woe to a generation fed by the bread of fraud, whose children's inheritance shall be a perpetual memento of their father's unrighteousness; to whom dishonesty shall be made pleasant by association with the revered memories of father, brother and friend!

UNDERGROUND POWER FOR BUENOS AYRES.

In connection with the electrification of the suburban railway lines in and about the city of Buenos Ayres, a contract, which is said to be probably the largest ever placed for an electric cable installation and certainly the largest for extra high-tension cables, has recently been placed by the Central Argentine Railway, Limited, with a London telegraph works. The contract, which covers the supplying and laying of all the underground power cables that the undertaking requires, will take about eighteen months to complete and will necessitate the sending out of a number of engineers, foremen, joiners, etc., to carry out the work of laying and jointing. The principal item consists of 66,000 meters (a meter equals 3.28 feet) of one-tenth square inch paper insulated, lead covered and armored three-phase cable for a working pressure of 20,000 volts, which is to be laid directly in the ground. The laying of this cable will necessitate several hundred joints, which will be made in cast iron sleeves filled with compound under vacuum. Very stringent tests are specified for the cables, both before and after laying. In addition, tests are specified for the meters of three-core pilot cable and 28,000 meters of armored telephone cable, which will also be laid direct in the ground. The contract further includes 20,000 meters of one-square inch paper insulated and vulcanized bitumen-sheathed track cable, to be laid solid in troughing. The track cable referred to will be used for feeding the conductor rails and running rails and for connecting across breaks in the rails at level crossings, junctions, etc. Track pillars to the number of 1300 are to be supplied by the contractor, together with a large number of joint boxes and a considerable amount of telephone apparatus, etc.—London Times.

SURVEYING WITH THE AID OF WIRELESS TELEGRAPHY.

The Belgian government is engaged upon plans for the use of wireless telegraphy in mapping colonial regions, especially Belgian Congo. It is well known that a very exact result can thus be obtained for the difference in longitude between any two points as shown by the difference in their respective times. Previous experiments prove that this latter is readily shown by sending wireless signals between the two points. The method is likely to prove a valuable one in colonial regions where there are no telegraph lines, as portable wireless posts can be set up with little trouble. In Belgium it is thought that a map of the Congo which would taken ten years to draw up can now be made in two years.—Scientific American.

THE GREAT CLAY INDUSTRY.

The total value of all clay products marketed in 1911, according to Jefferson Middleton, in an advance chapter from "Mineral Resources" for that year, entitled "Statistics of the Clay-working Industries," just published by the United States Geological Survey, was $162,236,181, a decrease of $7,879,793 from the value of such products for 1910, when it was $170,115,974.

Of the two great divisions of the industry, brick and tile and pottery, the pottery trade showed an increase. The decrease in the brick and tile industry was $8,613,675; the increase in the pottery industry was $733,882.

In the brick and tile industry there were decreases in both quantity and value of common brick, in the number of vitrified paving brick, in the value of fancy or ornamental brick, in the quantity and value of fire brick, and in the value of draintile and of architectural terra cotta. There were, however, increases in the value of vitrified paving brick, in the quantity and value of front brick, in the value of enameled brick, stove lining, sewer pipe, fireproofing, and the miscellaneous items.

The decrease in the output of common brick may be partly accounted for by the increased use of hollow block or tile for the construction of large

buildings and cost of erection. The form of construction, offers many advantages among which is the economy in construction. The cost per [illegible] with which the material can be put in the walls, and the [illegible] it is believed that these will not be subjected to fire [illegible] common brick in the [illegible] probable that the use of [illegible] brick will largely increase.

The value of the [illegible] constantly for 10 years up to 1910 has shown a large increase, being 100 per cent. [illegible] of the value of all the products in 1902. The decrease in the value of the [illegible] is due largely to the [illegible] deposits.

The value of the clay products of this class produced in 1911 [illegible] with $32,-000,000. Pennsylvania was [illegible] with $26,700,000, New Jersey [illegible] $18,178,[illegible], Illinois [illegible] $4,[illegible], and New York [illegible] $[illegible]. No other State [illegible] $2,000,000. [illegible] and New Jersey [illegible] value of output over 1910, the increase [illegible] being $1,685,777 and in New Jersey $213,919.

The value of the [illegible] of clay products in 1911 amounted to $10,804,-449, a decrease of $543,[illegible] from the value in 1910. Of these products pottery formed the greater part in 1911, having a value of $10,638,616, the remainder being divided among brick, fire brick, tile, etc. The pottery imports decreased $[illegible] and the brick imports $2[illegible] from the amount for 1910.

The exports of domestic clay products [illegible] a $3,665,720, an increase of $1,[illegible]15. Brick and tile exports [illegible]ned $683,141 and pottery exports $359,677.

CHICO GETS PERCENT OF RAILWAY EARNINGS.

CHICO (Butte Co.), October 10.—The Northern Electric has sent City Engineer P. J. Nottemann a check for $1,[illegible] being 2 per cent of the net earnings of the city car line for the past [illegible] year, as provided in the franchise granted to the railway company.

SUBMIT PLANS FOR CHICO BRIDGE

CHICO (Butte Co.), October 10.—At a meeting of the Trustees plans for the improvement of the bridge over Little Chico Creek at the junction of Normal and Orange Streets were submitted by City Engineer Martin C. Polk.

The plans call for removing the [illegible] which are used in the present bridge and for the widening of the [illegible] account of the heavy traffic.

GOLD REPORTS ON ALASKA.

The United States Geological Survey has just published as Bulletin 508 a report on the mining and water supply of the Fortymile, Seventymile, Circle, and Fairbanks districts, Alaska, by E. A. Porter and C. E. Ellsworth. The estimated value of the combined gold production of the Fortymile and Seventymile districts for 1911 was $212,000, an increase of $[illegible]000 over the output for 1910 due to the success of two dredges on the headwaters of Fortymile River. The value of the gold production of the Fairbanks district in 1911 is estimated to be approximately $4,500,000, a decrease of $1,000,000 from the output for 1910, due mainly to the fact that most of the bonanzas of the camp have been worked out and the major part of the mining was confined to deposits of relatively low grade. The Circle precinct in 1911 produced gold with an estimated value of $350,000, which exceeds that of any other year since 1[illegible]. The increase was due entirely

LINE TO BE BUILT TO COOS BAY.

EUREKA, Oct. 9. That the Northwestern Pacific railroad, now rapidly being completed between this city and San Francisco, will be extended without delay to Coos Bay, and thence to Portland, became evident Tuesday when deeds were placed on record transferring all rights of way in Humboldt county north from this city from the Southern Pacific Railroad company to the Willamette Pacific Railroad Company, recently organized. The latter company is a branch of the Southern Pacific, as shown by the fact that E. O. McCormick, E. E. Calvin and other high officials of the Southern Pacific are likewise officials of the Willamette Pacific company.

Editorial Comment.

Building totals throughout the country generally fell off during the month of September. Reports from forty-five cities representing the chief building centers of the country made to the American Contractor, Chicago, show a decrease in the aggregate of 7 per cent over the same month last year. Among the cities that showed a loss were New York and Chicago, St. Louis and Milwaukee. The Pacific Coast cities generally held their own. No report was recorded from Los Angeles, but inasmuch as that city has increased its corporate area materially the showing of permits issued naturally register an increase. Details are shown in the following table:

City.	September, 1912. Cost.	September, 1911. Cost.
Akron	$ 335,650	$ 261,995
Atlanta	568,587	487,087

Nancy Works, Junior Senator from California, is much concerned because the Taft Republicans will not have a chance to vote in California.

The Call is now his exponent and mouthpiece. Inasmuch as the Call has been searching over everything to find objections against the Johnson administration because Works was elected Senator instead of Spalding, if is rather a funny coincidence that they should at last agree.

Works has been a distinct disappointment to all his constituents. Elected as a Progressive about all he has done has been to espouse the cause of the Christan Scientists. Instead of being a representative of his state he has only been a representative of a semi religious sect and has been about as effective as an old woman.

The crank, or crazy dutchman, that attempted to assassinate Roosevelt is about as sensible as the high-browed newspapers of the East who insult the intelligence of the groundlings by their howls of Caesarism and the third term.

Life, for instance, in a recent editorial eulogized the action of the Chicago convention in crushing the aspirations of the third termers. Of all nonsensical claims of the reactionaries this seems the least sensible. Roosevelt served out the unexpired term of President McKinley. He was then elected by a very large majority and served another term. The present machinery of government is in the hands of people that are unalterably opposed to him and his policies. He comes before the people as a person who has the only advantage of having been in the public eye, which at the same time that it advertises him, emphasizes his mistakes and magnifies his personal peculiarities. What objection could there be to a third term under those circumstances.? No political machine has been built up and he is coming before the people wholly on his merits. If the people are fit to rule at all they are certainly fit to choose those who are to administer their government.

Roosevelt was President while he was President and he was the responsible man at the helm. There was no power behind the throne dictating as to what he should do in a given case. If there was any shaping a course for future favor he shaped it himself and the other party to the contract was the people themselves and no moneyed interest.

A great part of the people believe that he is the man to lead in the crusade for popular rights and the humanities. The opposition that has consolidated against him confirm the people in this belief. With all his shortcomings he is an honest, able and a fighting man whose heart is in

the right place and his sympathies are with the people. He possesses a marvelous power of marshaling his forces for attack in accomplishing reforms, he is quick to see a situation and take advantage of circumstances.

Whatever objection people may have to Roosevelt personally there is certainly no real objection on account of the third term. It is simply sound and fury signifying nothing. Roosevelt may be assassinated or die or anything may happen to him, but the progressive cause will still go on. The time has come when human rights are as sacred as property rights and it is as much the duty of the government to conserve its citizens as to protect its property.

Progress is reported on the Exposition work. The fence is practically completed, the contract for the Service Building has been let and plans are well under way for several of the other buildings. Sites have been selected for many of the state buildings and the filling in of the flats is in progress. From now on we may expect substantial progress reported each month and something doing on exposition work and in the Civic Center.

Practical schools and vocational training is now occupying the attention of educators. The struggle for existence as civilization advances and industrial organization becomes more complex is daily becoming more intense. The one that stops to tie his shoe is lost in the race and he who is not equipped for his work by special training is under a great handicap.

Practical instruction can now be had in almost any calling. There are Engineering Schools, Mechanical Schools, Architectural Schools, Automobile Schools, Aviation Schools and schools for every occupation under the sun. The elementary schools have their manual training and domestic science departments. Sewing and cooking as well as the manual arts are taught in a rudimentary sort of way and some elementary training is obtained in the occupations that are part of the home life. But there is a great tendency to fads in education. At the county fair in Fresno there was a school in operation which taught children practical work in all the ordinary occupations of life. There was not a book or a desk and the work was conducted in the open air. The exhibit attracted a wide attention and comment was made upon the practical training that the children received. With this emphasis upon new things there is always a great tendency to criticise the old methods of education. As a result less emphasis is put upon the elementary subjects of the ordinary schools. The children of the cities are not so well trained in arithmetic and spelling and the fundamentals of English as are the children that live in the country. Whatever may be said about the impracticability of book learning it still remains true that any one to get along must have some knowledge of these fundamentals and a certain amount of didactic education is a necessary prerequisite of all vocational training.

These three reasons for the necessity of a new party have been advanced by three men now before the public—Theodore Roosevelt, Senator Beveridge and Governor Wilson.

Col. Roosevelt:

"It seems to me that the time is ripe, and overripe, for a genuine Progressive movement, nation wide and justice loving, sprung from the responsible to the people themselves, and sundered by a great gulf from both of the old party organizations, while representing all that is best in the hopes, beliefs and aspirations of the plain people who make up the majority of the rank and file of both the old parties.

"The first essential thing in the Progressive programme is the right of the people to rule."

Senator Beveridge:

"The roots of the wrongs which hurt the people is the fact that the people's government has been taken away from them. Their government must be given back to the people. And so the first purpose of the Progressive party is to make sure the rule of the people.

"The Progressive motto is 'Pass prosperity around.'

"The Democratic platform declares for free trade; but free trade is wrong and ruinous. The Republican platform permits extortion; but tariff extortion is robbery by law. The Progressive party is for honest protection; and honest protection is right and a condition of American prosperity."

Gov. Wilson:

"I used to meet men who shrugged their shoulders and said, 'What difference does it make how we vote? Nothing ever results from our votes?' I suppose you know the force that is behind the new party that has recently been formed—the so-called Progressive party. It is a force of discontent with the regular parties of the United States. It is a feeling that men have gone into blind allies and come out often enough and that they propose to find an open road for themselves."

According to the year book of the United States Department of Agriculture for 1912 the number of beef cattle on the farms of the United States have declined from fifty one and a half million in 1907 to thirty-seven and a quarter million in 1912. The statement also shows that the number is steadily decreasing at the rate of two and a half millions a year.

This is certainly a reason fo[r] the high price of cattle and [i]t [s] a good [a]spect of profit out of all the states of the Union only Florida increased its number of cattle.

All the big ranching states of the West have shown heavy declines. The days of the big cattle ranges have passed. The land is being put into cultivation and the day of the cattle king has gone.

We must, however, look somewhere for our future supply of beef. No other single article of food is as important, if we except wheat. It is the good red blood making diet that has made the American and English nations first in the modern world. It is to be noted that in the cotton growing states only there has been no decline and in one instance an increase. We must look in the future to farms and not to ranches for our supply of beef.

There is now grown and going to waste in the cotton growing states to raise and fatten enough cattle to increase the product enough to reduce the price of beef five cents a pound and still have a good margin of profit to the cattle raiser. The by products of the cotton plant itself, cotton seed meal and hulls are abundant and cheap, hulls at less than half the price of hay and meal at less than half the price of corn. This is good cattle feed and over one thousand mills are making it and are scattered over the cotton growing district from one end to the other. It is said that most of the cotton states plow under each year enough grass to feed twice the number of cattle that are now raised in the district.

Evidently the southern states offer a profitable field for investment in the cattle business. Fertilizers and modern farming methods will greatly increase the yield of cotton per acre and also the by products and attendant crops. Beef is a staple that no nation can afford to ignore. The Beef Trust has done its share in boosting prices, but there must be a sufficient supply if the population is to be fed at all at any price.

Alfred Holman, of the San Francisco Argonaut, has condescended to admit although he is astonished to find that W. J. Bryan displays at times some glimpses of intelligence and says:

"But even Mr. Bryan may sometimes wander unawares into the realm of statesmanship or into that of the saving common-sense that is its best ally."

This is the same Holman who was not in favor of the Civic Center, because he would have to witness the wrecks of humanity on the seats of the public park when he walked through the open square.

It is interesting to follow these snobs and bootlicks in their changes of opinion. Nearly all of them have called Bryan a crazy demagogue and have expressed their opinion at different times that he was an insincere anarchist seeking to stir up disorder. Now they are supporting Wilson whom Bryan nominated and for whom the majority of the Democratic party will vote for simply because Bryan nominated him. Mr. Bryan has not changed since he ran for President in 1896. Some of the people have changed since then and are honest enough and courageous enough to admit it. Those who trail in the wake of special privilege now reluctantly admit that he may wander unawares into the realm of statesmanship. Mr. Holman has said so, so it must be so.

It is announced that Gertrude Atherton is one of the three women selected whose names will be placed in San Francisco's Hall of Fame among the twenty natives of California who have reflected honor on the State.

And that one of the chief reasons for her notoriety may be properly recognized her name should be encompassed by a halo of tobacco smoke in place of the laurels of literature.—Sacramento Bee.

Field Inspection and Tests of Concrete. Result of Experience In Building Warehouses.

By G. H. Bayless.

In the spring of 1910 we were commissioned to design and superintend the construction of a warehouse 100x210 feet and four stories high in the Borough of Brooklyn New York City, for the New York Dock Company. The use of reinforced concrete was recommended and adopted, but from our own experience and being familiar with the many criticisms of this material and the considerable number of failures in its use, we were of the opinion that very careful inspection should be maintained. Consequently when the work was started in the latter part of July, the engineer who designed the building was put in charge, assisted by two inspectors, both experts in the making and placing of reinforced concrete.

The engineer assumed general charge of the work. One inspector superintended the proportioning and mixing of the concrete and the other placing it in the forms. They collaborated in the inspection of construction and wrecking forms, placing reinforcements and testing materials. There seemed to be no recognized system of testing concrete or concrete materials on the job, so a series of tests was arranged to meet, as we believed, the necessary requirements. These tests were as follows. For cement tests for fineness, constancy of volume, time of setting, initial and final, specific gravity and crushing strength, of 1:2 cement mortar; for sand tests for loam, fineness and percentage of voids; for stone tests for percentage of voids; for concrete tests for crushing strength; no tests of the steel were made on the job.

A temporary laboratory was built near the work and the necessary apparatus installed. This laboratory was intended to be such as could be built on any job, and no arrangements were made for heating it except the use of a small oil stove in extreme weather. It was 12x8 feet, built of ⅞-inch sheeting on 2x4-inch frame with felt roof, one door front, and windows one side and rear.

At first six samples for testing were taken from every car of cement, but later this number was reduced to three. For the fineness tests the usual 100-mesh and 200-mesh sieves were used. The inspector shook the sieves in his hands and judged by the eye when no appreciable quantity of cement was going through. Scales graduated to milligrams were used to determine the proportions. A near-by tinsmith made the boiler and wire rack for the consistency of volume tests and the glass plates were cut on the job from scrap window glass. The cones are 13 inches high and 3 inches in diameter, with a lid, and the rack was made to hold twelve pats at a time. The test pats were boiled for five hours or more. The Vicat needle was used to determine the time of setting. The variable temperature made the results of these tests vary so greatly as to be of little value. Le Chatelier's specific gravity apparatus was used with gasoline for making the specific gravity tests.

The test for crushing strength, not being in such general use as the other tests, requires more detailed description. It consisted in testing to failure 4-inch cubes of 1:2 cement and sand mortar. More elaborate apparatus was necessary for making these tests. For this purpose were required molds for 4-inch cubes, a damp closet large enough to hold four gang molds, pans of water in which to submerge the test specimens, and a compression testing machine. The gang molds were made of 1-inch lumber, held together by iron clamps. The measurements were not exact, but the surface areas were approximately correct within the limits of accuracy of the tests. While only two cubes were used for each test, the gang molds were made for four cubes, as the same molds were to be used for concrete tests. They were made by a carpenter on the job and the clamps were made by the company's blacksmith.

The damp closet was built into the corner of the laboratory, the sides and floor of the laboratory forming two sides and the bottom of the closet; the other side and top were of ⅞-inch tongue and groove sheeting. Two shelves were put in the closet, each large enough to hold two gang molds, and space was left below for a large pan of water. When a mold with two test specimens was placed in the closet a wet coffee sack was thrown over it, the ends of the sack dipping into the water below. A better arrangement would be to have the closet lined with felt, the lower edge of the felt dipping into the water. The simpler method was used as being one easily provided on any job.

The pans for water in which the test specimens were to be submerged were made 28x28 inches and 5 inches deep, large enough to hold thirty-six 4-inch cubes each. The same size pan was used in the damp closet. Five pans were required and they were made by one of the company's sheet metal workers.

The selection of a compression testing machine was more difficult. Most machines designed to do this kind of work are elaborate and expensive. A simple and comparatively inexpensive machine was desired and after careful investigation a hydraulic machine was acquired, consisting essentially of two horizontal plane surfaces one fixed, the other movable, between which the test specimens were crushed. The top surface is fixed, being held rigidly in place by two side posts extending upward from the base. The lower or movable surface is supported on top of a 7-inch cylinder and ram. A ball and socket packing gland are used to compensate for any inequalities in the test specimens. The pressure is applied by means of a hand pump and is measured on a gauge reading total tons on the 5-inch ram. The gauge is graduated from 0 to 60 tons, and while the rated capacity of the press is 50 tons, cubes were crushed which required as much as 60 tons pressure. As many of the newer cubes crushed at low pressure, and exact readings on the gauge that was furnished on the machine were difficult, a second gauge was attached reading up to 10 tons only. When cubes requiring a greater pressure to crush them were being tested this second gauge was shut off by a valve.

On account of the high values which were obtained at the beginning of the work, suspicion was directed towards the accuracy of the machine, but comparisons of the cubes by testing on an accurately gauged machine at the testing laboratry of Columbia University showed that the small press used on the work was correct within reasonable limits.

For each test two cubes of 1:2 cement and sand mortar were made. The sand was taken from that used on the work and washed clean. To insure uniformity a sufficient quantity for all the tests was taken at one time and stored in a bin until required. For each test a little in excess of 128 cubic inches of sand and half as much by volume of cement were used. The sand and cement were mixed dry, then sufficient water added to make a fairly wet mixture; that is, one that was readily muddied, but would not pour. The whole was then well mixed and placed in the molds and puddled with a small trowel. All the operations were done by hand. As soon as the mortar was sufficiently set to hold the markings the date and hour were marked on both cubes and the mold placed in the damp closet. At the end of twenty-four hours the mold was taken from the damp closet, the forms removed and one cube crushed. The other cube was submerged in a pan of water, wher it remained for six days, and then crushed. All specimens were tested to failure.

To prevent little inequalities of the surfaces of the cubes from seriously affecting the results, three thicknesses of blotting paper were used on top and bottom of each cube in the press. After some time it was discovered that the long sides of the gang molds were more nearly parallel than the others, and thereafter care was taken to use the sides of the cubes formed by them as the crushing faces. By this means better and more nearly uniform results were obtained.

Every scow load of sand was tested for percentage of loam. If the sand in different parts of the scow appeared to be of different quality, tests from one test were made. The test consisted of taking a quantity of sand, drying it thoroughly in an oven. A thousand grams of it was then taken in a 12-quart pail, and washed

turning on a hose giving the water as it flowed from the hose sufficient velocity to keep the mass stirred up and moving, the loom being carried off in the overflow. When the water ran clear the sand was again dried and weighed, the difference in weight giving the percentage of loam. Sand containing more than 2 per cent was rejected. Tests wer also made to determine the comparative fineness of the sand. These were only made when there appeared to the eye to be a difference in the grade. The test consisted in taking a measured quantity of sand (by weight) and screening it by hand through 20-mesh and 30-mesh sieves. These tests showed on an average about 24 per cent retained on the 20-mesh sieve, 27 per cent on the 30-mesh sieve, and the remainder passing through the 30.

Occasionally tests for percentage of voids in the sand were made as follows: A comparatively large amount of sand was measured and weighed to show the average weight per c.c. Then a quantity by weight corresponding to 500 c.c. was put into a glass graduate and the volume of water displaced measured. The average volume of voids was thus found to be about 40 per cent.

As the grade of the crushed stone varied but slightly, only occasional tests were made to determine the percentage of voids in the stone. To do this a quantity of stone was submerged in water for two hours to permit it to become thoroughly saturated. The water was then poured off and the stone exposed to the air for half an hour to permit the surface moisture to evaporate. A vessel of known cubic capacity (nearly 10,000 c.c.) was then filled with the stone and weighed. Sufficient water was added to fill all the voids and weighed taken again. The difference in weight showed the percentage of voids. As there was excess of voids around the sides of the vessel this test is only comparative and is not considered particularly important as the inspector can best judge by the appearance of the batch when the voids are properly filled. For the stone used on this work the voids measured by the above method averaged nearly 50 per cent. Measurements of concrete in place and stone on the scows indicated that the volume of stone used was about 97½ per cent by of the concrete produced.

What seems to us the most important test and the test of most practical value was that of the crushing strength of concrete itself as it was placed in the forms for the building. For these tests the same apparatus was used as for the mortar tests. The preparations of the test specimens was simpler. The gang mold for 4-inch cubes was taken into the work where concrete was being poured. The concrete was taken from the buggies as it was being poured into the forms and was immediately placed in the cube molds and puddled with a trowel. There was no excessive puddling as it was intended to approximate working conditions as nearly as practicable. One set of cubes for tests were made every day concrete was poured. From time to time co-operation was similarly carried out for testing for mortar. After 24 hours in the damp closet the forms were removed, one cube crushed and the three others submerged in a pan of water. Of these three, one was crushed at the end of seven days, one day in the damp closet and six in water; one at the end of 8 days and the other was removed from the water at the end of 8 days and laid aside to be tested later. As ha salready been said, no later. As has already been said, no temperature in the laboratory, the object being to maintain as nearly as practicable the condition of the concrete in the work, so that it sometimes happened during the winter that ice formed on the water in the pans where the test cubes were submerged. The effect of this is clearly shown in the results of the tests. A practical use of the tests of concrete was to indicate to the inspector as well as to the contractor the safe time for wrecking the forms. This time was fixed at first at seven days, but was afterwards shortened to four days during the summer and well into the fall, when the decreasing strength of the cubes tested caused the time to be again extended to seven days.

The results of these tests on the whole were so satisfactory and the information obtained was deemed of such importance that they were continued for another piece of work which was done during the summer and fall of 1911. This latter work consisted of the reconstruction of a block of six warehouses. The whole block is 200x374 feet in plan and four stories high. The buildings were of the old type, brick walls with wood interior. All the wood was removed and replaced by reinforced concrete, making the building fireproof throughout. As this work was done with greater dispatch than the first job, it was thought best to have more inspectors. Consequently a chief inspector was put in charge of the whole work, assisted by one inspector over the proportioning and mixing and one on placing concrete and one solely for making tests. This arrangement worked very satisfactorily and allowed the engineer to devote more of his time to other work.

There is nothing notable in the results of the tests for fineness, constancy of volume and specific gravity except that they show what may be expected from the ordinary inspector who is not specifically trained in making such tests, as they were made under the conditions prevailing on the ordinary job. The results of the tests for initial and final set were so varied, due, no doubt to the changing temperature, that they lack value as determining the quality of the cement.

Tests of the cubes of 1:2 cement and sand mortar were intended to show a definite relation of strength of the cement being tested to what could be expected from the concrete made from the cement. Comparisons of the results of these tests with the results of the tests of concrete were so simple and proved so satisfactory that it is believed they show with sufficient accuracy the practical rate of setting of the cement and the tests for initial and final set could be discontinued for used laboratories.

The average strength of the 173 tests of 1:2 cement and sand mortar on the 4-inch cubes was 418 pounds per square inch in 24 hours and 2,065 pounds per square inch in 7 days. On the second job, where a different brand of cement was used, 198 tests were made and the average strength was 570 pounds per square inch in 24 hours and 2,025 pounds per square inch in 7 days.

CONSTRUCTION WORK IN FOREIGN COUNTRIES.

MEXICO.

New Business Structures.

While the opportunity as present of securing any very extended business in this district in building supplies is not very encouraging the prospects for the future are brightening. There are planned for this year a couple of important structures. One is the new store building for the firm of P. Urunuela y Cia. Sucrs., one of the leading houses here, and the other is a new home for the Banco Nacional, the erection of which, however, is not so definite. Senor Juan H. Luz, at present the presidente municipal of Acapulco, is one of the leading contractors. There are no architects here.

VENEZUELA.

Proposed Paper Factory—Aerial Cable Line.

For establishing a paper factory $200,000 gold has been subscribed. It is to be erected at Maracay, a point on the Gran Ferrocarril de Venezuela between Caracas and Valencia.

Preliminary steps have been taken to arouse interest in a project to construct an aerial cable for transporting freight from the town of San Felix, on the Orinoco near the mouth of the Caroni River, into the region to the southeast. The power which can be developed from the various falls or cascades in the Caroni is to be used to operate the cableway.

(The names of the officials of the foregoing companies to be addressed may be had from the Bureau of Foreign and Domestic Commerce at Washington.)

PHILIPPINES.

Steady Railway Construction.

Railway construction in the Philippines, especially in Luzon, is proceeding in a most satisfactory manner. According to a statement of one of the chief engineers engaged in the work (Mr. Abelardo Lafuente) made in a Hongkong newspaper (South China Morning Post), 8,000 to 9,000 men are now employed on railway extension in Luzon alone, being recruited from time to time from various islands of the archipelago in a vessel chartered therefor. For the past six months 1,000 men have been working on the new line from Aringay to Baguio. At present visitors to Baguio, the "mountain capital" of the islands, proceed by train as far as Dagupan, and continue the journey by automobile. The distance from Aringay to Baguio is about 50 miles, and the grade is about 5 per cent. It is now expected that the public will be able to reach Baguio itself next year by train or trolley.

Work on the Baguio Line.

The new line to Baguio is progressing finely, even better than the of-

615 Phelan Building, San Francisco

ficials of the company thought possible under the circumstances. Over 900 men are working at the Baguio end of the new road, from where more than 4 miles of grade have been completed toward Aringay on the coast. At Aringay, working toward Baguio, is a camp of 1,200 men, which will soon be increased; at the close of the rice planting season, the Aringay camp will be increased to 4,500 laborers. About 2 miles of track have been laid from Aringay and the grade is completed for nearly 7 miles farther. For the first time in the Philippine Islands the constructors are to use hydraulic streams to cut down the dirt grade, obtaining the water from the Irosen River. Little Giant hydraulic pumps will be used and the work will be pushed. The main tunnel on this line has already been driven 165 feet into the cliff at its full height. The work is practically 65 per cent completed, and the company intends to work through the wet season.

New Outport and City.

Attention is also called to the work upon the new port now beng constructed as a "second Manila" on the eastern coast of Luzon. Four thousand men are at work on the railway, which runs through the richest part of the island. It is a tremendous coconut area, and it is believed that the United States Army transports running from the United States to the Philippines will be able to save four days in the journey by coming direct to the new port. The new city will be about six hours by express train from Manila. The railroad, it is estimated, will be about 200 miles in length. Work upon all these enterprises has been greatly hindered by lack of labor.

FRENCH AFRICA.

Sahara Railway Project.

The Matin, of Paris, states that the parties sent out by the French Government to explore the Sahara Desert and ascertain what facilities exist for the building of a railway and highways have now finished their task. The great difficulty of constructing a trans-Sahara railway is still the problem to be solved; but the reports of the surveying parties are much more satisfactory regarding this question, and it is believed now that all obstacles can be vanquished. If the Government decide to go on with the matter, the entire plans may be ready by the end of this year.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO.—Apartment house, 7 story and base, brick and steel, $65,000. Architect, Harry Skidmore, Foxcroft Bldg., S. F. Owner, W. W. Anderson, 107 Grant Ave., S. F. This work has been mentioned here before when the architect first started the working drawings. The building will contain in the neighborhood of 75 apartments, which are to be arranged in two and three room suites with connecting baths. There will be steam heat and elevator service. A vacuum cleaning system will also be installed. The exterior of the building will be faced with pressed brick and terra cotta. Plans are in the hands of the owner who is taking figures for the various parts of the work.

SANTA BARBARA, SANTA BARBARA CO, CAL.—Apartment house, 3 story and base, frame, $65,000. Architect A. B. Benton, 114 Spring St. L. A. Owners, West Coast Apartment Co. The building will have a frontage of 200 feet with a wing at each end extending back 108 feet. There will be 110 rooms, which are to be divided into 50 apartments with wall beds and connecting baths. There will be steam heat, a vacuum cleaning system and trunk elevator. Interior finish will be of pine and hardwood. The exterior will be covered with blue brick veneer and shingles. Plans have been revised and are now out for figures.

LOS ANGELES, CAL. — Apartment house, 3 story and base, brick. Cost not stated. Architects, California Real Estate and Building Co., 631 So. Spring St., L. A. Owner, Sidney A. Butler. The building has been designed to contain 77 rooms, which are to be arranged in two and three room suites with connecting baths and wall beds. Interior finish will be of pine and hardwood. There will be steam heat and a vacuum cleaning system. The exterior will be faced with pressed brick. Plans are complete and figures will be taken at once.

LOS ANGELES, CAL. Apartment house, 3 story and base, brick. Cost not stated. Architect, W. J. Sircy, I. W. Hellman Bldg., L. A. Owner, Mr. McElvain. The building will be erected on a corner and will have a street frontage of 87 feet on one street and 177 feet on the other. Plans show a total of 192 rooms, which are to be arranged in two and three room suites. All apartments will be equipped with wall beds and will have connecting baths. There will be steam heat and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL. — Apartment house, 3 story and base, brick. Cost not stated. Architect, W. J. Sircy, I. W. Hellman Bldg., L. A. Owner, C. S. Winthraul. The building will cover an area of 50x90 feet and will contain 18 rooms, which are to be divided into two room suites. There will be wall beds and connecting baths. Interior finish will be of pine and hardwood. There will be steam heat. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

LOS ANGELES, CAL. — Apartment house, 3 story and base, brick. Cost not stated. Architect, Leonard L. Jones, I. W. Hellman Bldg., L. A. Owner, Mrs. Hoffman. The building will be 50x150 feet and will contain a total of 93 rooms, which are to be arranged in suites of two and three rooms each. There will be private baths, wall beds, steam heat and a vacuum cleaning system. The interior of the building will be finished in pine with some oak floors. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

PORTLAND, ORE—Apartment house, 3 story and base, brick and steel, $100,000. Architects, Root & Hoose, Commercial Bldg., Portland, Owners' names withheld. The building will cover a site 120 feet square and is to be arranged around an open court 36x60 feet. There will be a number of large family apartments of six and seven rooms besides bachelor suites. All apartments will have sleeping porches, private baths and wall beds. There will be steam heat, elevator service and a vacuum cleaning system. The design is in the Tudor Gothic style. Plans are being prepared and will be ready for figures shortly.

VANCOUVER, B. C. — Apartment house, 6 story and base, reinforced concrete, $75,000. Architect, T. H. Bamforth, Riggs-Selmar Bldg., Vancouver. Owner's name withheld. The building will cover an area of 50x115 feet There will be in the neighborhood of 75 apartments, which are to be arranged in suites of two and three rooms each. All apartments will have wall beds and connecting baths. Plans call for steam heat, elevator service and a vacuum cleaning plant. The exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

LOS ANGELES CAL. — Apartment house, 3 story and base, frame. Cost not stated. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owner, J. S. Dodge. The building has been arranged for two and three room suites, all of which will have connecting baths and wall beds. Plans provide for steam heat and elevator service. There will be composition floors in the bath rooms. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

LOS ANGELES CAL. — Apartment house, 4 story and base, brick, $65,000. Architects Milwaukee Building Co., Wright & Callender Bldg., L. A. Owner, C. W. Chase. This work has been mentioned here before when plans were first started. Drawings are now nearly complete and work will be commenced at once under the Day Labor system. The building will contain 108 rooms which are to be arranged in suites of two and three rooms each. There will be steam heat, elevator service and a vacuum cleaning system. The exterior will be faced with pressed brick.

Contracts Awarded.

PORTLAND, ORE.—Apartment house, 3 story and base, brick and steel, $26,000. Architects, McNaughton & Raymond, Concord Bldg., Portland. Owners, Blanchard and Clemson. Contractors, brick work, Wright & Branch.; carpentry, John Almeteer; heating, Kendall Heating Co., and plumbing, I P. Arnold.

LOS ANGELES CAL. — Apartment house, 3 story and base, brick $25,000. Architect, L. S. Munson, Central Bldg., L. A. Owner, Bernard Potter. Contractor, A. L. Dutro, 617 Orange Ave., Long Beach. Contract price, $25,000.

—BANKS—

Contracts Awarded.

MADERA, MADERA CO., CAL.—Bank, 2 story and base, brick and steel, $20,000. Architects, Parker & Kenyon, 244 Kearny St., S. F. Owners, Commercial Bank of Madera. Contractors, Brady & Fisher, S. F. Contract price, $20,600.

SAN PEDRO, LOS ANGELES CO., CAL.—Bank, 2 story and base, reinforced concrete. Cost not stated. Architects, Edelman & Barnett, Blanchard Bldg., L. A. Owners, State Bank of San Pedro. Contractor, Earle Remington, 110 East Ninth St., L. A., vault doors and vault work. Contract price, $10,000.

BATH HOUSE.

Contracts Awarded.

SAN JOSE SANTA CLARA CO., CAL.—Bath house, 2 story and base, reinforced concrete, $65,000. Architect, William Binder, Rea Bldg., San Jose. Owners, City of San Jose. Contractor, general construction, Z. O. Feild San Jose. Contract price, $64,989. Mechanical equipment, Garden City Sheet Metal Works, San Jose. Contract price, $8,495. For a complete list of bids see under San Jose and the Santa Clara Valley in this issue.

BRIDGES, DAMS AND HARBOR WORK.

TRANCAS CREEK, NAPA CO., CAL.—Bridge, stone and concrete, $15,000. Engineer, County Surveyor, Napa. Owners, Napa County. Plans have been approved for the construction of a stone and concrete bridge over Trancas Creek near Napa, and figures are now being taken. The structure will be 200 feet long. Full particulars of the work can be had from the County Clerk.

CHEHALIS, LEWIS CO., WASH.—Bridges, steel and concrete. Cost not stated. Engineer, County Surveyor, Chehalis. Owners, Lewis County. The County Surveyor, John Ward, is engaged in locating the sites for several new bridges which are to be erected shortly from funds recently provided by a bond election. None of the details of construction are available at this time.

Contracts Awarded.

BELLINGHAM, WASH. — Bridge, concrete and steel. Cost not stated. Engineer, County Surveyor, Bellingham. Owners, City of Bellingham. Contractor, W. G. Hyatt, Arlington, concrete and earth approaches for Nooksack bridge. Contract price, $12,554.92.

—CHURCHES—

SAN FRANCISCO—Church, 1 story and base, frame, $10,000. Architect, W. J. Watke, Central Bank Bldg., Oakland. Owners Sunset M. E. Church. The building will be erected at 19th avenue and Judah street. Design will be in the Gothic style. The main auditorium will occupy the entire ground floor. Space has been provided in the basement for a large social hall and Sunlay school rooms. A hot air system of heating will be installed. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

COURT HOUSES.

SAN FRANCISCO—Sub-Treasury, 2 story and base. Class A construction, $500,000. Architect, J. Milton Dyer, Cuyahoga Bldg., Cleveland, Ohio. Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government Word has been received from Washington to the effect that working drawing for the new $500,000 Sub-Treasury building in this city have been approved and that the official advertisement will be published on November 11th. Bids will be opened on January 6th.

The new building will be located on the site now owned by the Government at the corner of Pine and Sansome streets. It will have a ground area of 87x128 feet, with the main front on Pine street. It will be two stories and basement, and it is designed in the classic style of architecture, using granite for the exterior material. The entire building is solely for use of the Sub-Treasury.

The main entrance will be emphasized by a beautiful classic colonnade, opening into the public banking room, separated from the working space by a suitable bank screen of glass and metal. The banking room will be about thirty-seven feet high, the ceiling being largely taken up by an ornamental ceiling light, an arrangement in accordance with the plans adopted in the most modern banks. Offices of the assistant treasurer open directly from the public banking room as do also those of the paymaster.

A large storage vault in the basement is supplemented by a daily money vault on the first floor. On the second floor general offices are arranged, reached by an independent exterior entrance on Sansome street. Special provision is made in the designing of the vaults.

FACTORIES & WAREHOUSES.

BERKELEY, ALAMEDA CO., CAL.—Factory 1 story and base, brick. Cost not stated. Engineer, Tracy, Berkeley. Owners, West Coast Kalsomine Co., Hanford Bldg., S. F. This company has recently purchased a large site on which there is now a three-story brick building. In addition to this building, which is to be entirely remodeled, a one-story structure will be erected. The capacity of the plant will be increased three times and in the course of the next year several other buildings will be erected. Plans for the first building are complete and work will be started at once.

LOS ANGELES, CAL.—Warehouse and machine shop, 1 and 2 story and base, brick. Cost not stated. Architect, J. J. Backus, Chief Building Inspector, L. A. Owners, City of Los Angeles. The building has been designed for a storehouse and machine shop for the use of the various city departments. The structure will cover an area of 100x130 feet. Considerable machinery will be installed. The exterior will be faced with stock brick. Plans are nearly complete and the work will be done by Day Labor.

LOS ANGELES, CAL.—Warehouse and stables, 4 story and base, reinforced concrete. Cost not stated. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owner, O. R. Fuller. The building will be 50x225 feet. There will be metal window sash and frames, freight elevator and fireproof doors. The exterior will be faced with blue pressed brick. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

LOS ANGELES, CAL. — Warehouse addition, 1 story and base reinforced concrete. Cost not stated. Architect, W. J. Saunders, International Bank Bldg., L. A. Owners, Moreland Truck Co. Contractors, R. H. Raphael Co., 641 So. Main St., L. A. Contract price not stated.

PORTLAND, ORE.—Brewery addition, brick construction, $12,000. Architect, Joseph Jacoberger, Board of Trade Bldg., Portland. Owners, Gambrinus Brewery Co. Contractors, Freeberg Bros., Oregonian Bldg., Portland. Contract price, $12,000.

FLATS.

SAN FRANCISCO—Flats, 3 story and base, frame, $10,000. Architects, Righetti & Headman, Phelan Bldg., S. F. Owner, Herman Market. The present building at the corner of Bush and Octavia streets is to be entirely remodeled. This work will include new plumbing, interior finish, plastering and electric work. The present exterior will also be changed. Plans are complete and figures are being taken.

SAN FRANCISCO—Flats, 3 story and base, frame, $8,000. Architect, none. Owner C. S. Allred, 119 Edna St., S. F. The building will cover an area of 27½x70 feet. There will be three modern flats of five and six rooms each. Interior finish will be of pine and redwood with some oak floors. There will be both open fire places and gas grates. Tile mantels will be used. Tile will also be used in the bath rooms and back of the sinks. The exterior of the building will be covered with rustic. Plans are complete and the owner will do the work by Day Labor.

SAN FRANCISCO—Flats 2 story and base, frame, $4,000. Architect none. Owner, A. Cuneo, 246 San Carlos St., S. F. The building has been designed to contain two flats of five and six rooms each with bath. All interior trim will be of pine or redwood. There will be gas grates. Mantels will be of tile. The building will cover a site 25x48 feet. The exterior will be covered with rustic and shiplap. Plans are in the hands of the owner and the

work will be done by Day Labor.

SAN FRANCISCO—Flats 2 story and base frame, $6500. Architect, John J. Foley, Monadnock Bldg., S. F. Owner's name withheld. The building will contain two high class flats each of which will contain six rooms and bath. The interiors will be finished in pine, redwood and some oak. Oak floors will be used in all the principal rooms. A central heating system will be installed. There will be open fire places with tile or brick mantels. Tile will be used in the bath rooms and kitchens. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Flats, 3 story and base, frame, $6,500. Architect E. E. Young, 251 Kearny St., S. F. Owner, Frank Grannis. The building will be 25x56 feet and will contain three small flats. The interiors will be handsomely finished in pine and redwood with oak floors. There will be open fire places. Mantels will be of brick or tile. Tile will be used in the baths and kitchens. The exterior of the building will be covered with rustic and brick veneer. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

SAN FRANCISCO—Flats 2 story and base frame $2000. Architect L. Mastropasqua 580 Washington St., S. F. Owner, Pio Cecchi. Contractor, Clemente Posina, 681 Broadway, S. F. Contract price, $2,000.

GARAGES.

SAN FRANCISCO—Garage, 2 story and base, reinforced concrete, $40,000. Architects, MacDonald & Applegarth, Call Bldg., S. F. Owner's name withheld. This building will be erected on Van Ness avenue, just above Sutter street, and is to cover a considerable ground area. The front portion of the building will contain sales rooms and offices. Repair shop, shipping rooms and storage space will occupy the rest of the first and second floors. There will be a cement floor on the first story. Plans call for steam heat and some metal trim. The exterior of the building will be faced with cement plaster. Plans are now being prepared.

RICHMOND, CONTRA COSTA CO., CAL.—Garage, 1 story and base, reinforced concrete, $5,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owners, Mt. Diablo Garage. The building will be in the nature of an addition to the present structure and will have a street frontage of 25 feet and a depth of 100 feet. There will be a cement floor. The building is designed for a commercial garage. The exterior will be faced with cement plaster. Plans are being prepared.

Contracts Awarded.

LOS ANGELES, CAL.—Garage, 1 story and base brick. Cost not stated. Architect, A. L. Haley, California Bldg., L. A. Owner, Dan Morris. Contractors, N. L. Hogan Construction Co., California Bldg., L. A. Contract price not stated.

GOVERNMENT WORK AND SUPPLIES.

Switchboards and Generating Sets.

The following bids were received by the depot quartermaster, U. S. Army, Washington, D. C., for furnishing generating sets and switchboard for laundry plant at Schofield Barracks, H. T.:

Westinghouse Electric and Mfg. Co., Pittsburgh, Pa. $5,220 for Ames Iron Works' engine; $5,150 for American Engine Co.'s engine; $4,900 for Ridgway engine; $5,192 for Harrisburg Foundry engine; for side-crank engine manufactured by the Ames Co., $5,020; begin delivery 10 days, complete 120 days.

Ridgway Dynamo and Engine Co., Ridgway, Pa., $4,500 for Ridgway engine; $4,375 for Ridgway engine with General Electric switchboard; begin 10 days, complete 110 days.

Skinner Engine Co., Erie, Pa., $4,569 to $5,155; 8 weeks.

B. F. Sturtvant Co., Hyde Park, Mass., 50-K. W. generating sets, $1,800 for one $3,600 for two.

Diehl Mfg. Co., Elizabethport, N. J., 2 50-K. W. generating sets, $4,775, 150 days.

Western Electric Co., New York city, 2 50-W. W. generating sets, $1,520 each; alternate, 50-K. W. watt-hour meter, $27.

General Electric Co., Schnectady, N. Y., generating set, $5,080; alternate, $5,200; 65 days.

Kerr Turbine Co., Wellsville, N. Y., generating sets, $1,888; switchboards, $665; total, $4,441; 120 days.

American Engine Co., Boundbrook, N. J., 2 generating sets, $3,769; switchboard, proposal A, $830; B, $645; begin 10 days, complete in 90 days.

Puget Sound Foundry Building.

The contract for installing hot-water piping, radiators, water and compressed air pipng in the new general foundry building, Puget Sound, Wash., bids for which were opened September 28, has been awarded to Ben Olsen Co., Seattle, Wash., at $4,644.

Pearl Harbor Crane.

The bid of the Brown Hoisting Machinery Co., Cleveland, Ohio, $9,200 in amount, has been accepted for furnishing one 15-ton locomotive crane for delivery at the naval station, Pearl Harbor, H. T.

Reclamation Work.

The director of the Reclamation Service is asking for proposals for the construction of about ten miles of the Dodson North Canal, Milk River project, Mont. The work involves the excavation of about 420,000 cubic yards of material and is situated on the north side of Milk River and adjacent to the main line of the Great Northern Railway in the vicinity of Wagner and Exeter, Mont. The bids will be opened at the office of the U. S. Reclamation Service, Malta, Mont., November 11, 1912.

Salt Lake City Public Building.

The bid of the Reading Chandelier Works, Reading, Pa., $2,473 in amount has been accepted for the installation of lighting fixtures in the U. S. post office and court house at Salt Lake City, Utah, work to be completed by December 1, 1912.

Railway Terminal in Panama.

Bids were opened at the office of the Panama Railroad Company in Colon on Tuesday, September 10, for the construction of the new railroad terminal in Panama. The work was divided into two parts, namely, the erection of the main station building, and the building of the baggage room wing, including the razing of the present station. Five bids were received as follows:

Central American Construction Co., main building, $59,032; baggage wing, $29,000; total, $88,032.

J. W. Sneed, main building, $64,300; baggage wing, $26,221; total, $90,521.

J. A. Wilson & J. Preston Moore, main building, $70,775; baggage wing, $40,775; total, $111,550.

W. E. Weigle, main building, $94,000; baggage wing, $21,000; total $115,000; I. G. Duque, main building $112,200; baggage wing, $22,500; total, $134,700.

The Central American Construction Co. was the lowest bidder on the main building and W. E. Weigle on the baggage wing, the two bids aggregating $80,032. A supplementary bid was made, however, by the Central American Construction Co., which stated that if the company was awarded the contract for both buildings it would do the work for the sum of $81,500. The committee appointed to consider the bids, consisting of Lieut. Frederick Mears, R. L. Mock, and H. E. Bartlett, reported against dividing the work, for the reason that it could be more advantageously handled by one company than by two, inasmuch as there would probably be less controversy and more assurance of satisfactory completion. The contract has been awarded to the Central American Construction Co. at $81,500.
